Title: An Integrated Theory for the Accumulation of Mentally Ill Offenders and the Effect of Realignment in California

Name: Yin Jien Lee

Print: Skipnes Kommunikasjon / University of Bergen

Appendices

Appendix A – Causal Loop Diagram (Major Loops)

Appendix B

– Calculation for the Prevalence Data (1992) Obtained from the Scarlett Carp Report

		SMI	MMI	SMI	MMI
Prevalence in 1992		0.1107	0.0947	0.1521	0.0903
Male Inmates	102749	11374	9730		
Female Inmates	5973			908	539
Total					22552
Ave Prevalence				0.207	(22552 / 102749)

In this report, SMI and MMI refer to severe mental impairments and moderate mental impairments respectively.

Appendix C – Timeline of Diagnostic and Statistical Manual of Mental Disorders Criteria (DSM) Development

DSM-I (1952)

- Homosexuality was included until 1974
- 106 mental disorders

DSM-II (1968)

- Many challenges of MI definitions
- 182 mental disorders

DSM-II (7th printing) (1974)

- Homosexuality was replaced by “sexual orientation disturbance”

DSM-III (1980)

- Abandoned psychodynamic/physiologic view in favor of a regulatory/legislative model
- Attempted to make the nomenclature consistent w/ ICD (International Statistical Classification of Diseases & Related Health Problem)
- 256 diagnostic criteria
- “may lead to the medication of 20-30% of population who may not have had any serious mental problem”

DSM-III-R (1987)

- A revision of DSM III
- Categories were renamed & reorganized, significant changes in criteria were made
- 6 categories were deleted
- 292 diagnoses

DSM-IV (1994)

- 297 disorders
- Major change: inclusion of a clinical significance criterion to almost half of all the categories, which required that symptoms caused “clinically significant distress/impairment in social, occupational, or other important areas of function”

DSM-IV-TR (2000)

- A text revision of DSM-IV
- Text sections give extra information on each diagnosis
- Characterizes a mental disorder as “clinically significant behavioral/psychological syndrome/pattern that occurs in an individual [which] is associated with present distress...or disability...or with a significant increased risk of suffering”
- “no definition adequately specifies precise boundaries for the concept of mental disorder...different situations call for different definitions”
- “there’s no assumption that each category of mental disorder is a completely discrete entity with absolute boundaries dividing it from other mental disorders or from no mental disorder”

DSM-5 (2013)

- Extensively revised diagnoses
- 1st major revision of the manual in 20 years
- Deletion of the subtypes of schizophrenia (paranoid, disorganized, catatonic, undifferentiated, residual)
- Deletion of the subsets of autistic spectrum disorder (Asperger’s Syndrome, classic autism, Rett Syndrome, Childhood Disintegrative Disorder, pervasive developmental disorder not otherwise specified)
- Intensity (mild, moderate, severe) were added to the diagnosis of autistic spectrum disorder

Appendix D – Global Assessment of Functioning (GAF) Scale

(From DSM-IV-TR, p. 34.)

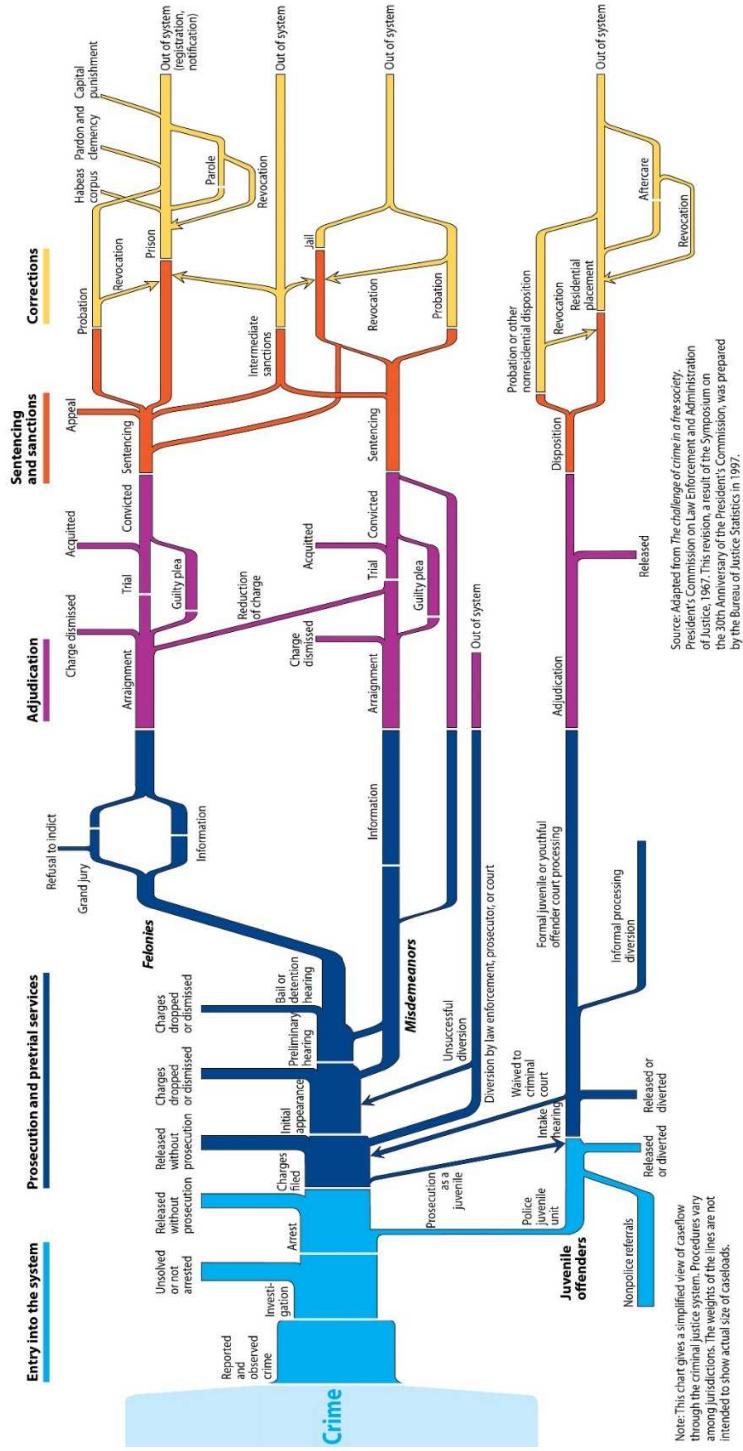

Consider psychological, social, and occupational functioning on a hypothetical continuum of mental health-illness. Do not include impairment in functioning due to physical (or environmental) limitations.

Code	(Note: Use intermediate codes when appropriate, e.g., 45, 68, 72.)
100	Superior functioning in a wide range of activities, life's problems never seem to get out of hand, is sought out by others because of his or her many positive qualities. No symptoms.
90	Absent or minimal symptoms (e.g., mild anxiety before an exam), good functioning in all areas, interested and involved in a wide range of activities.
81	socially effective, generally satisfied with life, no more than everyday problems or concerns (e.g. an occasional argument with family members).
80	If symptoms are present, they are transient and expectable reactions to psychosocial stressors (e.g., difficulty concentrating after family argument); no more than slight impairment in social, occupational or school functioning (e.g., temporarily failing behind in schoolwork).
70	Some mild symptoms (e.g. depressed mood and mild insomnia) OR some difficulty in social, occupational, or school functioning (e.g., occasional truancy, or theft within the household), but generally functioning pretty well, has some meaningful interpersonal relationships.
60	Moderate symptoms (e.g., flat affect and circumstantial speech, occasional panic attacks) OR moderate difficulty in social, occupational, or school functioning (e.g.. few friends, conflicts with peers or co-workers).
50	Serious symptoms (e.g.. suicidal ideation, severe obsessional rituals, frequent shoplifting) OR any serious impairment in social, occupational, or school functioning (e.g., no friends, unable to keep a job).
40	Some impairment in reality testing or communication (e.g., speech is at times illogical, obscure, or irrelevant) OR major impairment in several areas, such as work or school, family relations, judgment, thinking, or mood (e.g., depressed man avoids friends, neglects family, and is unable to work; child frequently beats up younger children, is defiant at home, and is failing at school).
30	Behavior is considerably influenced by delusions or hallucinations OR serious impairment in communication or judgment (e.g., sometimes incoherent, acts grossly inappropriately, suicidal preoccupation)
21	OR inability to function in almost all areas (e.g., stays in bed all day; no job, home, or friends).
20	Some danger of hurting self or others (e.g., suicide attempts without clear expectation of death; frequently violent; manic excitement) OR occasionally fails to maintain minimal personal hygiene (e.g., smears feces)
11	OR gross impairment in communication (e.g., largely incoherent or mute).
10	Persistent danger of severely hurting self or others (e.g., recurrent violence) OR persistent inability to maintain minimal personal hygiene
1	OR serious suicidal act with clear expectation of death.
0	Inadequate information.

<https://www.bjs.gov/content/justsys.cfm#>

Appendix F – Calculation of Ex-convict Population

Data for ex-convict population is not publicly available to estimate the initial values for the ex-convict stocks. Hence, we have to estimate the initial values based on the estimated ex-convict population by Schmitt et al. (2011). The authors estimate that in 2008, the population size for ex-prisoners and ex-felons to be 6,094,000 and 13,851,000 under the low recidivism scenario. The population size for ex-prisoners and ex-felons would be 5,427,000 and 12,333,000 under the high recidivism scenario. Three-year low recidivism rates for age groups between 18 to 64 range between 46% and 57%; the high recidivism rates range between 51% and 62%. The ex-prisoners refer to ex-convicts who have served prison sentence while the ex-felons, which are estimated from ex-prisoners. Ex-felon population comprises ex-convicts who have served federal prison sentence, state prison sentence, jail sentence, and probation. More than half of the ex-felon population served jail and probation sentence.

We take the estimated population size reported by Schmitt and colleague and multiply with the historical total state prisoners growth rate from 1987 to 2015 in order to estimate the initial values for the ex-convict stocks in our model. This linear projection assumes that the demographics of the population and criminal justice policies remain constant. Given this crude calculation, we choose to be conservative and take the values under the low recidivism scenario. The “ex-prisoners” value in 1987 will be used as the initial values for the stocks of prison ex-convicts whereas the discrepancy between “ex-felons” and “ex-prisoners” is used to populate the stocks of jail ex-convicts.

Year	Total State Prisoners Growth Rate	Population Size			
		Low Recidivism		High Recidivism	
		Ex-Prisoners	Ex-Felons	Ex-Prisoners	Ex-Felons
1987		2,170,148	4,932,510	1,932,621	4,391,931

2011	-0.09	5,256,687	11,947,879	4,681,333	10,638,451
2012	-0.10	4,735,108	10,762,385	4,216,841	9,582,882
2013	0.01	4,785,118	10,876,053	4,261,377	9,684,092
2014	0.01	4,825,902	10,968,752	4,297,698	9,766,632
2015	-0.05	4,591,382	10,435,713	4,088,846	9,292,011

The distribution of ex-prisoners by the mental health status is as the following.

Assuming that the mental illness prevalence of ex-convicts are same as the parolees, i.e. MI prevalence equals to 0.10, the distribution of prison and jail ex-convicts by mental health status are:

Ex-prisoners wMI → 2,170,148 person * 0.10 = 217,015 person

Ex-prisoners wo MI → 2,170,148 person * 0.90 = 1,953,133 person

Ex-jail offenders wMI → (4,932,510 - 2,170,148) person * 0.10 = 276,236 person

Ex-jail offenders wo MI → (4,932,510 - 2,170,148) * 0.90 = 2,486,126 person

To further estimate the initial values for high-risk, low-risk, and desisting ex-convicts, we use the average times these ex-convicts stay in the respective stock to calculate the distribution. For example, the average times for high-risk, low-risk, and desisting prison ex-convicts wMI are 2.5 years, 7 years, and 167 years (average ex-convict mortality rate is 0.006 1/year) respectively. Hence, the total average time is the sum of these three average time parameters, which equals to 176.5. Thus,

Prison Ex-Convicts wMI

Hi Risk Prison ExConv wMI = 217,015 person * 2.5/176.5 = 3,074 person

Lo Risk Prison ExConv wMI = 217,015 person * 7/176.5 = 8,607 person

Desisting Prison ExConv wMI = 217,015 person * 167/176.5 = 205,334 person

Prison Ex-Convicts wo MI

Hi Risk Prison ExConv wo MI = 1,953,133 person * 2.0/176 = 22,195 person

Lo Risk Prison ExConv wo MI = 1,953,133 person * 7/176 = 77,681 person

Desisting Prison ExConv wo MI = 1,953,133 person * 167/176 = 1,853,257 person

Jail Ex-Convicts wMI

Hi Risk Jail ExConv wMI = 276,236 person * 2/172.5 = 3,203 person

Lo Risk Jail ExConv wMI = 276,236 person * 3.5/172.5 = 5,605 person

Desisting Jail ExConv wMI = 276,236 person * 167/172.5 = 267,429 person

Jail Ex-Convicts wo MI

Hi Risk Jail ExConv wo MI = 2,486,126 person * 1.5/172 = 21,681 person

Lo Risk Jail ExConv wo MI = 2,486,126 person * 3.5/172 = 50,590 person

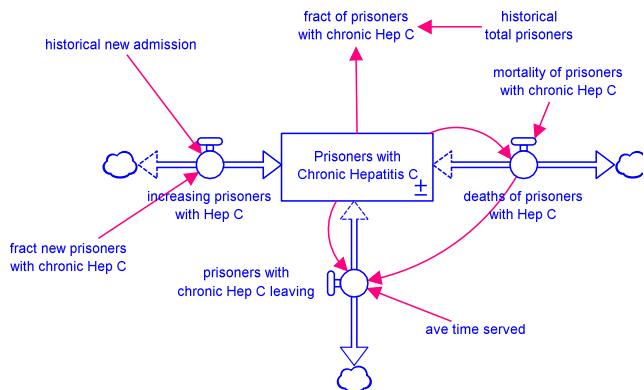

Desisting Jail ExConv wo MI = 2,486,126 person * 167/172 = 2,413,855 person

Appendix G – Calculations to Estimate the Prevalence of Infectious Disease in Prison

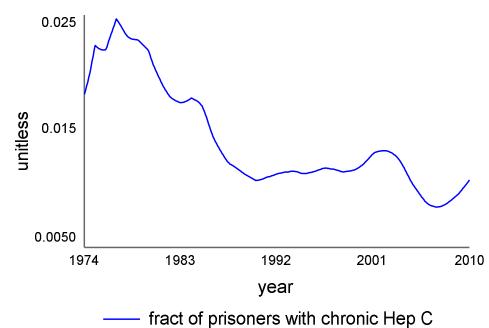

Estimation of the Prevalence of HIV/AIDS in Prison	
Prison Population in 1998	159563 persons
HIV/AIDS Prisoners	5,000 – 8,000 persons
Fraction of HIV/AIDS Prisoners (using the average of 5,000 to 8,000)	0.04

Estimation of the Prevalence of Hepatitis C in Prison

Estimation with an system dynamics model

Appendix H – Calculation of Treatment Cost per Mental Function Improved

This is a calculation to estimate the treatment cost for mental illness by severity.

Mental Functions Discrepancy

Number of prisoners in 1987 – 66,975 person

Average GAF score per prisoner – 57 score/person

Desired GAP score per prisoner – 100 score/person

MI Prevalence in 1987 – 0.14

Mental Functions of Prisoners wMI – $66,975 * 0.14 * 57 = 247,990$ score

Desired Mental Functions of Prisoners wMI - $66,975 * 0.14 * 100 = 937,650$ score

Discrepancy in Mental Functions of Prisoners wMI – $937,650$ score – $247,990$ score = $689,660$ score

Treatment Cost of the MI Prisoners

Costs are adapted from "Corrections Criminal Justice and the Mental Illness Observations about Costs in California" (Izumi, Schiller & Hayward, 1996)

CCCM costs \$880/person * 10,595 prisoners wMI (1996-97) = \$9,323,600

EOP costs \$9,600/person * 1,896 prisoners wMI (1996-97) = \$18,201,600

\$9,323,600 + \$18,201,600 = \$27,525,200

Consumer Price Index base year in 2009 – 59.935

Adjusted Cost of treatment of Prisoners wMI in 1987 - $\$27,525,200 / 59.935 = \$ 467,228$

MHC cost per discrepancy - $\$ 16,497,228 / 689,660$ score = $\$ 23.92$ /score

Appendix I – California Parole Population Caseloads and Supervision Requirements

LEVEL OF SUPERVISION	SELECTED PAROLE CONTACT AND TESTING REQUIREMENTS
High Control Parolees who were convicted of violent felonies in Penal Code 667.5(c), must register as sex offenders, are validated gang members, or high-notoriety cases.	<ul style="list-style-type: none"> ▪ 2 face-to-face contacts per month (one must be at residence) ▪ First home visit within 6 days of release ▪ 1 drug test per month, if required ▪ 2 collaterals per quarter
High Service Refers to parolees who have special service needs (severe addiction problems) or behavioral patterns (severe mental illness).	<ul style="list-style-type: none"> ▪ 2 face-to-face contacts per month (one must be at residence) ▪ 1 drug test per month, if required (Civil addicts may have weekly testing) ▪ 2 collaterals per quarter
Control Service Require active supervision. Refers to parolees who do not meet the criteria for High Control or High Services	<ul style="list-style-type: none"> ▪ 1 face-to-face in residence every other month ▪ 2 drug tests per quarter ▪ 1 collateral every 90 days ▪ Most CS cases drop to MS automatically at 180 days
High Risk Caseloads <i>Second Striker</i> Parolees with at least two prior convictions for serious or violent offenses. Ideal ratio of 40:1	<ul style="list-style-type: none"> ▪ 2 face-to-face per month; 4 per quarter in home ▪ 1 drug tests per month ▪ 2 collaterals per month
<i>High Risk Sex Offender</i> Defined by the CA Dept of Justice, uses criteria set forth under PC 290(n)(1), PC 667.5 and 667.6. Ideal ratio of 40:1.	<ul style="list-style-type: none"> ▪ 2 face-to-face per month; 4 per quarter in home ▪ 1 drug test per month ▪ 2 collaterals per month ▪ Quarterly meeting with person who knows parolee well.
Minimum Service (MS) This classification refers to parolees who are on monthly mail-in, and these are counted as ‘contacts.’ These individuals need to make only two to three face to face or collateral contacts with their parole officer each year	<ul style="list-style-type: none"> ▪ 1 home visit within 30 days of being assigned to MS ▪ 1 face-to-face or collateral every 4 months ▪ 1 monthly report turned in by 5th of every month. ▪ Face-to-face contact 30 days prior to discharge ▪ Drug testing waived

39	Age Profiles	Constant	init age per suspect in custody with cases filed	30.4326964 551 year	Calibration	
40	Age Profiles	Constant	init age per desisting jail exConv wo MI	38.5 year	Estimation	
41	Age Profiles	Constant	max ave age	90 year	By default	
42	Age Profiles	Constant	min ave age	18 year	By default	
43	Age Profiles	Constant	prisoner life expectancy	65 year	Williams et al., 2014	Due to the pre-condition of prisoners' socio-economic status and the harsh prison environment, prisoners' life expectancy is 10-15 years shorter than the general population. The life expectancy at birth for California population has been increasing from 76 to 81 between 1990 and 2009. Thus, prisoner's life expectancy at birth is assumed to be 65 years old.
44	Age Profiles	Constant	min remaining years of life life	1 year	By default	
45	Age Profiles	Constant	ref mortality rate	0.003 1/year	By default	To initialize the model.
46	Community Services	Stock	Community Service Capacity for Parolees wMI	1058 person	CDCR's Prisoners and Parolees (1987-2010); Parole Pop Reports (2011-2012); CDCR Monthly Pop Reports (2014-2015); LAO (2000b); Williams et al. (2000); Calculation	Total Parolees in 1987 is 42,298 persons. 10% of them are mentally ill (LAO, 2000b). Only 40% of parolees are supported with employment in the first year post release (Williams et al., 2000). Considering the lack of community services to support parolees wMI, we assume the fraction of employed parolees wMI to be 0.25 only.
47	Community Services	Stock	Community Service Capacity for Parolees wo MI	15227 person	Parolees (1987-2010); Parole Pop Reports (2011-2012); CDCR Monthly Pop Reports (2014-2015); LAO (2000b); Williams et al. (2000); Calculation	Total Parolees in 1987 is 42,298 persons. 10% of them are mentally ill (LAO, 2000b). Only 40% of parolees are supported with employment in the first year post release (Williams et al., 2000).
48	Community Services	Stock	correctional Fund to Community Services	116550998. 793 dollar/year	Estimation	
49	Community Services	Table Function	CA pop annual growth rate	1/year	Calculation; Pop data is obtained from the Demographic Research Unit of the Dept of Finance of California	
50	Community Services	Constant	comm svc capacity adj time delay	10 year	Estimation	A long delay is used to reflect the irresponsiveness of the community service capacity in meeting the needs of parolees.

ID	Module	Element	Parameter Name	Parametric Value	Data Source	Note
51	Community Services	Constant	community supervision cost	4438 dollar/person	Grattet (2015)	The local governments bear this additional cost post-Realignment
52	Community Services	Constant	correctional comm svc fund averaging time	10 year	Estimation	A long delay is used to reflect the irresponsiveness of the community service capacity in meeting the needs of parolees.
53	Community Services	Constant	desired comm svc for parolees capacity adj time	3 year	3 year	Time taken to observe, collect, report, assess, and recruit.
54	Community Services	Constant	desired fract parolee work	0.6 unitless	U.S. Dept of Labor (https://data.bls.gov)	
55	Community Services	Constant	funded comm services capacity for county parolees w/MI preRealignment	0 person	By default	To initialize the stock. Realignment was introduced in 2012.
56	Community Services	Constant	funded comm services capacity for county parolees w/o MI preRealignment	0 person	By default	To initialize the stock. Realignment was introduced in 2012.
57	Community Services	Constant	init comm svc for parolees capacity adj time	20 year	Estimation	Based on the assumption that community service capacity show little sign of increasing. This long delay symbolizes slow change in responding to the increasing needs of parolees.
58	Community Services	Constant	init comm svcs cost per county parolee	0 dollar/person	By default	To introduce the county parole cost after Realignment was introduced in 2012. To introduce the county parole cost after Realignment was introduced in 2012.
59	Community Services	Constant	min comm svc capacity for parolees	1 person	By default	To formulate "effect of min comm svc capacity for parolees w/MI multiple on adjustment" in order to protect the stock from becoming negative.
60	Community Services	Constant	probability of employed parolee fail parole	0.4 unitless	Estimation	If 60% of the parolees are employed, 40% of them are unemployed. The assumption is that these 40% will likely fail parole supervision.
61	Community Services	Constant	ref comm svc cost per parolee w/MI	18600 dollar/person	Romano (2017); Simerman (2009); North Carolina Department of Public Safety (2011)	CMHC - \$7,900 per person per year (Romano, 2017); Housing subsidy - \$10,200 per person per year (Simerman, 2009); Work Comm Svc - \$500 per person per year (NCDPS, 2011)
62	Community Services	Constant	ref comm svc cost per parolee w/o MI	10700 dollar/person	Simerman (2009); North Carolina Department of Public Safety (2011)	Housing subsidy - \$10,200 per person per year (Simerman, 2009); Work Comm Svc - \$500 per person per year (NCDPS, 2011)
63	Community Services	Constant	time to adjust correction fund for comm svcs	3 year	California Dept of Finance	California adopts budget change adjustment process. It takes two years at the state level to modify budget. An additional year is expected for the local government to observe, collect, and report budget request.
64	Community Services	Constant	weighted strength of comm svcs claim	0.55 unitless	Bird et al. (2014)	55% of the counties adopt the reentry-focused approach while 45% take the enforcement-focused approach.

ID	Module	Element	Parameter Name	Parametric Value	Data Source	Note
65	Community Services	Constant	weighted strength of local enforcement claim	0.45 unitless	Bird et al. (2014)	55% of the counties adopt the reentry-focused approach while 45% take the enforcement-focused approach.
66	Incarceration Year Served	Stock	Current Prison Time Served by Prisoners wSMI in Alternative Facility	0 year	By default	To initialize the model. This stock is the new recommended policy structure. So it will only starts to accumulate when the policy structure is activated.
67	Incarceration Year Served	Constant	init current jail time served per jail offender wMI	0.25 year	U.S. Department of Justice, 1992-2006; Calibration	Before Realignment, jail offenders served an average of six months of jail time . After Realignment, the convicts sentenced to jail consists of offenders with more serious felony convictions, and thus the average jail time served jail offender increases accordingly.
68	Incarceration Year Served	Constant	init current jail time served per jail offender wo MI	0.25 year	U.S. Department of Justice, 1992-2006; Calibration	Before Realignment, jail offenders served an average of six months of jail time . After Realignment, the convicts sentenced to jail consists of offenders with more serious felony convictions, and thus the average jail time served jail offender increases accordingly.
69	Incarceration Year Served	Constant	init current prison time served per prisoner wMI	1.8 year	CDCR Annual Time Served On Prison Sentence Report from 1998 to 2012 Felony Sentences in State Courts (Bureau of Justices Statistics, 1986-2006)	Represents the actual time served by prisoners from the first day of admission to the prison to the day of their first release to parole. The average prison time served has been relatively stable from 1998 to 2009; it ranges between 1.63 and 1.73 year per prisoner. However, it starts to climb to 3.99 in 2012. So, we adjusted the prison time served by prisoner wMI upward because prisoners wMI tend to serve longer sentences than the prisoners wo MI.
70	Incarceration Year Served	Constant	init current prison time served per prisoner wo MI	1.4 year	CDCR Annual Time Served On Prison Sentence Report from 1998 to 2012 Felony Sentences in State Courts (Bureau of Justices Statistics, 1986-2006)	Represents the actual time served by prisoners from the first day of admission to the prison to the day of their first release to parole. The average prison time served has been relatively stable from 1998 to 2009; it ranges between 1.63 and 1.73 year per prisoner. However, it starts to climb to 3.99 in 2012. So, we adjusted the prison time served by prisoner wo MI downward because prisoners wMI tend to serve longer sentences than the prisoners wo MI.

217	Individuals with Criminal History	Table Function	ref MI prev	unitless	Various sources	1987—From the Sterling Report published at the request of California state government in 1986 for the Coleman v. Wilson lawsuit. This ratio represents serious mental disorder prevalence.1992—The Scarlett Carp Report published at the request of California state government in 1992 for the Coleman v. Wilson lawsuit. The reported prevalence were: male SMI (0.1107), male MMI (0.0947); female SMI (0.1521); female MMI (0.0903). We average these ratios to 0.21. See Appendix B for calculation.2000—Allen J. Beck & Laura M. Maruschak, Bureau of Justice Statistics, U.S. Dept. of Justice, Mental Health Treatment in State Prisons (2001) (reporting 2000 data). These figures are for enrollment in programs, not overall demand. Given the staffing problems in California prisons, the figures are likely to underestimate demand.2003—Human Rights Watch states the population of California state prisoners with mental illness at 23,439 as of 2003. Human Rights Watch, Ill-Equipped: U.S. Prisons and Offenders with Mental Illness 18 (2003).2007—California Department of Corrections and Rehabilitation (CDCR) 2009—Opinion and Order by the Three-Judge Court on Plata v. Schwarzenegger court case (p. 22)2011—The Future of California Corrections (2012) by CDCR (p. 29 – 30)2012—An Update to the Future of California Corrections (2016) by CDCR (p.12-13)2014—CA Governor's Budget Report: Entire Corrections and Rehab Budget; MH Program-The pop of inmates requiring MH treatment is projected to be 33480 in 2013-2014 and 34,118 in 2014-2015 2015— An Update to the Future of California Corrections (2016) by CDCR (p.12-13)

290	Mental Profiles	Constant	init mental func per reprimoned county parole violator wMI	58 score/person	Estimation	
291	Mental Profiles	Constant	init mental func per reprimoned county parole violator wo MI	62 score/person	Estimation	
292	Mental Profiles	Constant	init mental func per suspect in comm with case filed	65 score/person	Estimation	
293	Mental Profiles	Constant	init mental func per suspect in custody	65 score/person	Estimation	
294	Mental Profiles	Constant	init mental func per suspect in custody with case filed	65 score/person	Estimation	
295	Mental Profiles	Constant	jail mental func chg per year	1.5 score/person /year	Estimation	This is the estimation of mental function loss per jail offender per year. It is slightly lower than the mental function loss per prisoner because jail sentence is shorter than prison sentence. On average, jail sentence is less than a year.
296	Mental Profiles	Constant	max cut off point for SMI	50 score/person	Aas (2011)	GAF Guideline
297	Mental Profiles	Constant	mental func gain	2 score/person /year		Represents the mental functions gained in the alternative facility. It is assumed that the rehabilitation programs specifically designed for prisoners wSMI in the alternative facility is effective. Hence, each prisoners wSMI gains 2 score/person/year.

ID	Module	Element	Parameter Name	Parametric Value	Data Source	Note
298	Mental Profiles	Constant	mental function per first time arrestee	65 score/person /year	Trestman et al. (2007)	GAF score of incoming jail offenders who had history of MI is about 57 on average while those without MI is 72. So, we set a value of 65 score/person/year for this constant.
299	Mental Profiles	Constant	min mental func per person	20 score/person /year	By default	To protect the stock from becoming negative. Also, according to GAF Guideline, the individuals with the score below 21 are usually hospitalized.
300	Mental Profiles	Constant	multiplier of ave mental func of prisoner to county parolee	1.1 unitless	Estimation	To characterize that prisoners who are placed in county parole supervision are those with higher-than-the- average mental functions of those who are placed in CDCR parole supervision.
301	Mental Profiles	Constant	parolee wMI mental func gain per year	1 score/person /year	Estimation	In the prison, the prisoners lose two score per year per person in the absence of mental health care. On the contrary, the parolees wMI gain mental functions if community service capacity is adequate. Inadequate community service capacity has a harmful effect on parolees wMI's ability to regain mental functions.
302	Mental Profiles	Constant	prisoner wMI mental func loss per year	2 score/person /year	Estimation	In the prison, the prisoners wMI lose two score per year per person in the absence of mental health care. On the contrary, the parolees wMI gain mental functions if community service capacity is adequate. Inadequate community service capacity has a harmful effect on parolees wMI's ability to regain mental functions.
303	Mental Profiles	Constant	prisoner wMI mental func loss per year	0.5 score/person /year	Estimation	In the prison, the prisoners wMI lose two score per year per person in the absence of mental health care. It is assumed that the prisoners wo MI also lose mental functions due to the high density of prisoners and harsh environment.
304	Mental Profiles	Constant	weight for hi risk recidivism for ave mental func calculation	0.27 unitless	Estimation	Fraction of recivism of the hi risk prison ex-convicts wMI as the sum of recidivism by prison parolees wMI, high risk prison parolees wMI, and low risk prison parolees wMI. To calculate the "ave mental func per recidivist".
305	Mental Profiles	Constant	weight for lo risk recidivism for ave mental function calculation	0.06 unitless	Estimation	Fraction of recivism of the hi risk prison ex-convicts wMI as the sum of recidivism by prison parolees wMI, high risk prison parolees wMI, and low risk prison parolees wMI. To calculate the "ave mental func per recidivist".

ID	Module	Element	Parameter Name	Parametric Value	Data Source	Note
306	Mental Profiles	Constant	weight for parolee recidivism for ave mental func calculation	0.97 unitless	Estimation	Fraction of recidivism of the hi risk prison ex-convicts wMI as the sum of recidivism by prison parolees wMI, high risk prison parolees wMI, and low risk prison parolees wMI. To calculate the "ave mental func per recidivist".
307	Population	Stock	Innocent Pop	22410000 person	Historical data and estimation; Pop data is obtained from the Demographic Research Unit of the Dept of Finance of California	The Pop Initial Contact with Criminal Justice System, Unrecovered Pop with Criminal History, and Recovered Pop with Criminal History makes up about 17% of California's population. Therefore, 83% of the population is innocent.
308	Population	Table Function	adjusted historical pop growth rate	1/year	Calculation; Pop data is obtained from the Demographic Research Unit of the Dept of Finance of California	
309	Population	Constant	mortality rate	0.006 1/year	Calculation; CA Dept of Public Health (https://archive.cdpb.ca.gov/data/statistics/Pages/DeathStatisticalDataTables.aspx)	Between 1987 and 2012, California's mortality rates range declined from about 0.0072 to 0.006.
310	Prison Capacity	Stock	Prison Capacity	36465 person	CDCR Annual Prisoners and Parolees Report 1987-2010; CDCR Monthly Population Reports 2011-2016	Design bed capacity in 1987 was 36465.
311	Prison Capacity	Constant	ave prison lifetime	60 years	O'Connor (2004)	
312	Prison Capacity	Table Function	ref design bed capacity		CDCR Annual Prisoners and Parolees Report 1987-2010; CDCR Monthly Population Reports 2011-2016	
313	Prison Capacity	Constant	time to adjust prison capacity	12 years	Martin et al. (2014)	It takes 5 - 7 years to construct a jail. Given the size and security requirements for prison, we set the adjustment time for prison capacity as 12 years.
314	Prison HC Resource Allocation	Stock	CD Tmnt Cost per Prisoner	1990 dollar/person	Kinsella (2004)	The cost to care for elderly prisoners is nearly three times of the cost of the younger prisoners . Given that the fraction of elderly prisoners is only 2%. We define the initial value for this stock with the same value as in the Ave HC Cost per Prisoner stock.

ID	Module	Element	Parameter Name	Parametric Value	Data Source	Note
315	Prison HC Resource Allocation	Stock	CD Treatment Capacity Fund	0 dollar/person	By default	This stock is only established after Realignment.
316	Prison HC Resource Allocation	Stock	ID Tmnt Cost per Prisoner	20000 dollar/person	California Dept of Finance Enacted Budget (2007-2016)	
317	Prison HC Resource Allocation	Stock	ID Treatment Capacity Fund	339507151.949 dollar/year	California Dept of Finance Enacted Budget (2007-2016)	
318	Prison HC Resource Allocation	Stock	Infectious Diseases Treatment Capacity	2530.62356631 person	Estimation	Given the high prison budget pressure and the surge in the prison population, the initial value of this stock is estimated to be 70% of the needs for ID treatment.
319	Prison HC Resource Allocation	Stock	MHC Capacity Fund	0 dollar/ year	By default	This stock is only established after Realignment.
320	Prison HC Resource Allocation	Stock	MHC Cost per Mental Function Improvement	24 dollar/score	Izumi et al. (1996); Calculation	Refer to Appendix H for detailed calculation.
321	Prison HC Resource Allocation	Stock	New Time to Perceive MHC Needs	4 year	Estimation	MI is a less visible disease. We assume it takes longer to observe the needs for treatment compared to the other two treatment capacities.
322	Prison HC Resource Allocation	Stock	Prison HC Fund	63925844.4 dollar/year	California Dept of Finance Enacted Budget (2000-2016); Calibration	
323	Prison HC Resource Allocation	Constant	averaging time to estimate prisoners growth rate	5 year	Estimation	
324	Prison HC Resource Allocation	Constant	averaging time to observe chg in needs for CD tmnt	2 year	Estimation	Due to budget pressure, the time taken to observe the change in needs for CD treatment is set to be longer than that for ID treatment.
325	Prison HC Resource Allocation	Constant	averaging time to observe chg in needs for ID tmnt	1 year	Estimation	Minimum time needed to average and estimate needs for ID treatment for the next fiscal year.
326	Prison HC Resource Allocation	Constant	averaging time to perceive indicated total HC fund	15 year	Estimation	Due to a long high budget pressure and lack of systematic reporting system, the time taken to realize "indicated total HC fund" is set as 15 years.
327	Prison HC Resource Allocation	Constant	desired adj time for medical screening adj time	2 year	Estimation	As the Receiver aims to boost up the screening capacity at the Reception Center, we estimate the desired time to adjust the medical screening capacity to be relatively short.
328	Prison HC Resource Allocation	Constant	desired new CD capacity adjustment time	1 year	Estimation	As the Receiver aims to boost up prison HC system's response to needs, we estimate the desired capacity adjustment time to be relatively short.

ID	Module	Element	Parameter Name	Parametric Value	Data Source	Note
329	Prison HC Resource Allocation	Constant	desired new ID capacity adjustment time	1 year	Estimation	As the Receiver aims to boost up prison HC system's response to needs, we estimate the desired capacity adjustment time to be relatively short.
330	Prison HC Resource Allocation	Constant	desired new MHC capacity adjustment time	1 year	Estimation	As the Receiver aims to boost up prison HC system's response to needs, we estimate the desired capacity adjustment time to be relatively short.
331	Prison HC Resource Allocation	Constant	desired perception delay in MHC needs	2 year	Estimation	As the Receiver aims to boost up prison HC system's response to needs, we estimate the desired capacity adjustment time to be relatively short.
332	Prison HC Resource Allocation	Constant	fract prison HC fund on ID CD and MHC tmnt	0.9 unitless	Estimation	Correctional health care costs also consist of dental care, ancillary health care, and relevant management expenditures.
333	Prison HC Resource Allocation	Constant	growth rate of ave HC cost	0.05 1/year	Aon Hewitt (2016)	The reported growth rate is 4% pe year. We adjusted the growth rate slightly upward to match historical average HC cost per prisoner.
334	Prison HC Resource Allocation	Constant	init medical screening adj time	20 year	Estimation	After the lawsuit file against CA state government, MHC had not improved until the Receiver took over. Hence, we set a large value for this parameter.
335	Prison HC Resource Allocation	Constant	init medical screening time per person	7 min/person	Nieto (1998)	
336	Prison HC Resource Allocation	Constant	min medical screening time per person	20 min/person	Nieto (1998)	
337	Prison HC Resource Allocation	Constant	min CD tmnt capacity	20 person	By default	To protect the stock from becoming negative.
338	Prison HC Resource Allocation	Constant	min ID tmnt capacity	10 person	By default	To protect the stock from becoming negative.
339	Prison HC Resource Allocation	Constant	min MHC capacity	100 score	By default	To protect the stock from becoming negative.
340	Prison HC Resource Allocation	Constant	perception delay in CD tmnt needs	2 year	Estimation	Information is reported on annual basis if data is collected in a timely and organized manner. Based on these assumptions, we set the "perception delay in CD tmnt needs" as two years.

ID	Module	Element	Parameter Name	Parametric Value	Data Source	Note
341	Prison HC Resource Allocation	Constant	perception delay in ID tmnt needs	1 year	Estimation	Information is reported on annual basis if data is collected in a timely and organized manner. Based on these assumptions, we set the “perception delay in DD tmnt needs” as one year because infectious diseases are acute. Hence, the response to budget adjustment request is assumed to be faster than other CD and MHC budget adjustment request.
342	Prison HC Resource Allocation	Constant	ref CD capacity adjustment time	4 year	Kelso (2008); California Correctional Health Care Services (2013)	As CDCR has tight budget constraint, we expect that the authority take a longer time to respond to the changing needs. The perception delay symbolizes the delay in perceiving actual needs due to inadequate screening, diagnosing, tracking, and follow-ups.
343	Prison HC Resource Allocation	Constant	ref ID capacity adjustment time	4 year	Kelso (2008); California Correctional Health Care Services (2013)	As CDCR has tight budget constraint, we expect that the authority take a longer time to respond to the changing needs. The perception delay symbolizes the delay in perceiving actual needs due to inadequate screening, diagnosing, tracking, and follow-ups.
344	Prison HC Resource Allocation	Constant	ref MHC capacity adjustment time	4 year	Kelso (2008); Estimation	The Receiver presented his plan to reform MHC for the next few years without giving a fixed date. As the capacity for prison HC is still being built in 2013, we assume the adjustment time for MHC capacity to be 4 years.
345	Prison HC Resource Allocation	Constant	ref perception delay in MHC needs	4 year	Kelso (2008); Estimation	The Receiver presented his plan to reform MHC for the next few years without giving a fixed date. As the capacity for prison HC is still being built in 2013, we assume the perception delay in MHC needs to be 4 years.
346	Prison HC Resource Allocation	Constant	time to adjust medical screening adj time	5 year	Estimation	
347	Prison HC Resource Allocation	Constant	time to adjust total HC fund	2 year	California Dept of Finance (www.dof.ca.gov/budget/Budget_Process/index.html)	California adopts the budget change proposal process . Under this budgetary process, the department prepares a proposal for budget change in the end of the year. This proposal will undergo a review process within CDCR before getting an approval from the overseeing agency. Then, the proposal will be submitted to the Department of Finance, followed by committee review and Legislative Analyst Office's. Then the final budget will be announced in the mid-year. In the following year, prison health care capacity can be adjusted with new appropriated fund.

ID	Module	Element	Parameter Name	Parametric Value	Data Source	Note
348	Prisoner Health Care Needs	Constant	desired mental func per prisoner	70 score/person	Davidson et al. (2007); Defined by author	We define the acceptable level in "desired mental function per person" as 70 score, which characterizes as mild symptom of mental illness.
349	Prisoner Health Care Needs	Constant	init fract prisoners need CD tmnt	0.02 unitless	CDCR's Prisoners and Parolees (1987 - 2010); Offenders Info (2011-2013)	
350	Prisoner Health Care Needs	Constant	ref fract prisoners wID	0.03 unitless	Calculation	See Appendix G for detailed calculation.
351	Social Capital	Constant	annual parolee wMI SC loss per person	2 score/person /year	Walker et al., 2014; Volker et al., 2016; Estimation	After imprisonment, some individuals' networks shrink through losing their friendships and only rely on family ties after release. It is a significant challenge for the prisoners to continue investing in maintaining or reproducing social ties. Both prisoners wMI and prisoners wo MI are expected to lose two scores of SC per person. Per year because they are unlikely to build their networks while being isolated from the community.
352	Social Capital	Constant	annual parolee wo MI SC loss per person	2 score/person /year	Walker et al., 2014; Volker et al., 2016; Estimation	After imprisonment, some individuals' networks shrink through losing their friendships and only rely on family ties after release. It is a significant challenge for the prisoners to continue investing in maintaining or reproducing social ties. Both prisoners wMI and prisoners wo MI are expected to lose two scores of SC per person.
353	Social Capital	Constant	annual prisoner SC loss per prisoner in alt facility	1.5 score/person /year	Walker et al., 2014; Volker et al., 2016; Estimation	After imprisonment, some individuals' networks shrink through losing their friendships and only rely on family ties after release. It is a significant challenge for the prisoners to continue investing in maintaining or reproducing social ties. Both prisoners wMI and prisoners wo MI are expected to lose two scores of SC per person. This constant is part of the new policy structured. It is based on the assumption that the rehabilitation program in the alternative facility is effective in reducing the annual social capital loss of prisoners wSMI.
354	Social Capital	Constant	ave social capital per new arrestee	70 score/person	Estimation	A first-time arrestee is an individual without criminal history from the "Innocent Pop" stock , the "SC per new arrestee" is expected to be higher than the recidivists. A normal SC per individual is defined as 90 score per person while the "SC per new arrestee" is set at 70 score per person. This comparison highlights that on average a new suspect possess one-third less SC than a normal person.
355	Social Capital	Constant	init SC per arrestee	70 score/person	Estimation

391	Social Capital	Constant	min SC per person	0 score/person	By default	
392	Social Capital	Constant	min SC stock	0.1 score	Set by the author	To formulate "effect of indicated min prisoner wMI multiple on outflow" so that "indicated min SC prisoner wMI multiple" will not become indefinitely large.

ID	Module	Element	Parameter Name	Parametric Value	Data Source	Note
393	Social Capital	Constant	multiplier of ave SC per prisoner to county parole	1.1 unitless	Estimation	To characterize that prisoners who are placed in county parole supervision are those with higher-than-the- average social capital of those who are placed in CDCR parole supervision.
394	Social Capital	Constant	ref annual jail offender SC loss per person	2 score/pers on/year	Walker et al., 2014; Volker et al., 2016; Estimation	After imprisonment, some individuals' networks shrink through losing their friendships and only rely on family ties after release. It is a significant challenge for the prisoners to continue investing in maintaining or reproducing social ties. Both prisoners wMI and prisoners wo MI are expected to lose two scores of SC per person. Per year because they are unlikely to build their networks while being isolated from the community.
395	Social Capital	Constant	ref annual parolee SC gain	2 score/pers on/year	Estimation	It is assumed that parolees are able to grow their networks if they are employed and are leading normal lives
396	Social Capital	Constant	ref annual prisoner SC loss per person	2 score/pers on/year	Walker et al., 2014; Volker et al., 2016; Estimation	After imprisonment, some individuals' networks shrink through losing their friendships and only rely on family ties after release. It is a significant challenge for the prisoners to continue investing in maintaining or reproducing social ties. Both prisoners wMI and prisoners wo MI are expected to lose two scores of SC per person. Per year because they are unlikely to build their networks while being isolated from the community.
397	Social Capital	Constant	ref SC per normal person	90 score/pers on	Defined by the author	This is an average.

Appendix L – Test Results of the Full Model

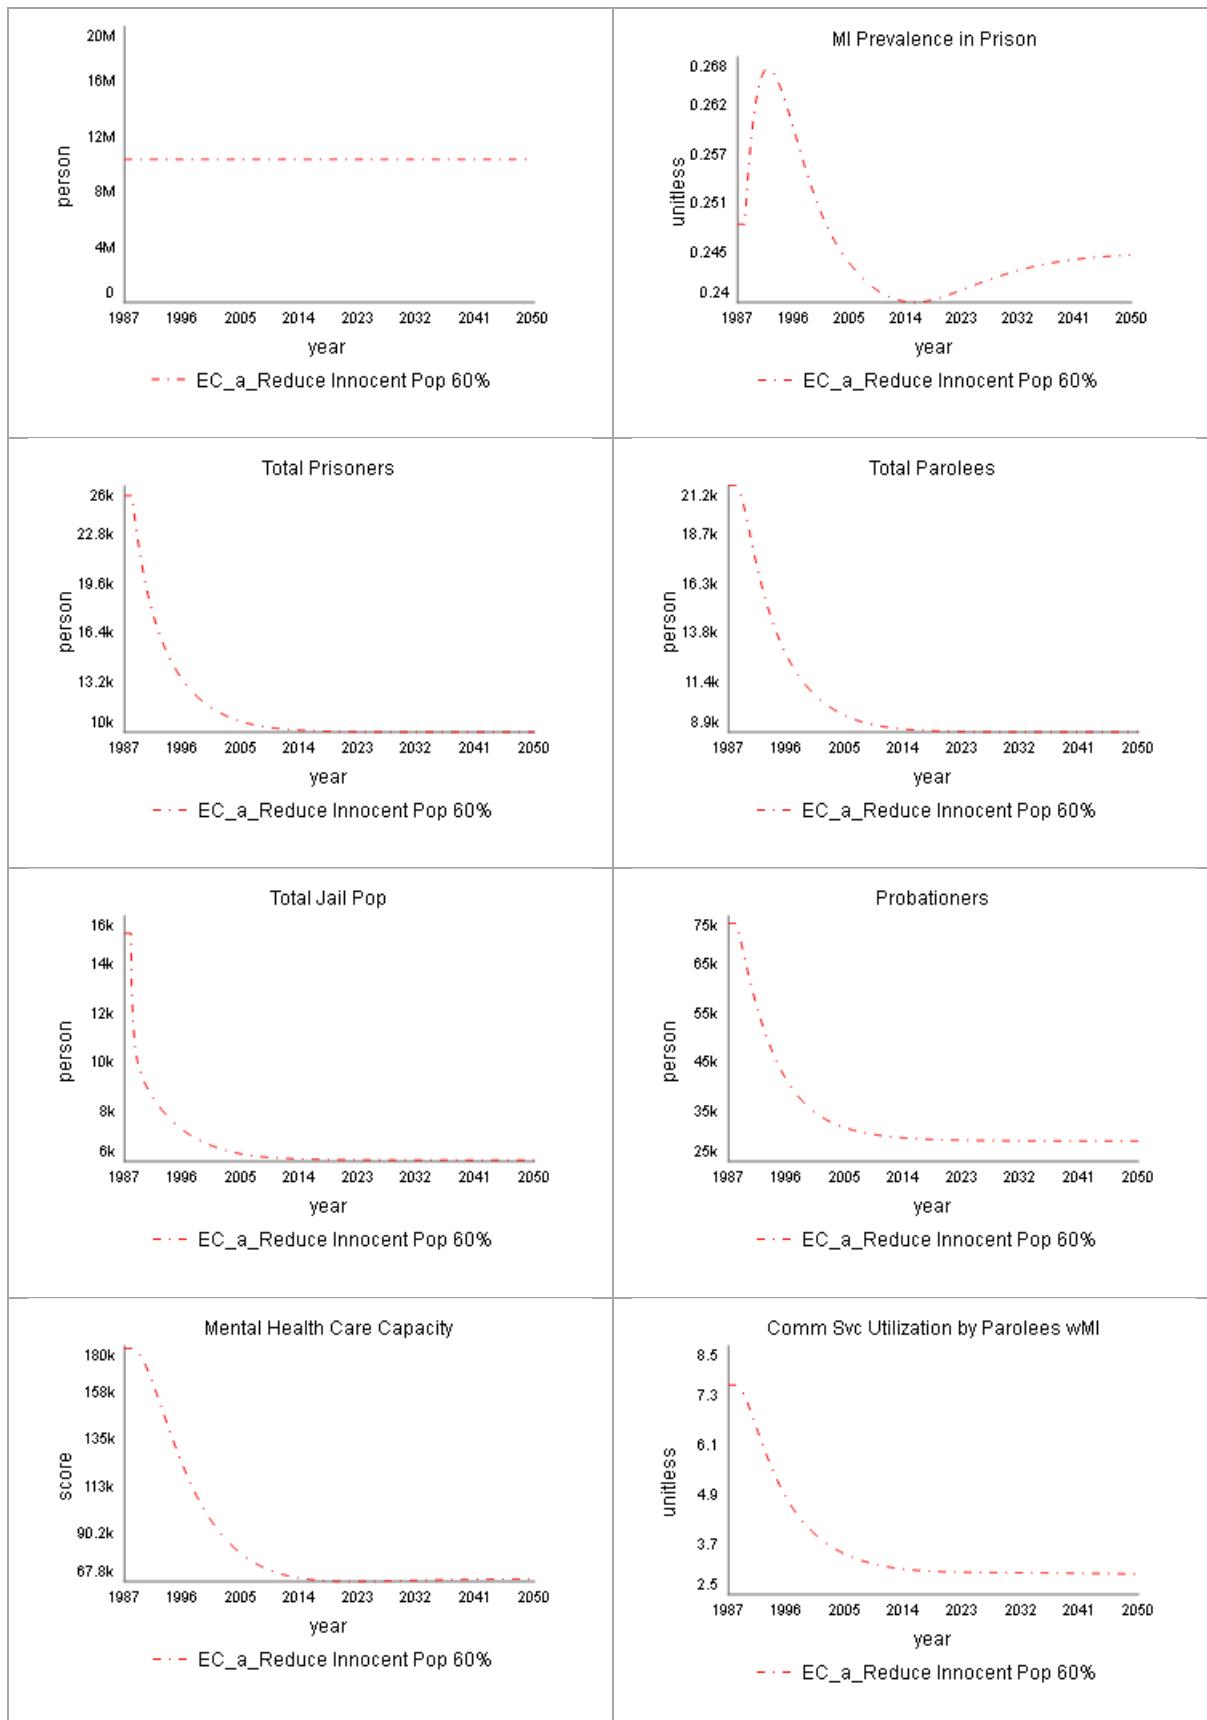

Equilibrium Test – Pre-Realignment

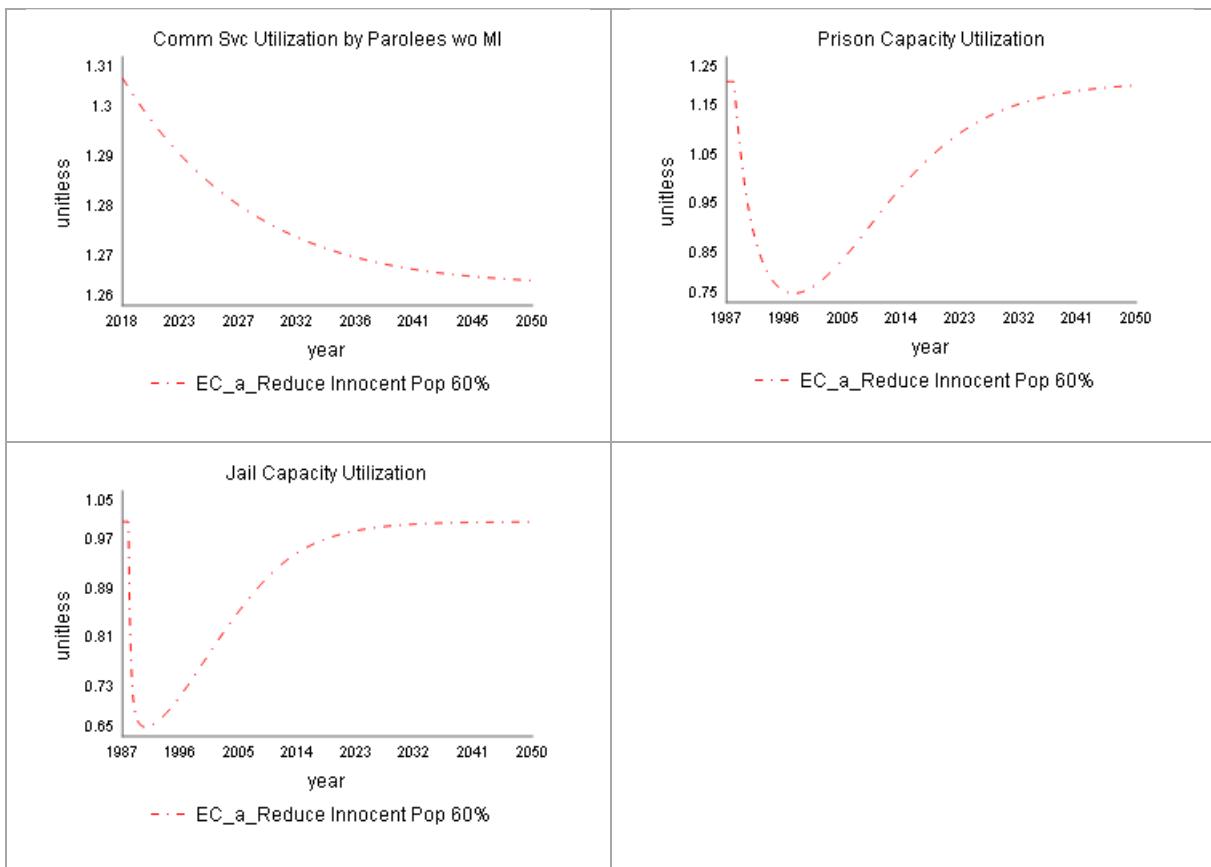

Extreme Condition Test 1a – Reduce Innocent Population 60%

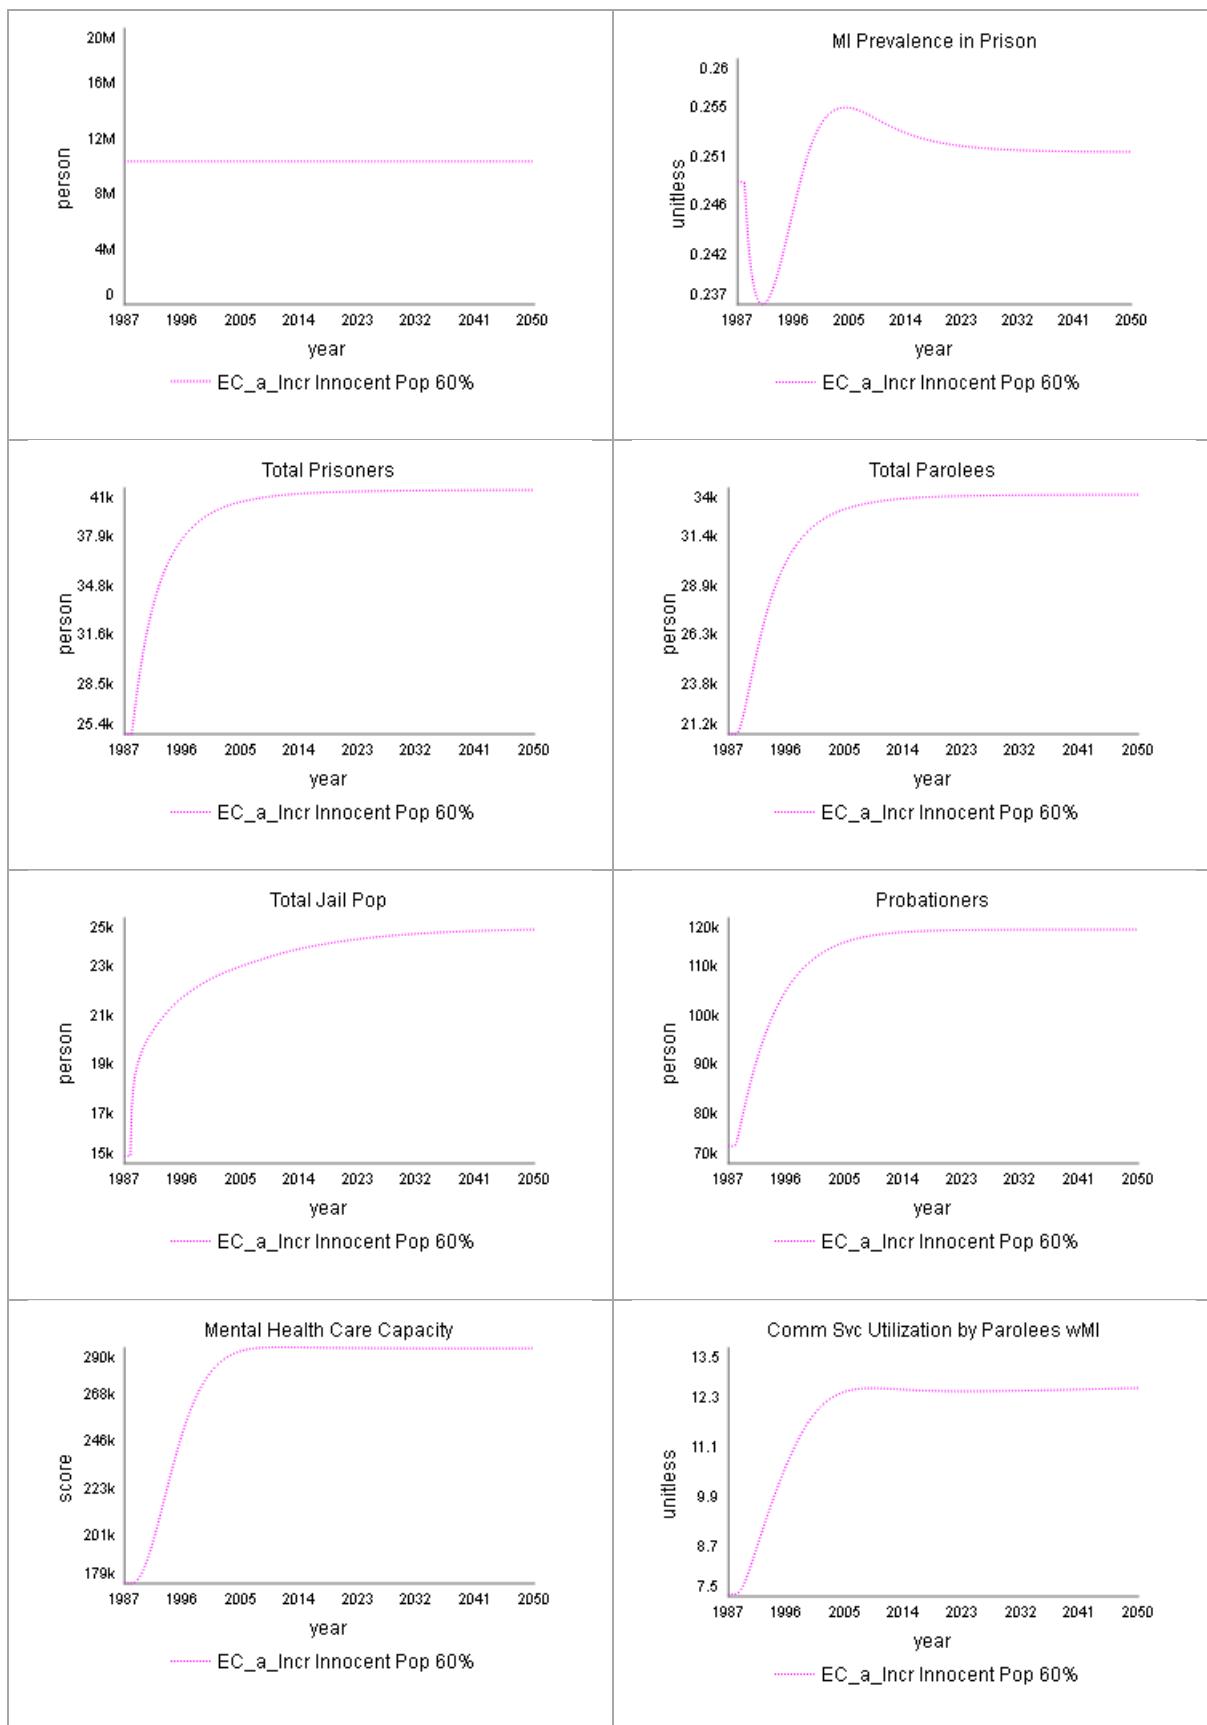

In this test, the innocent population reduces 60% from 1988 to 2050.

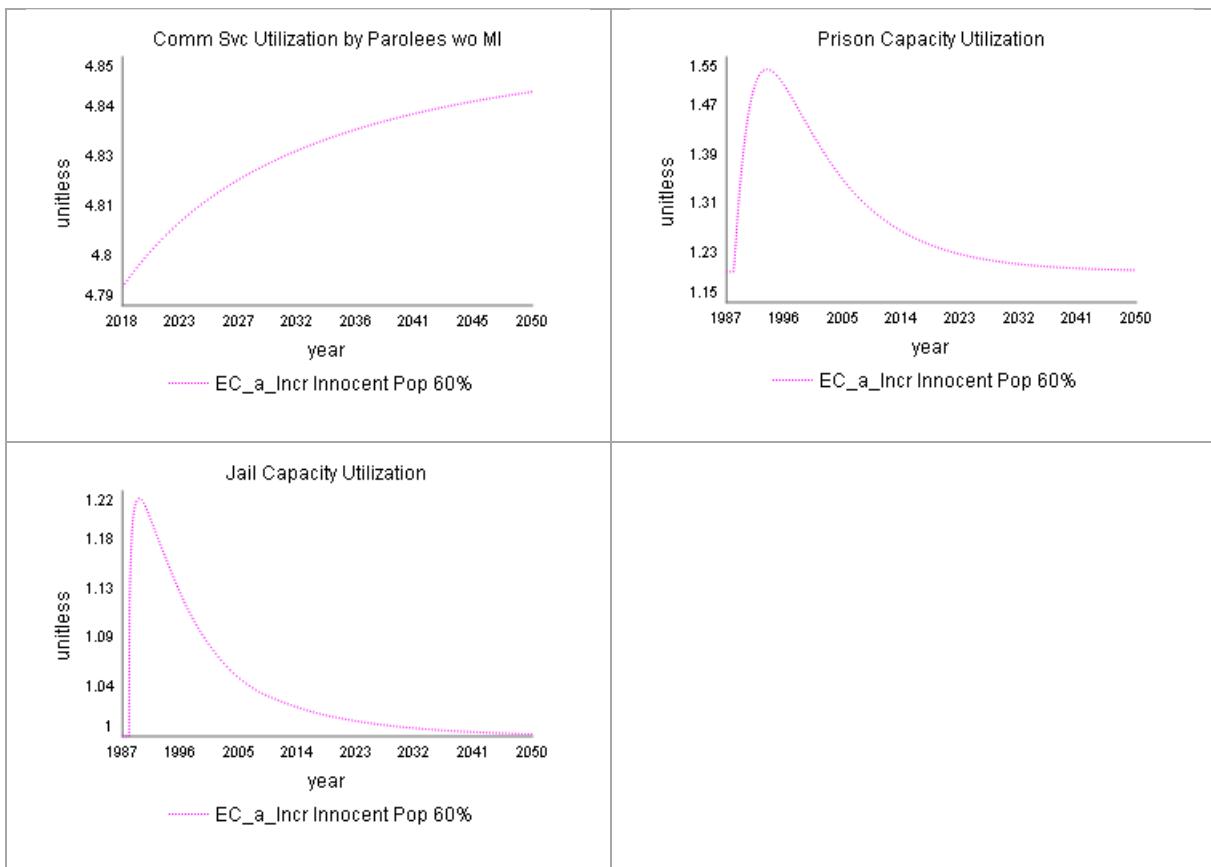

Extreme Condition Test 2a – Increase Innocent Population 60%

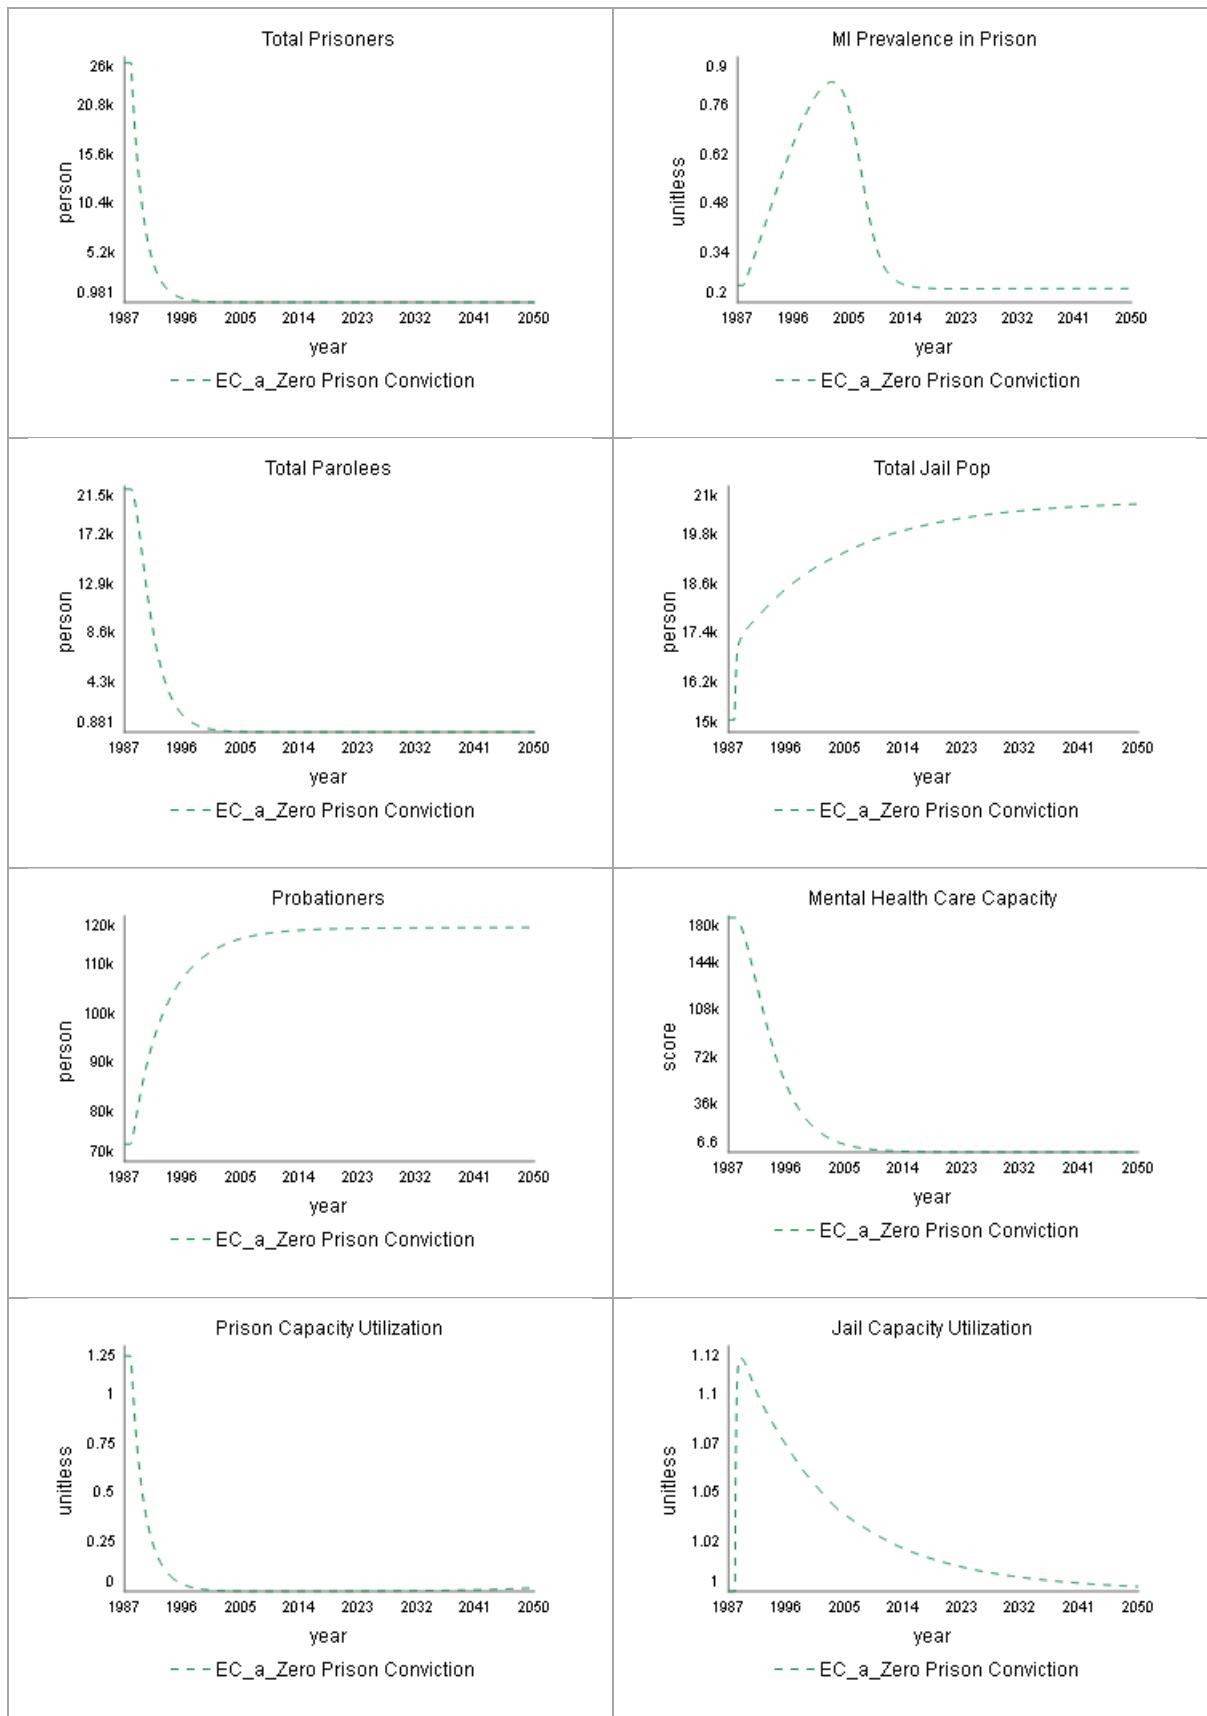

In this test, the innocent population increases 60% from 1988 to 2050.

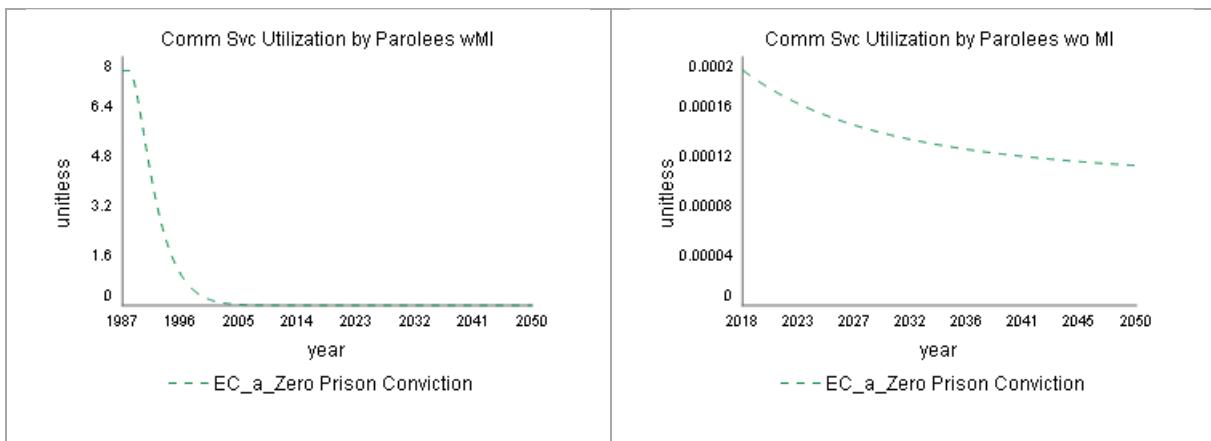

Extreme Condition Test 3a – Zero Fraction of Convicts with Prison Conviction

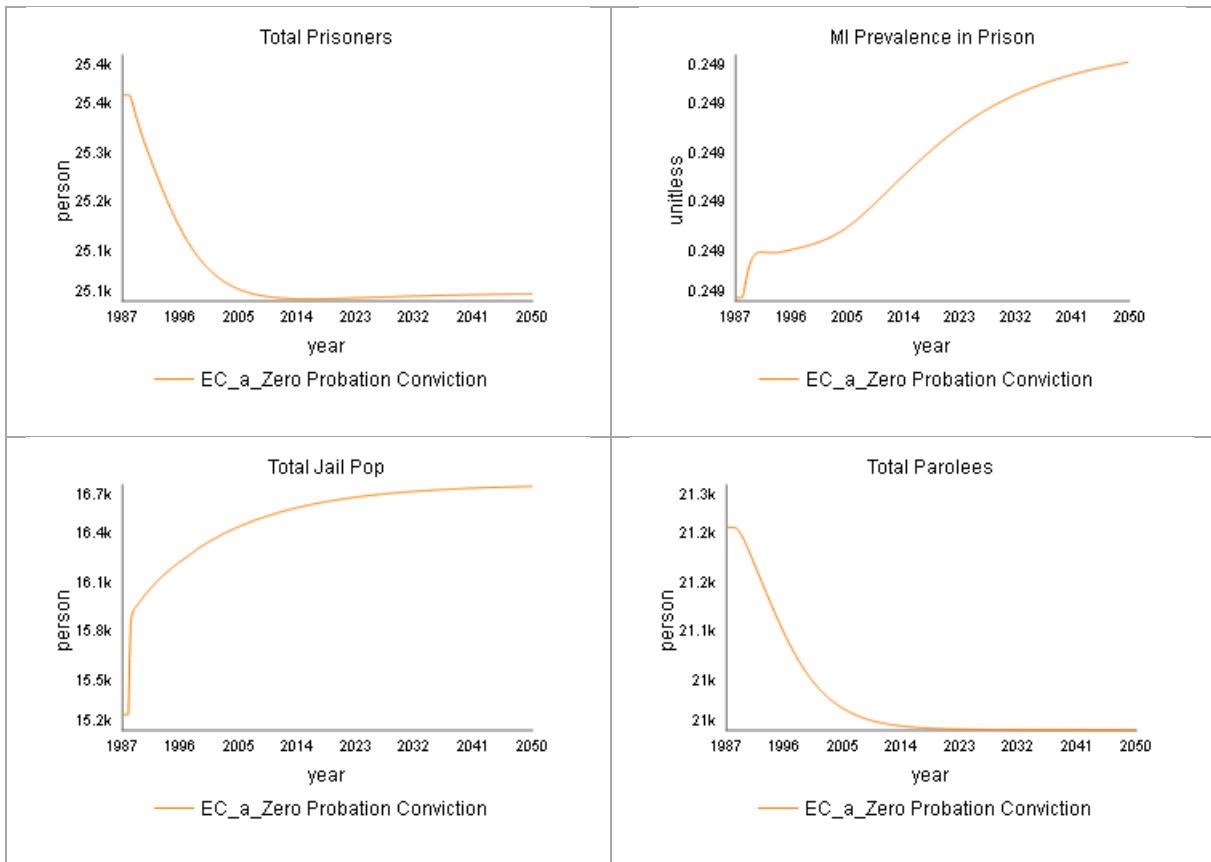

In this test, the fraction of convicts being convicted to prison sentence is reduced to zero from 1988.

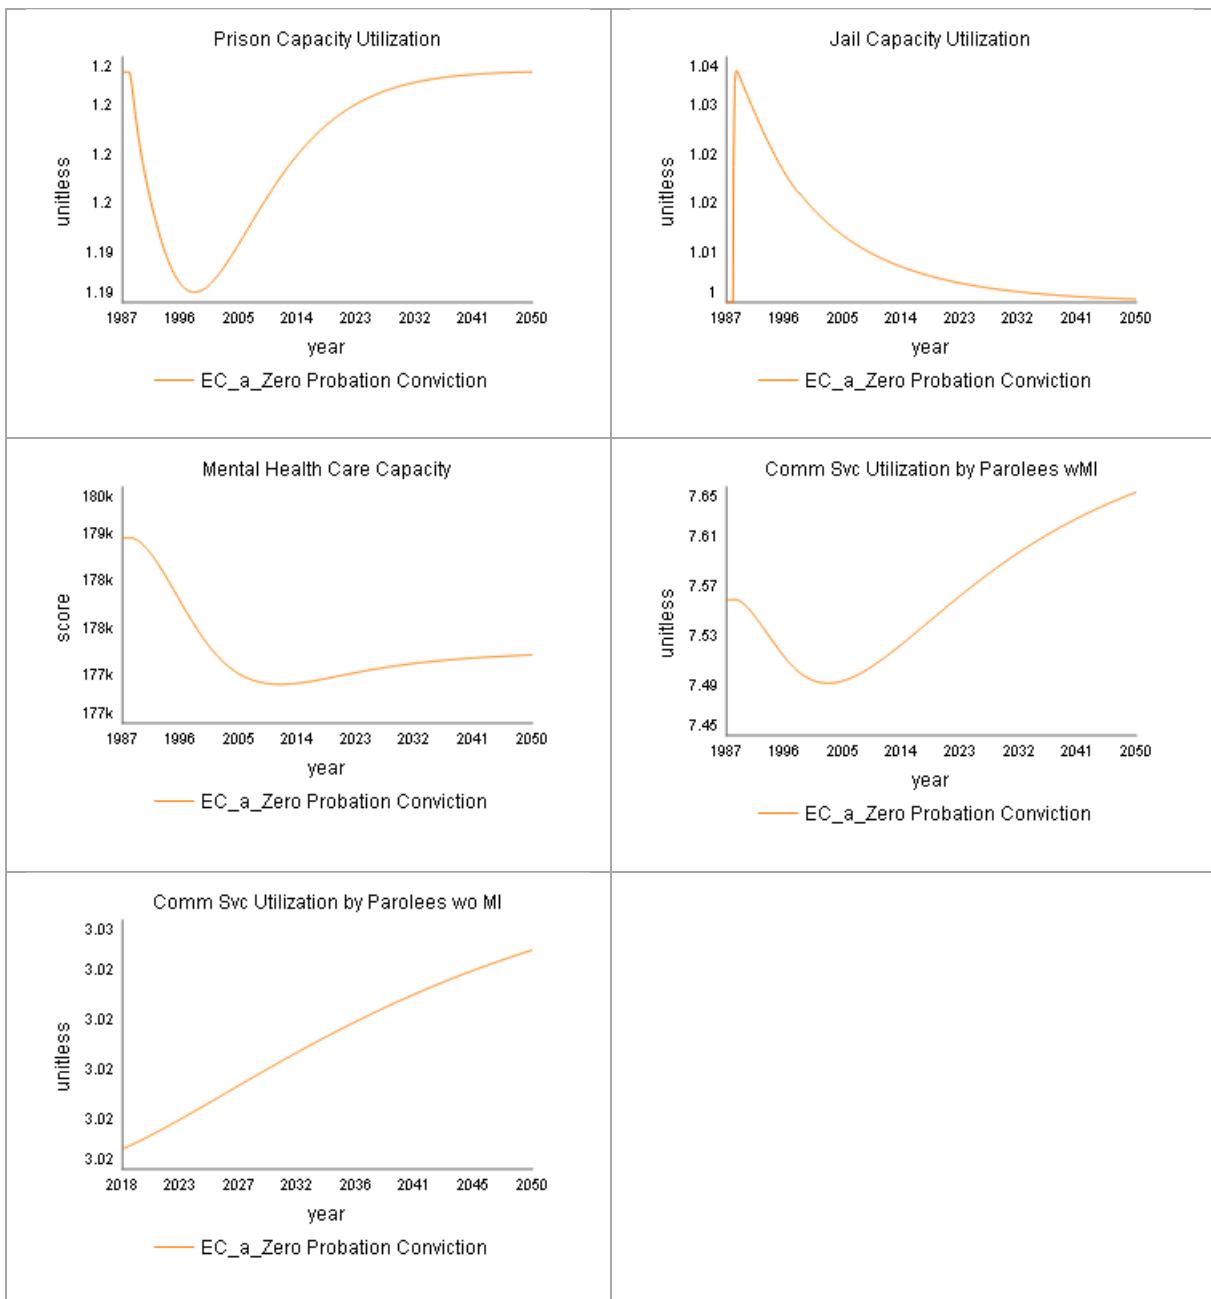

Extreme Condition Test 4a – Zero Fraction of Convicts with Probation Conviction

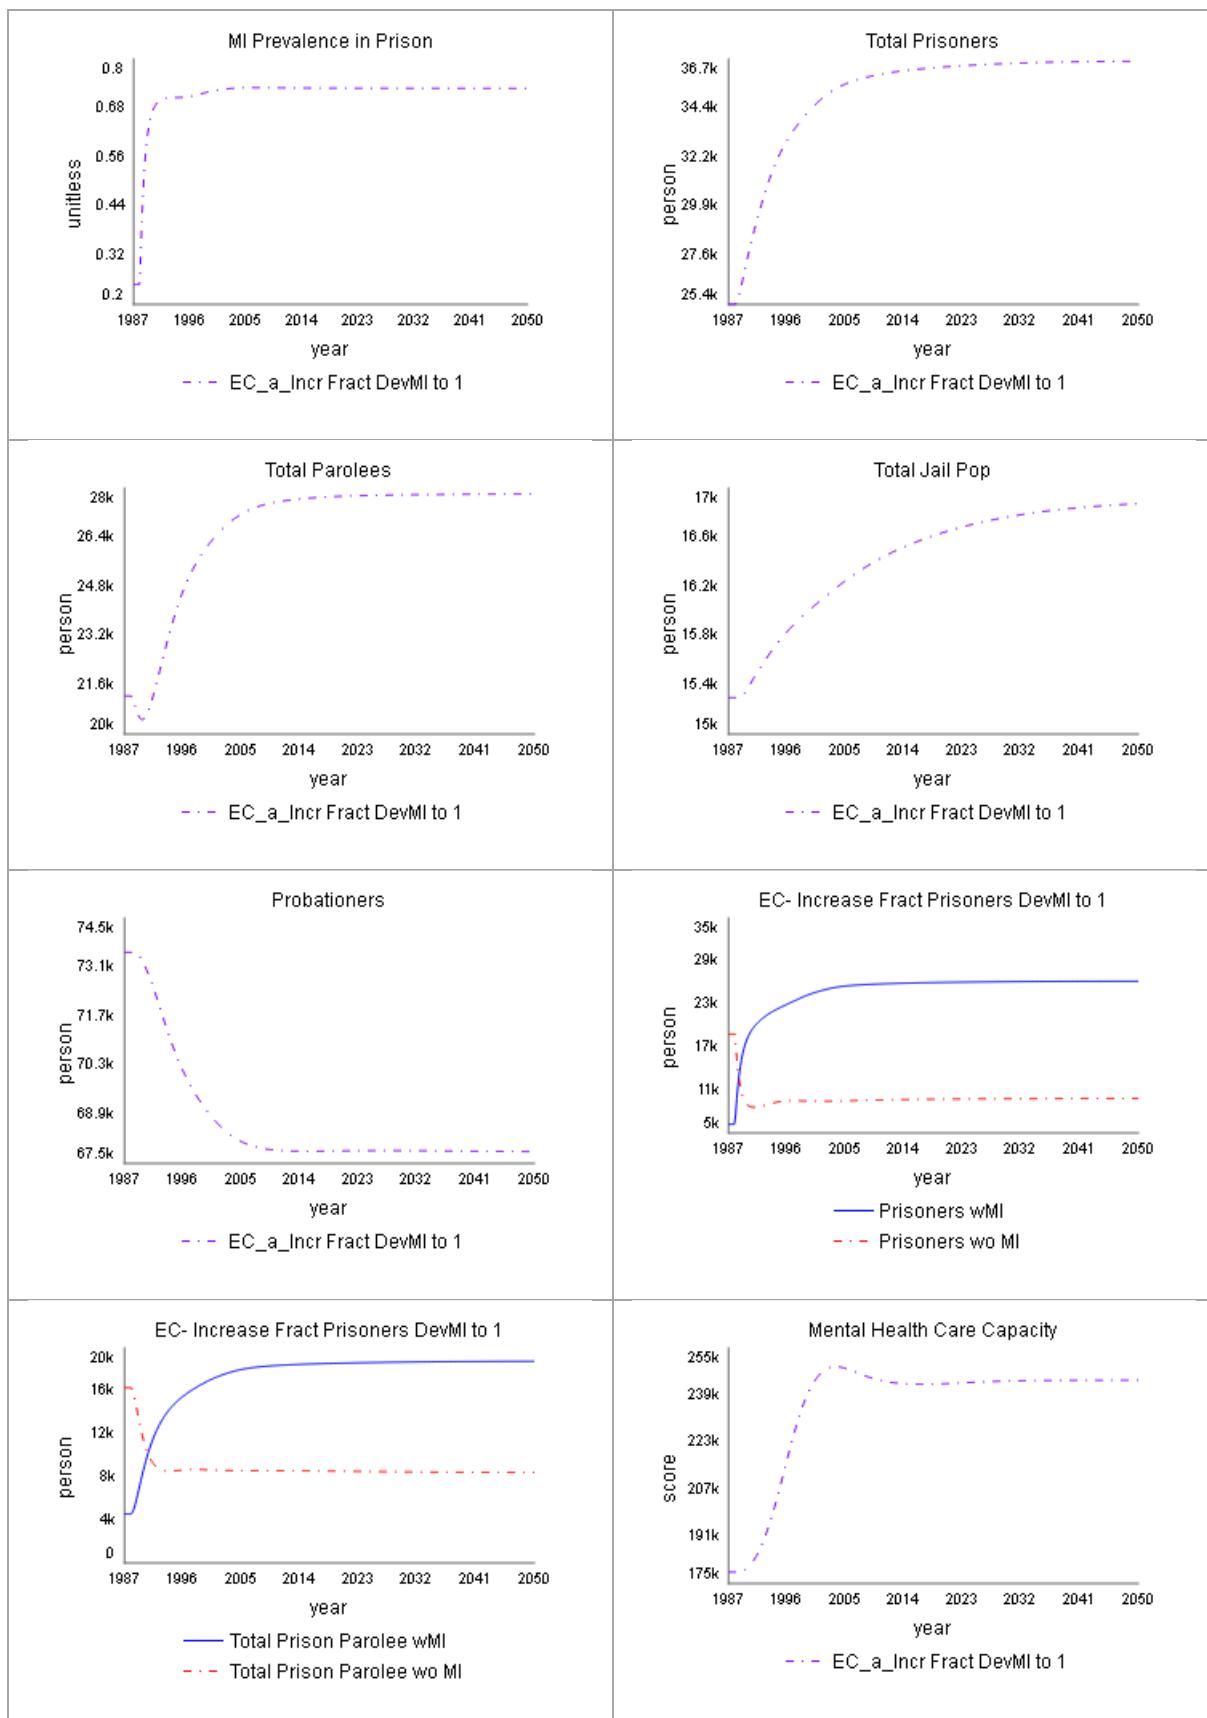

In this test, the fraction of convicts being convicted to probation sentence is reduced to zero from 1988.

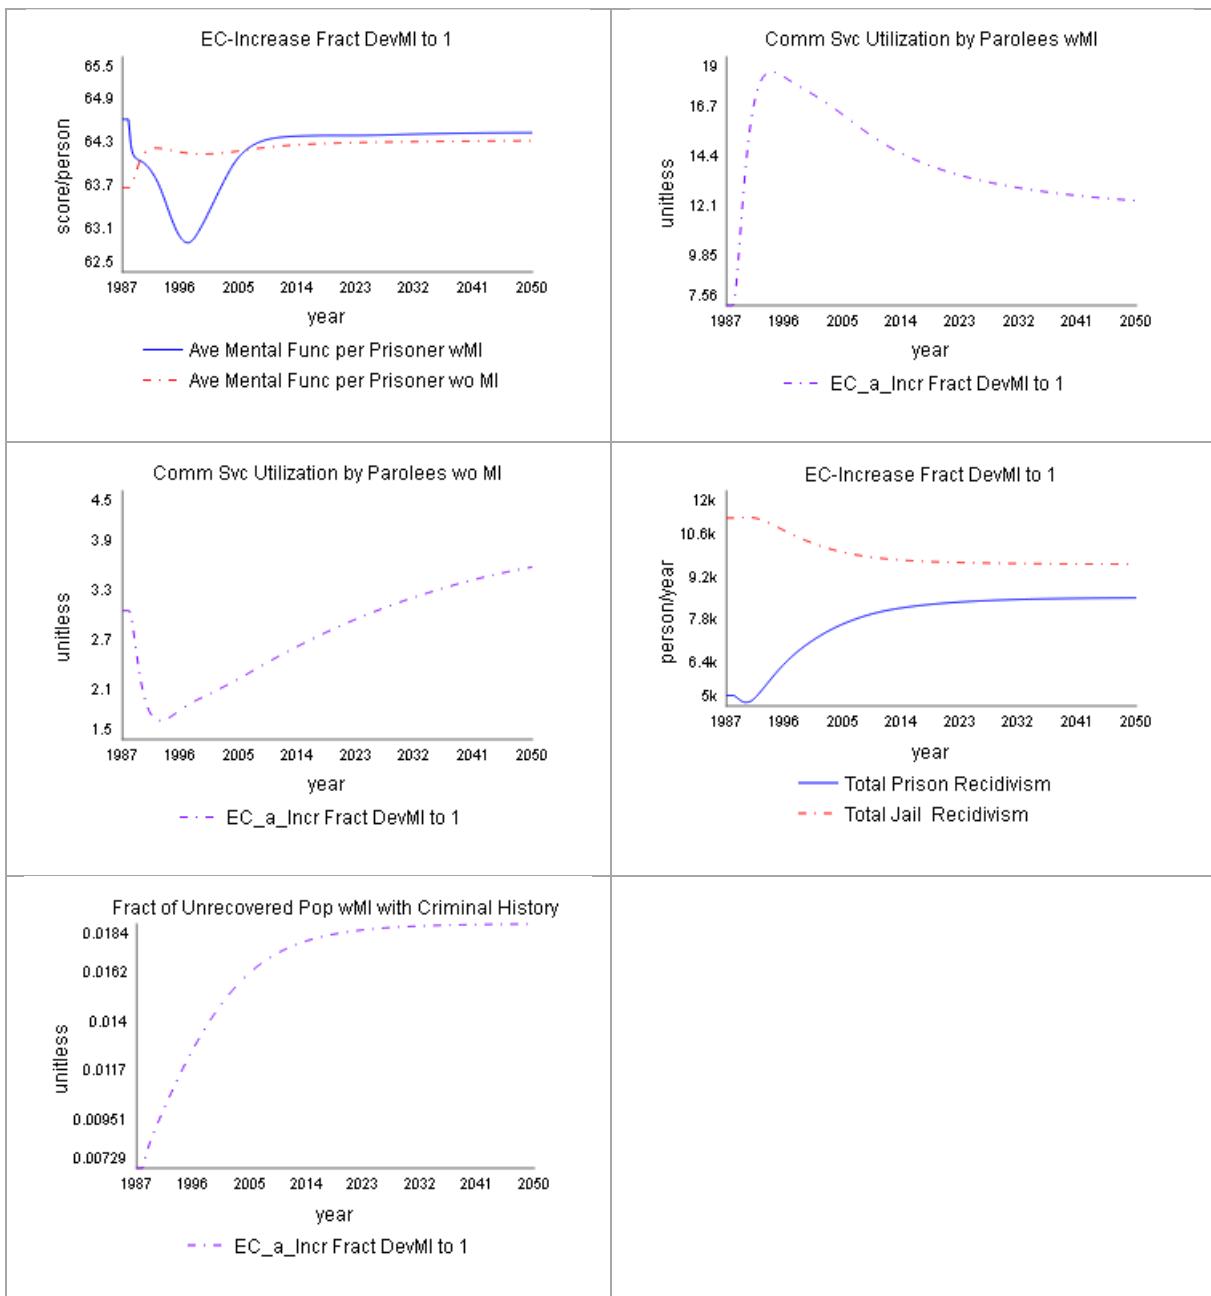

Extreme Condition Test 5a – Increase Fraction of Prisoners wo MI Develop MI to 1

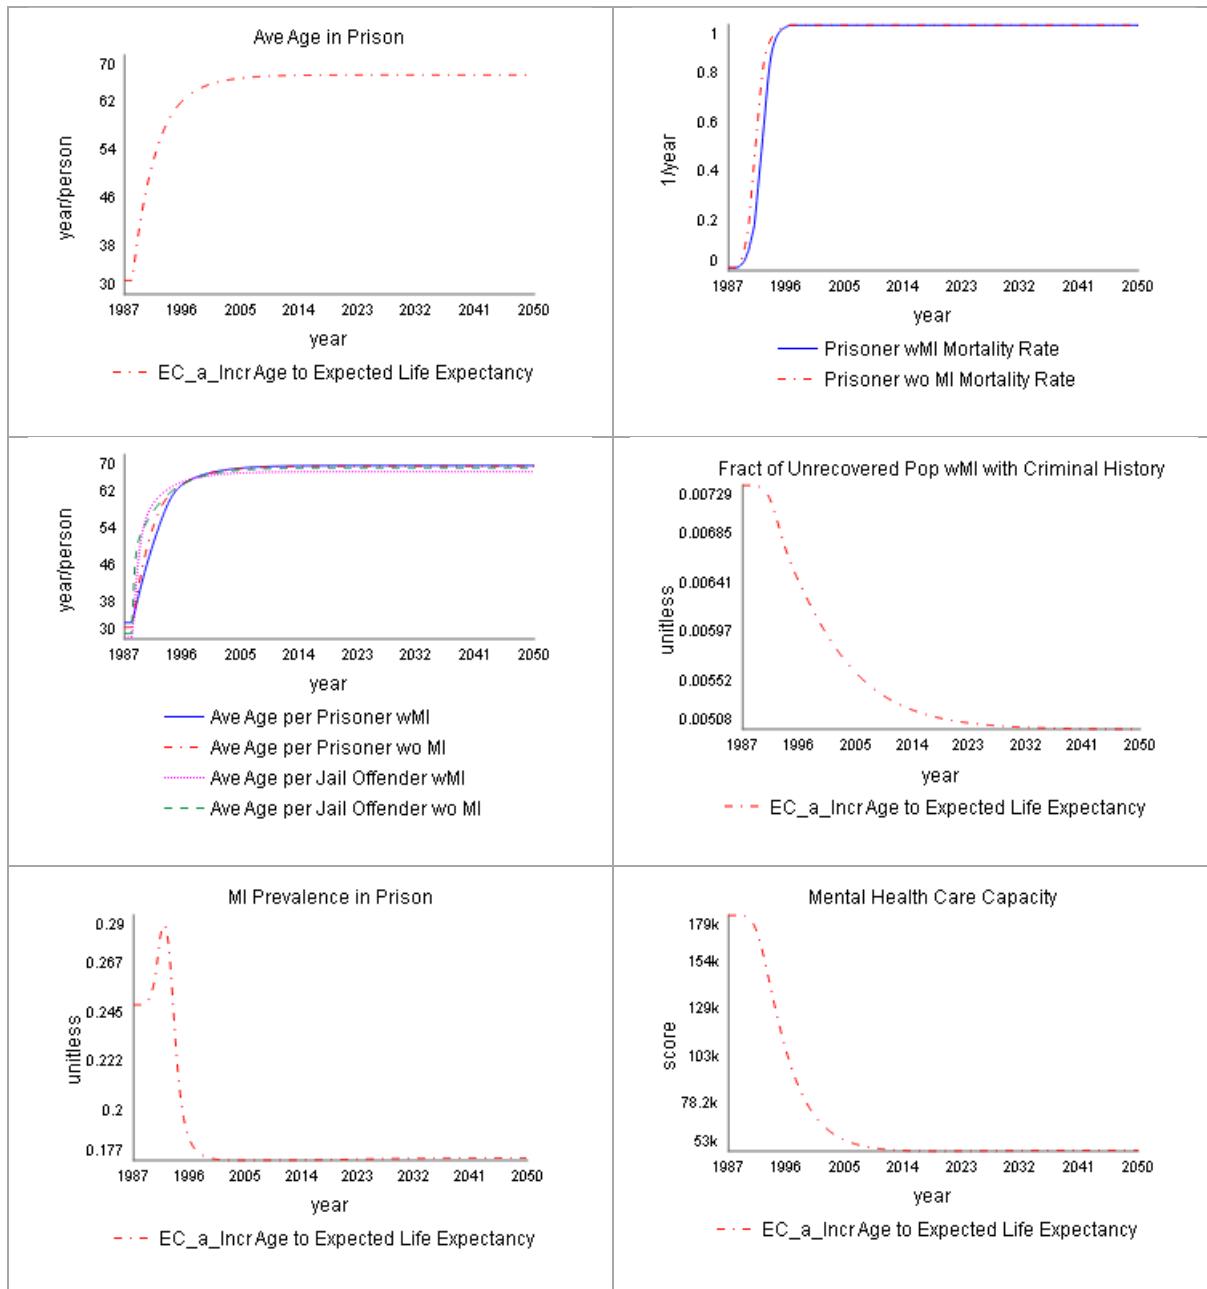

In this test, “fract prisoners devMI” increases from 0.02 per year to 1 per year from 1988 onwards.

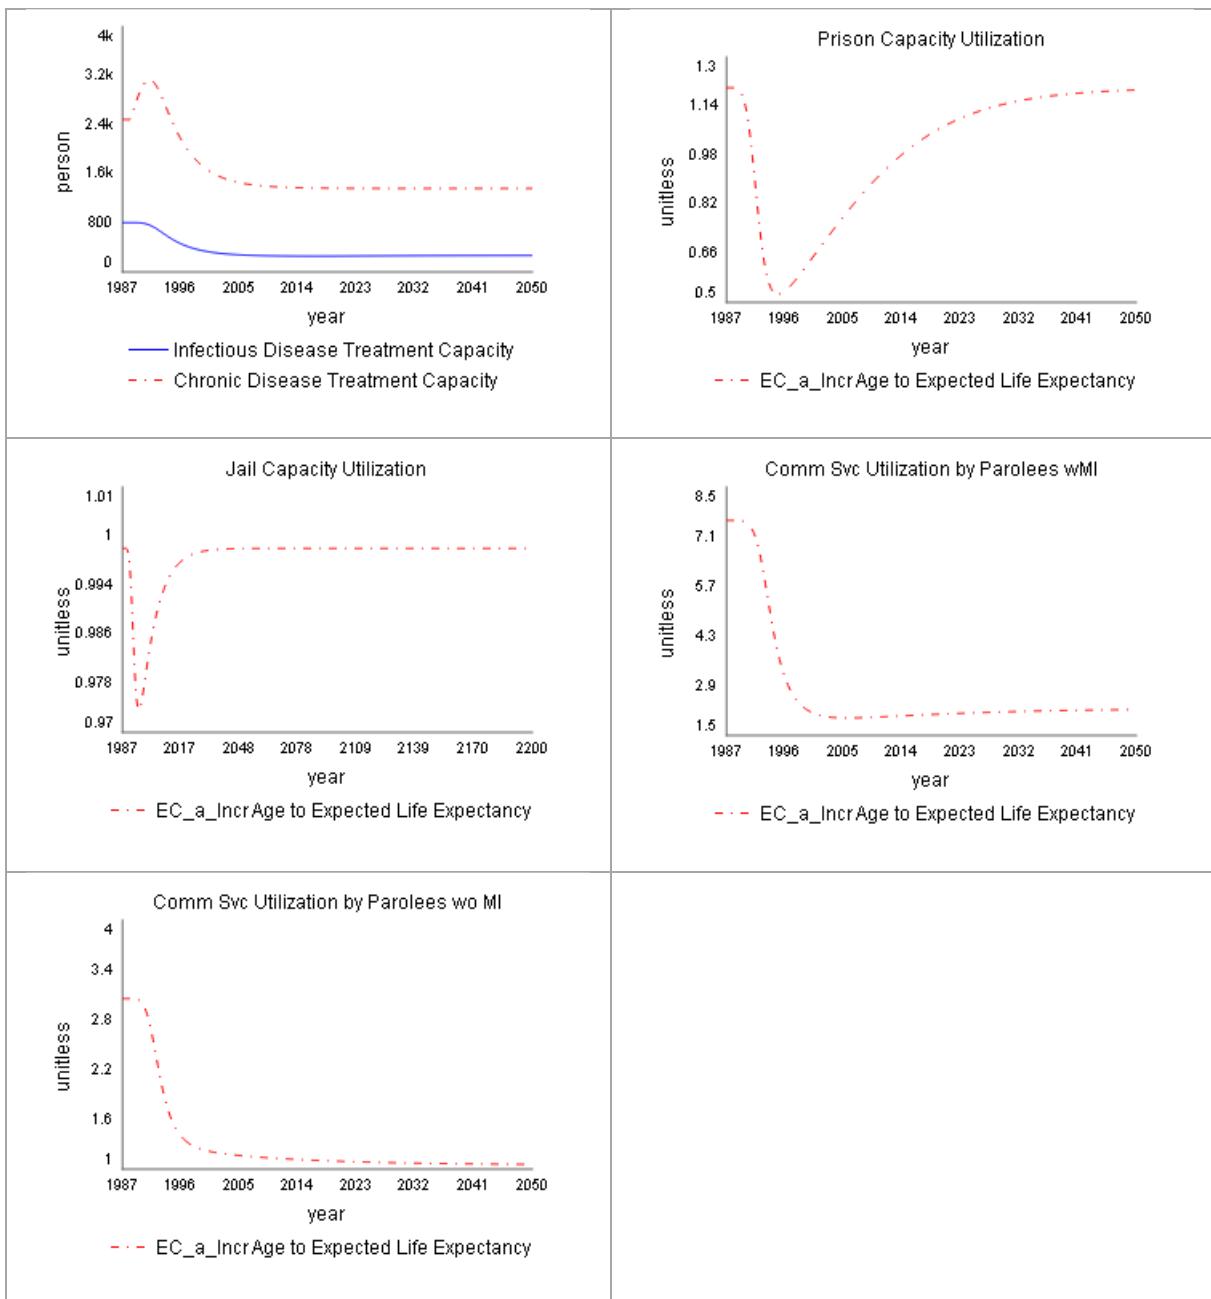

Extreme Condition Test 6a – Increase Initial Age at First Commitment to the Expected Life Expectancy of Prisoners

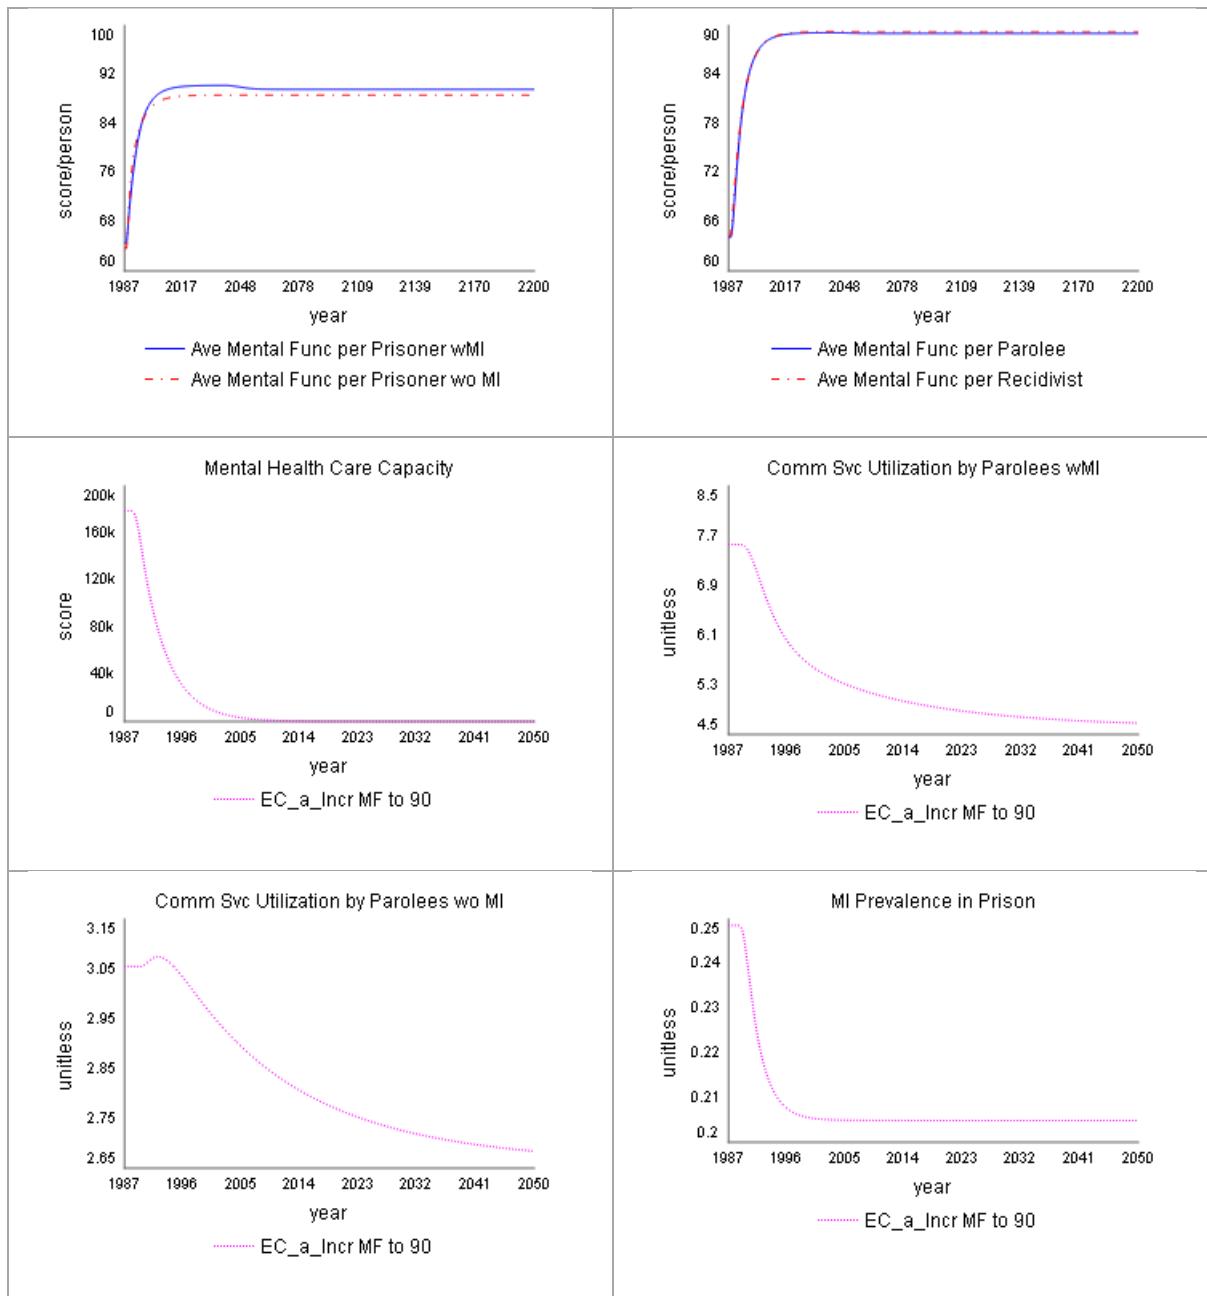

In this test, the initial age at first commitment increases from 28 to 65 from 1988.

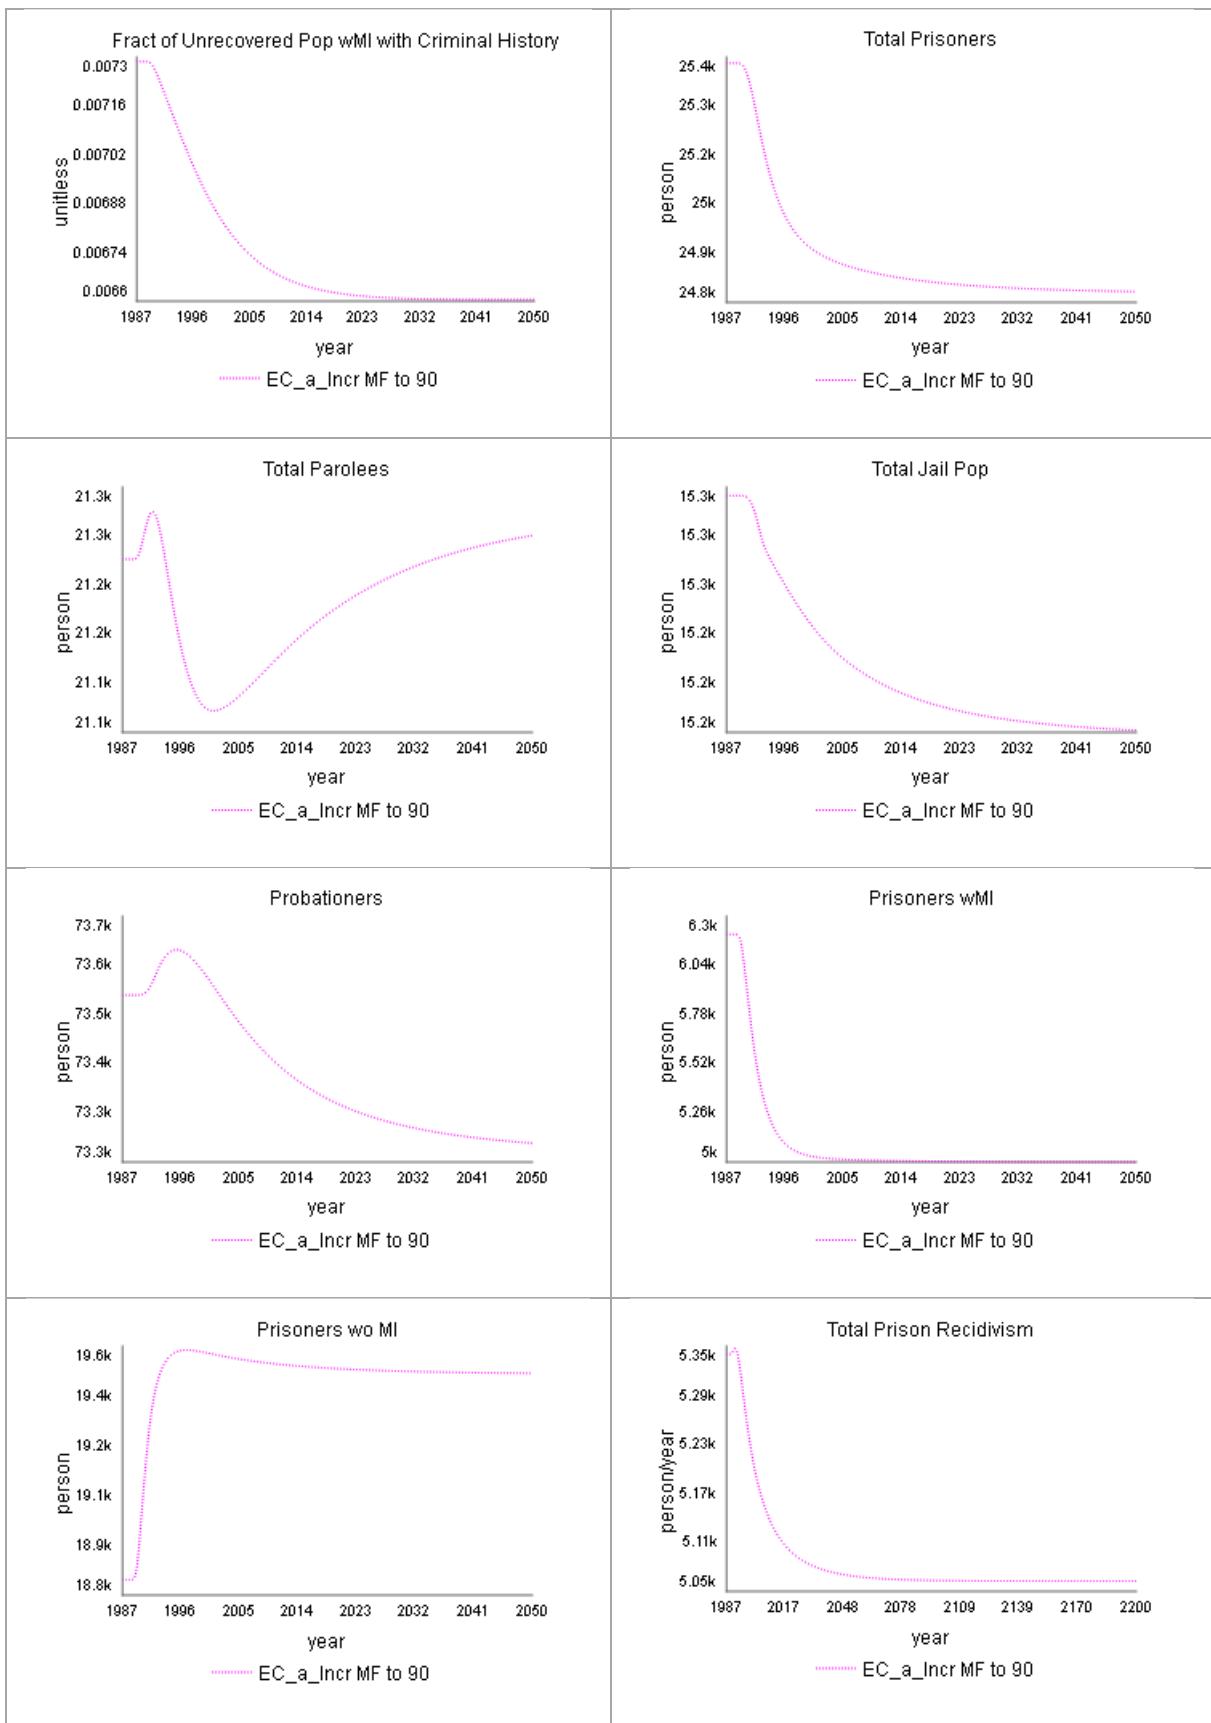

Extreme Condition Test 7a – Increase Average Mental Functions per New Arrestee to 90

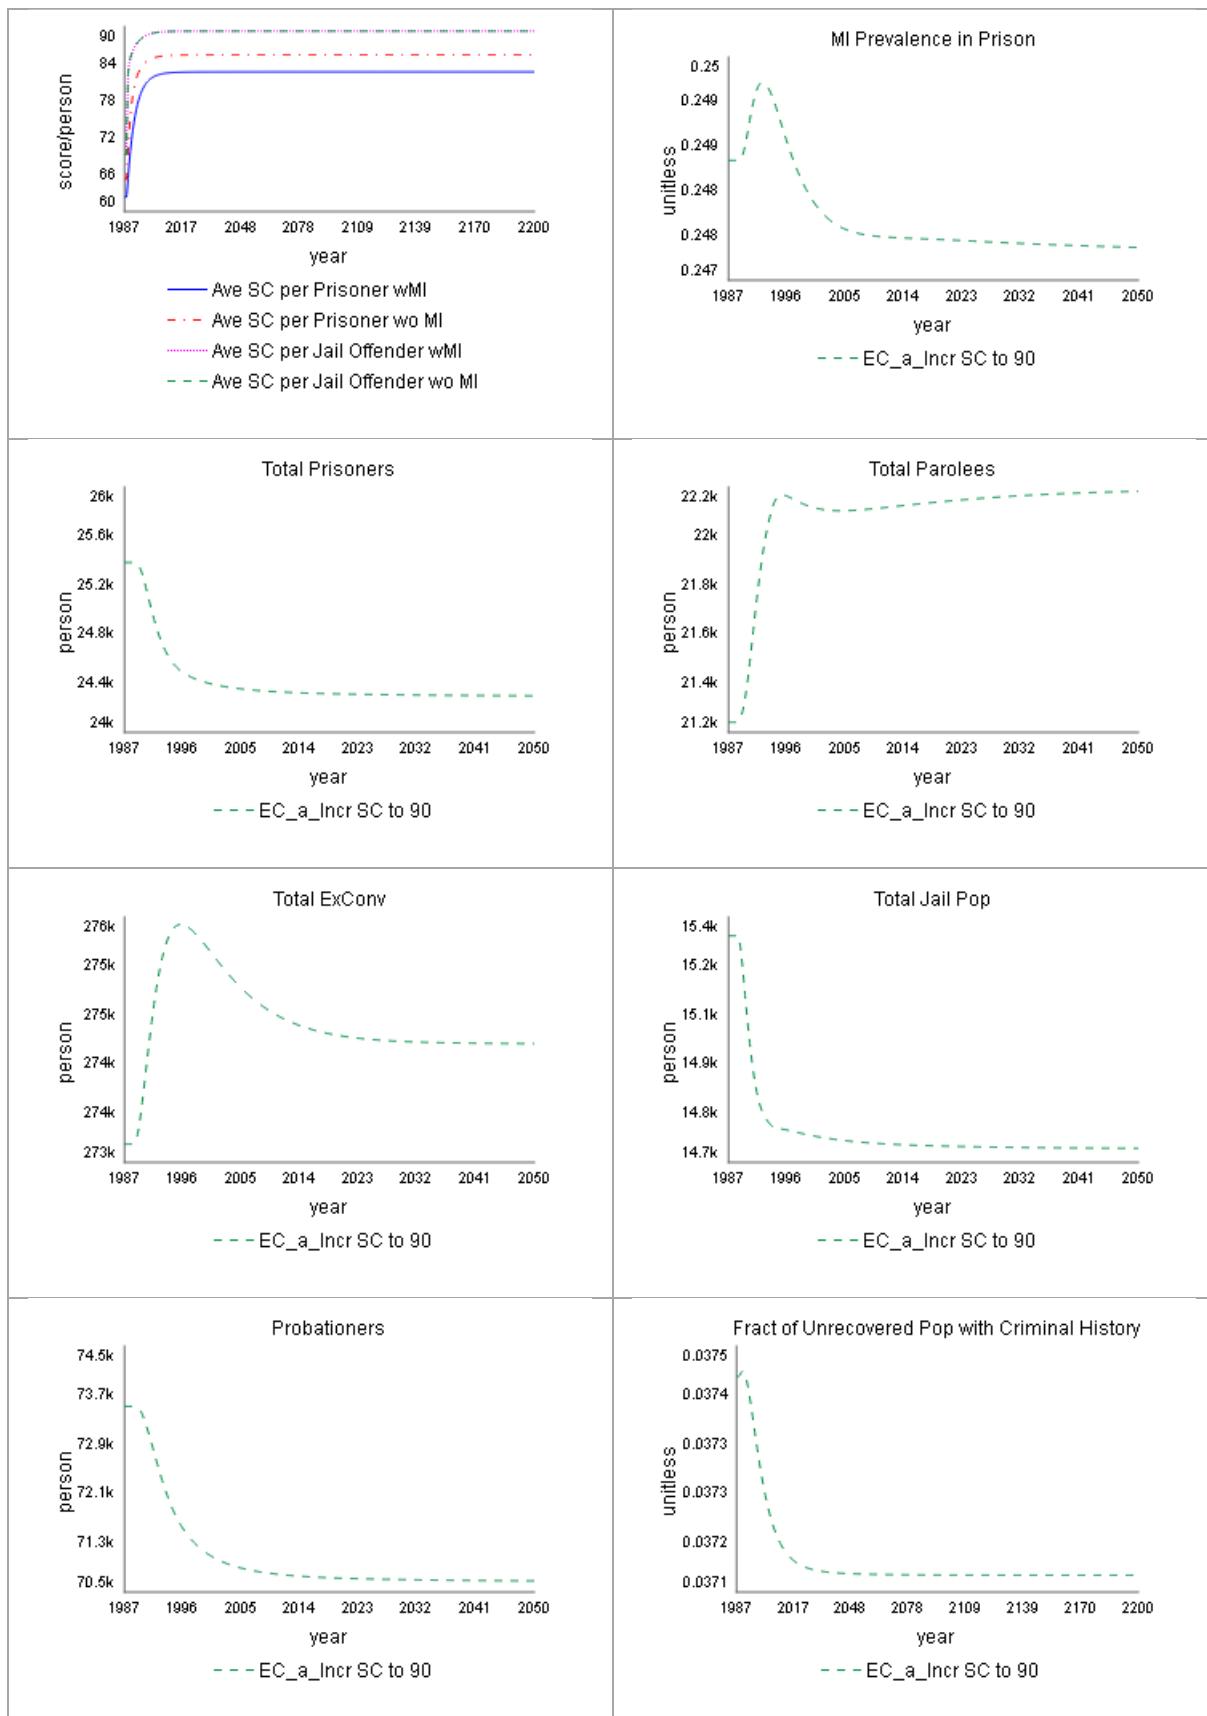

In this test, the average mental functions per new arrestee increases from 65 score/person to 90 score/person from 1988.

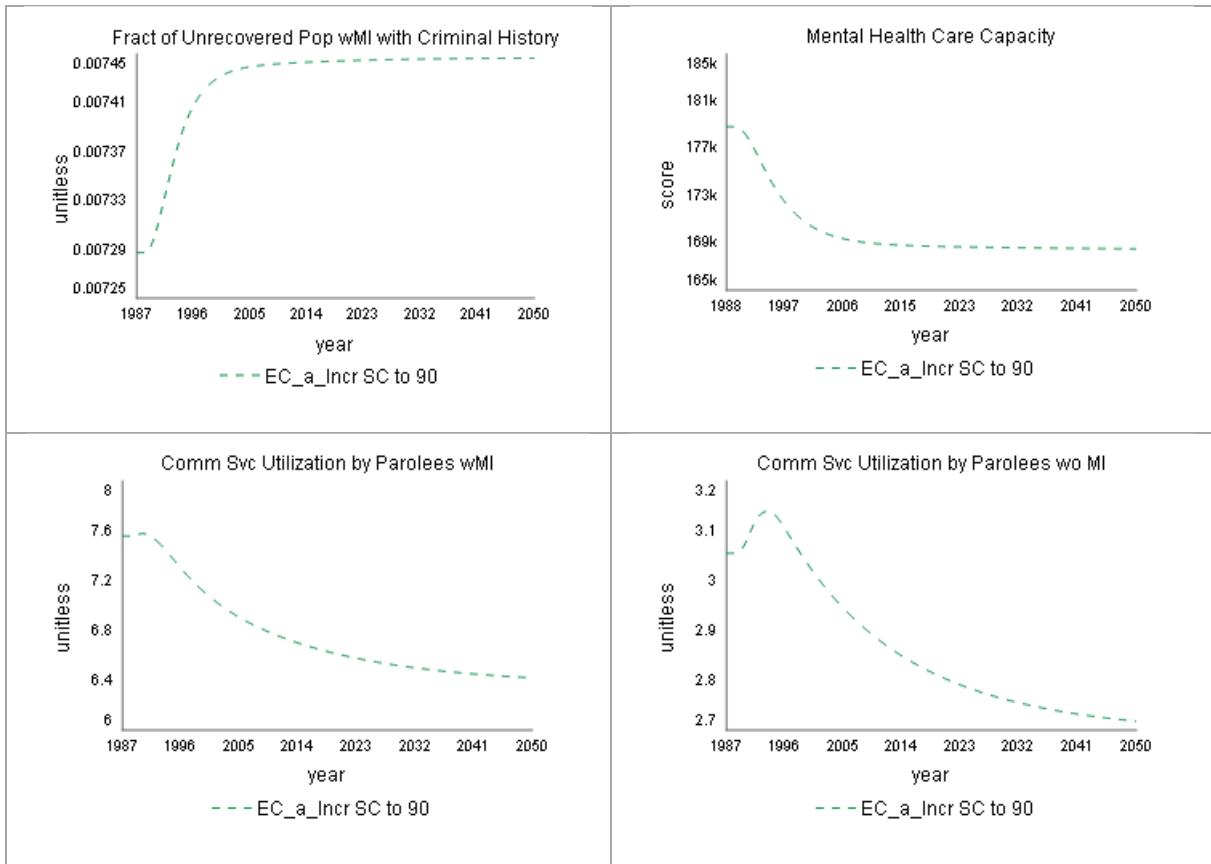

Extreme Condition Test 8a – Increase Social Capital per New Arrestee to 90

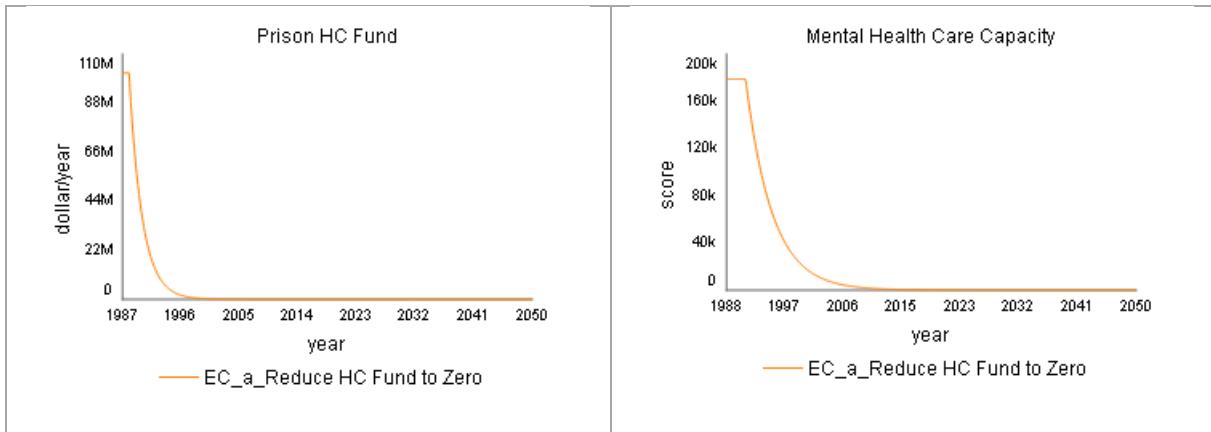

In this test, the average mental functions per new arrestee increases from 70 score/person to 90 score/person from 1988.

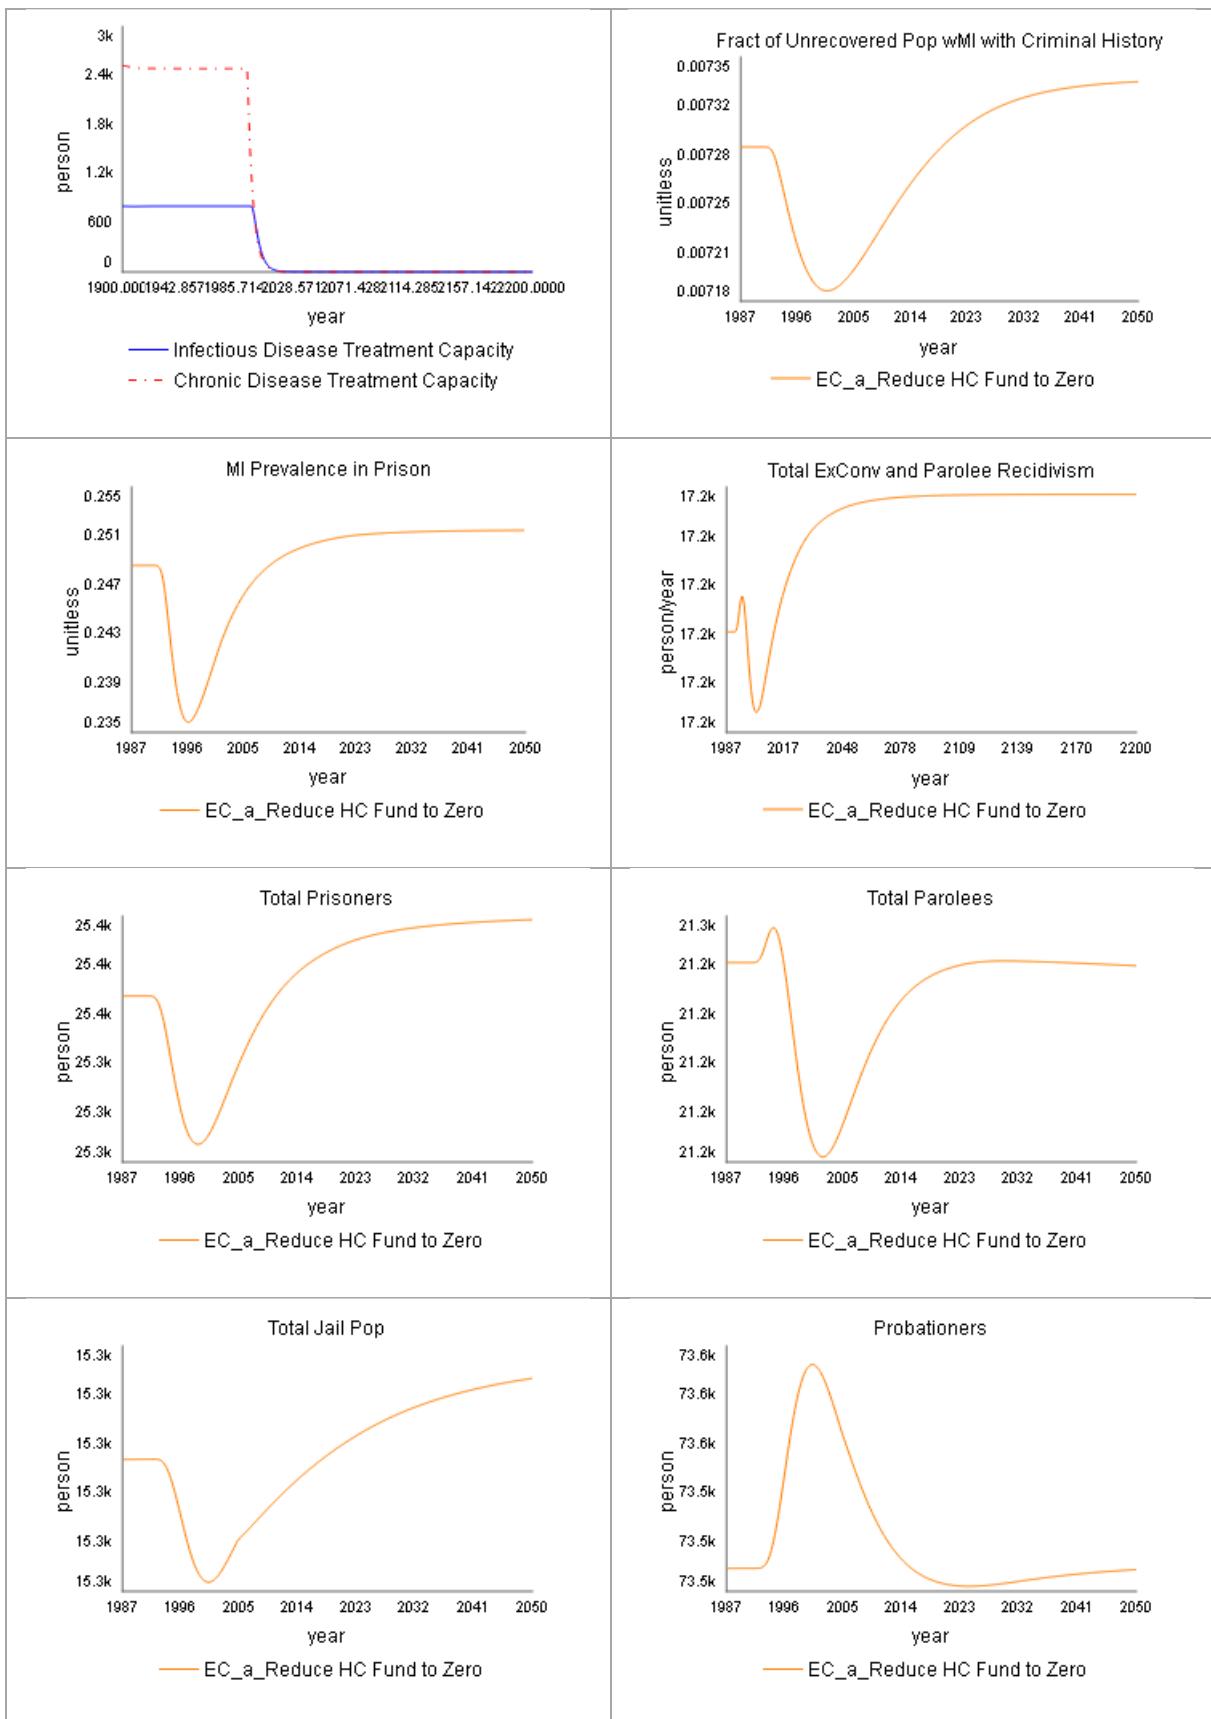

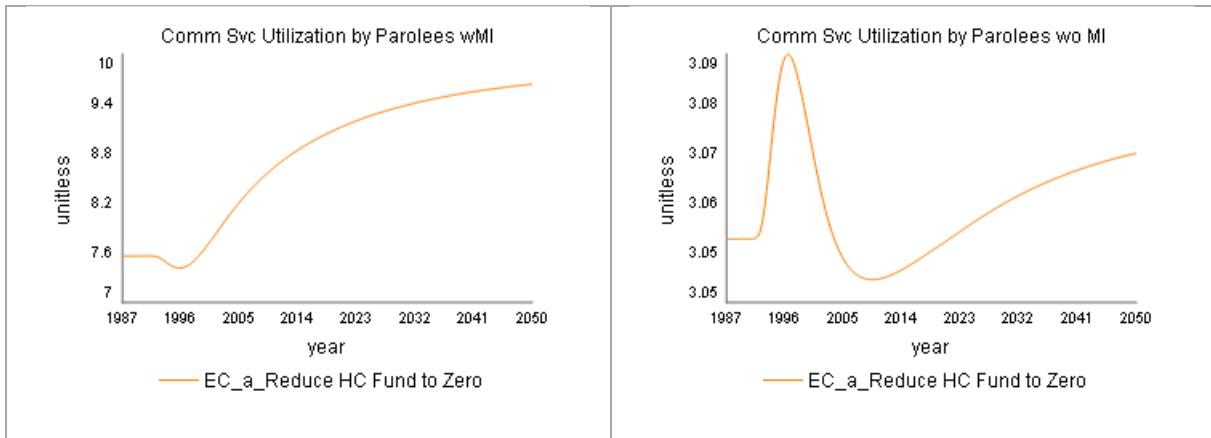

Extreme Condition Test 9a – Reduce Prison Health Care Fund to Zero

In this test, the prison health care budget decreases to zero from 1988.

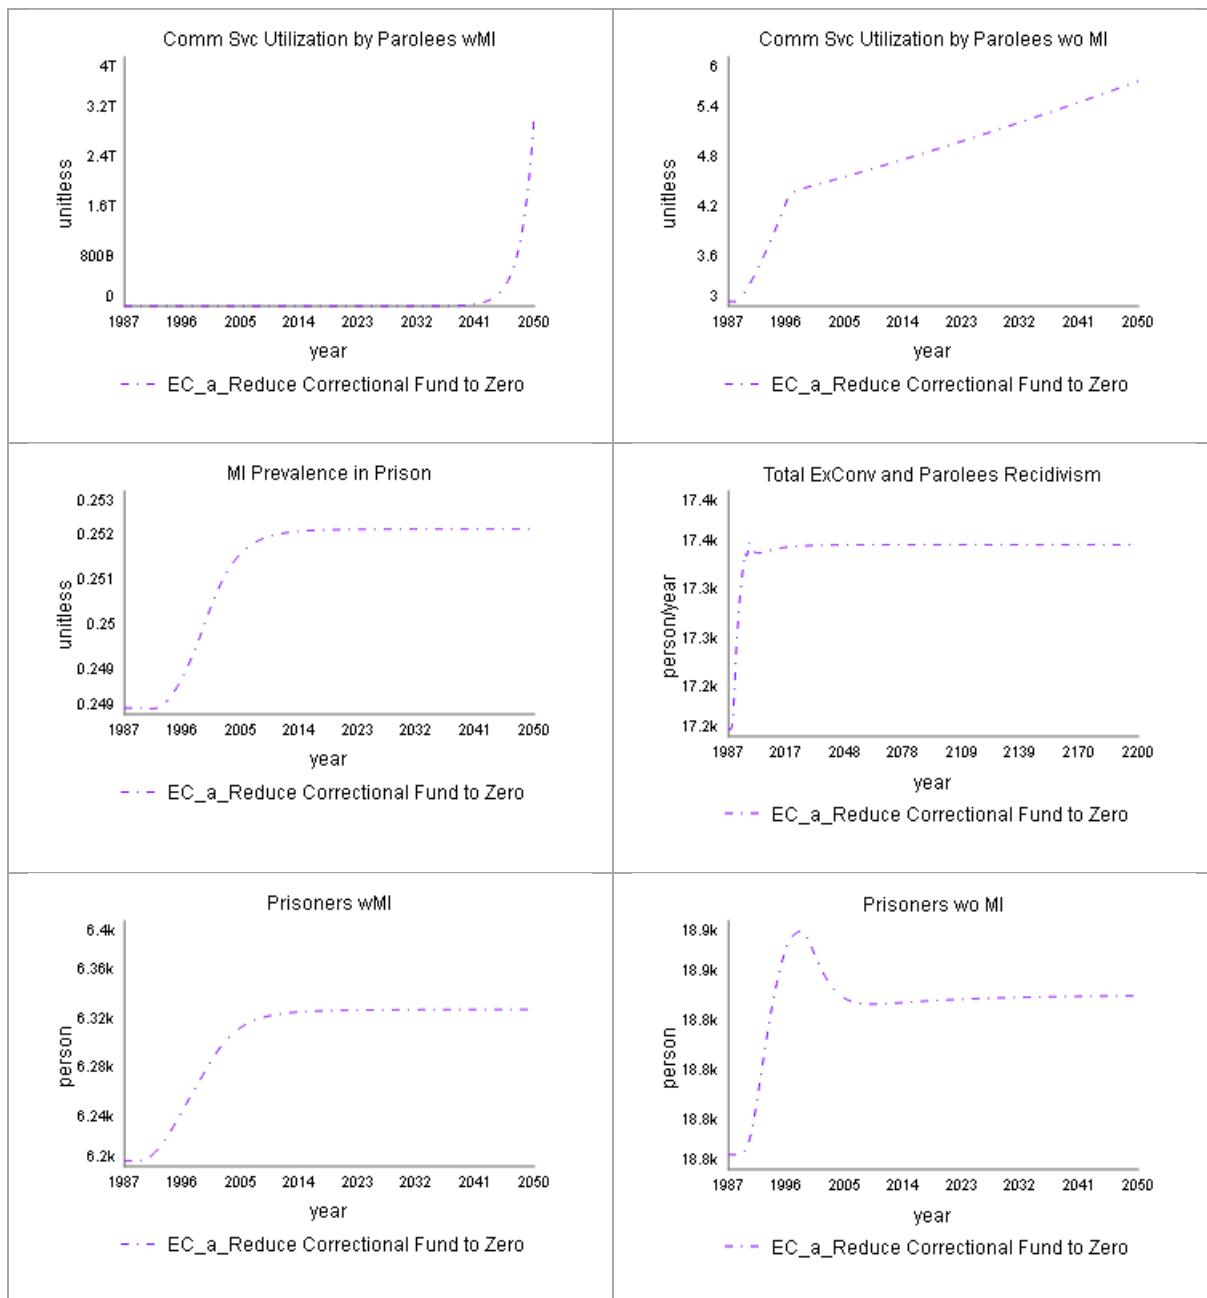

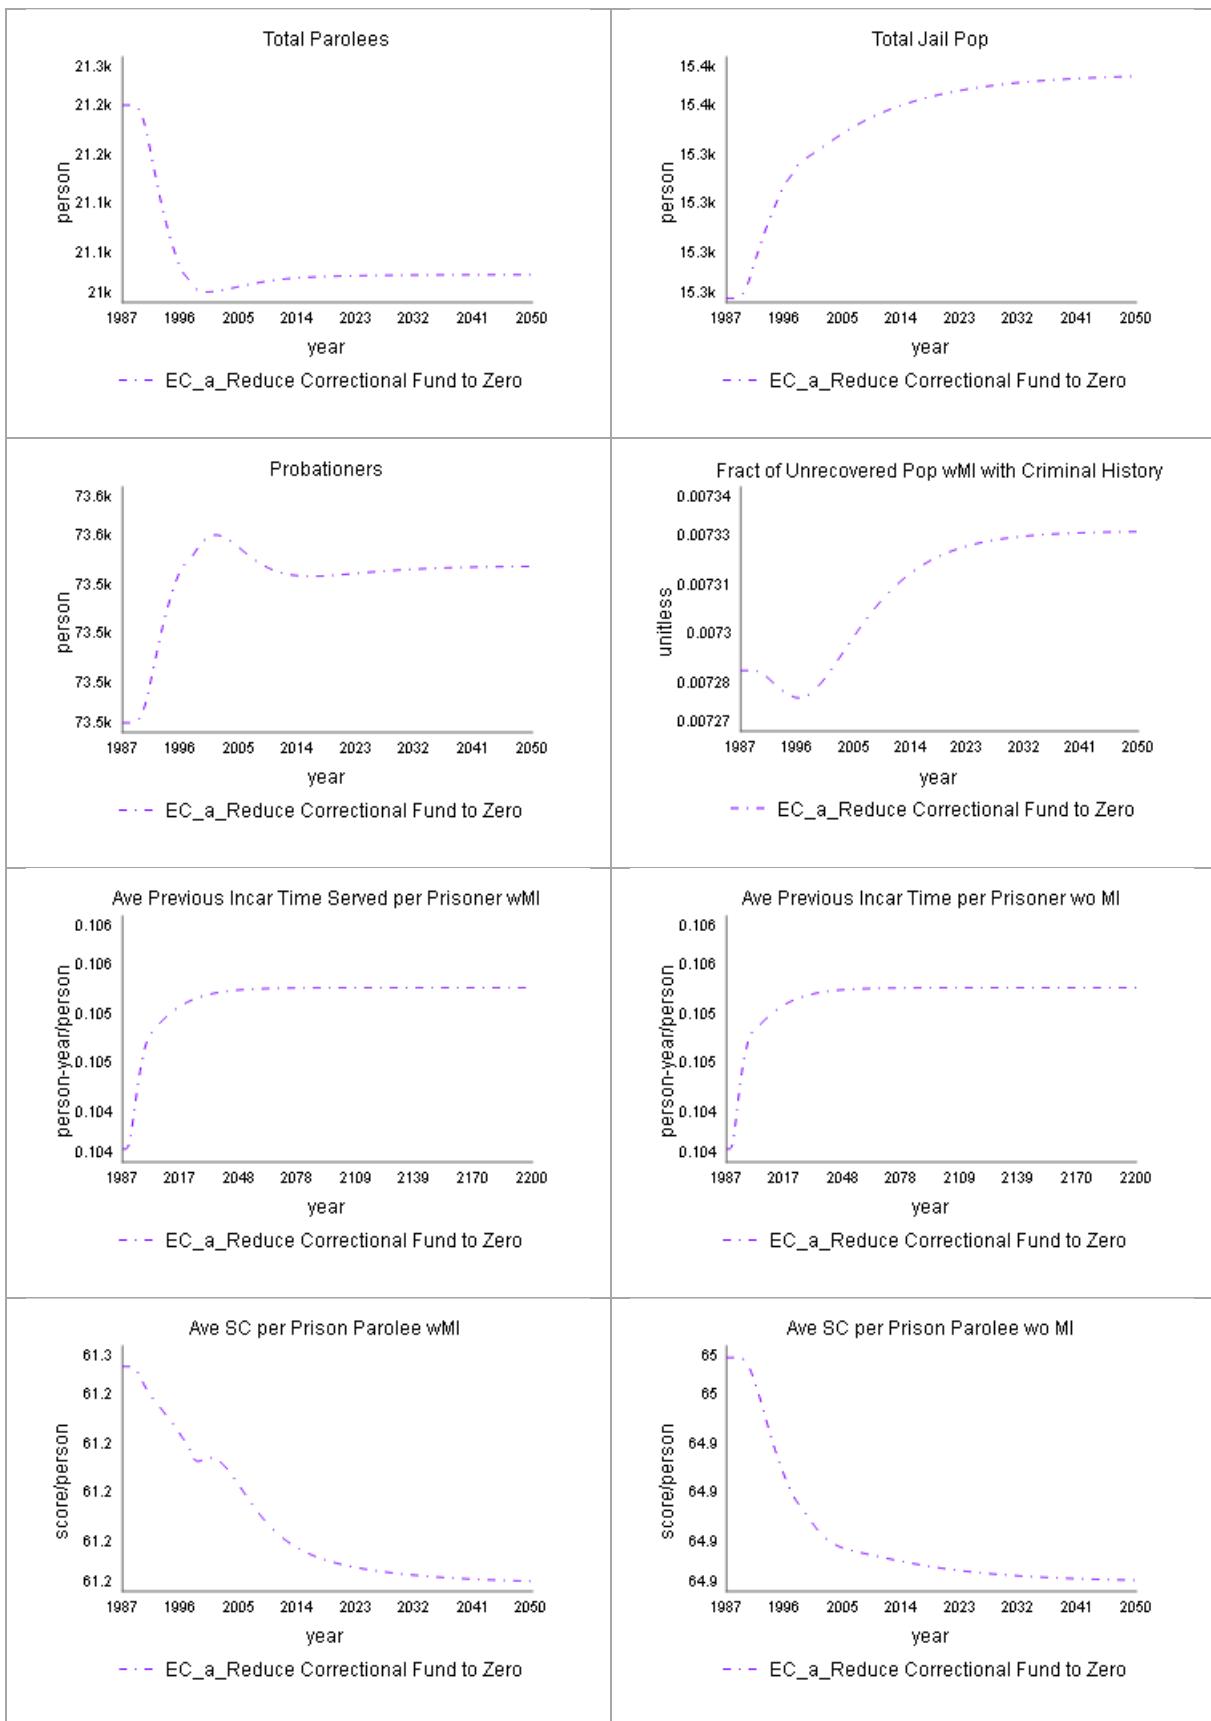

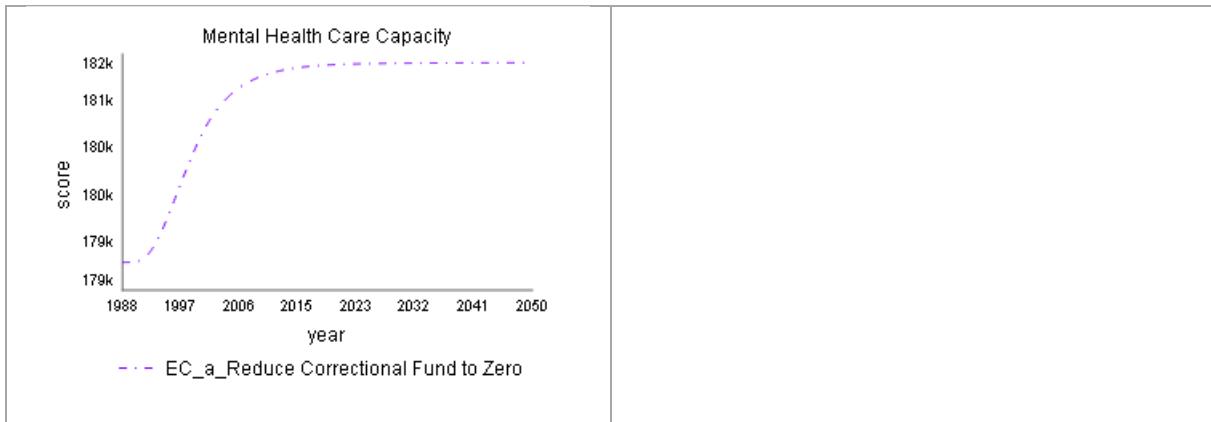

Extreme Condition Test 10a – Reduce Correctional Fund to Community Services to Zero

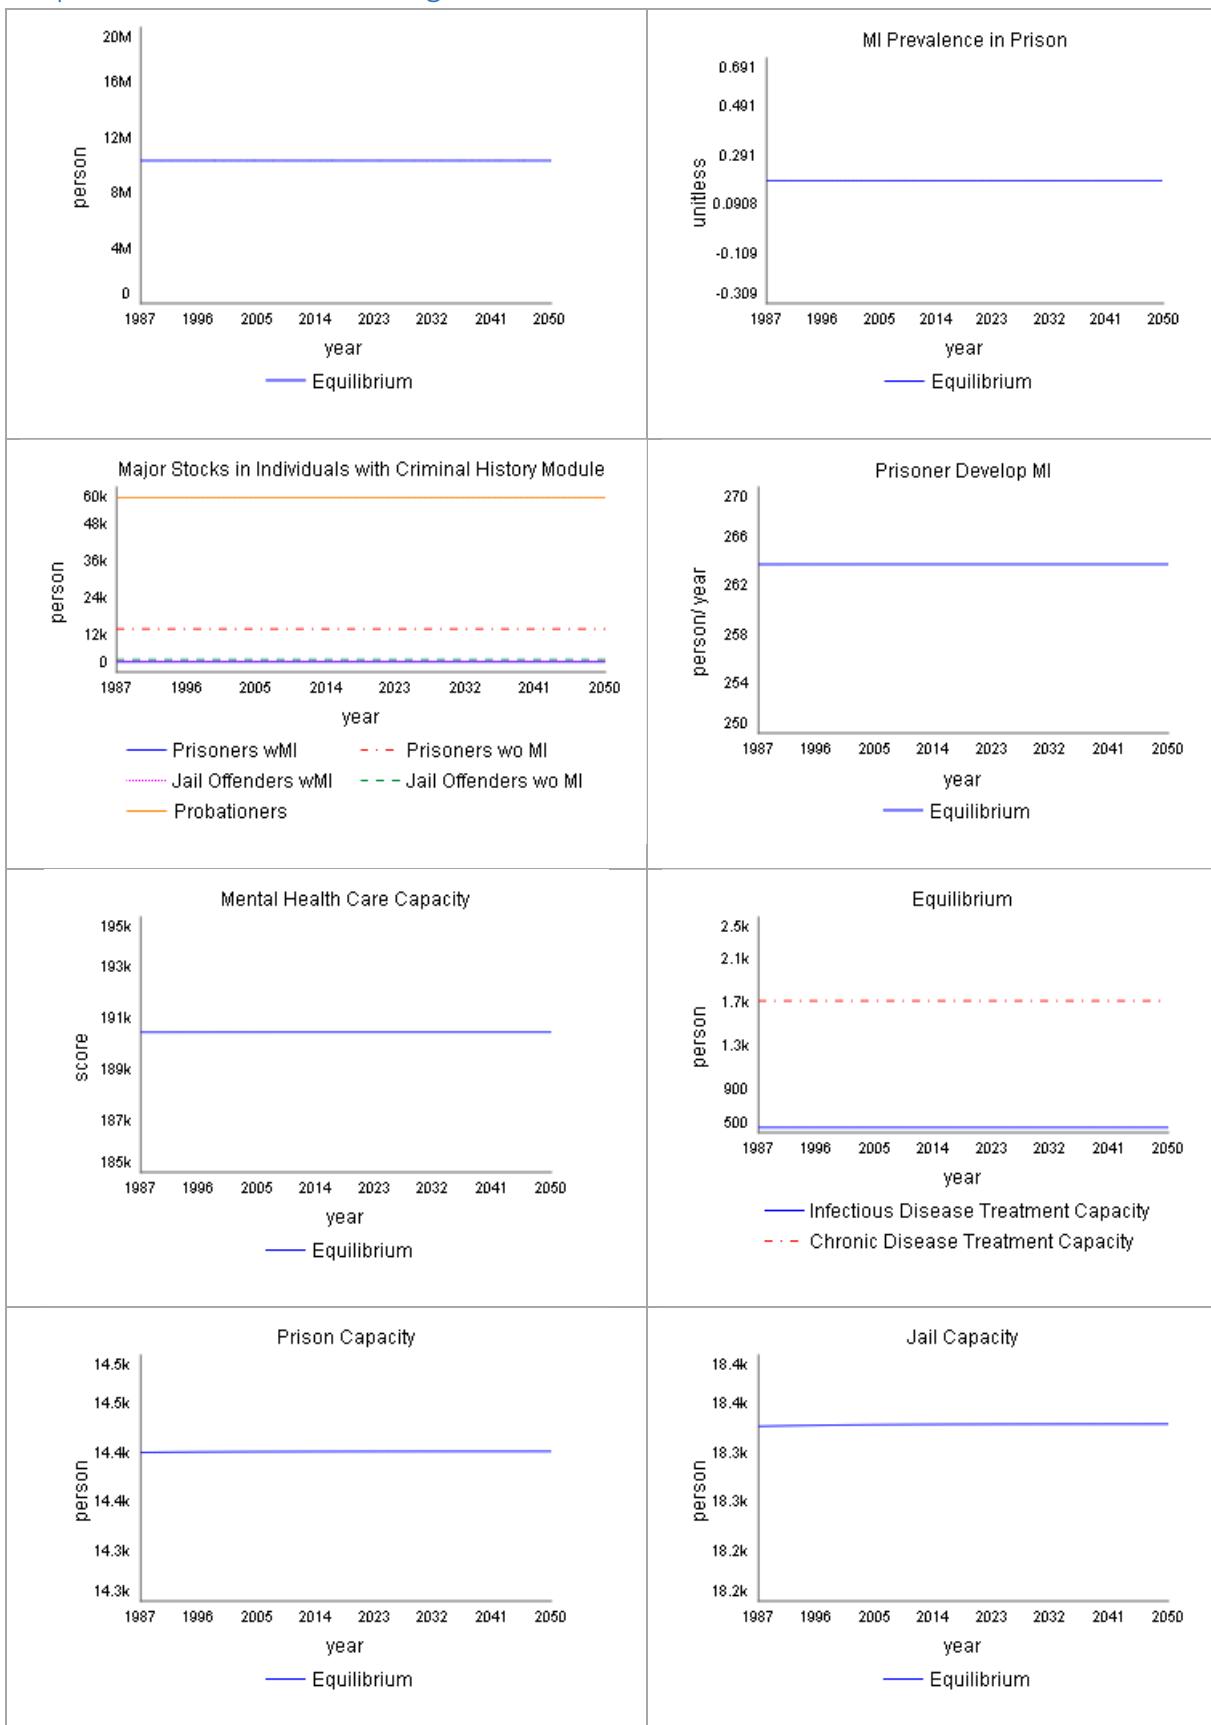

In this test, the correctional community service budget decreases to zero from 1988.

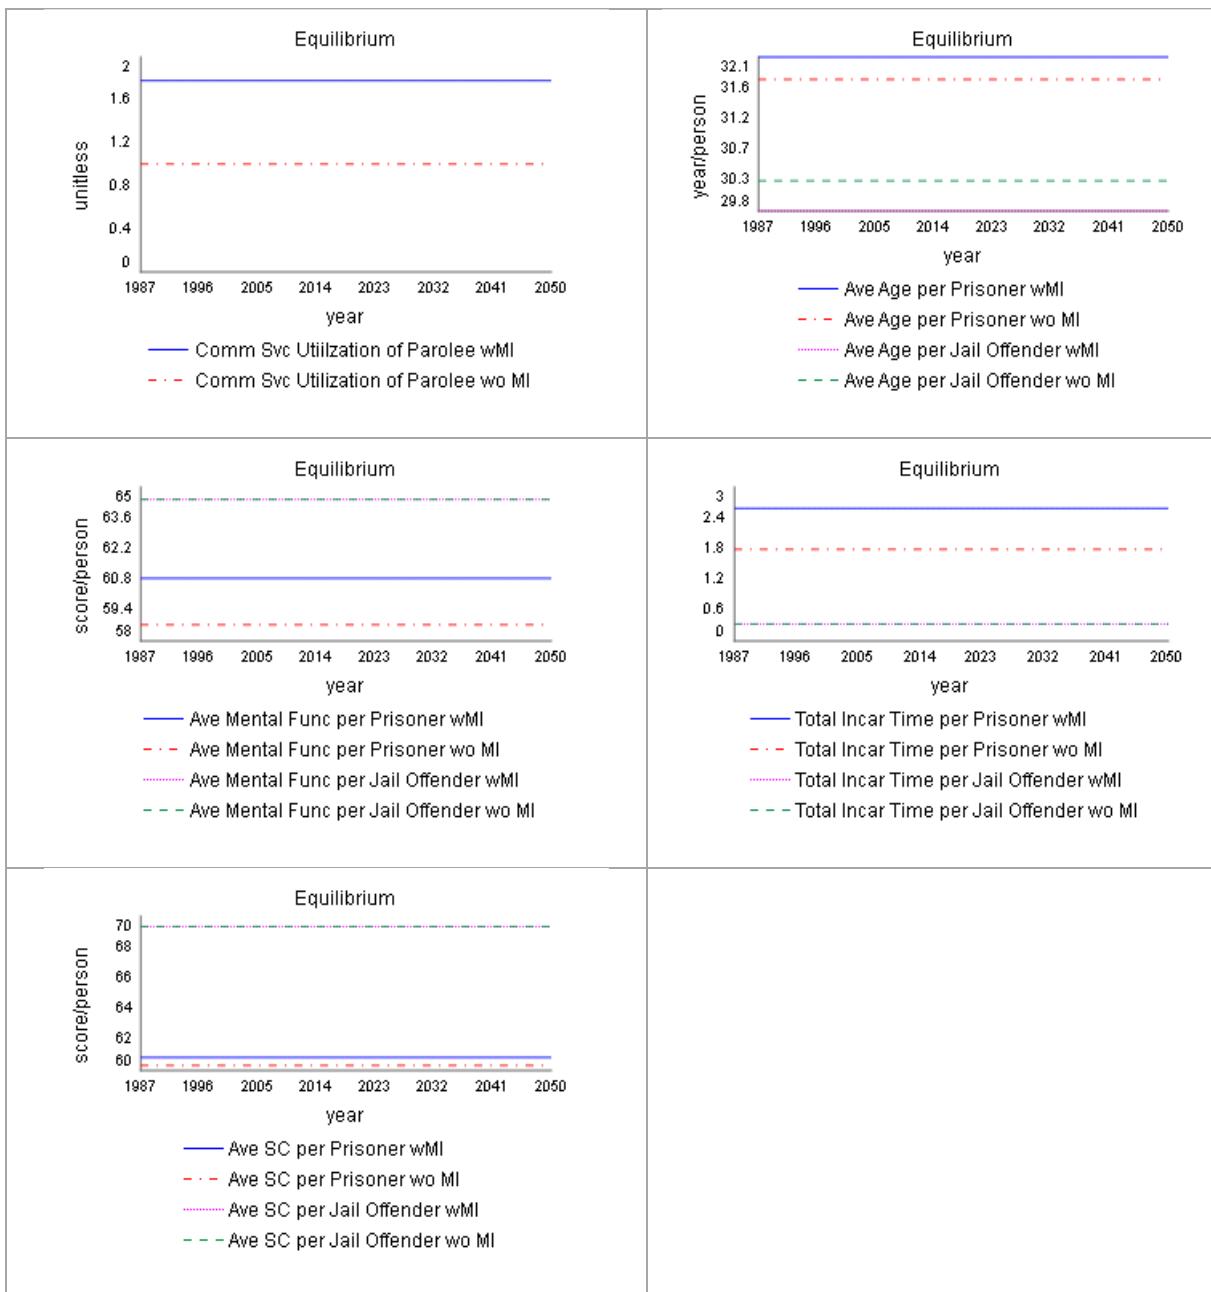

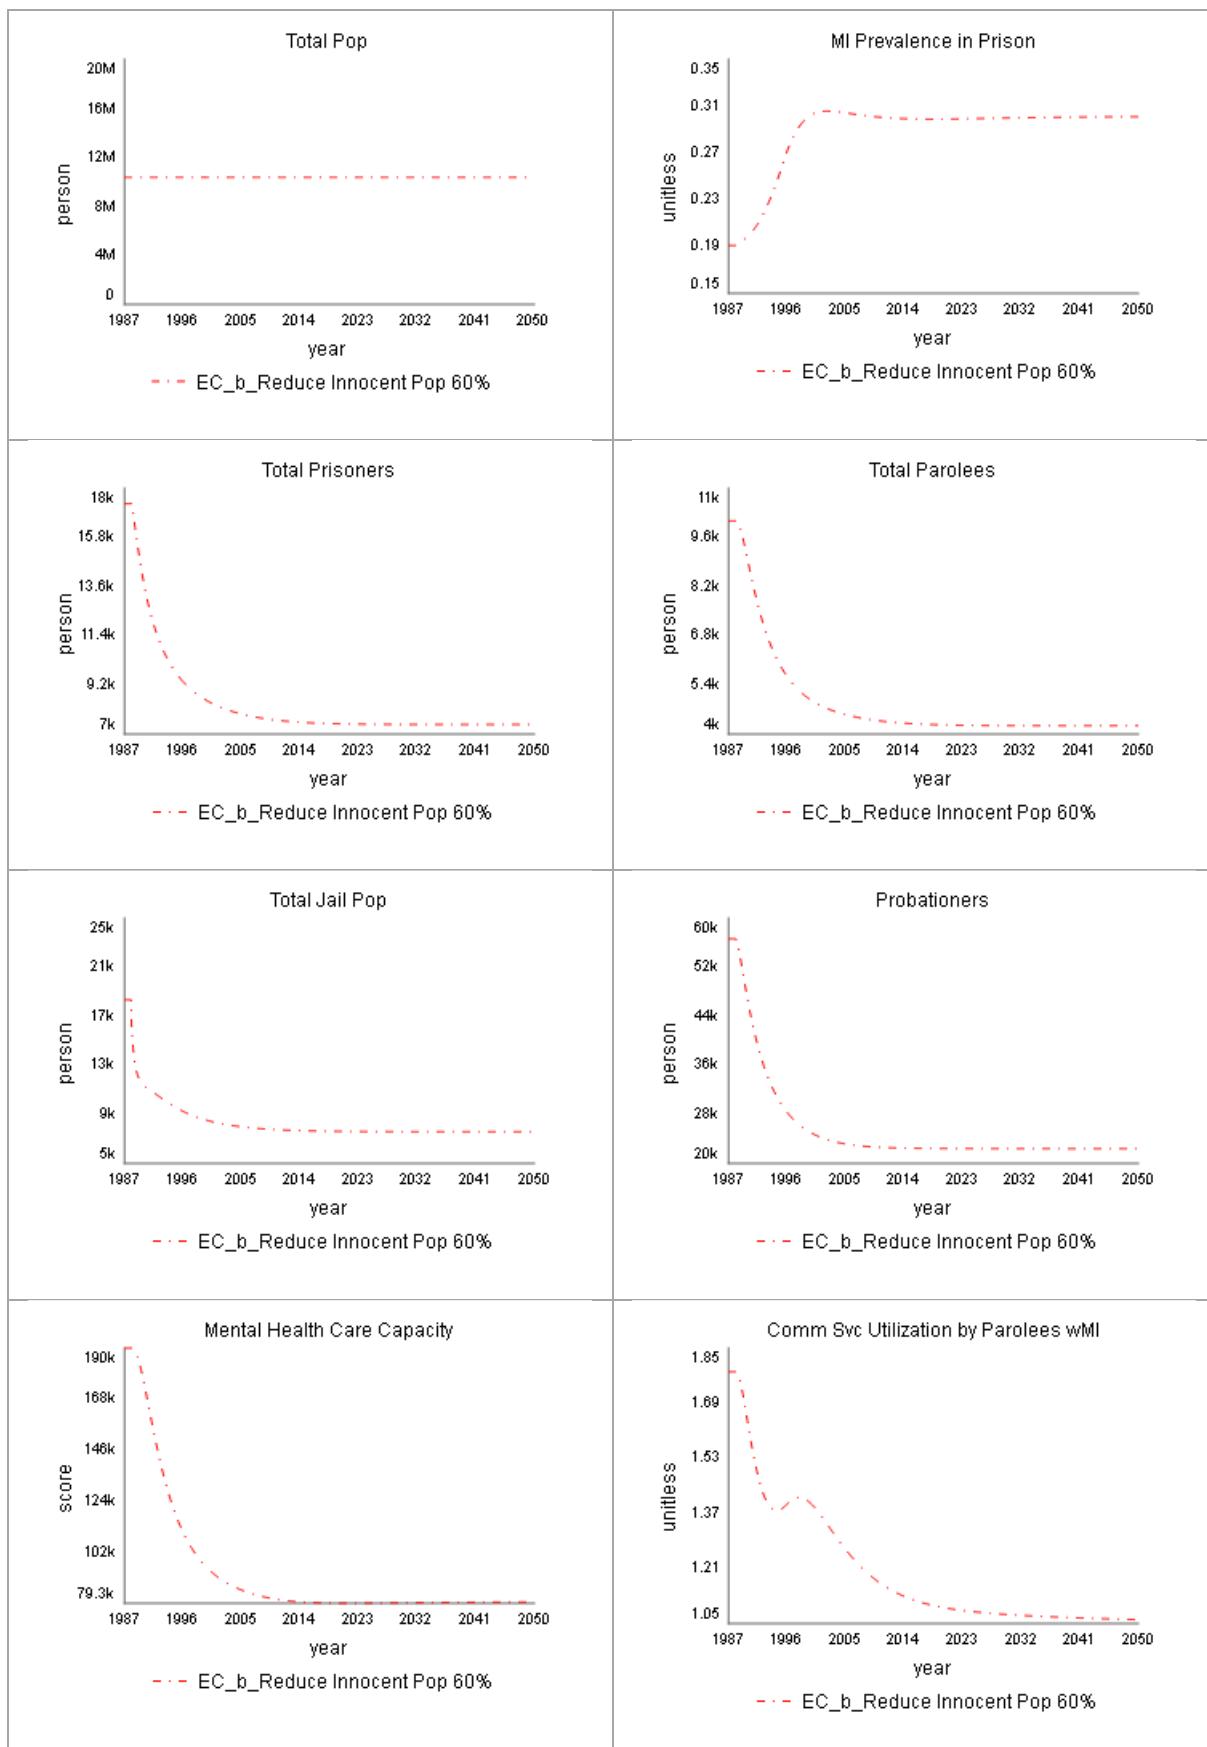

Equilibrium Test – Post-Realignment

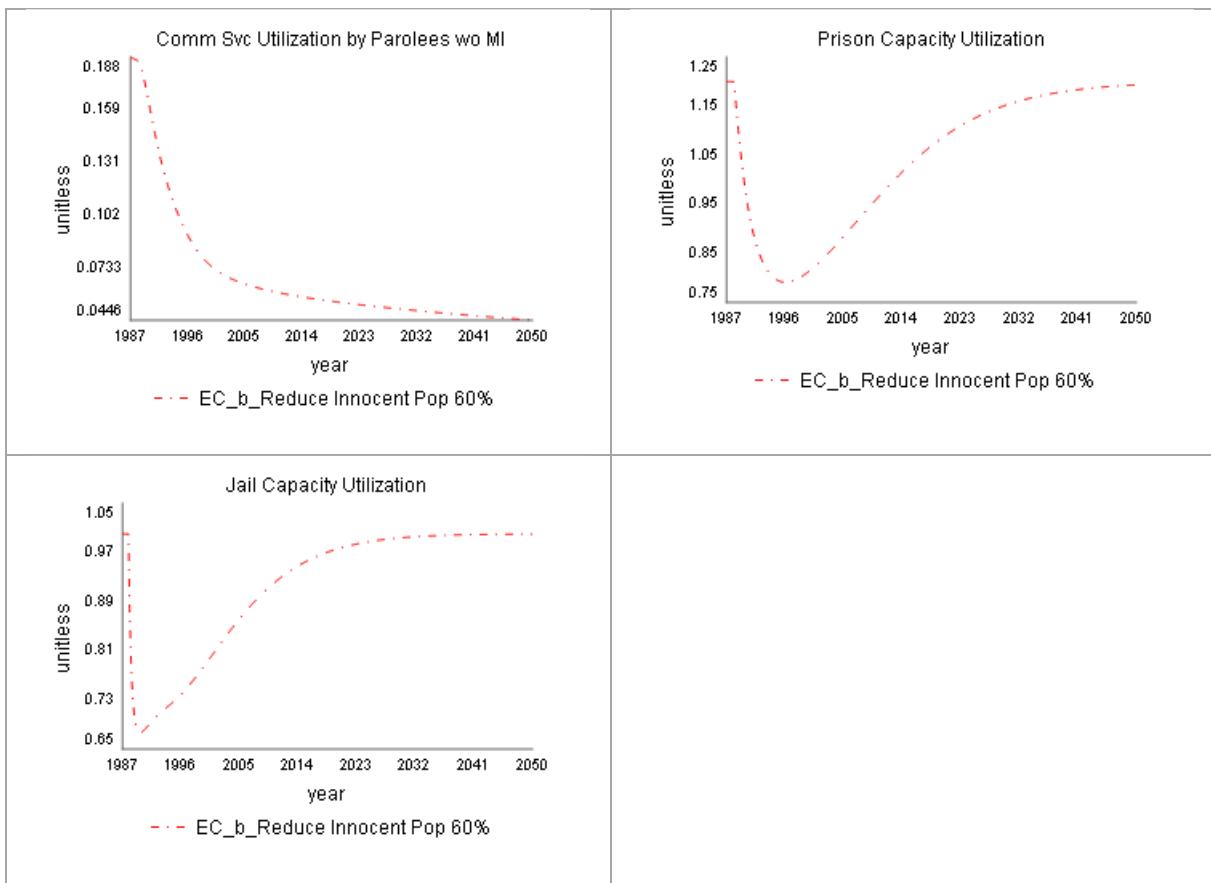

Extreme Condition Test 1b – Reduce Innocent Population 60%

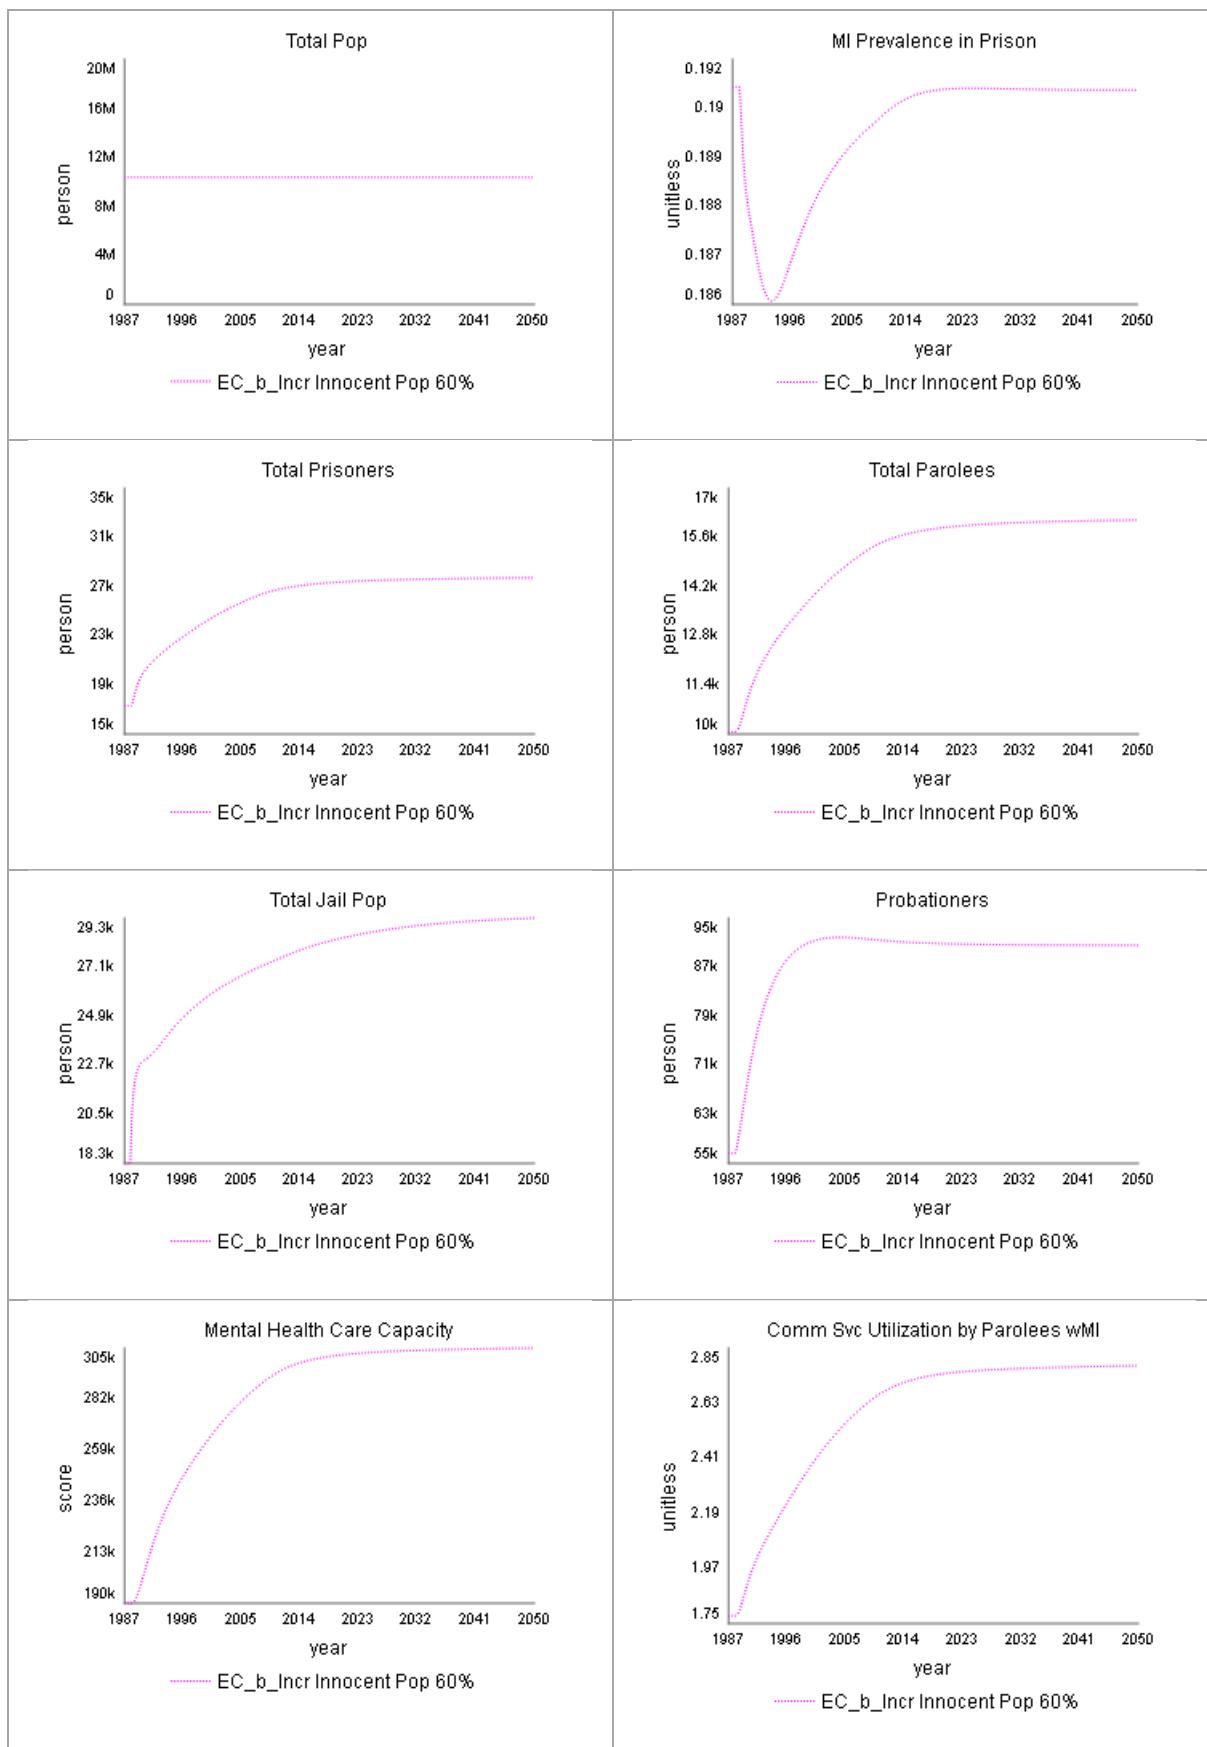

In this test, the innocent population reduces 60% from 1988 to 2050.

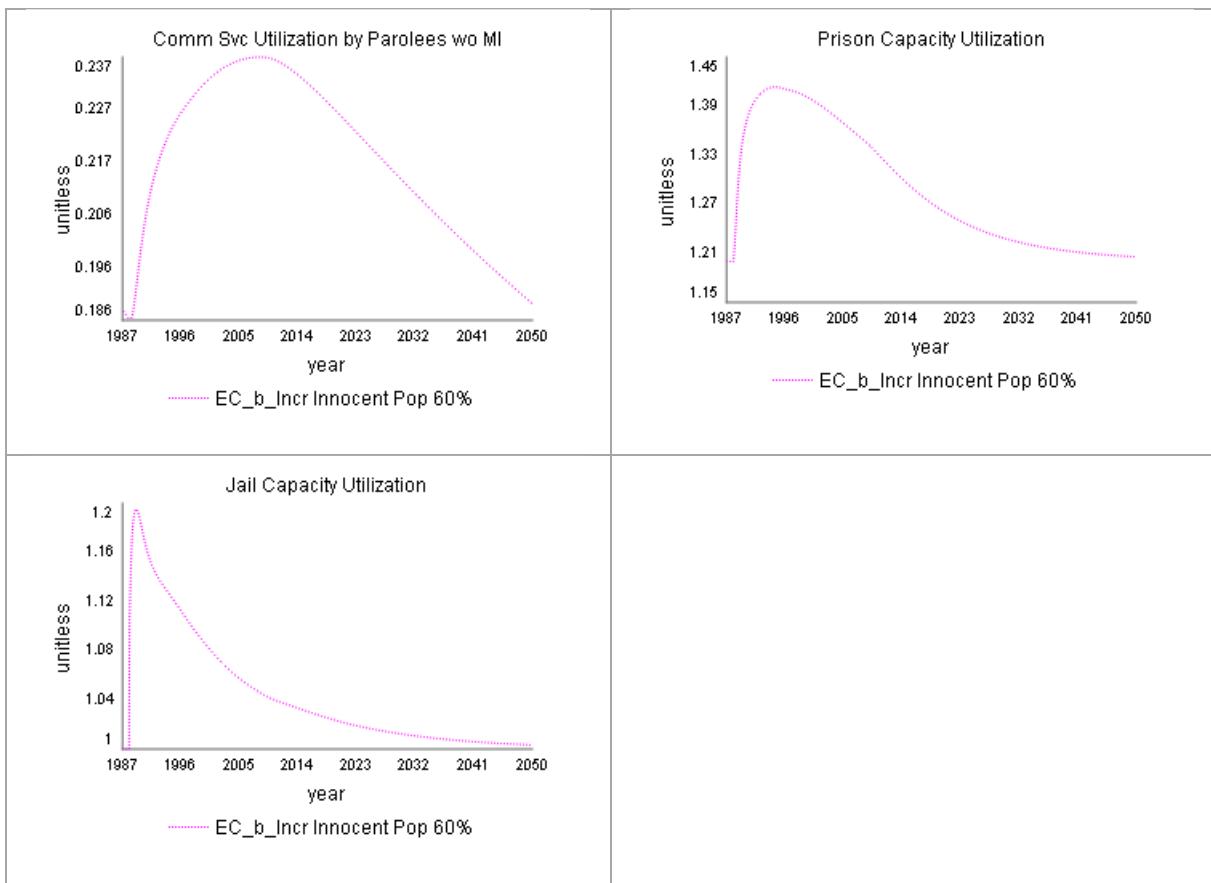

Extreme Condition Test 2b – Increase Innocent Population 60%

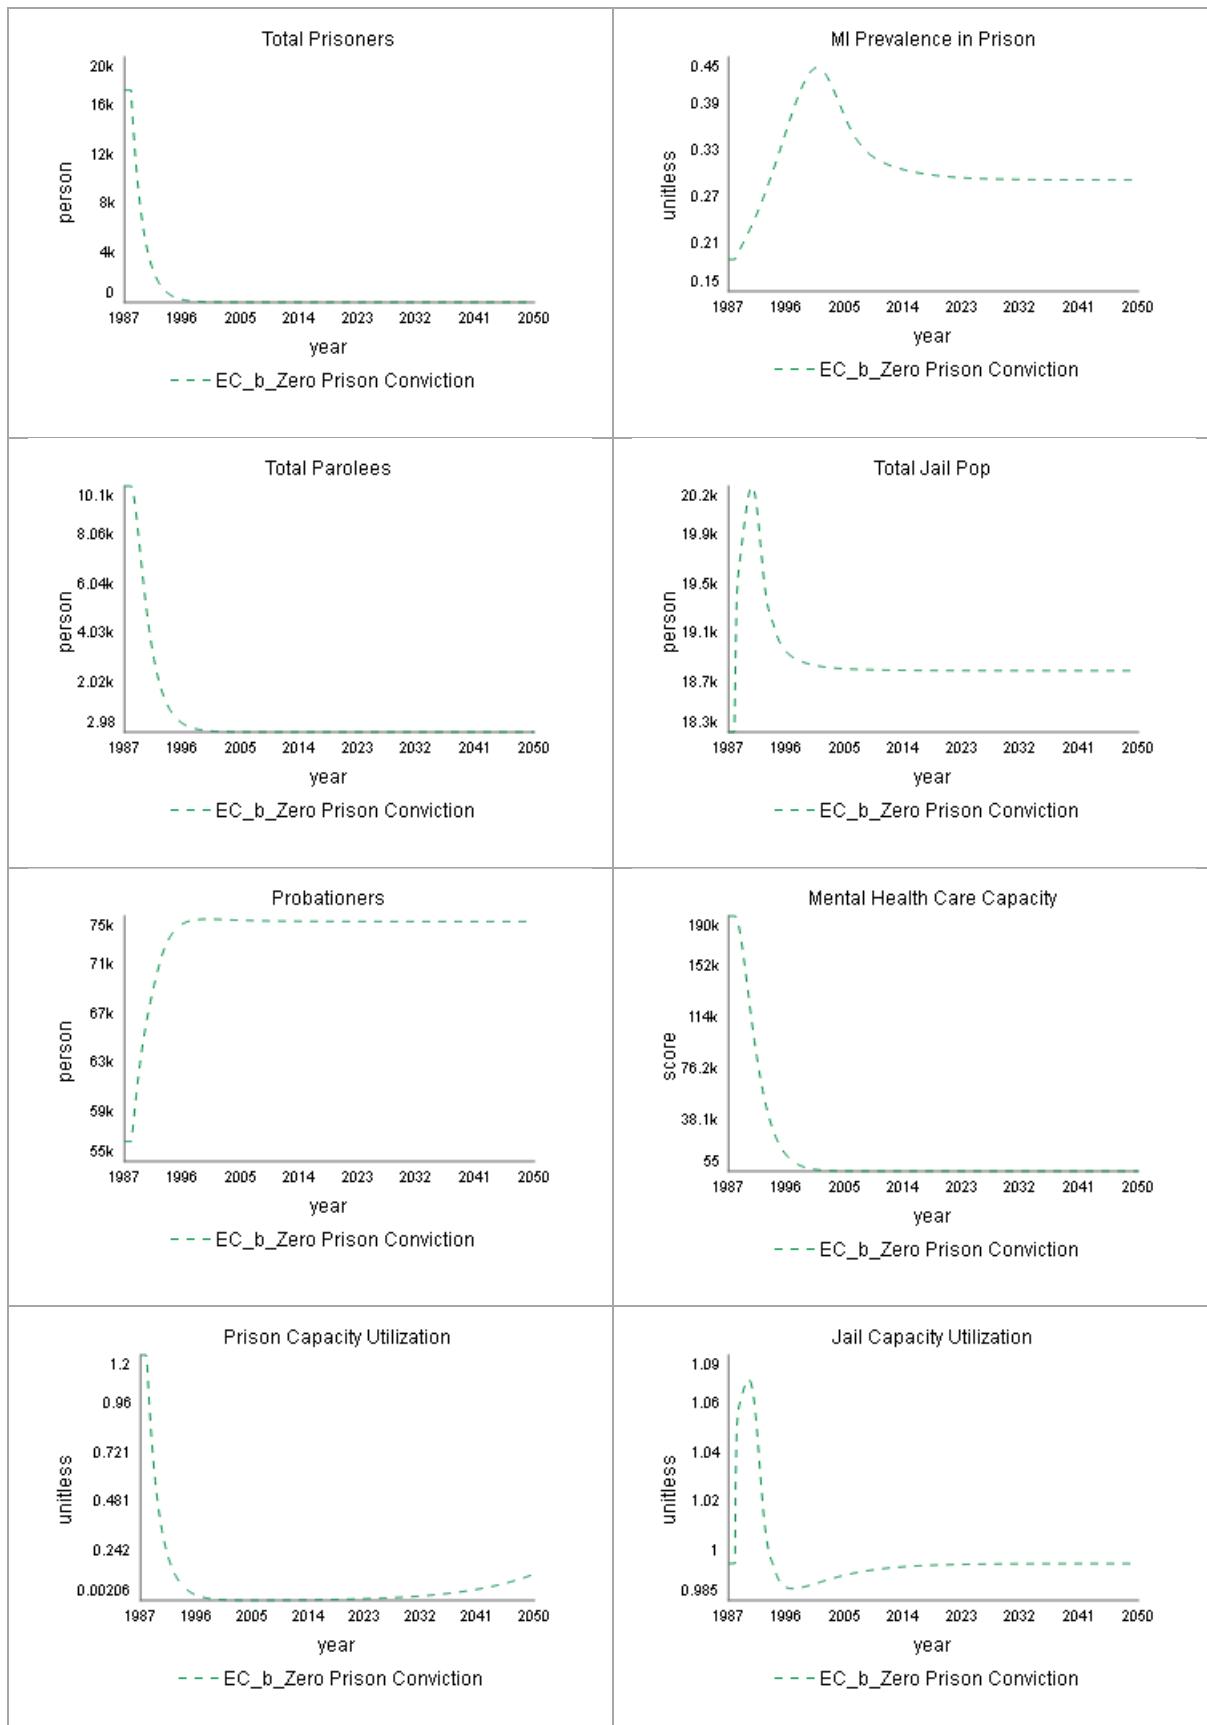

In this test, the innocent population increases 60% from 1988 to 2050.

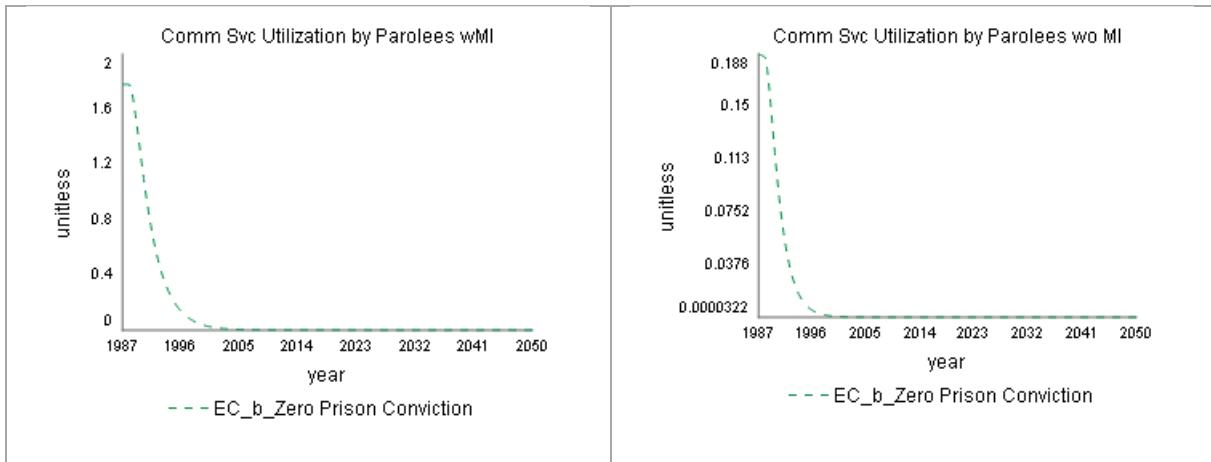

Extreme Condition Test 3b – Zero Fraction of Convicts with Prison Conviction

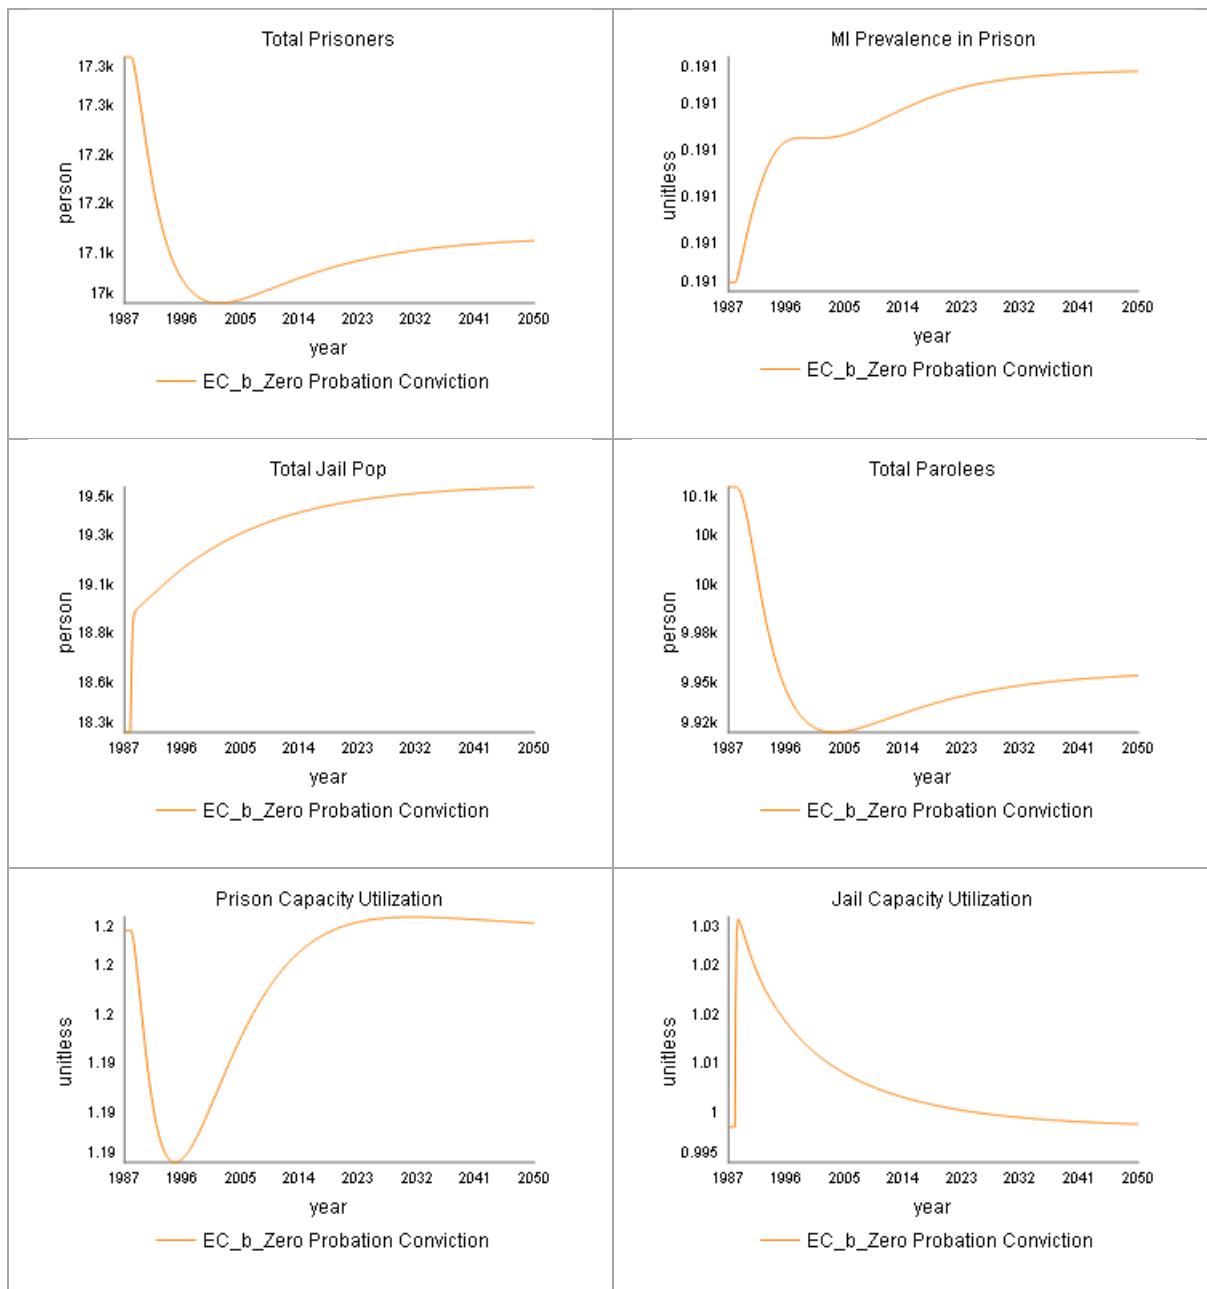

In this test, the fraction of convicts being convicted to prison sentence is reduced to zero from 1988.

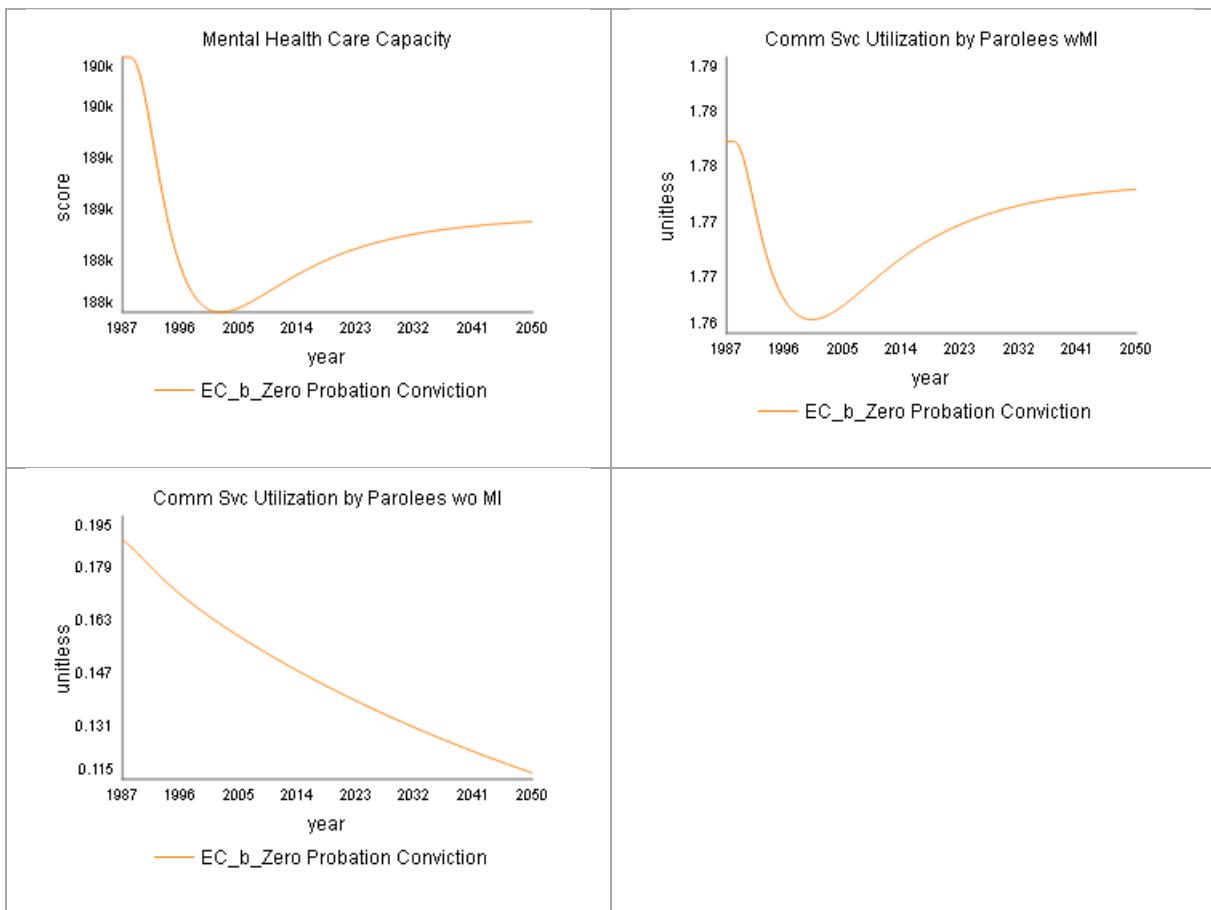

Extreme Condition Test 4b – Zero Fraction of Convicts with Probation Conviction

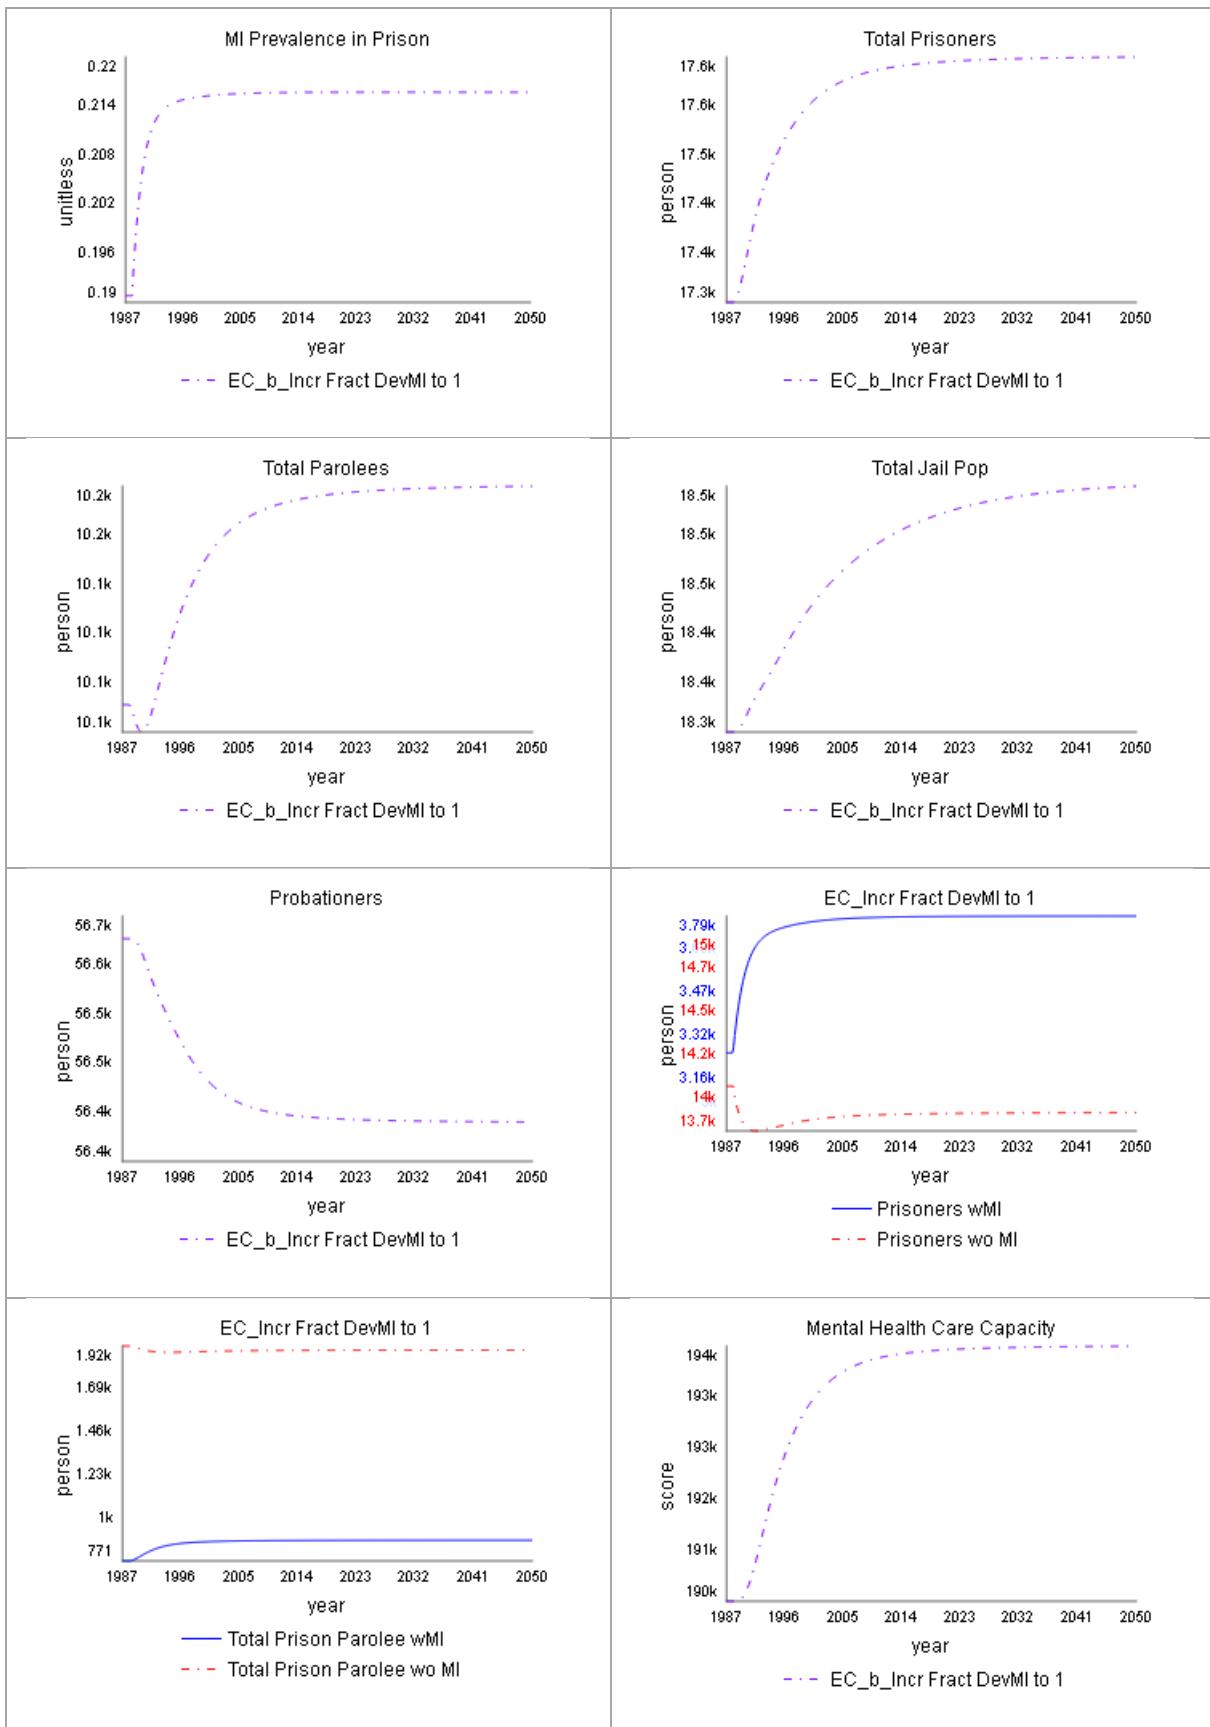

In this test, the fraction of convicts being convicted to probation sentence is reduced to zero from 1988.

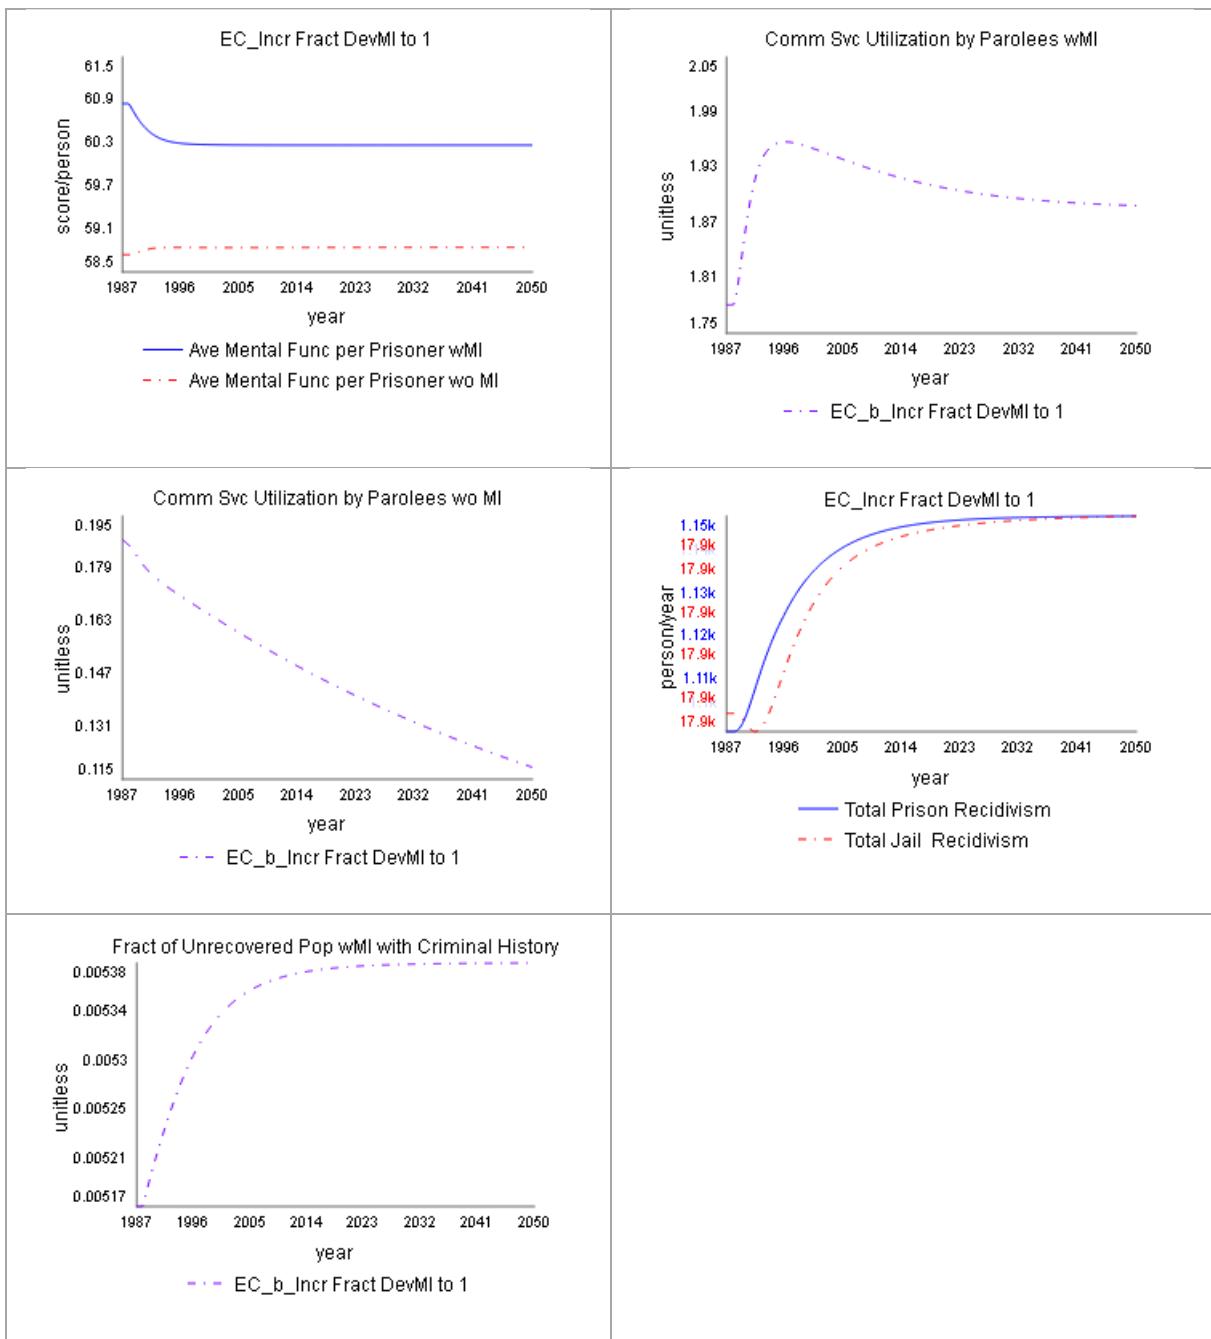

Extreme Condition Test 5b – Increase Fraction of Prisoners wo MI Develop MI to 1

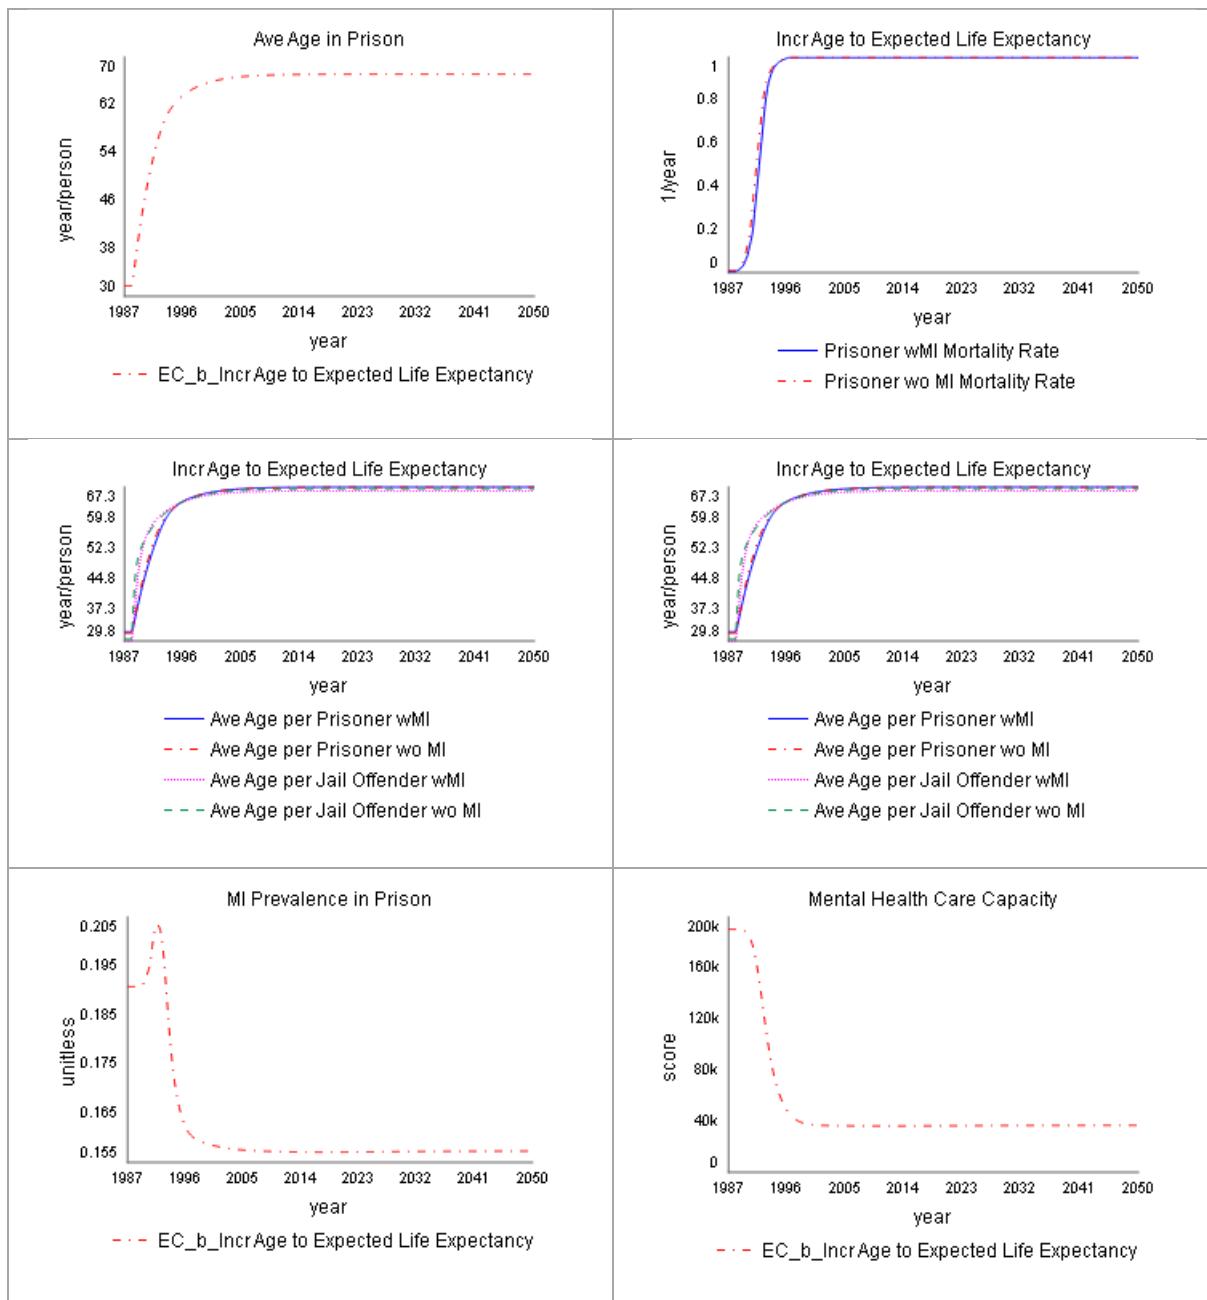

In this test, “fract prisoners devMI” increases from 0.02 per year to 1 per year from 1988 onwards.

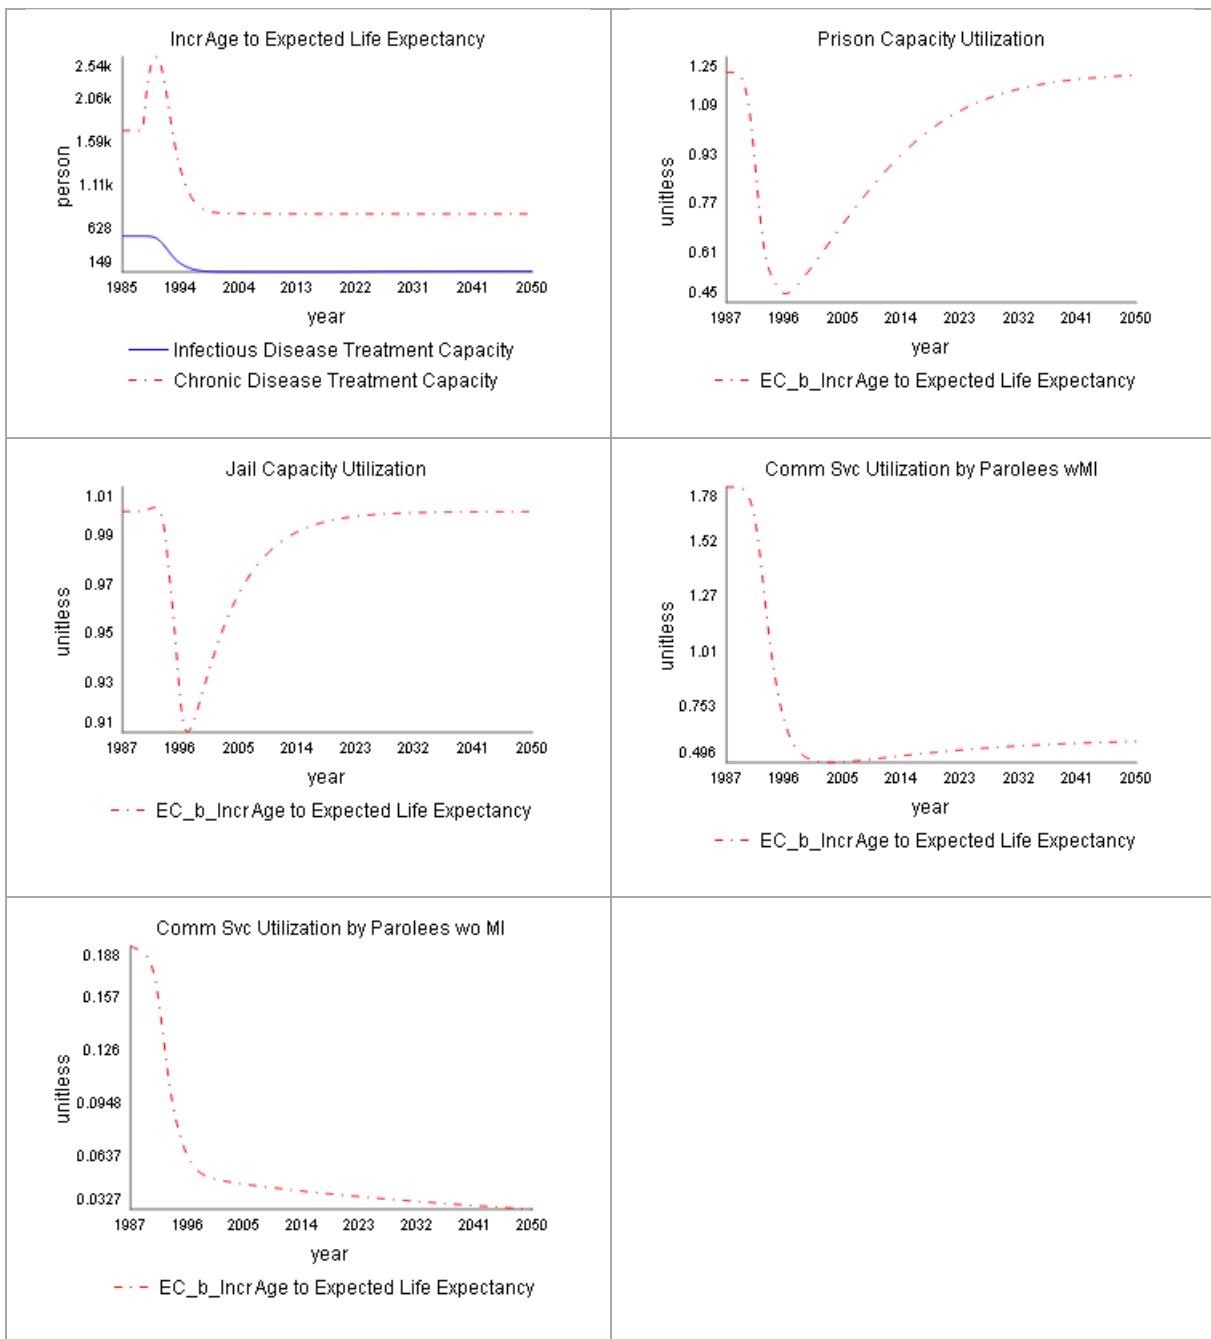

Extreme Condition Test 6b – Increase Initial Age at First Commitment to the Expected Life Expectancy of Prisoners

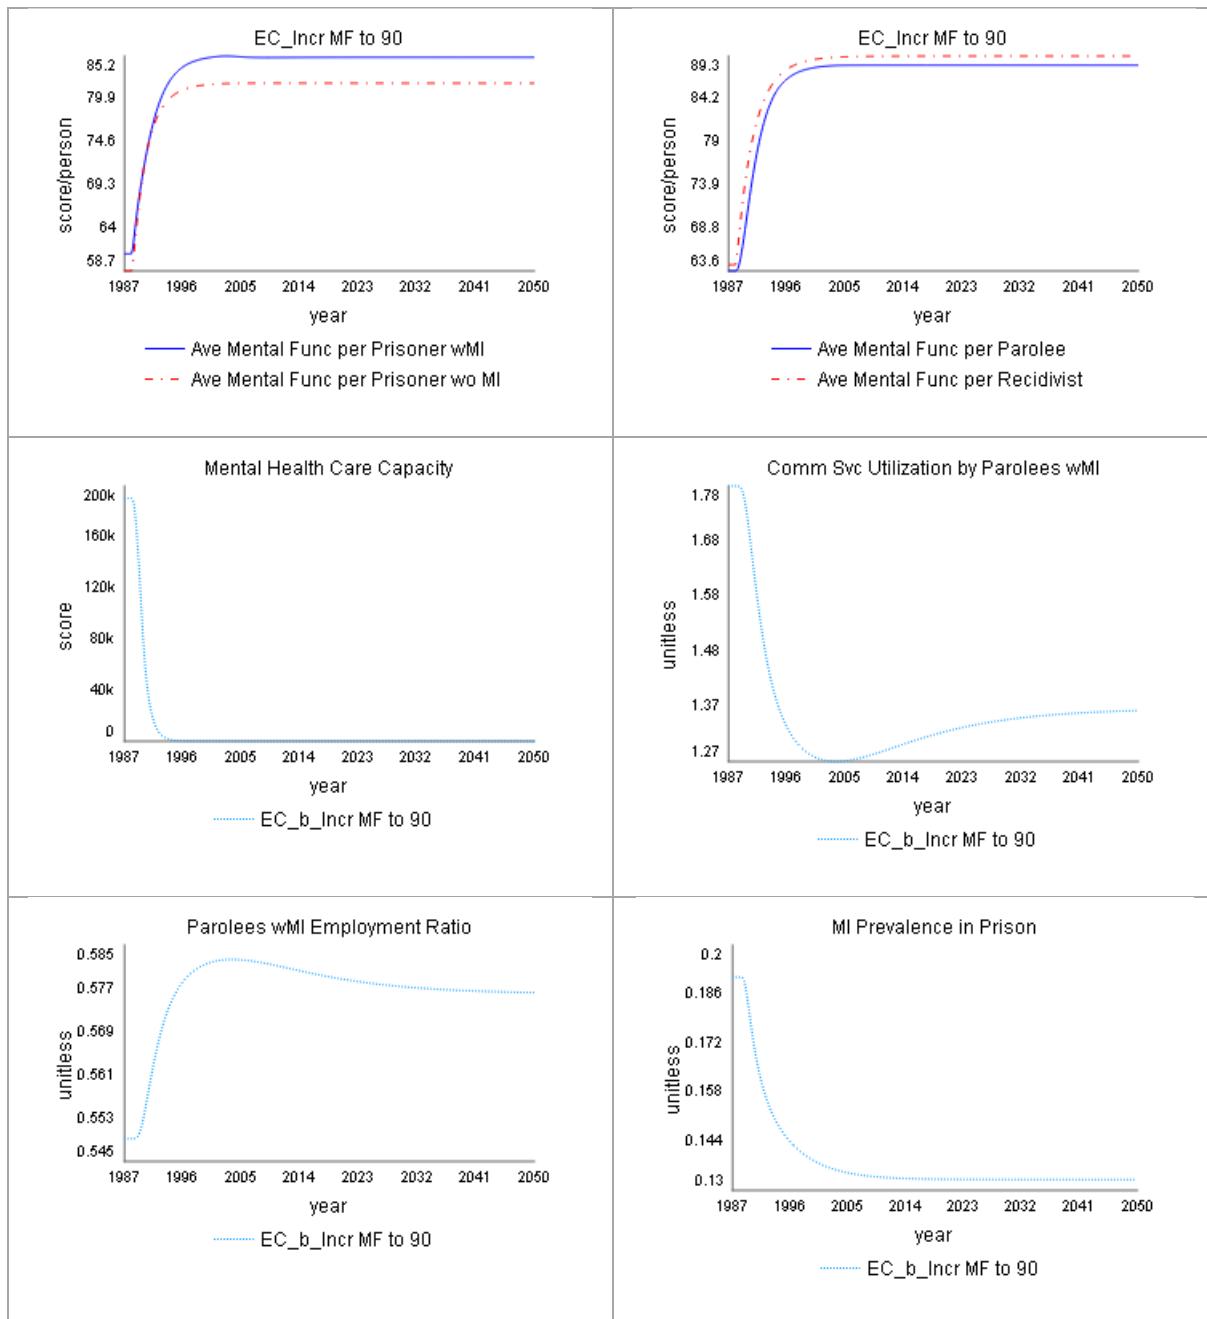

In this test, the initial age at first commitment increases from 28 to 65 from 1988.

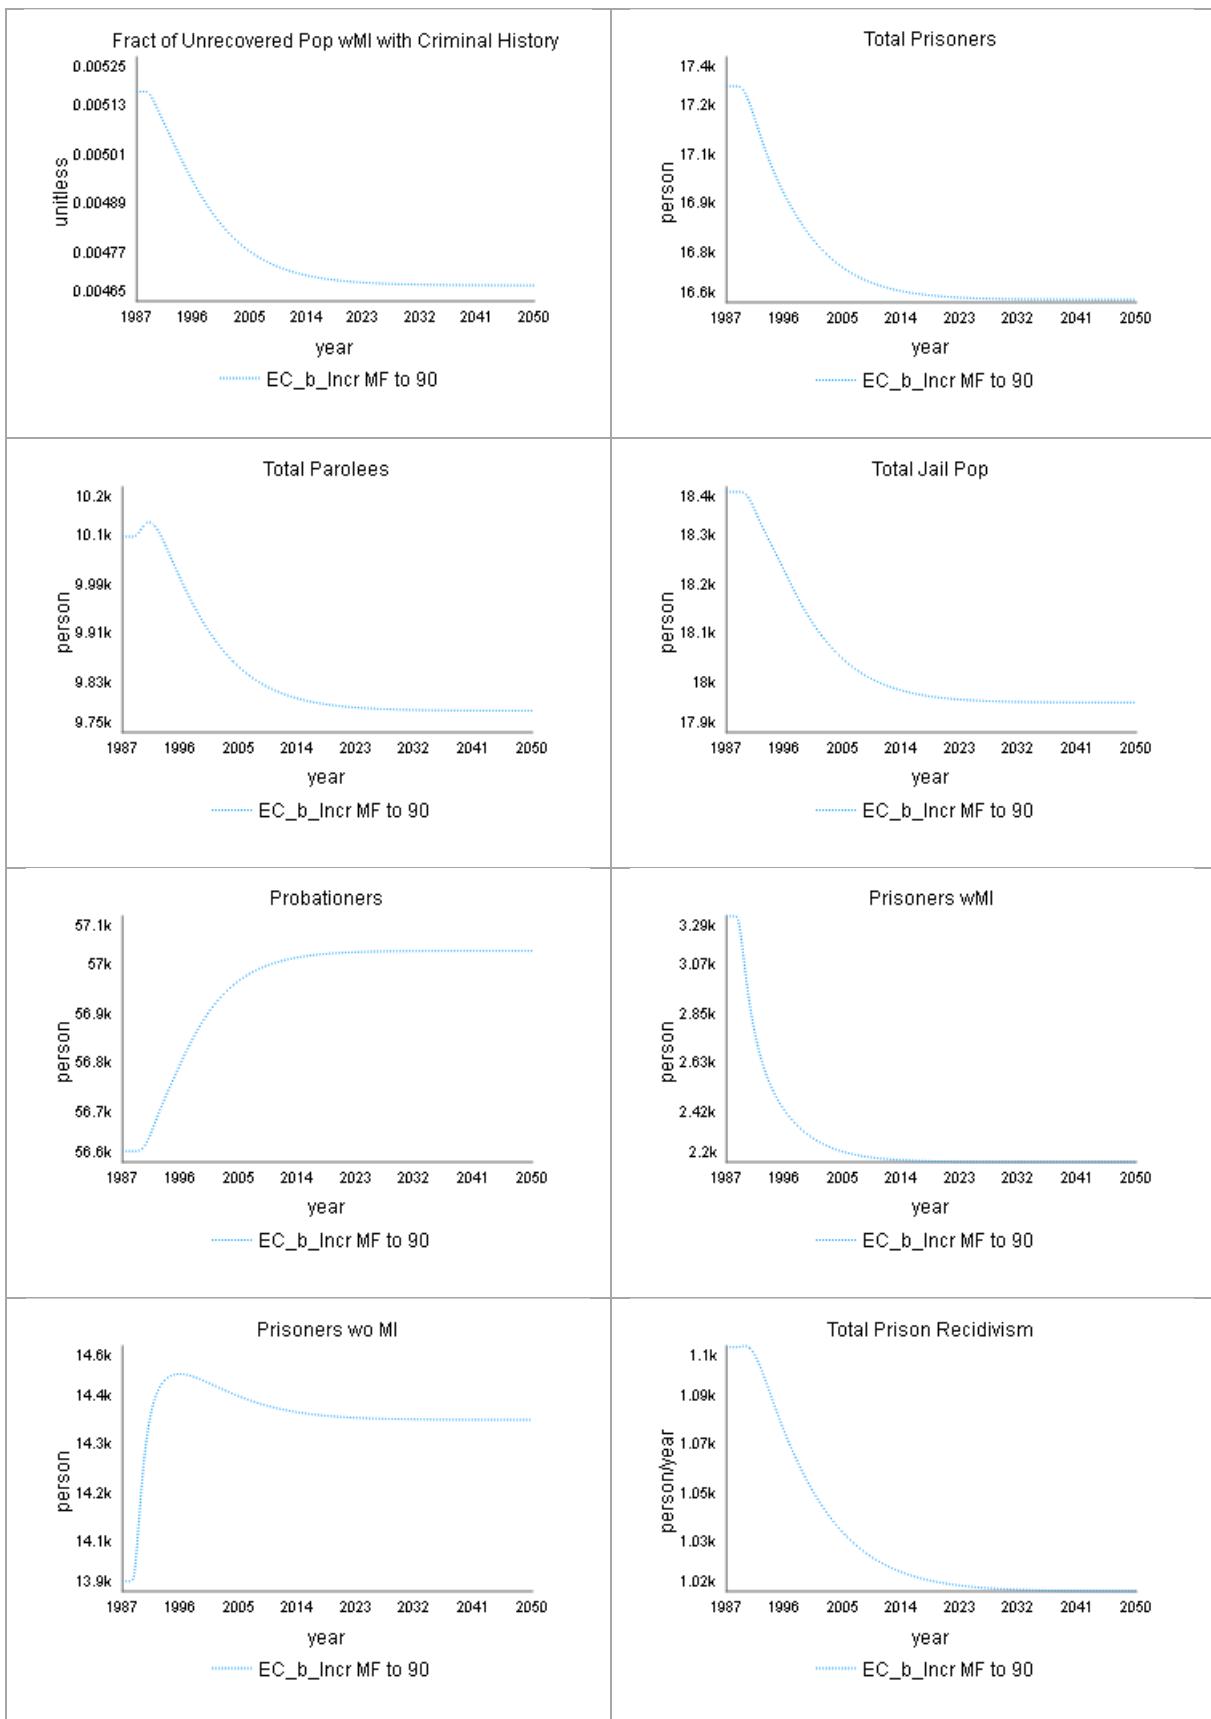

Extreme Condition Test 7b – Increase Average Mental Functions per New Arrestee to 90

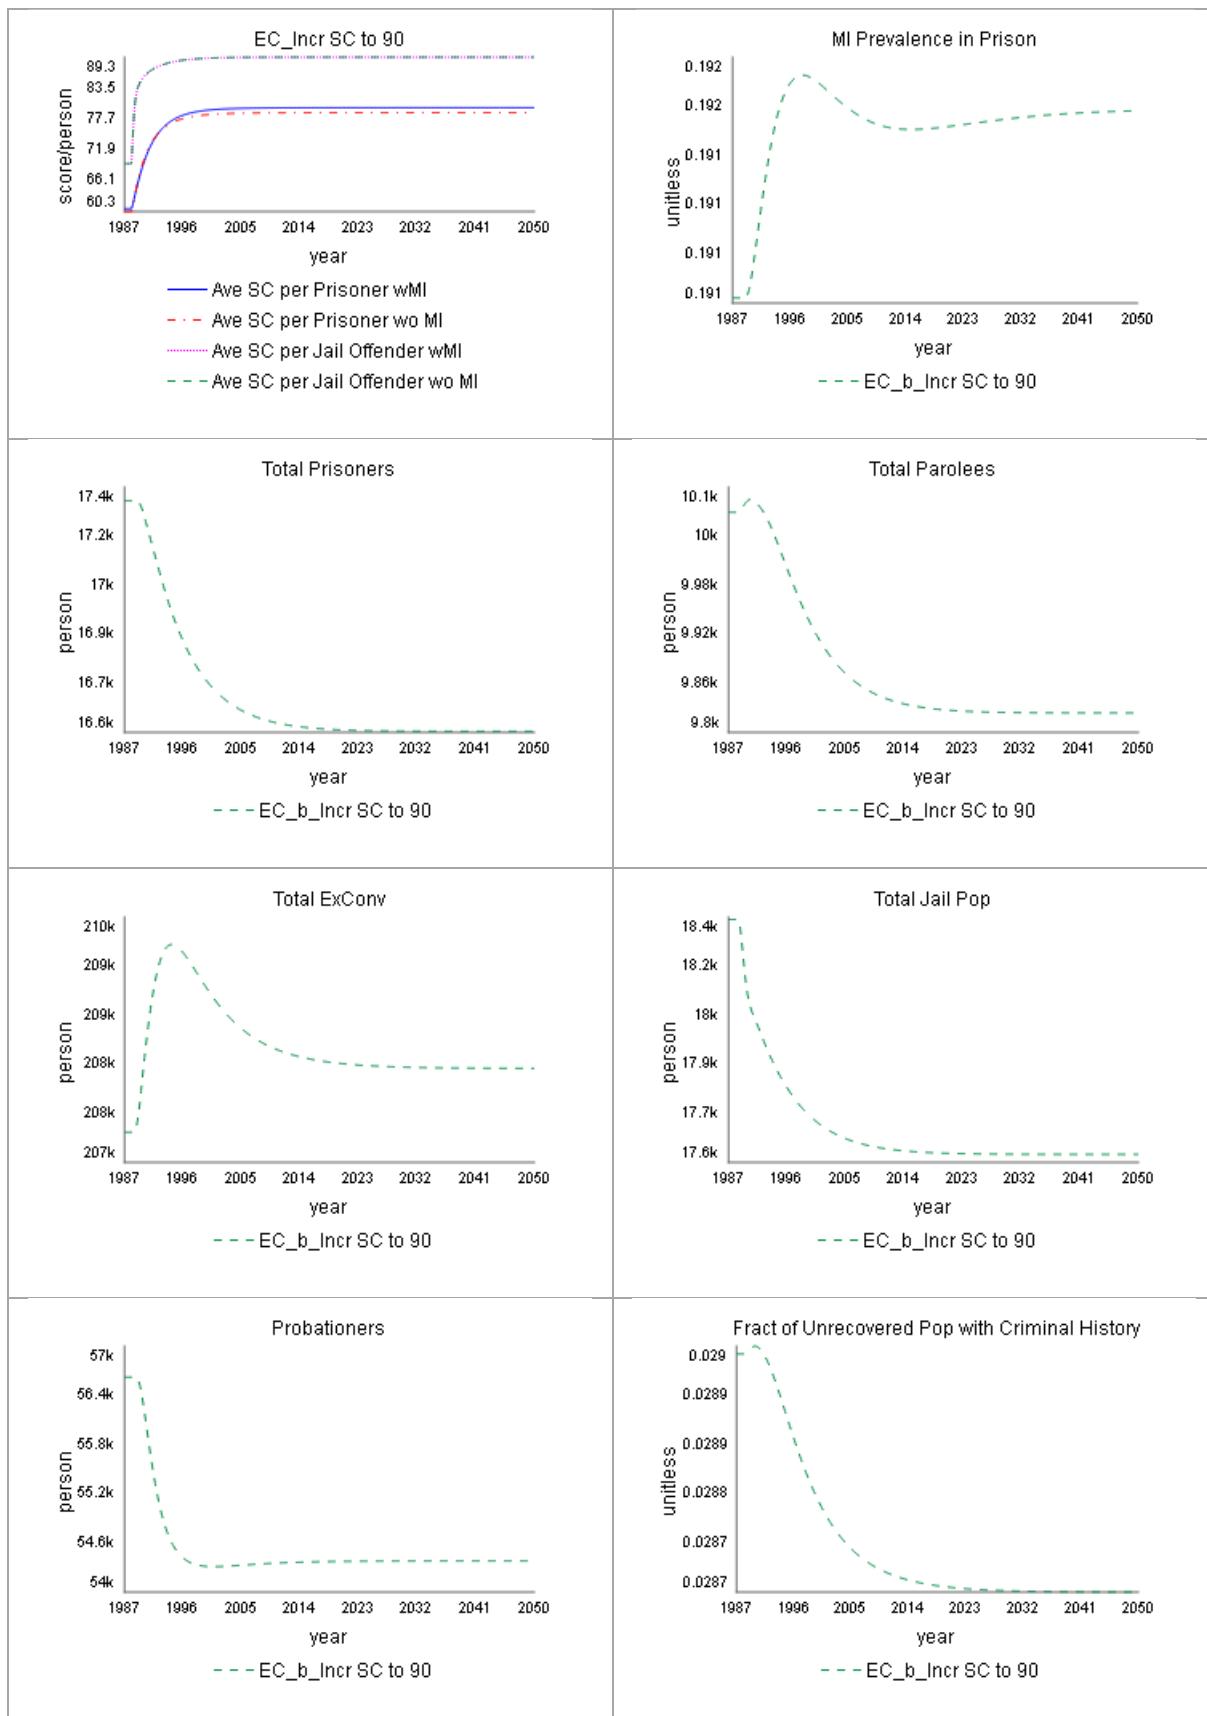

In this test, the average mental functions per new arrestee increases from 65 score/person to 90 score/person from 1988.

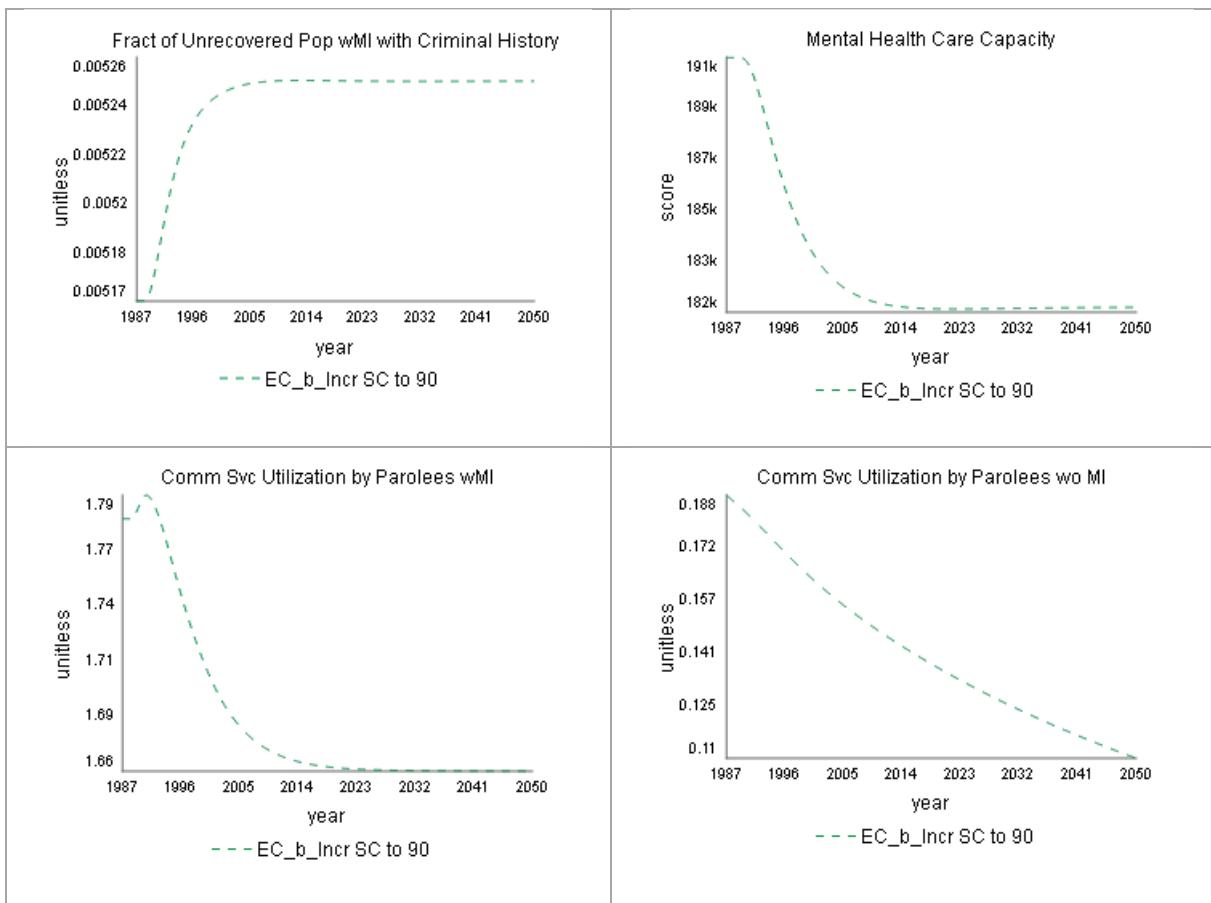

Extreme Condition Test 8b – Increase Social Capital per New Arrestee to 90

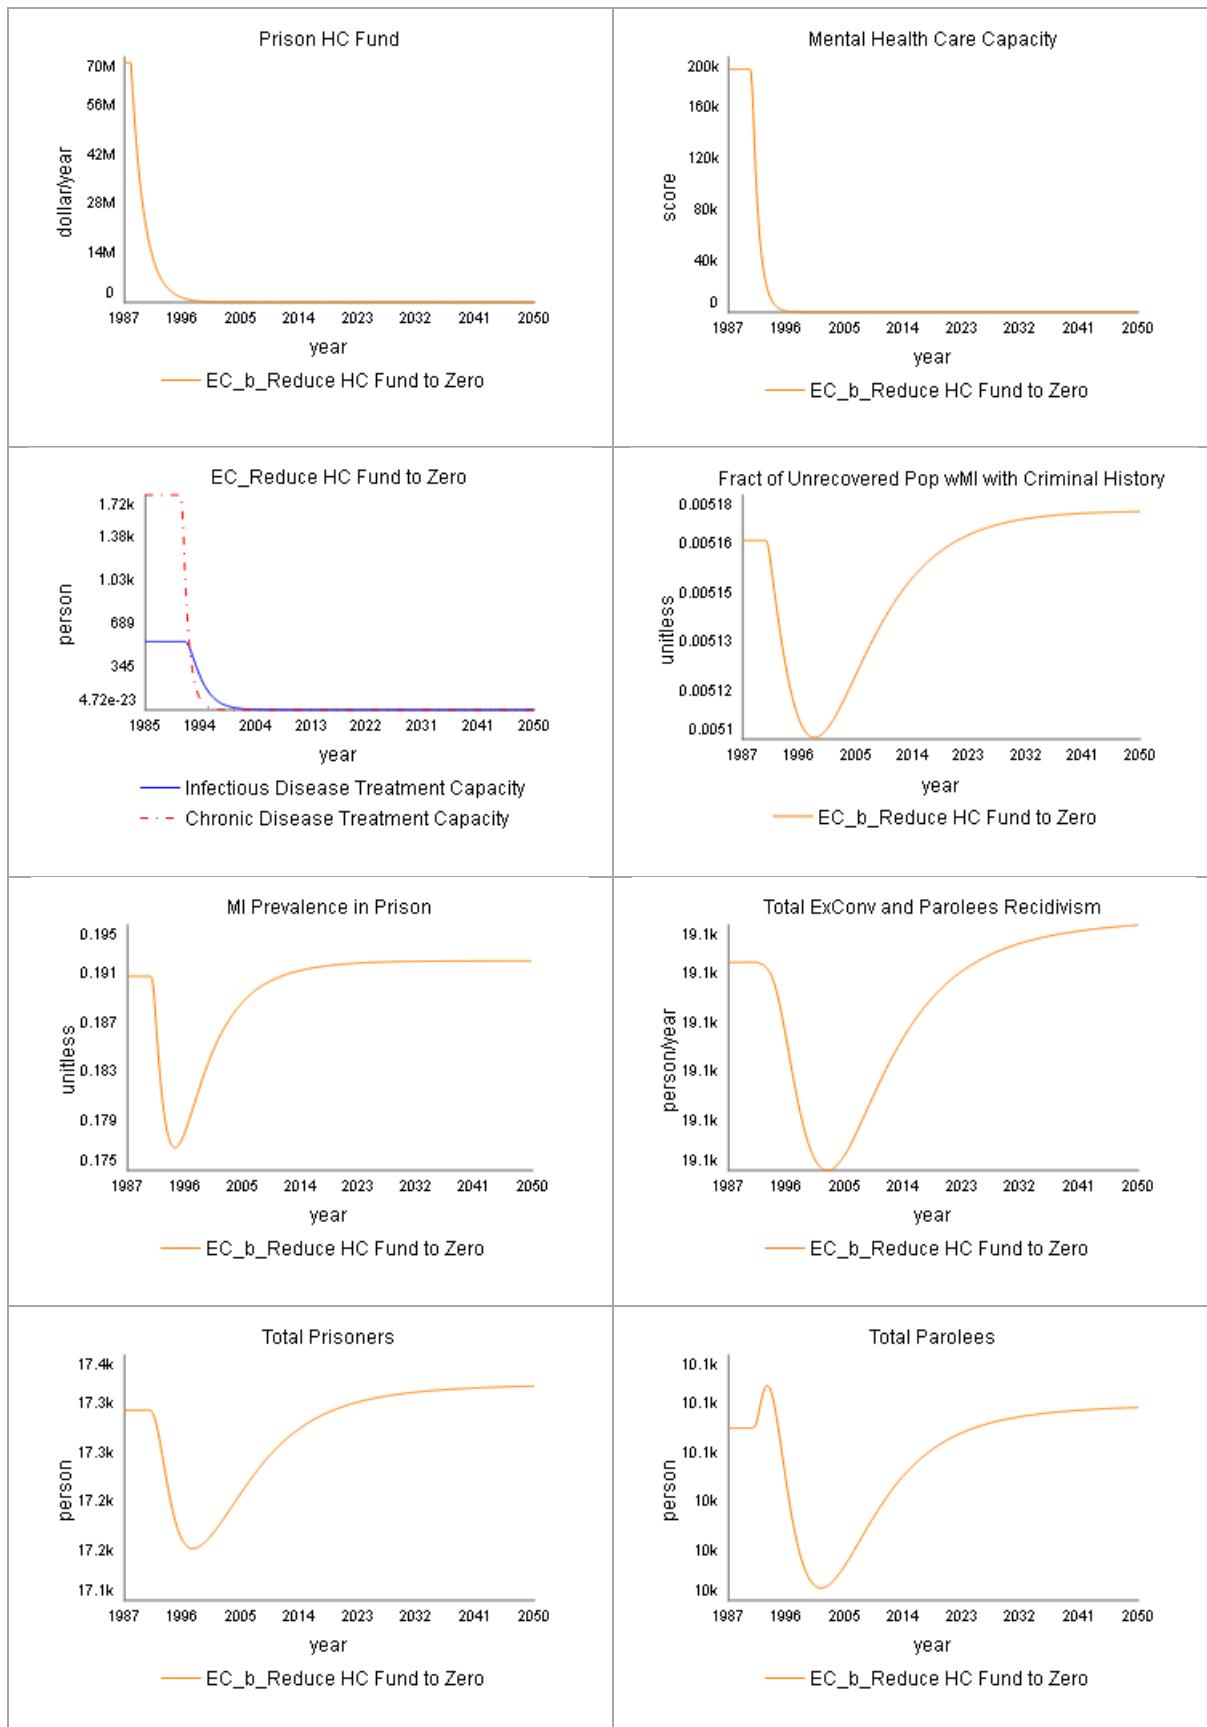

In this test, the average mental functions per new arrestee increases from 70 score/person to 90 score/person from 1988.

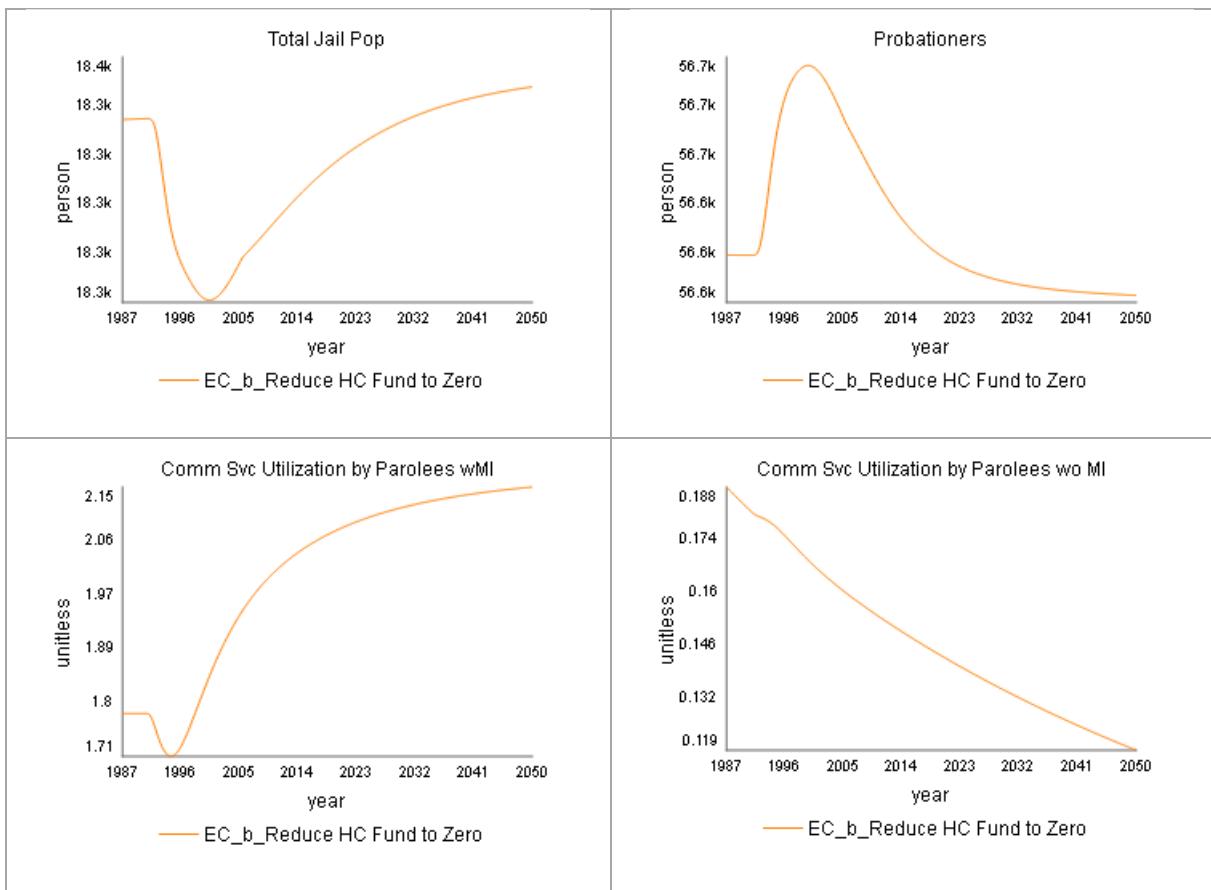

Extreme Condition Test 9b – Reduce Prison Health Care Fund to Zero

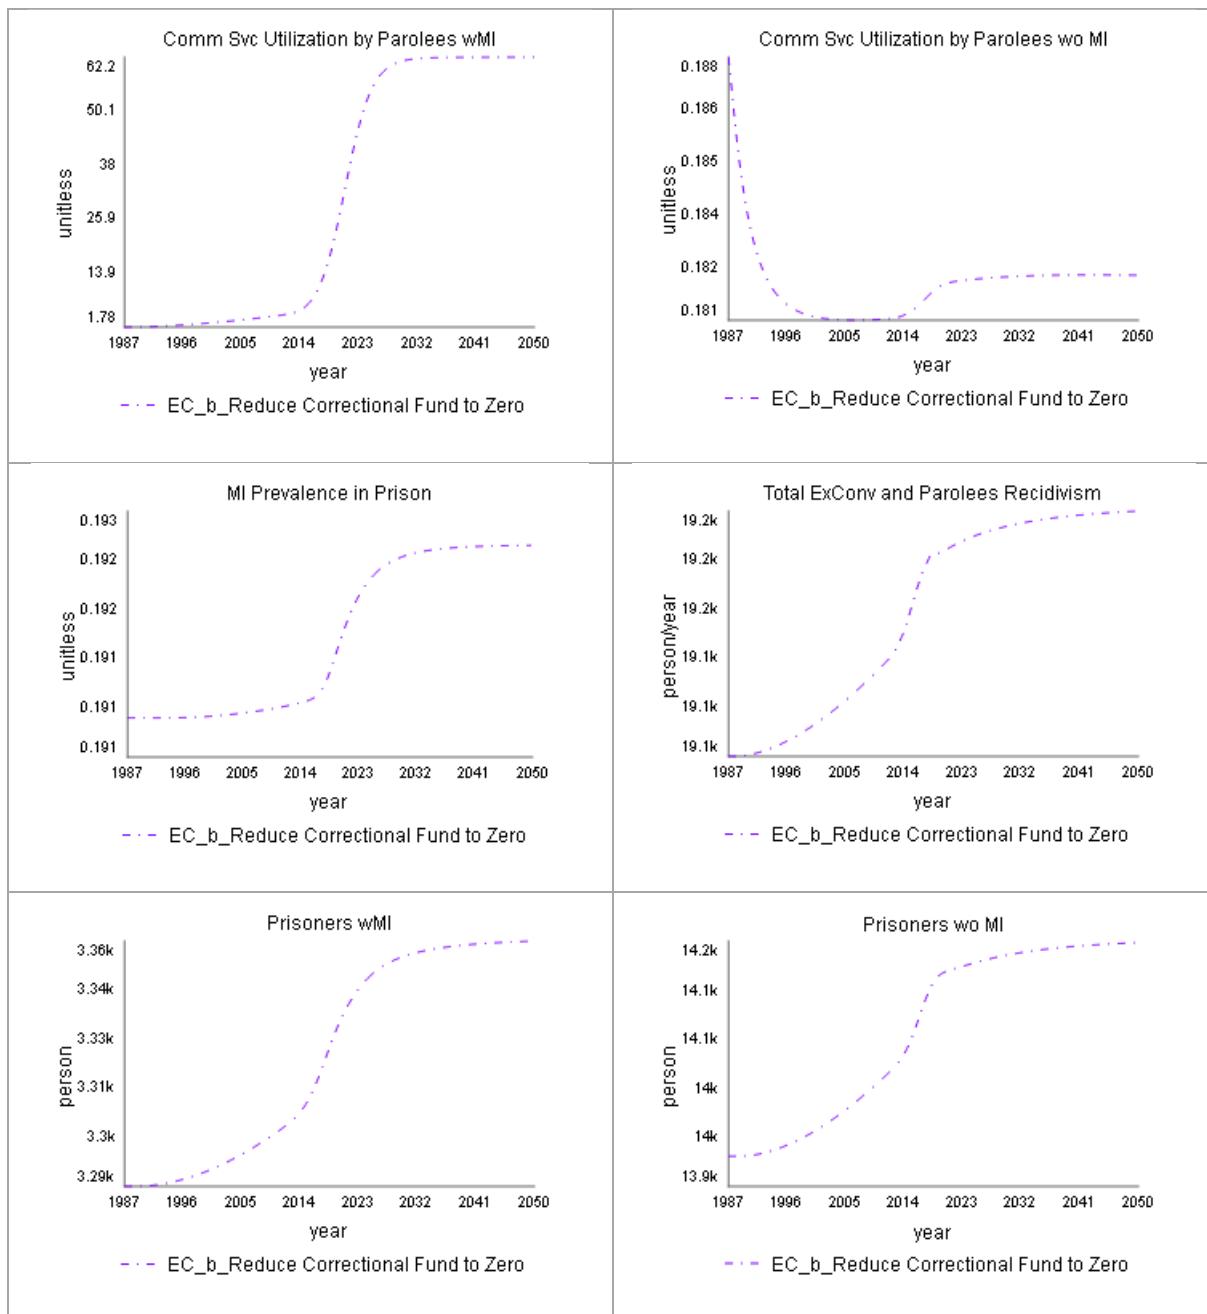

In this test, the prison health care budget decreases to zero from 1988.

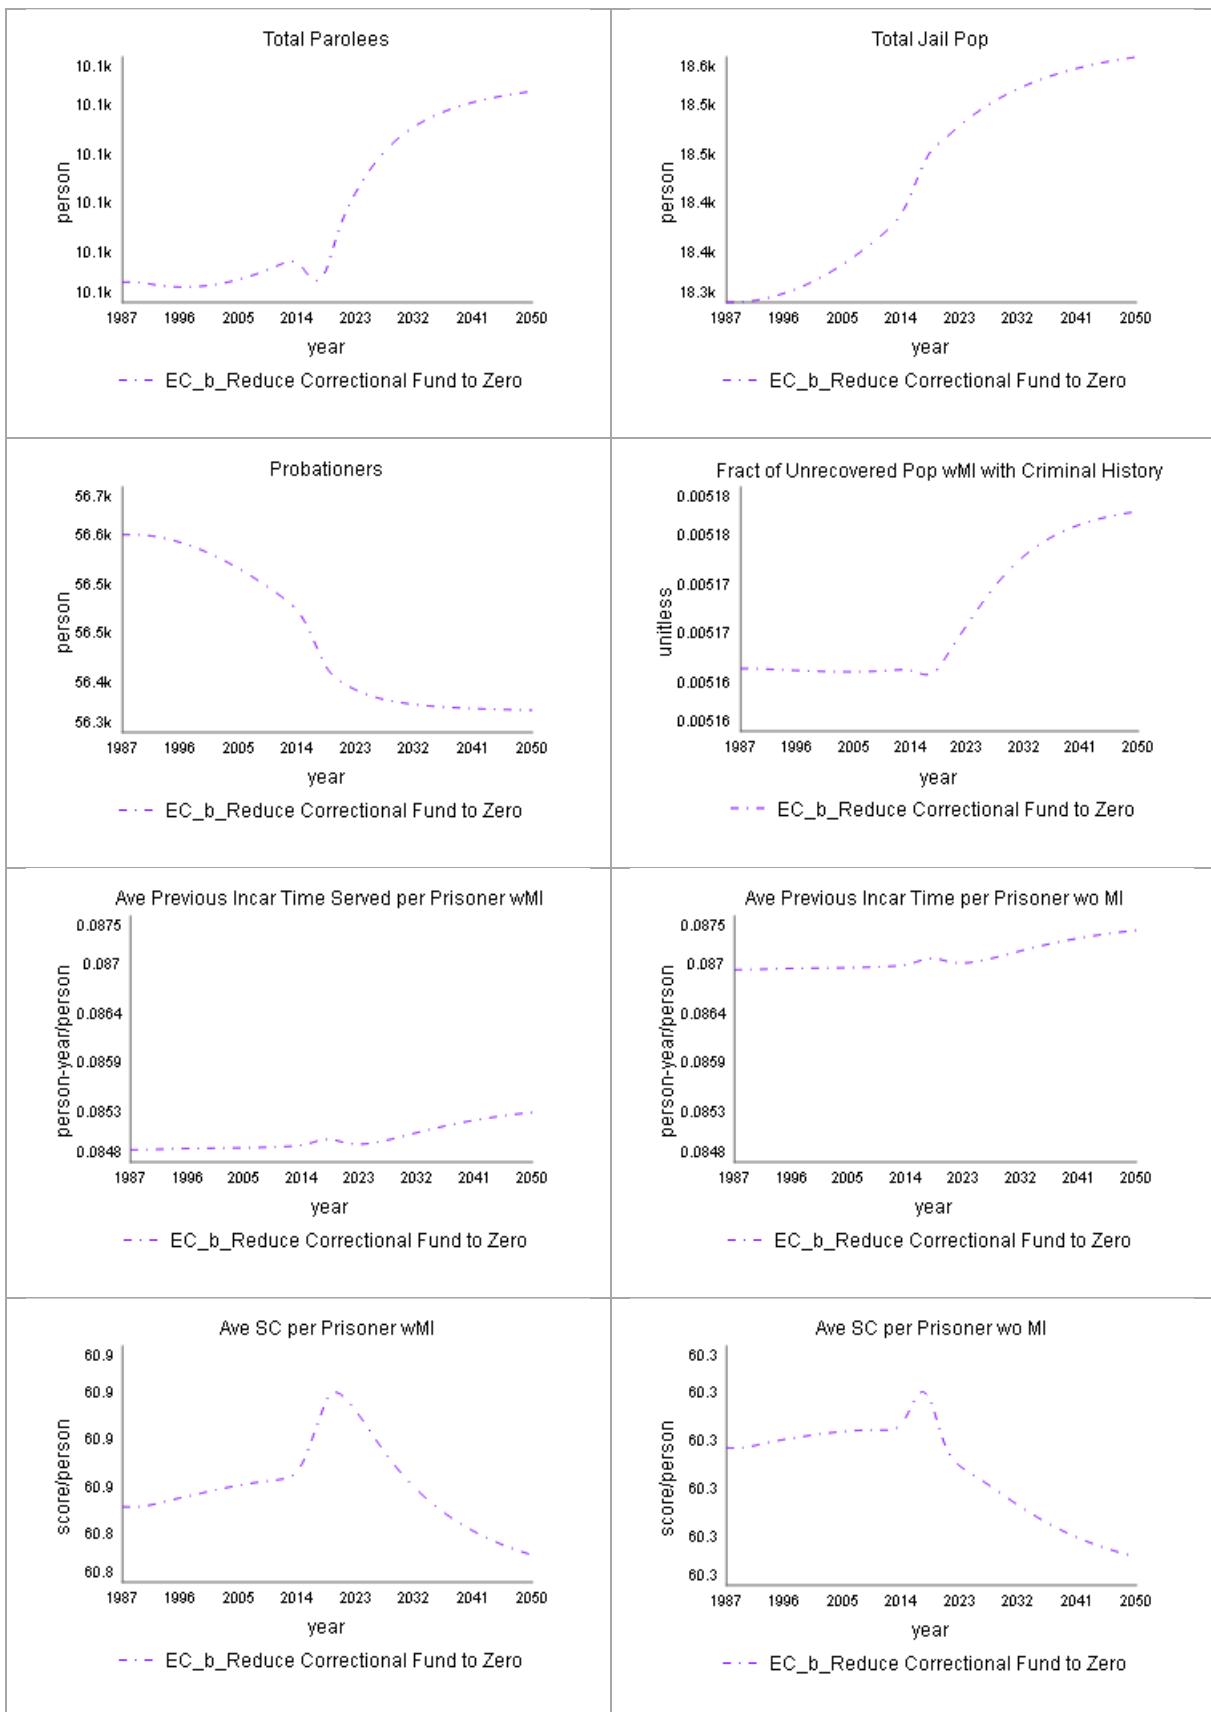

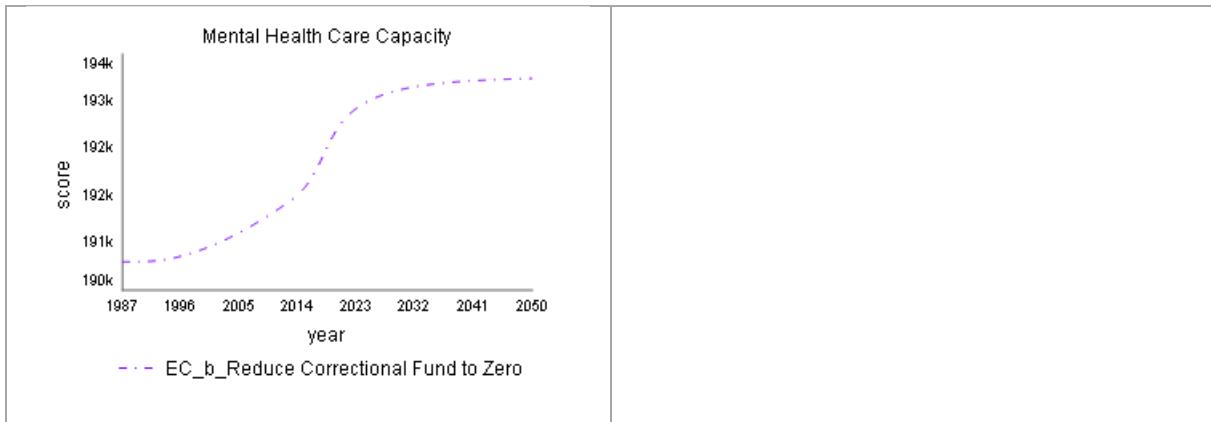

Extreme Condition Test 10b – Reduce Correctional Fund to Community Services to Zero

In this test, the correctional community service budget decreases to zero from 1988.

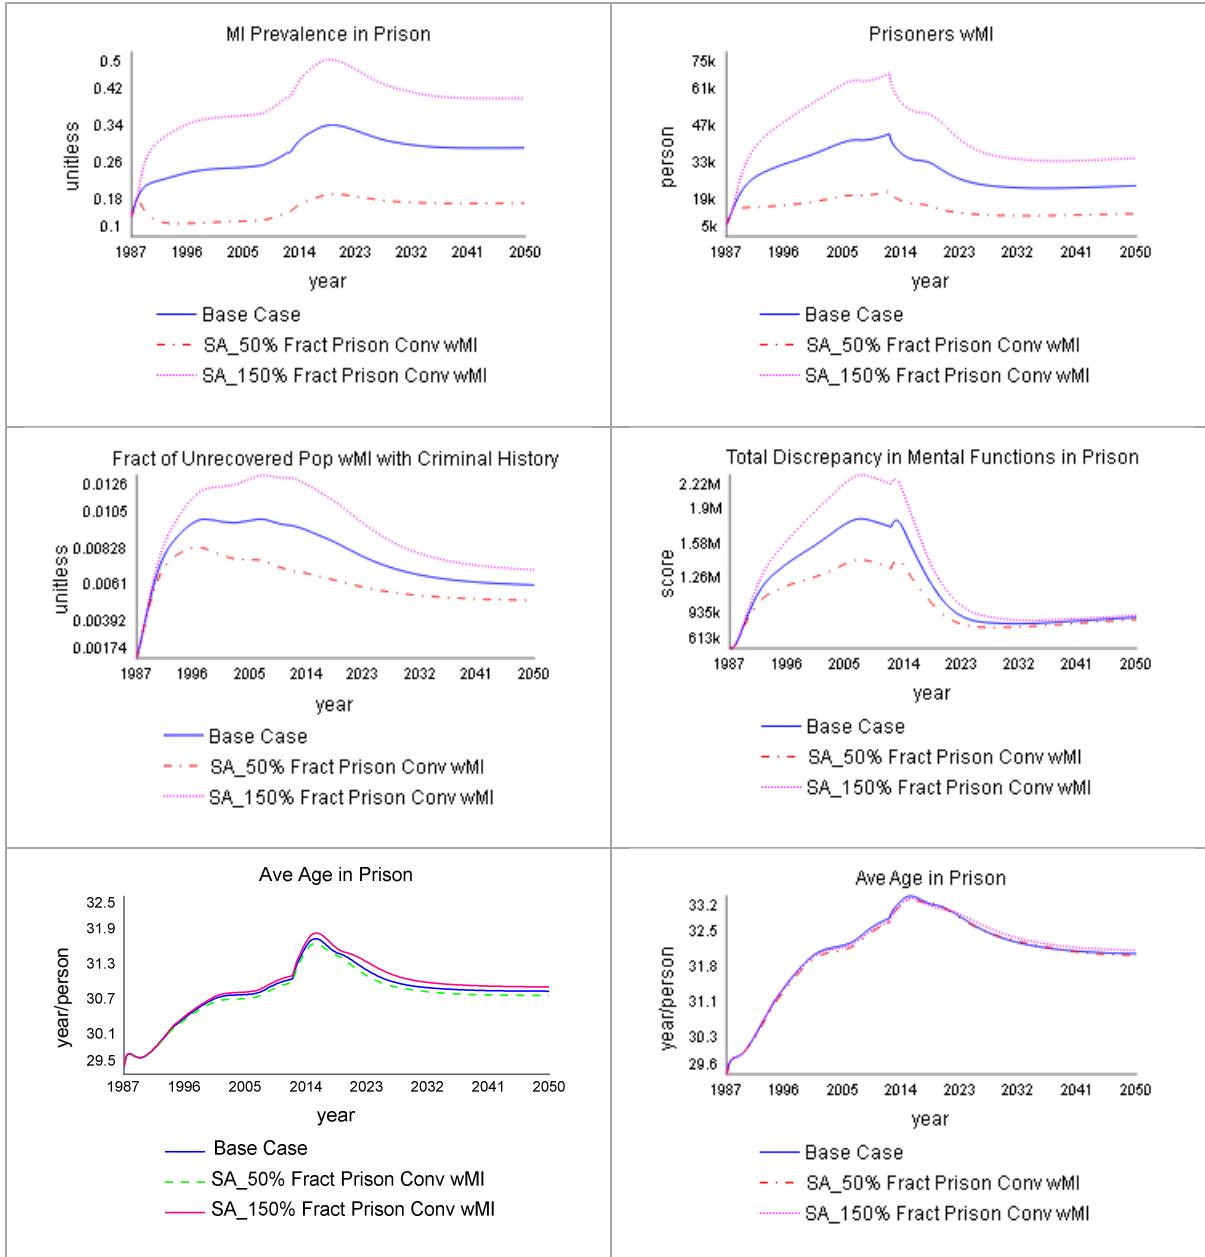

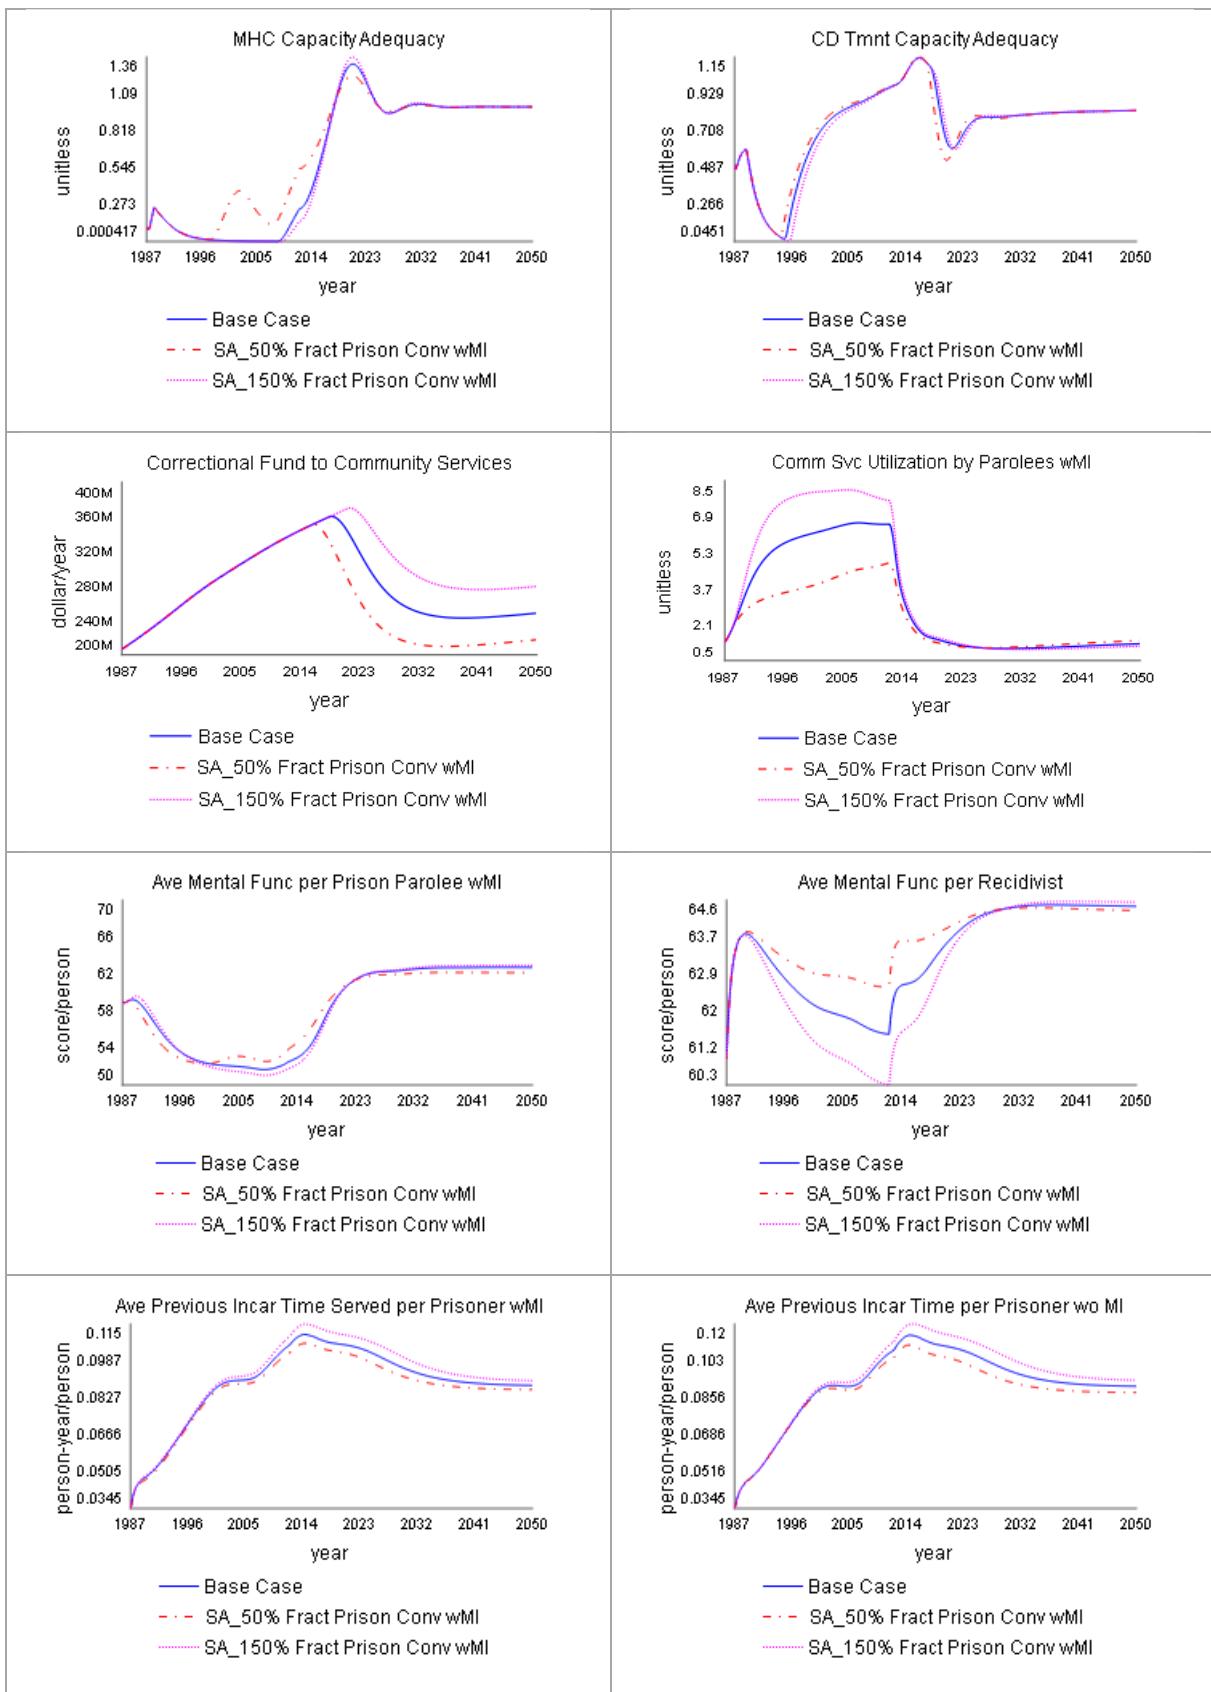

Appendix M – Sensitivity Analysis Results for the Full Model

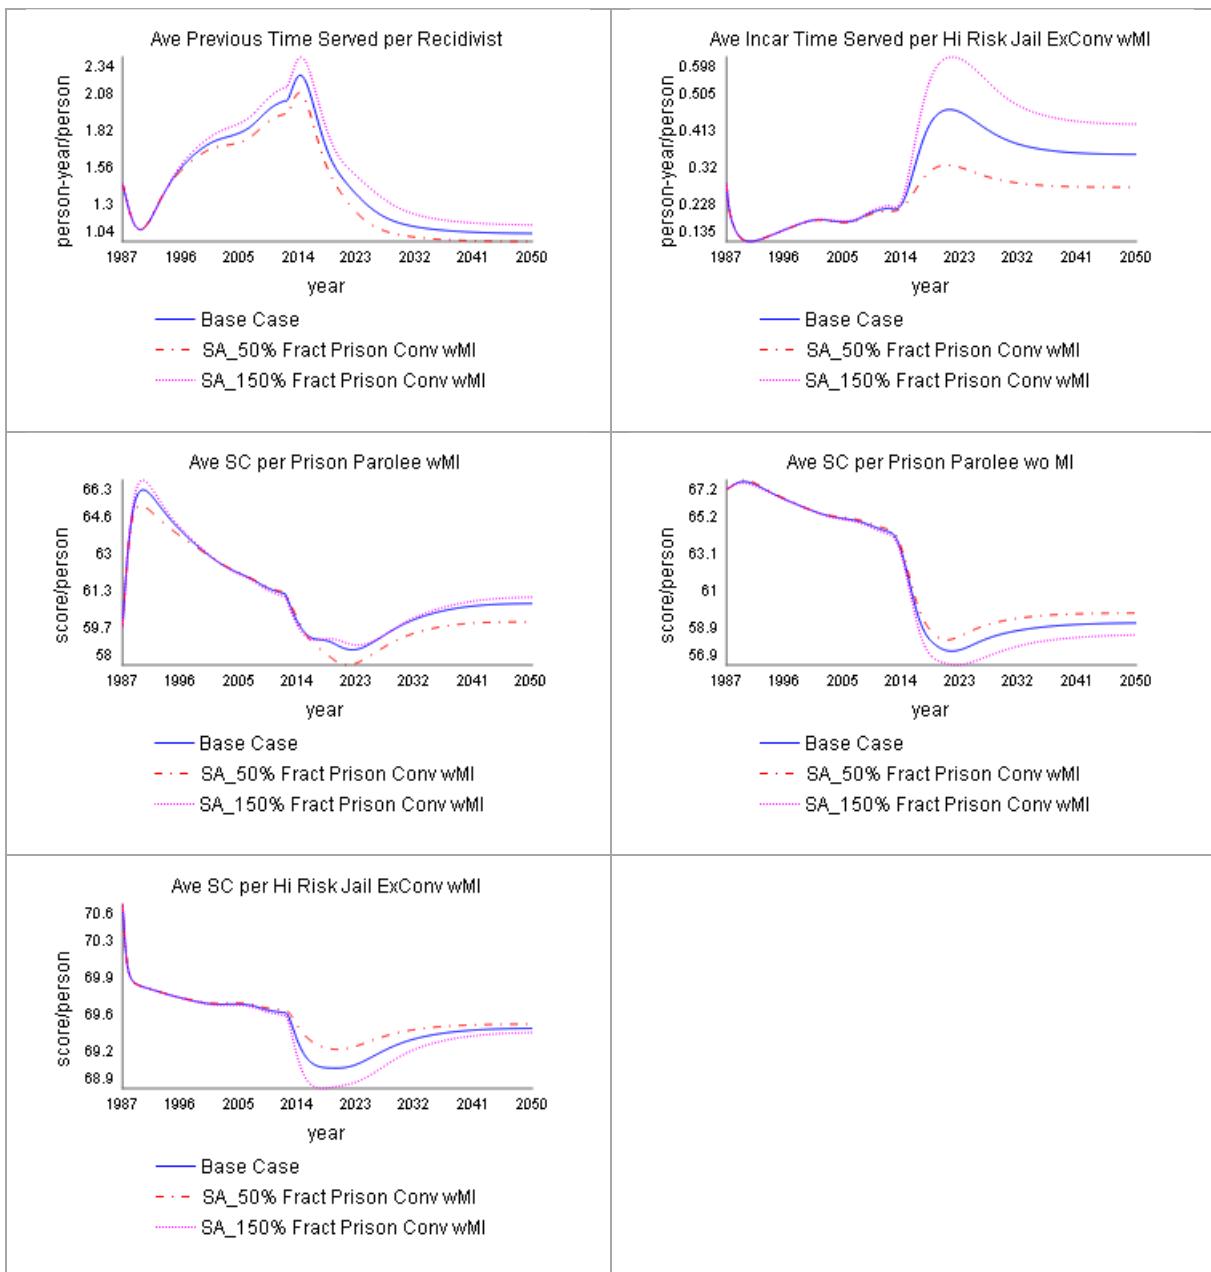

Sensitivity Analysis Test 1 – Fraction of Prison Convicts with Mental Illness

In this test, the “ref fract prison convicts wMI” parameter is varied between 50% and 150% of the constant value, which is 0.32, from 1988 onwards.

Selected Results

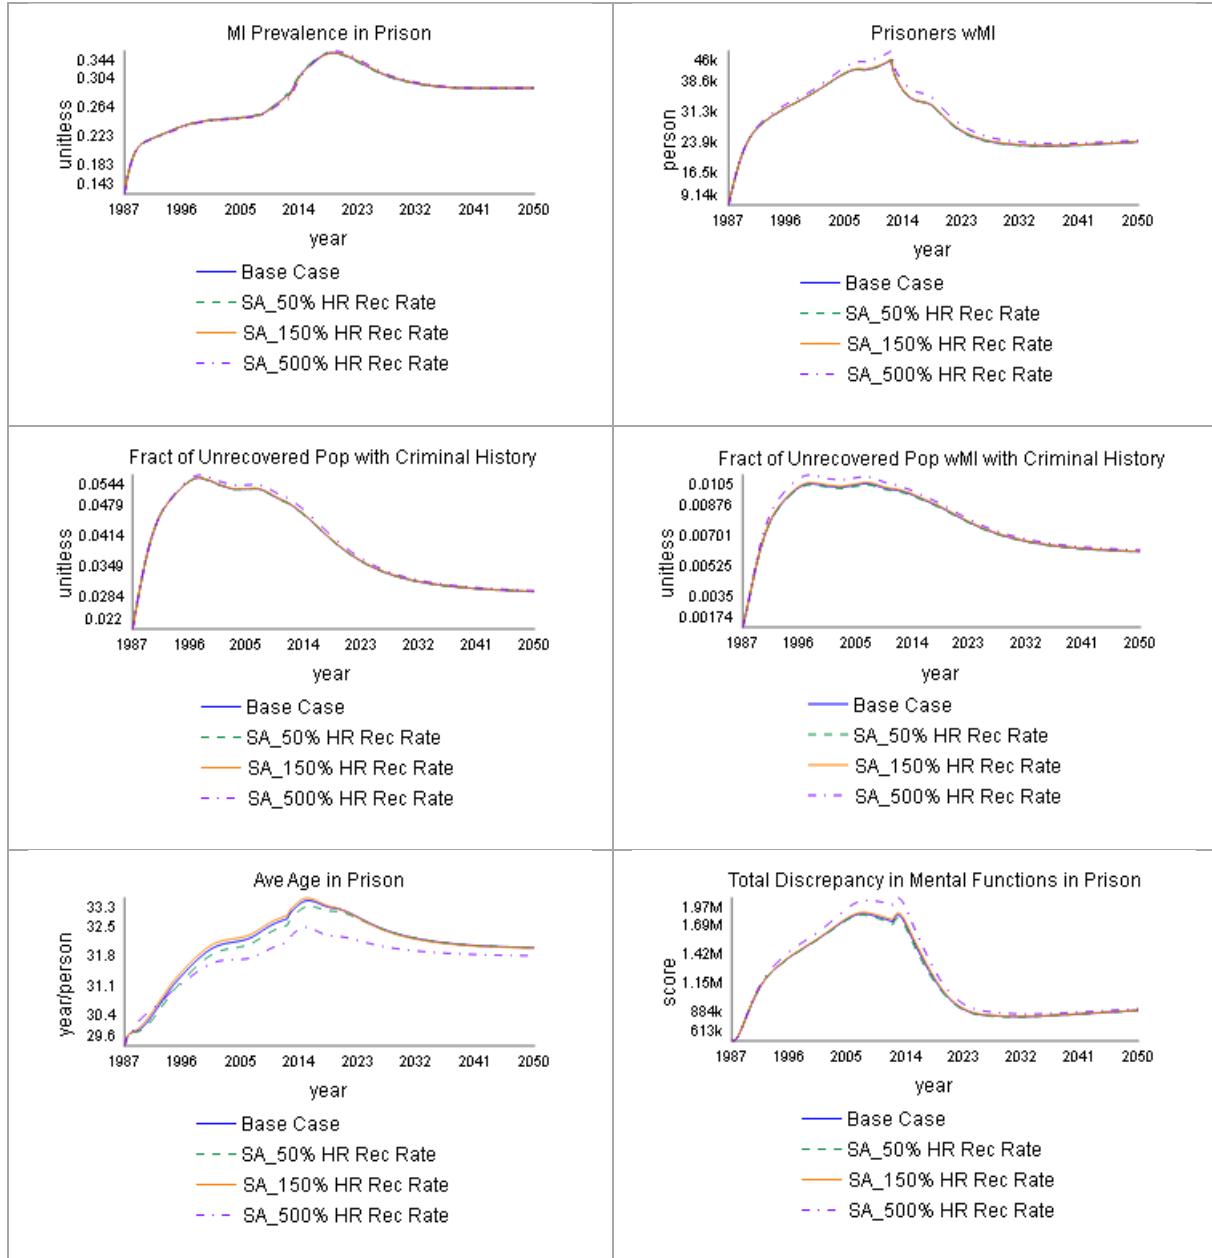

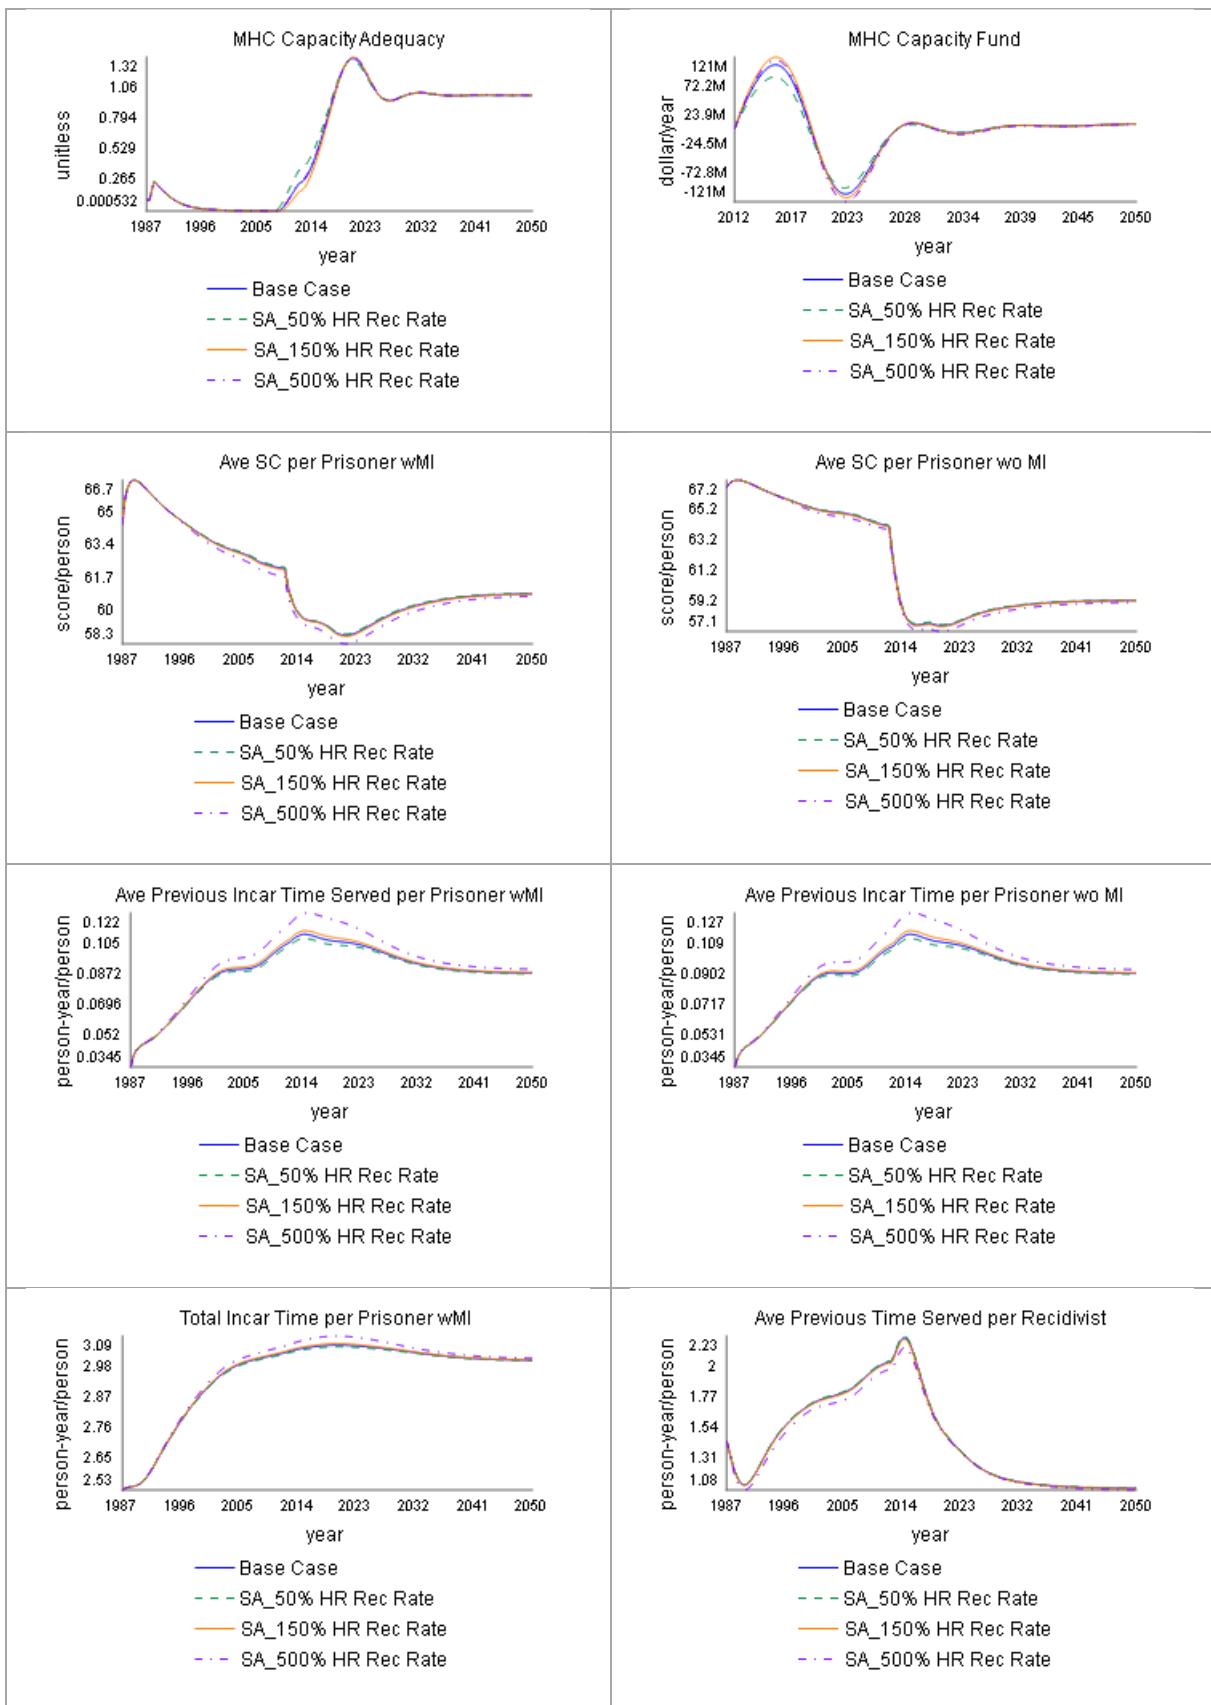

Sensitivity Analysis Test 2 – High Risk Prison Ex-convict wMI Recidivism Rate

In this test, the “hi risk exConv wMI recidivism rate” parameter is varied between 50%, 150%, and 500% of the constant value, which is 0.04, from 1988 onwards.

Selected Results

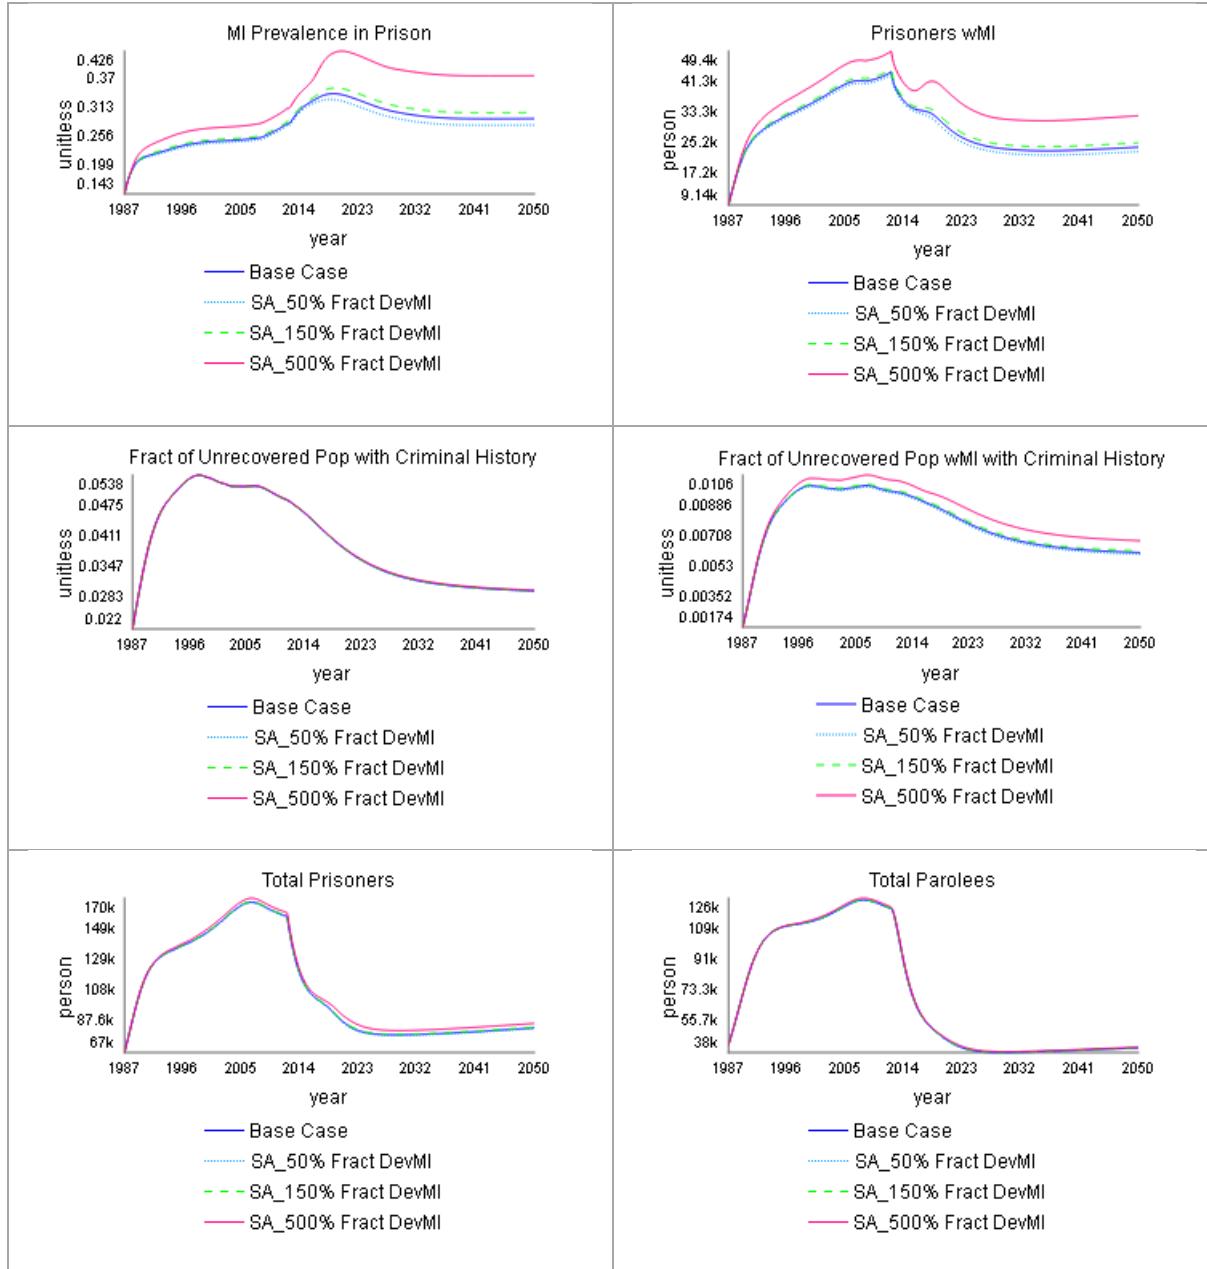

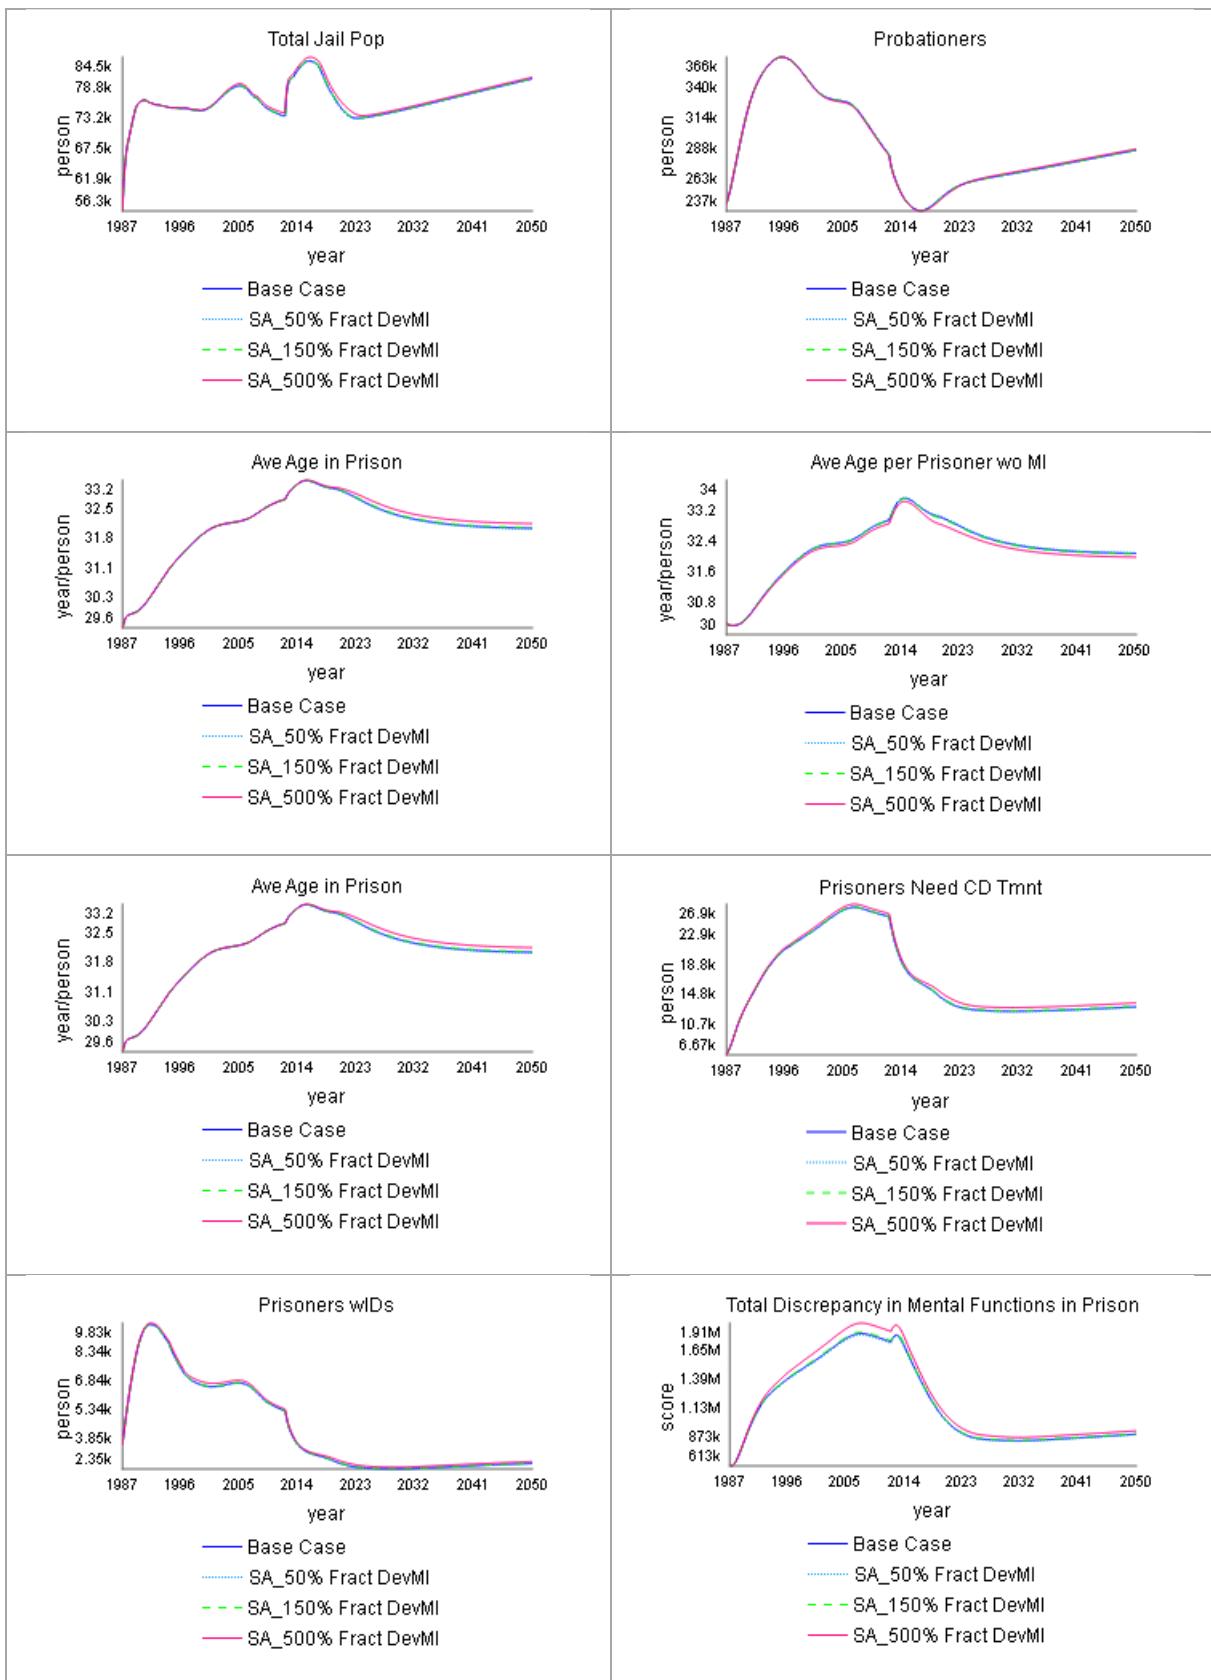

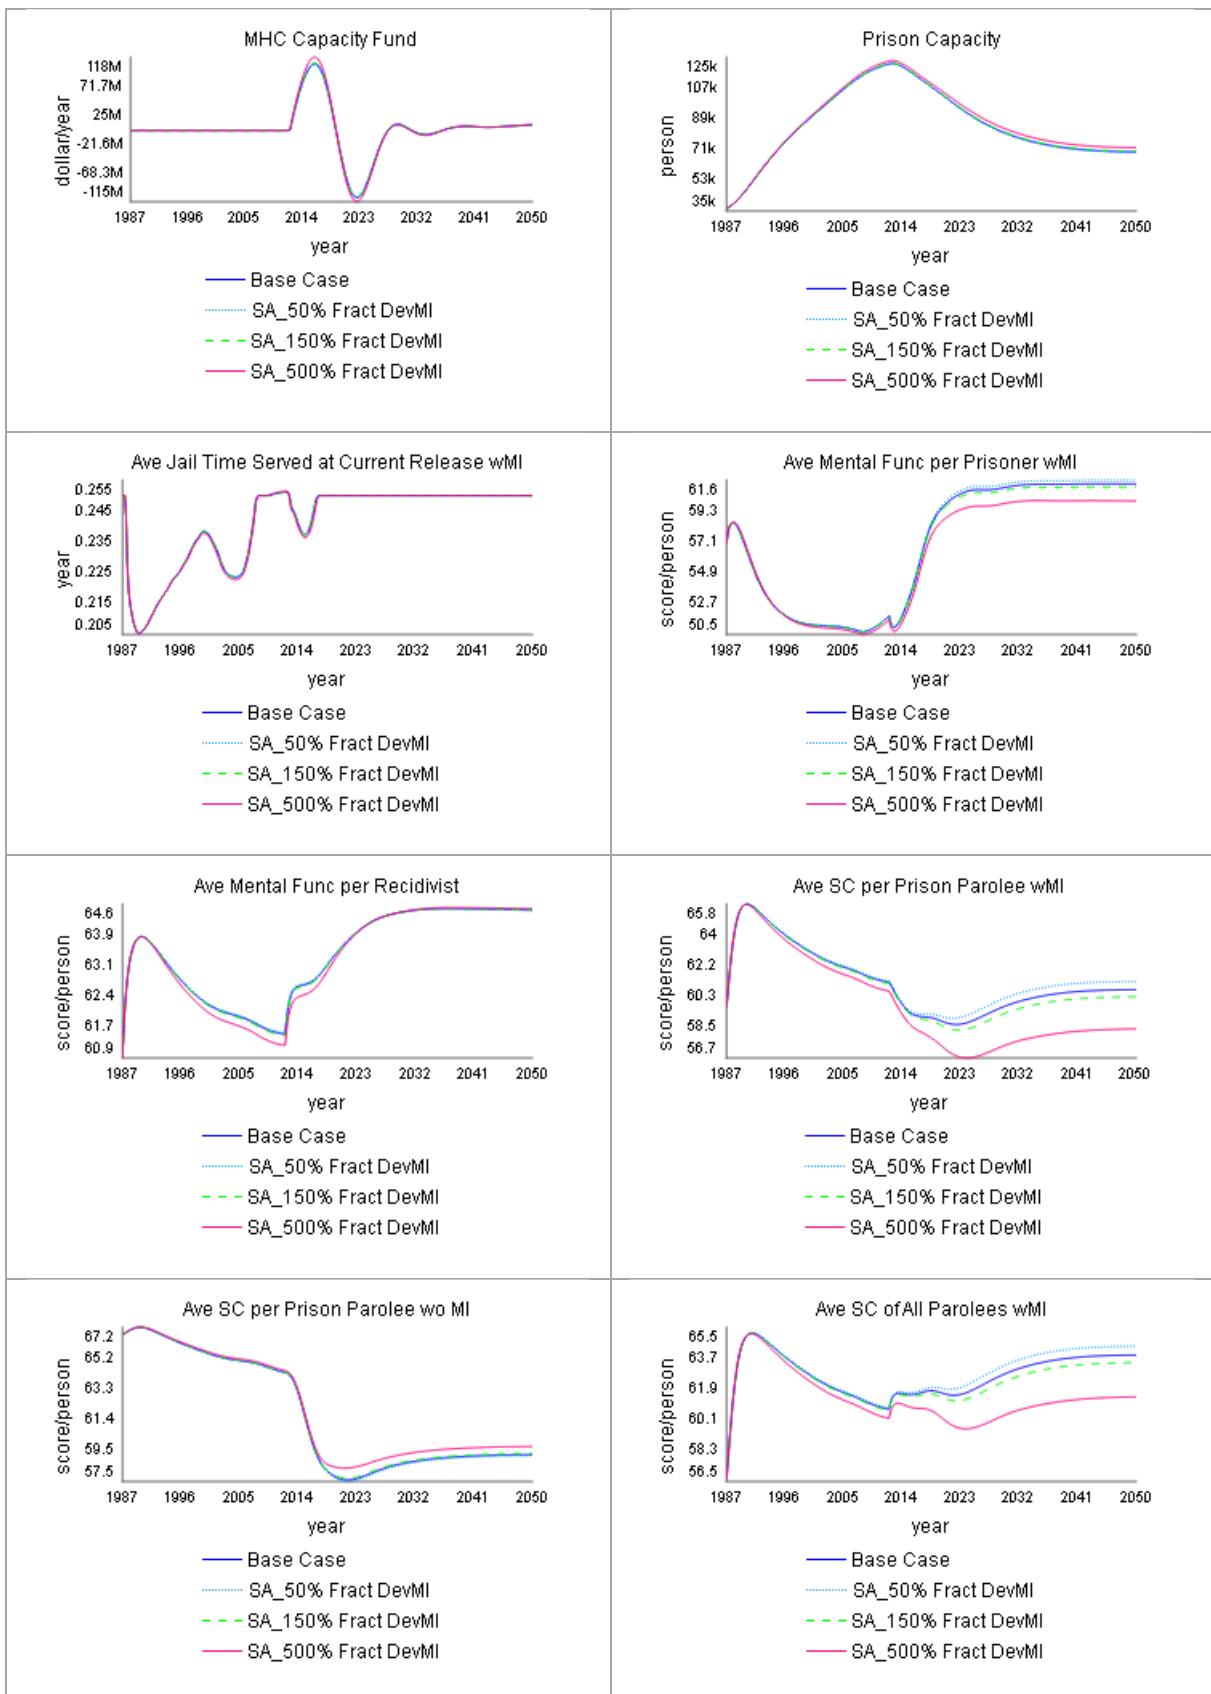

Sensitivity Analysis Test 3 – Fraction of Prisoners Develop Mental Illness

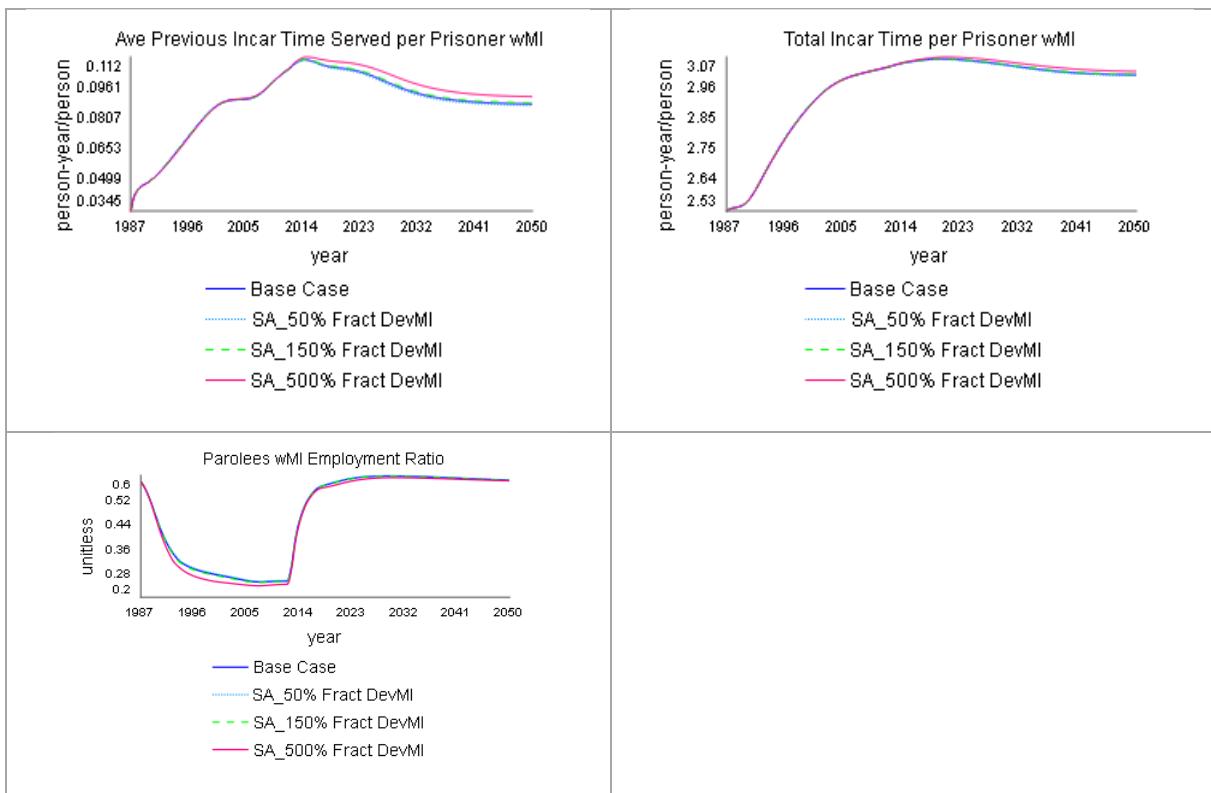

In this test, the “ref fract prisoners devMI” parameter is varied between 50%, 150%, and 500% of the constant value, which is 0.02, from 1988 onwards.

Selected Results

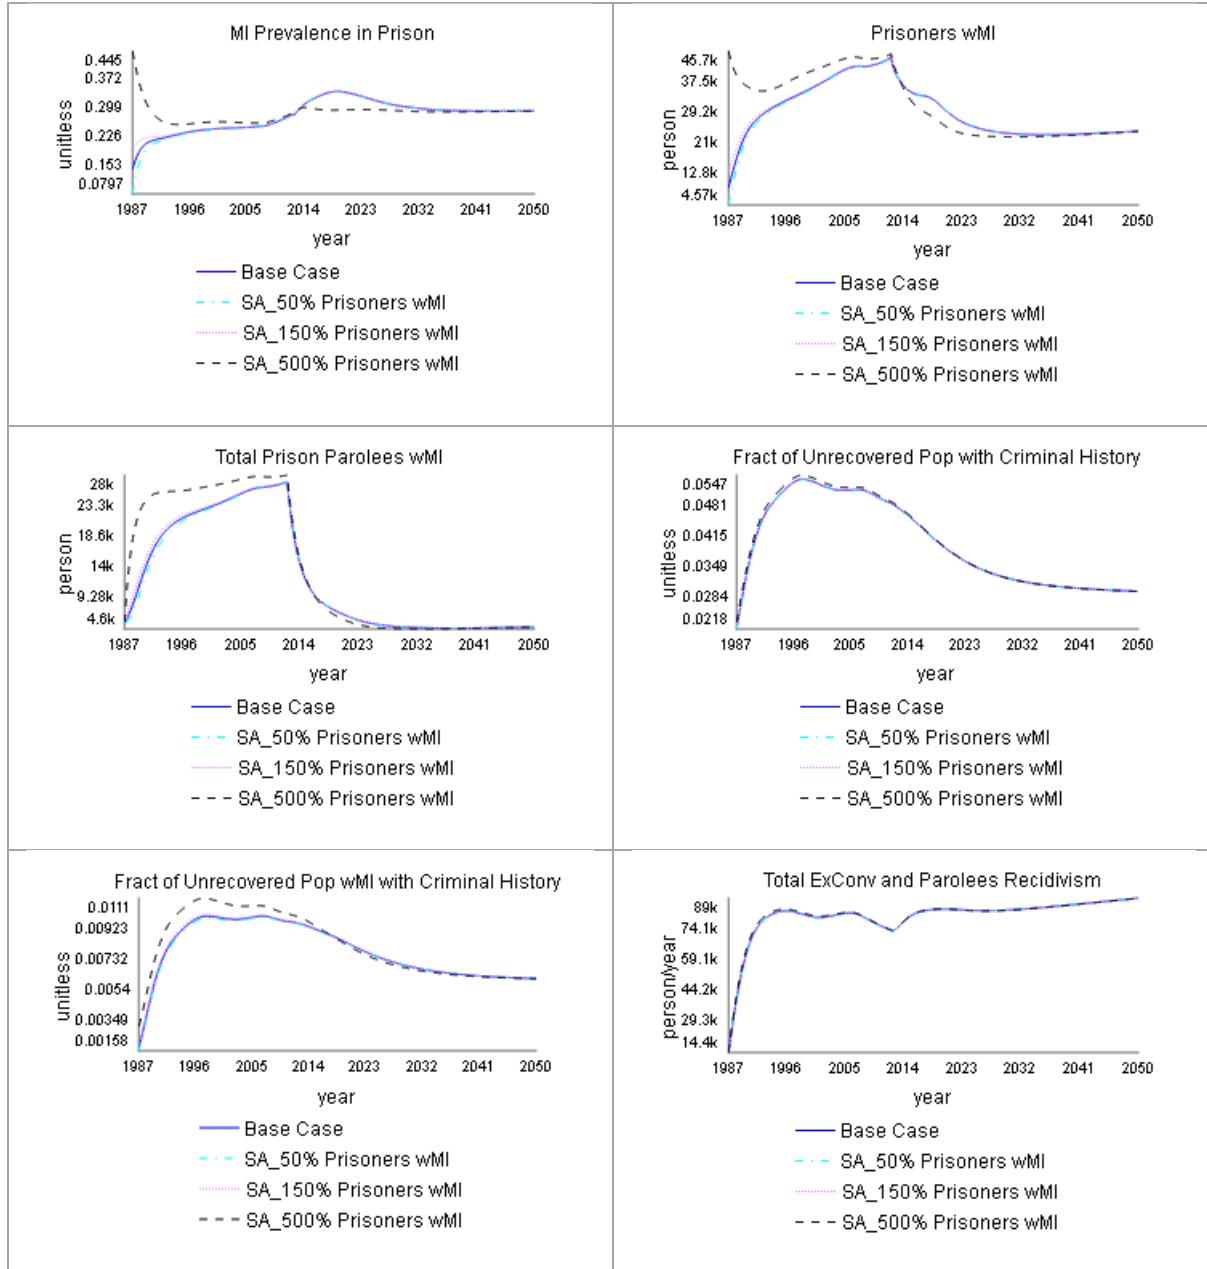

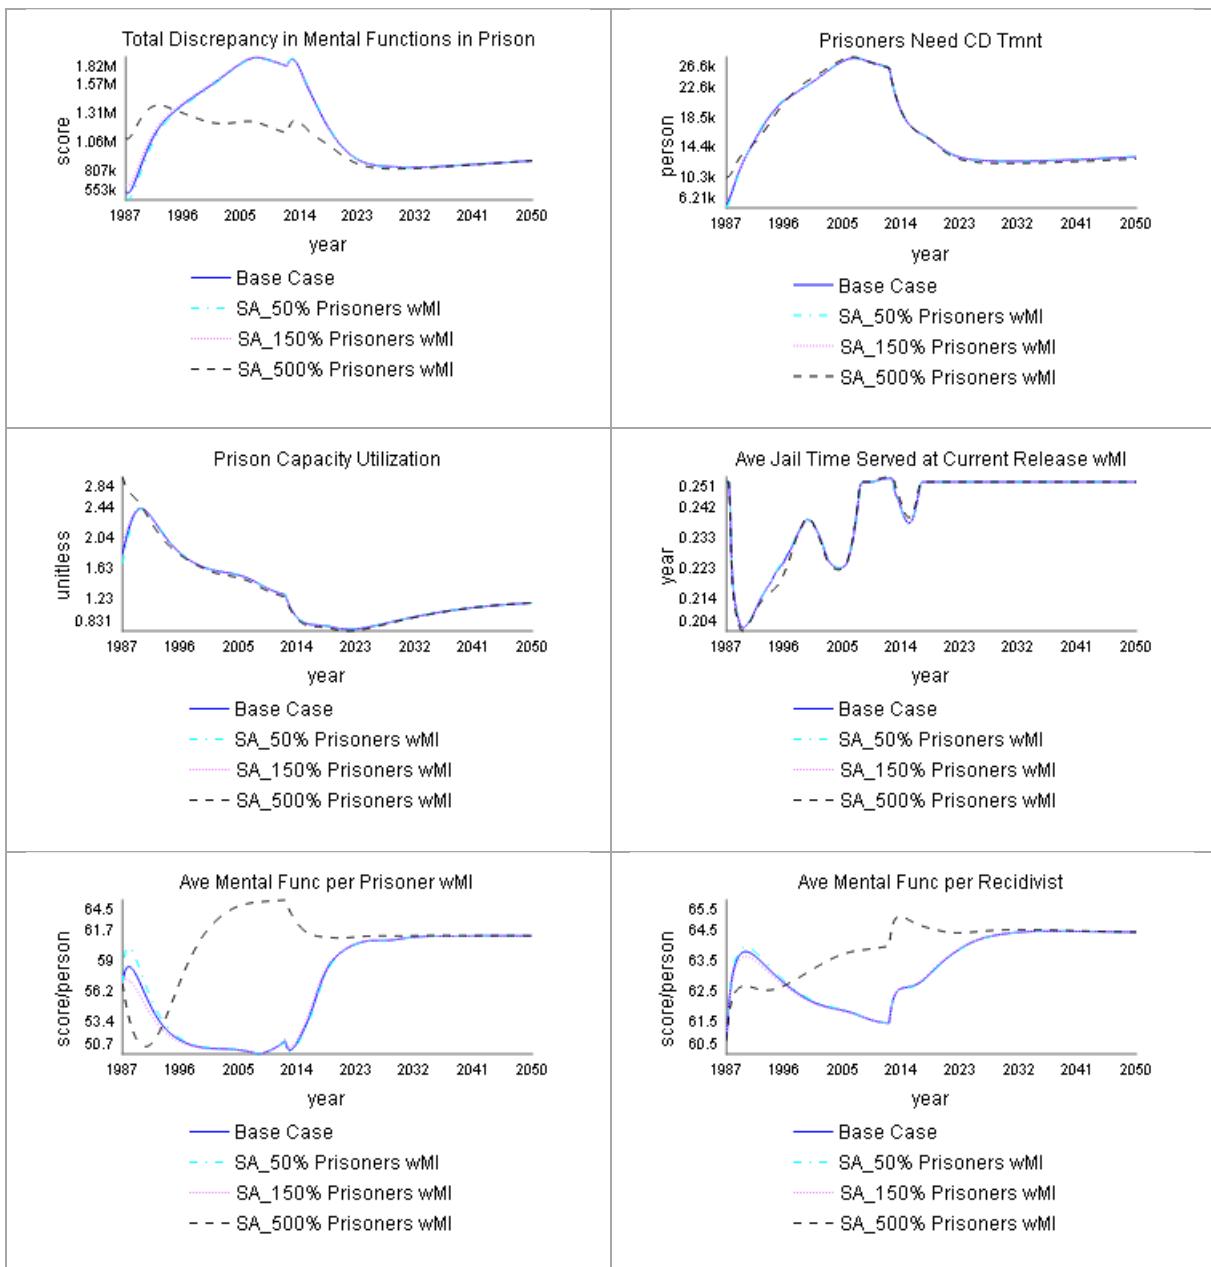

Sensitivity Analysis Test 4 – Initial Value of Prisoners with Mental Illness

In this test, the initial value for the Prisoners wMI stock is varied between 50%, 150%, and 500% of the constant value, which is 8,018, from 1987 onwards.

Selected Results

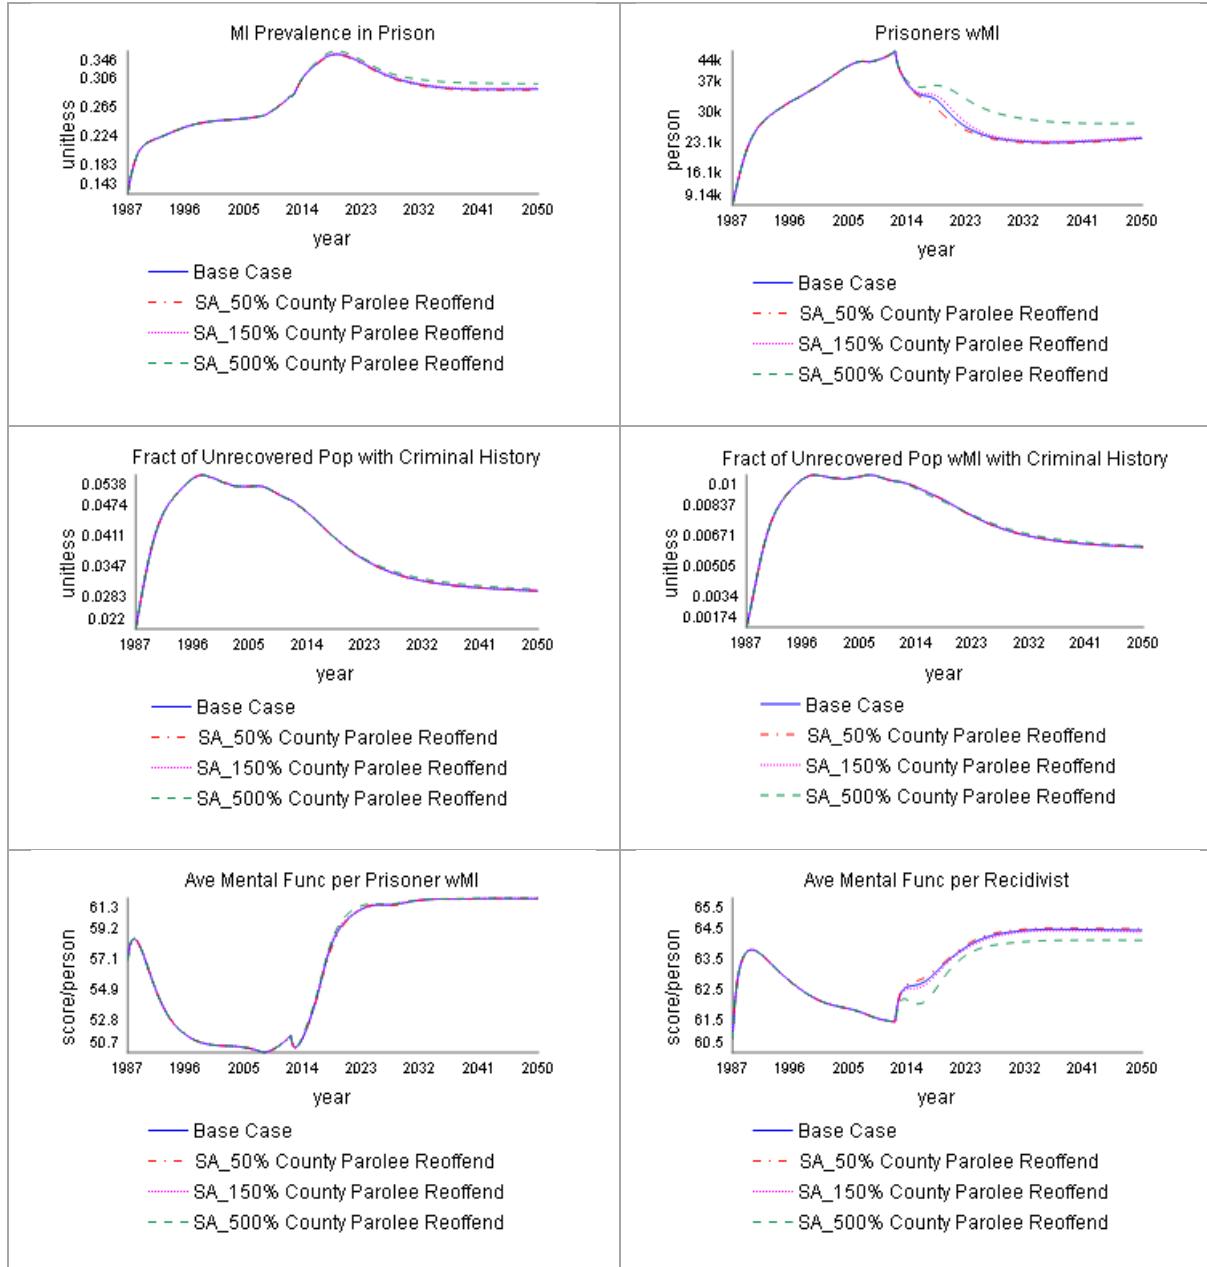

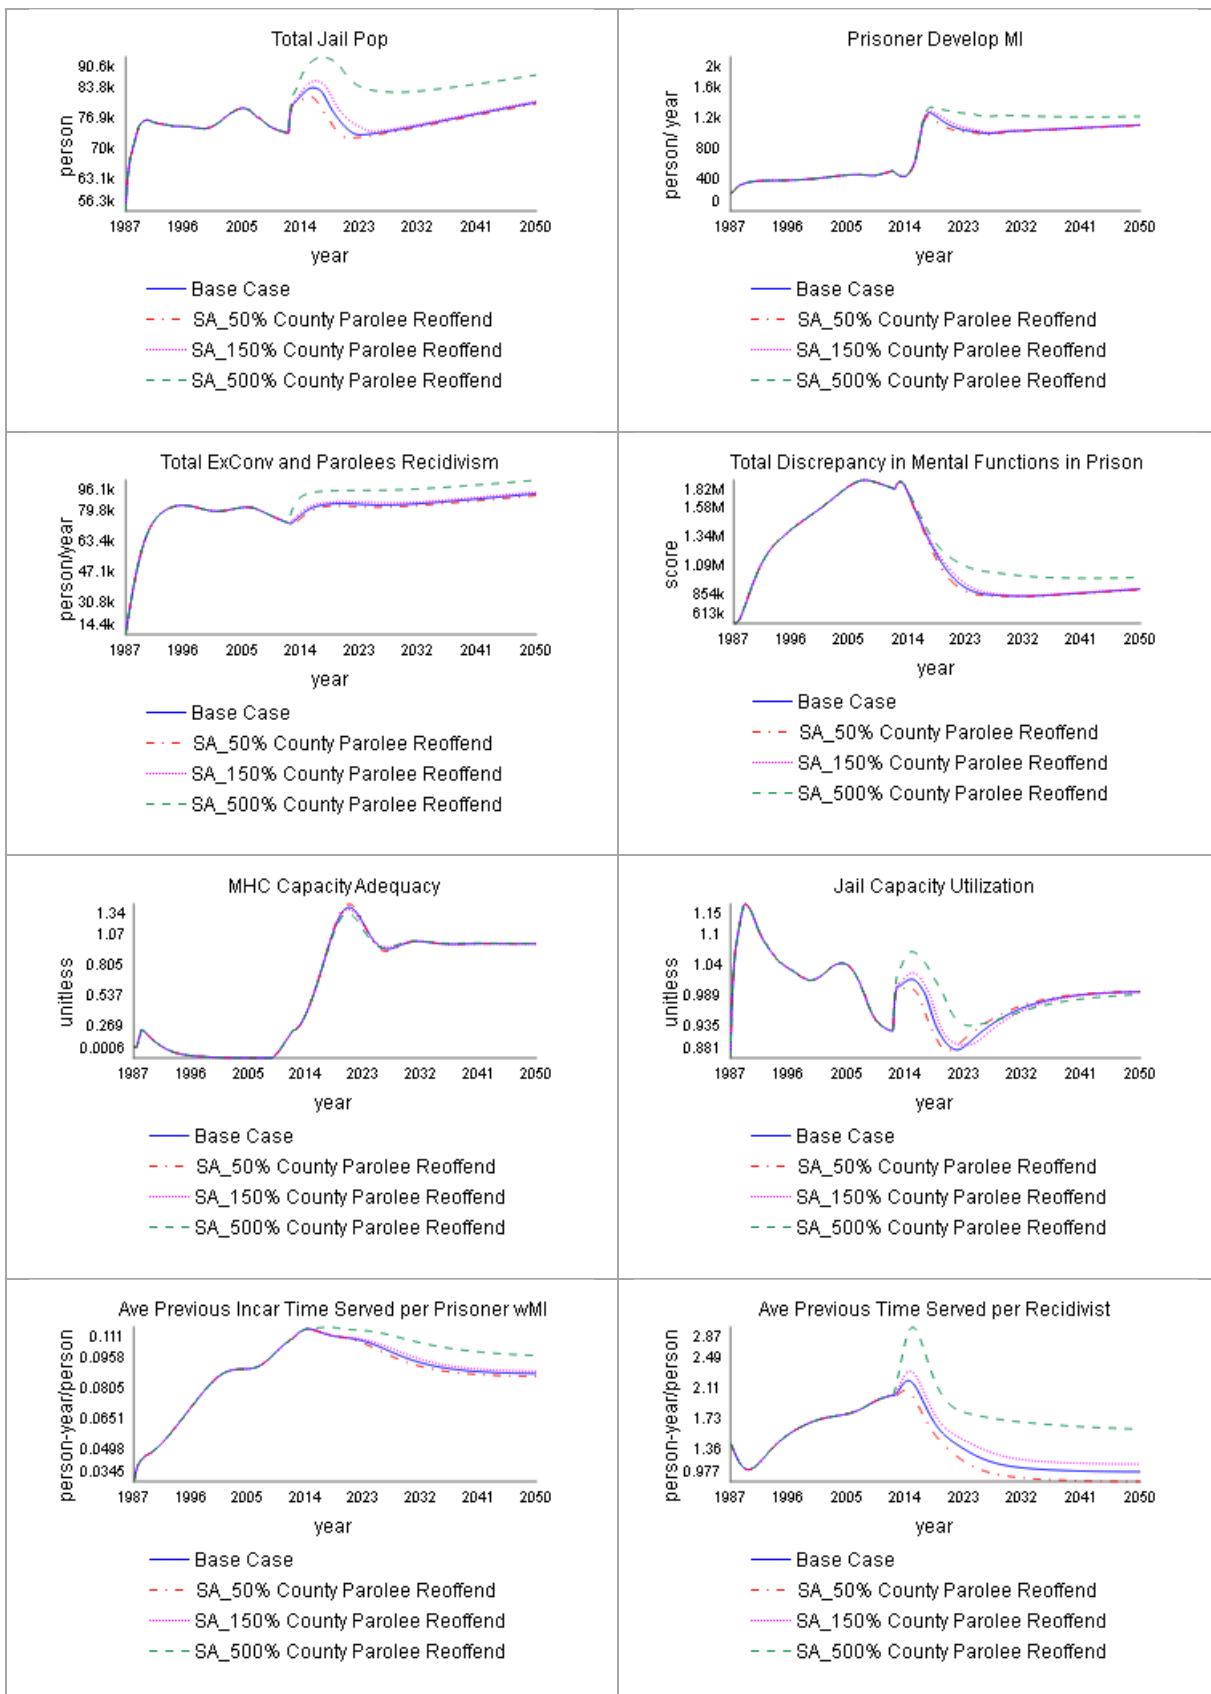

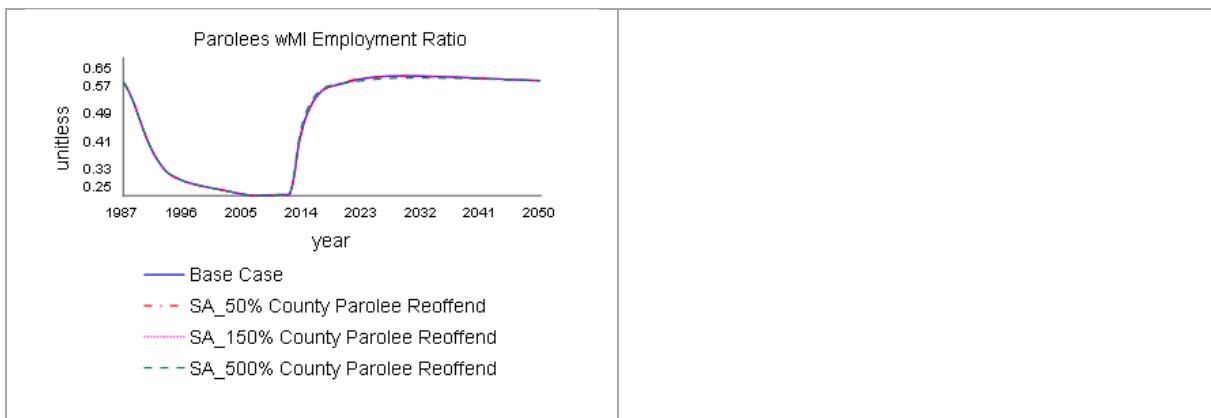

Sensitivity Analysis Test 5 – Fraction of County Parolees Reoffend

In this test, the “fract county parolee reoffend” parameter is varied between 50%, 150%, and 500% of the constant value, which is 0.15, from 2012 onwards.

Selected Results

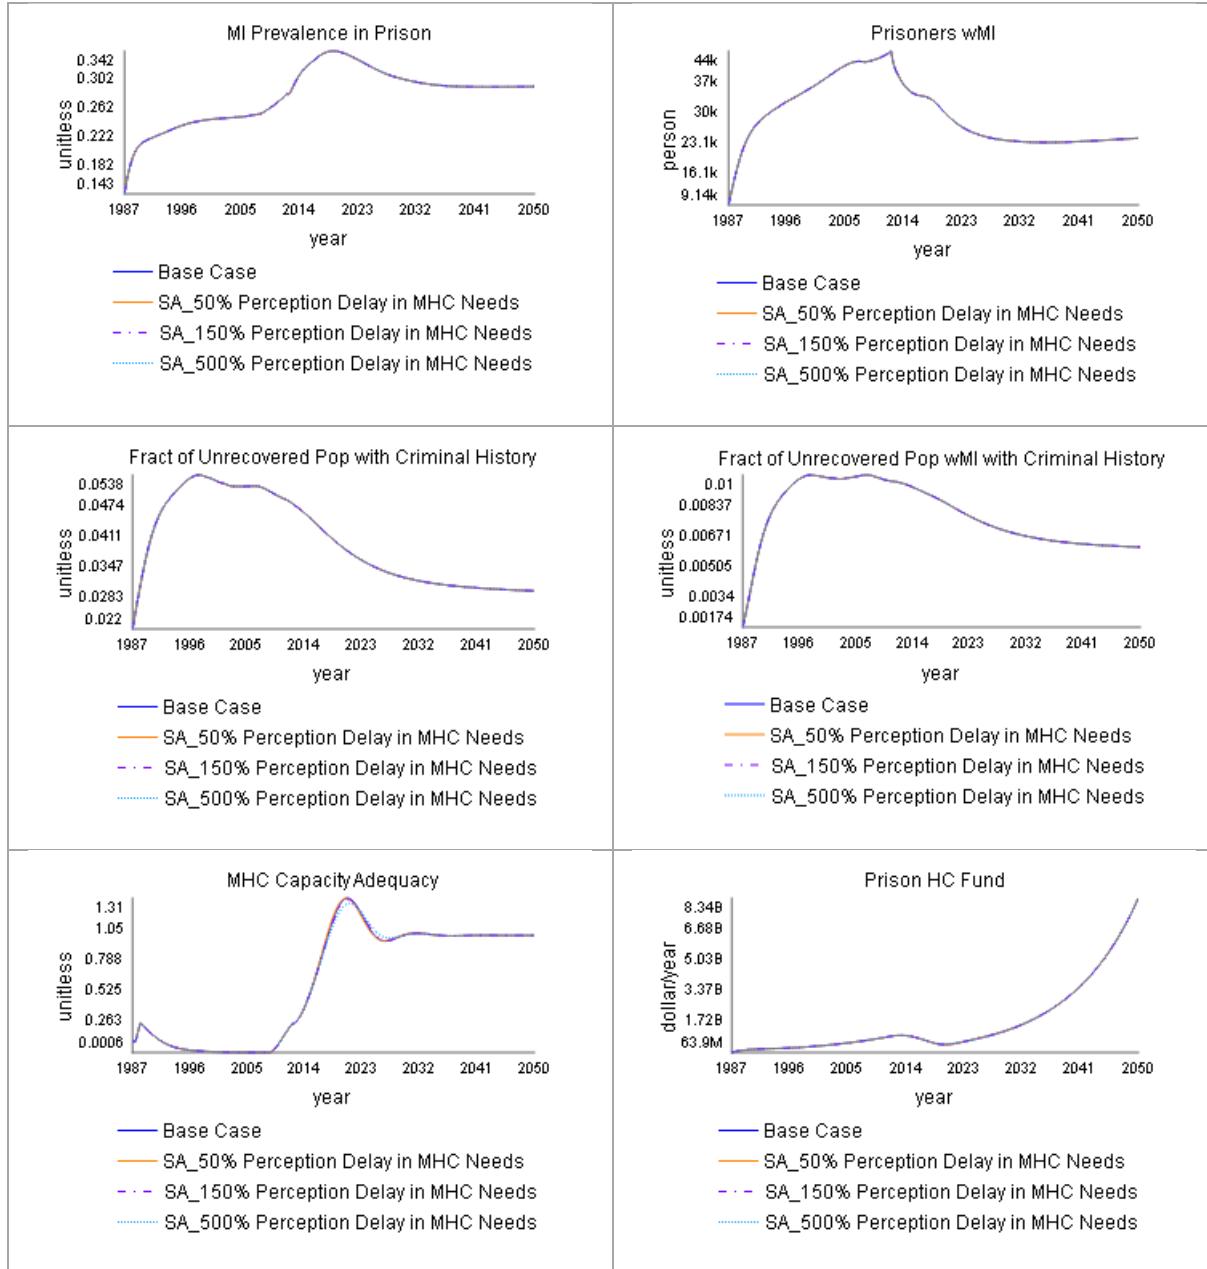

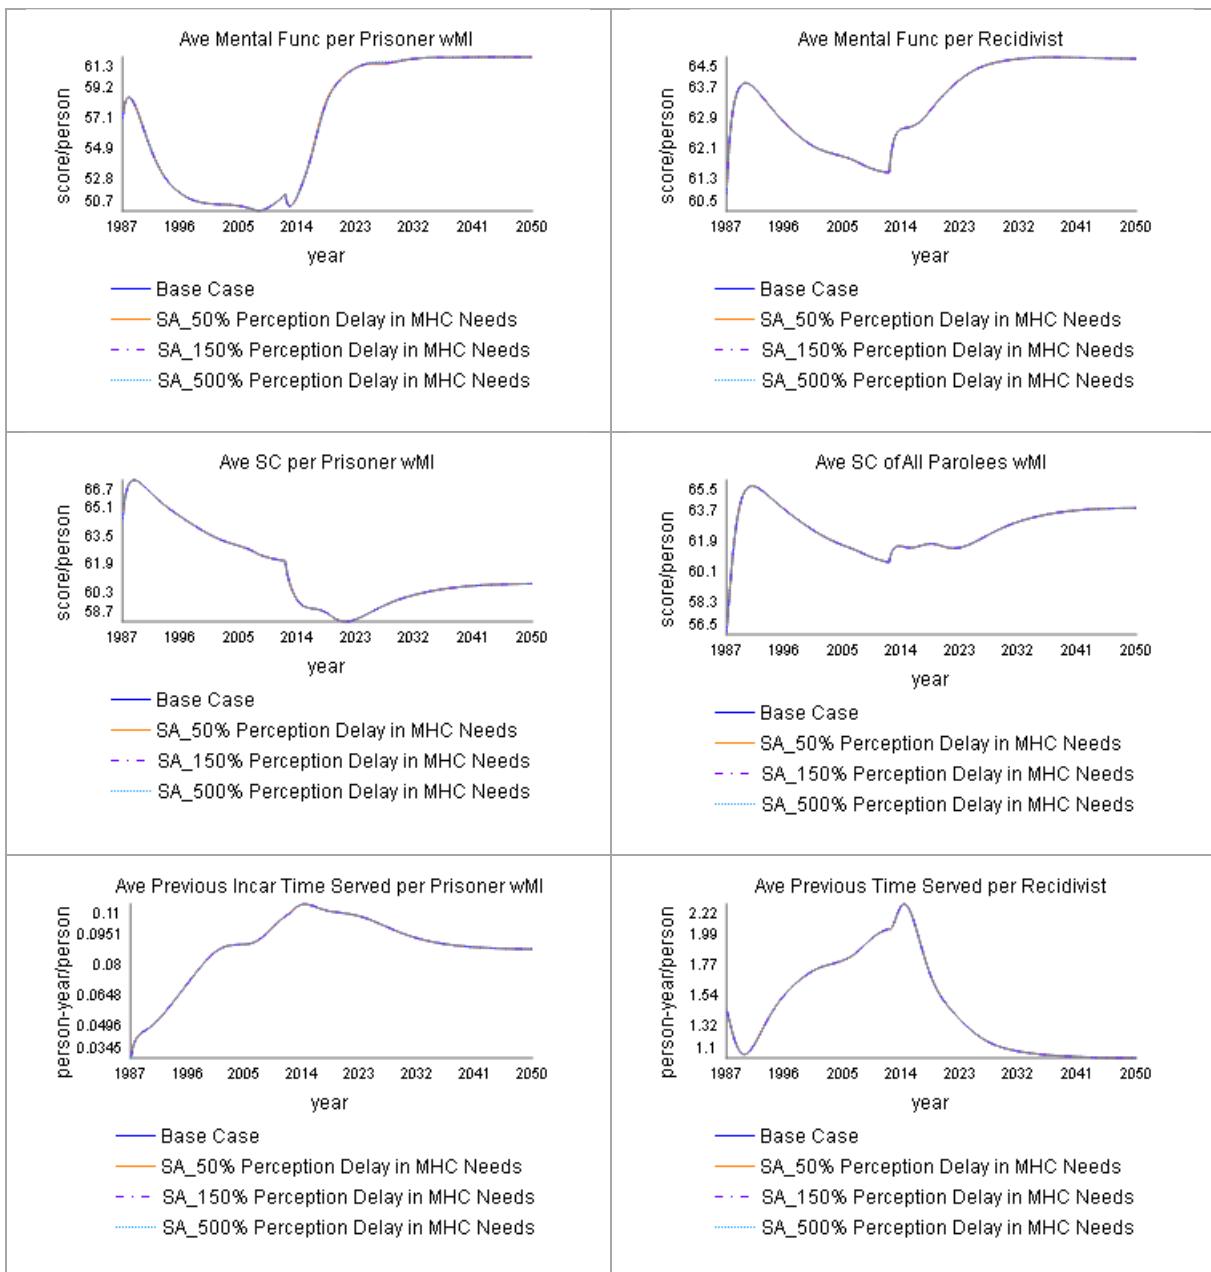

Sensitivity Analysis Test 6 – New Time to Perceive Mental Health Care Needs

In this test, the “ref perception delay in MHC needs” parameter is varied between 50%, 150%, and 500% of the constant value, which is 4 years, from 2012 onwards.

Selected Results

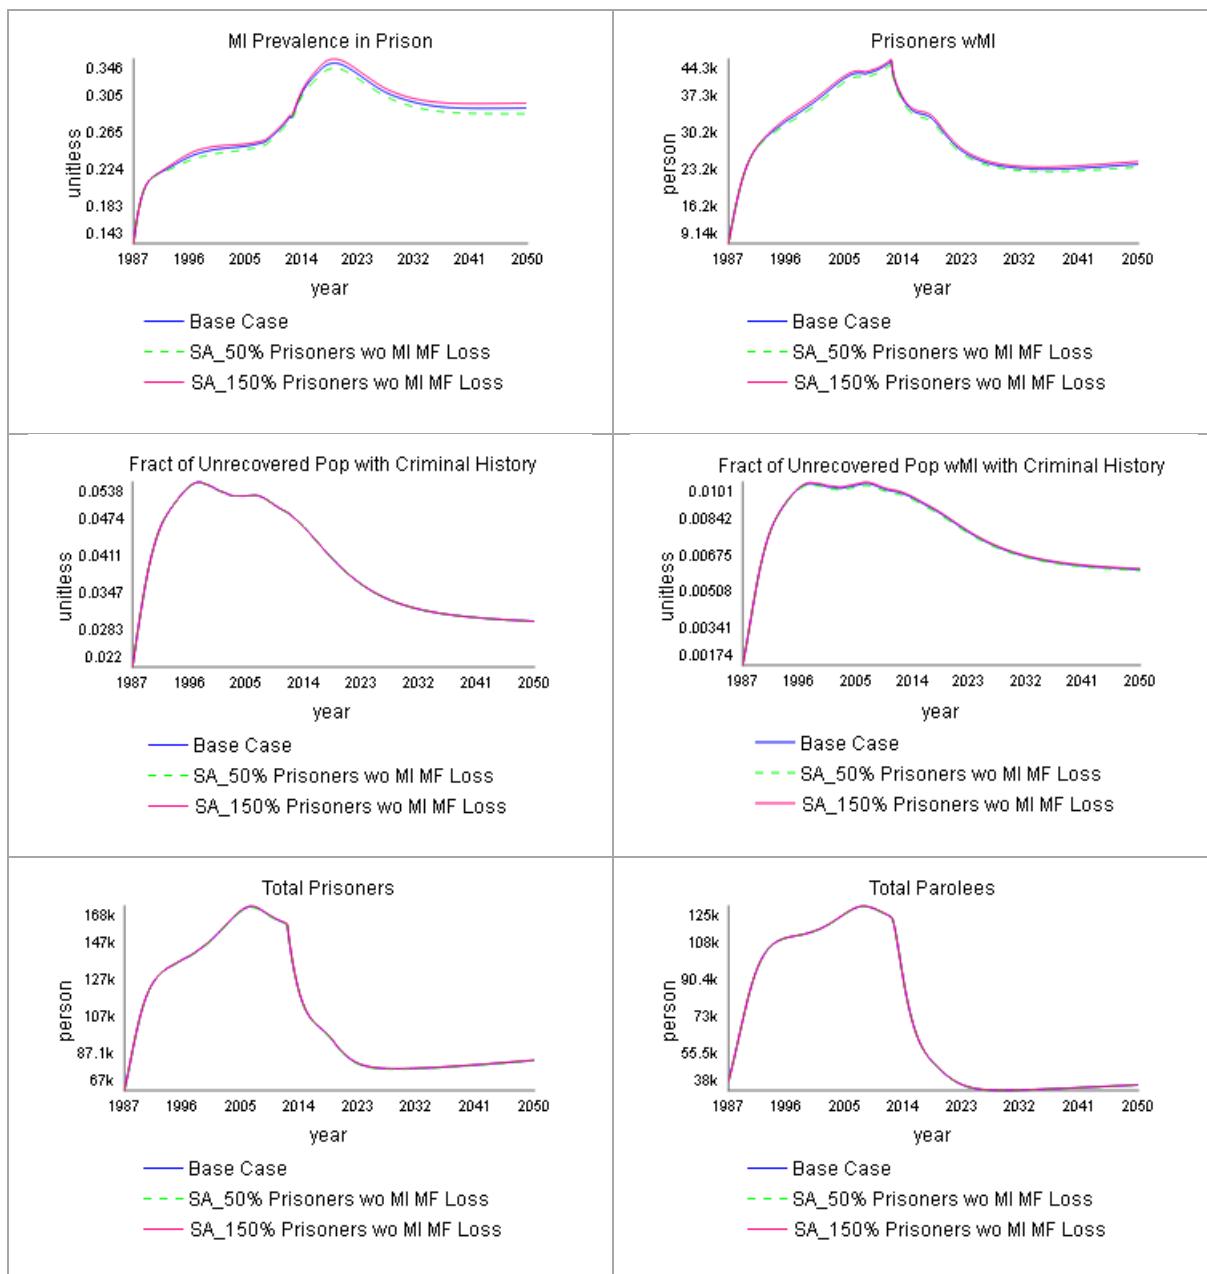

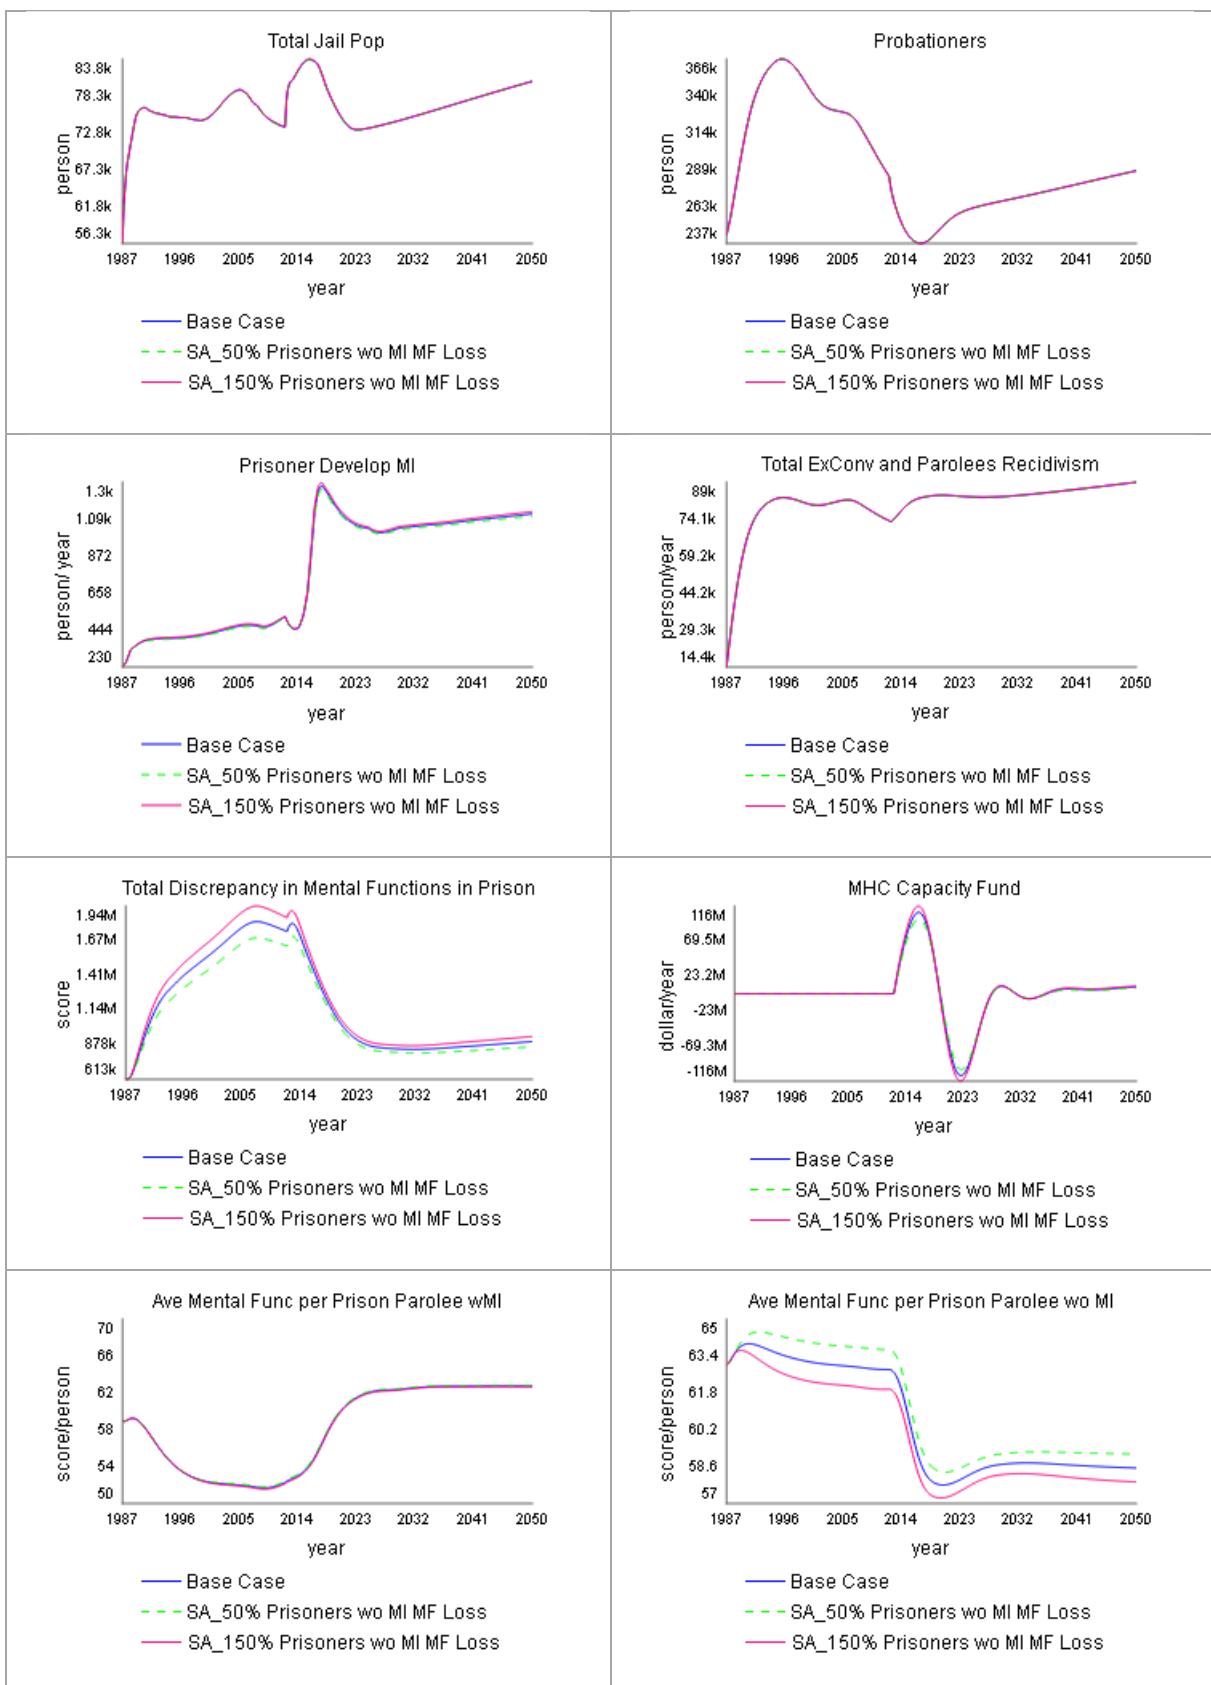

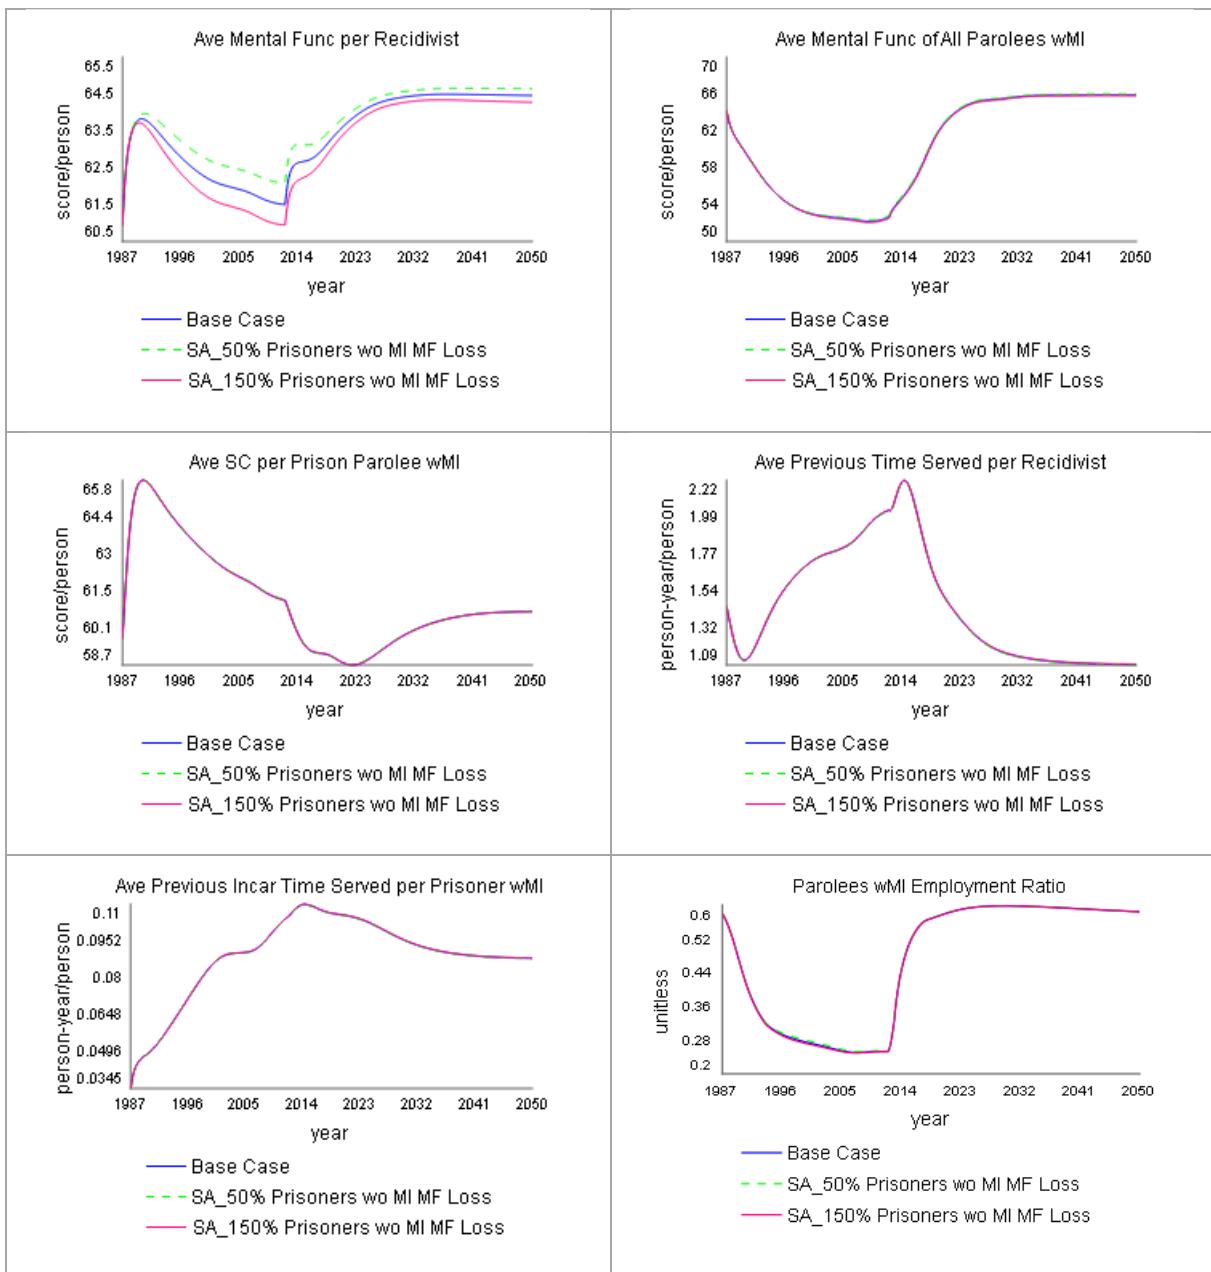

Sensitivity Analysis Test 7 – Prisoners without Mental Illness’ Mental Functions Loss per Year

In this test, the “prisoner wo MI mental func loss per year” parameter is varied between 50% and 150% of the constant value, which is two score per person per year, from 1988 onwards.

Selected Results

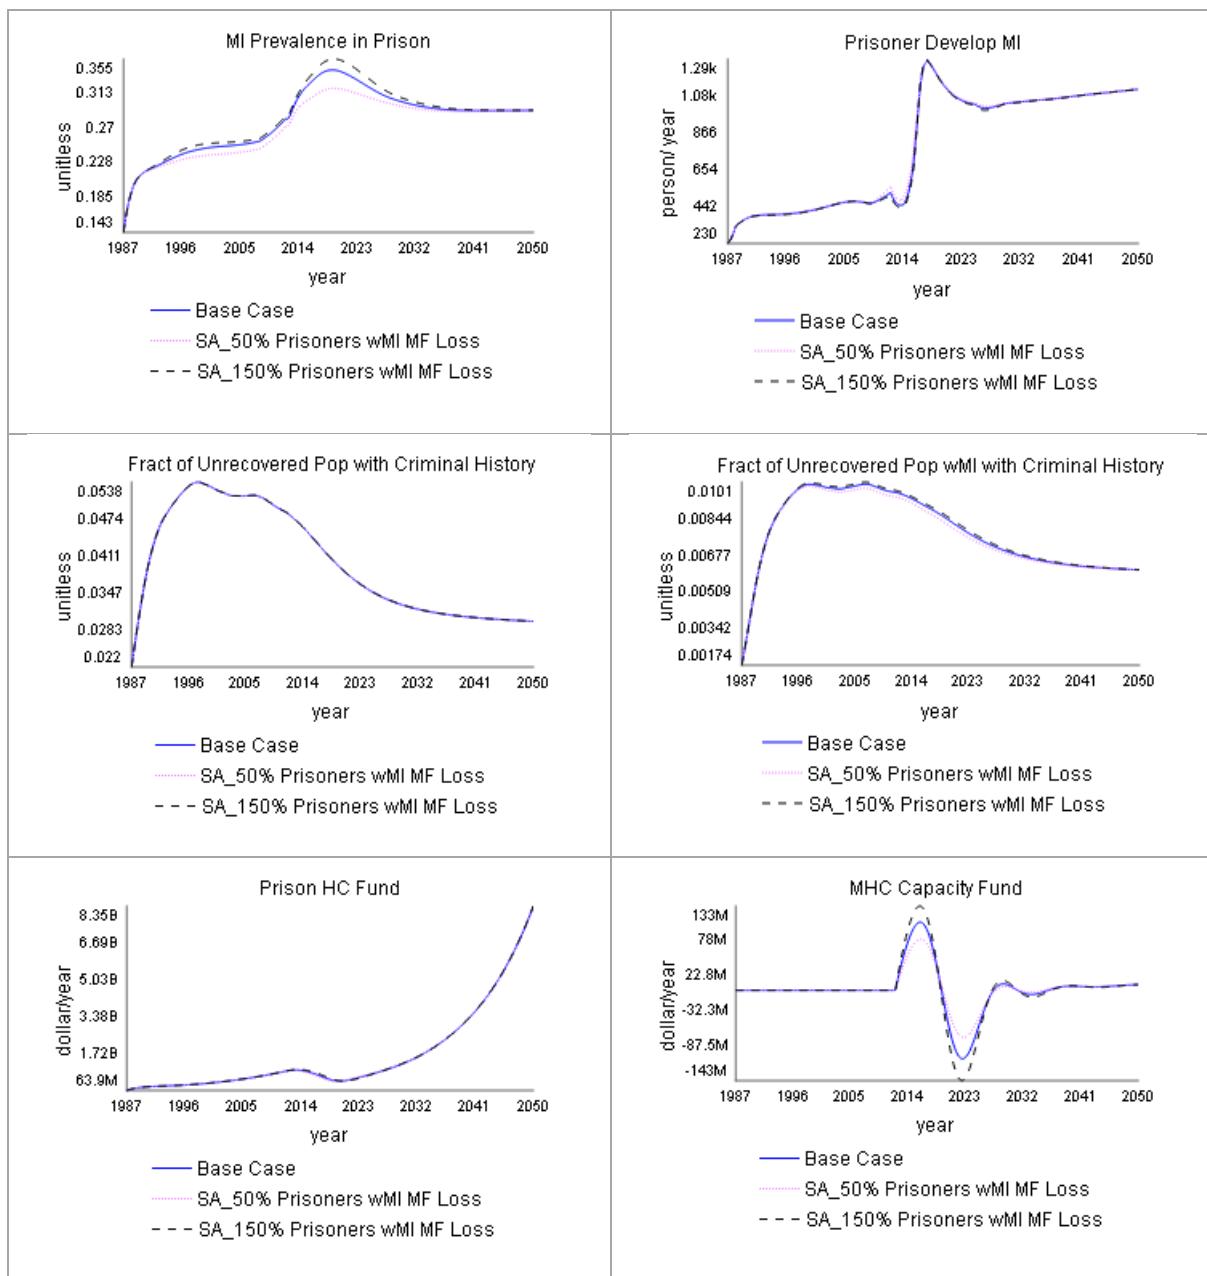

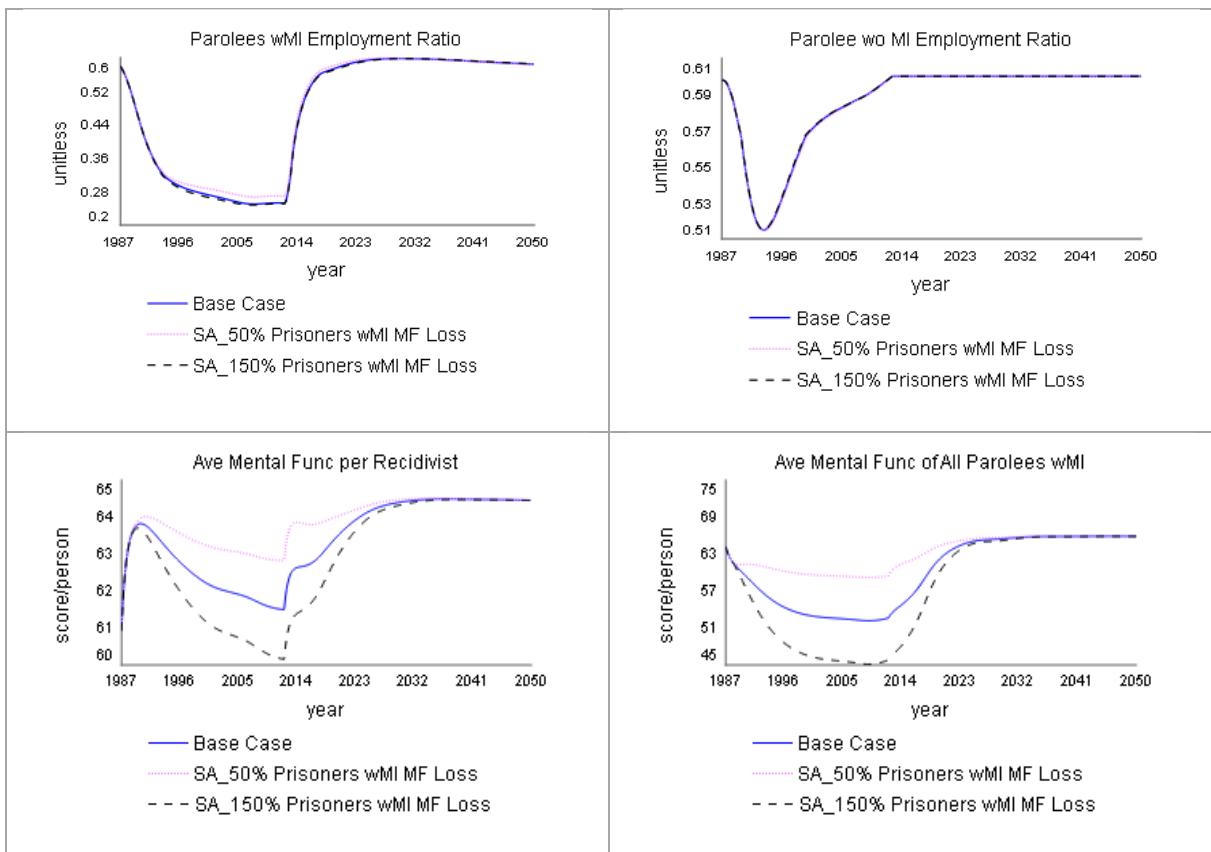

Sensitivity Analysis Test 8 – Prisoners with Mental Illness’ Mental Functions Loss per Year

In this test, the “prisoner wMI mental func loss per year” parameter is varied between 50% and 150% of the constant value, which is two score per person per year, from 1988 onwards.

Selected Results

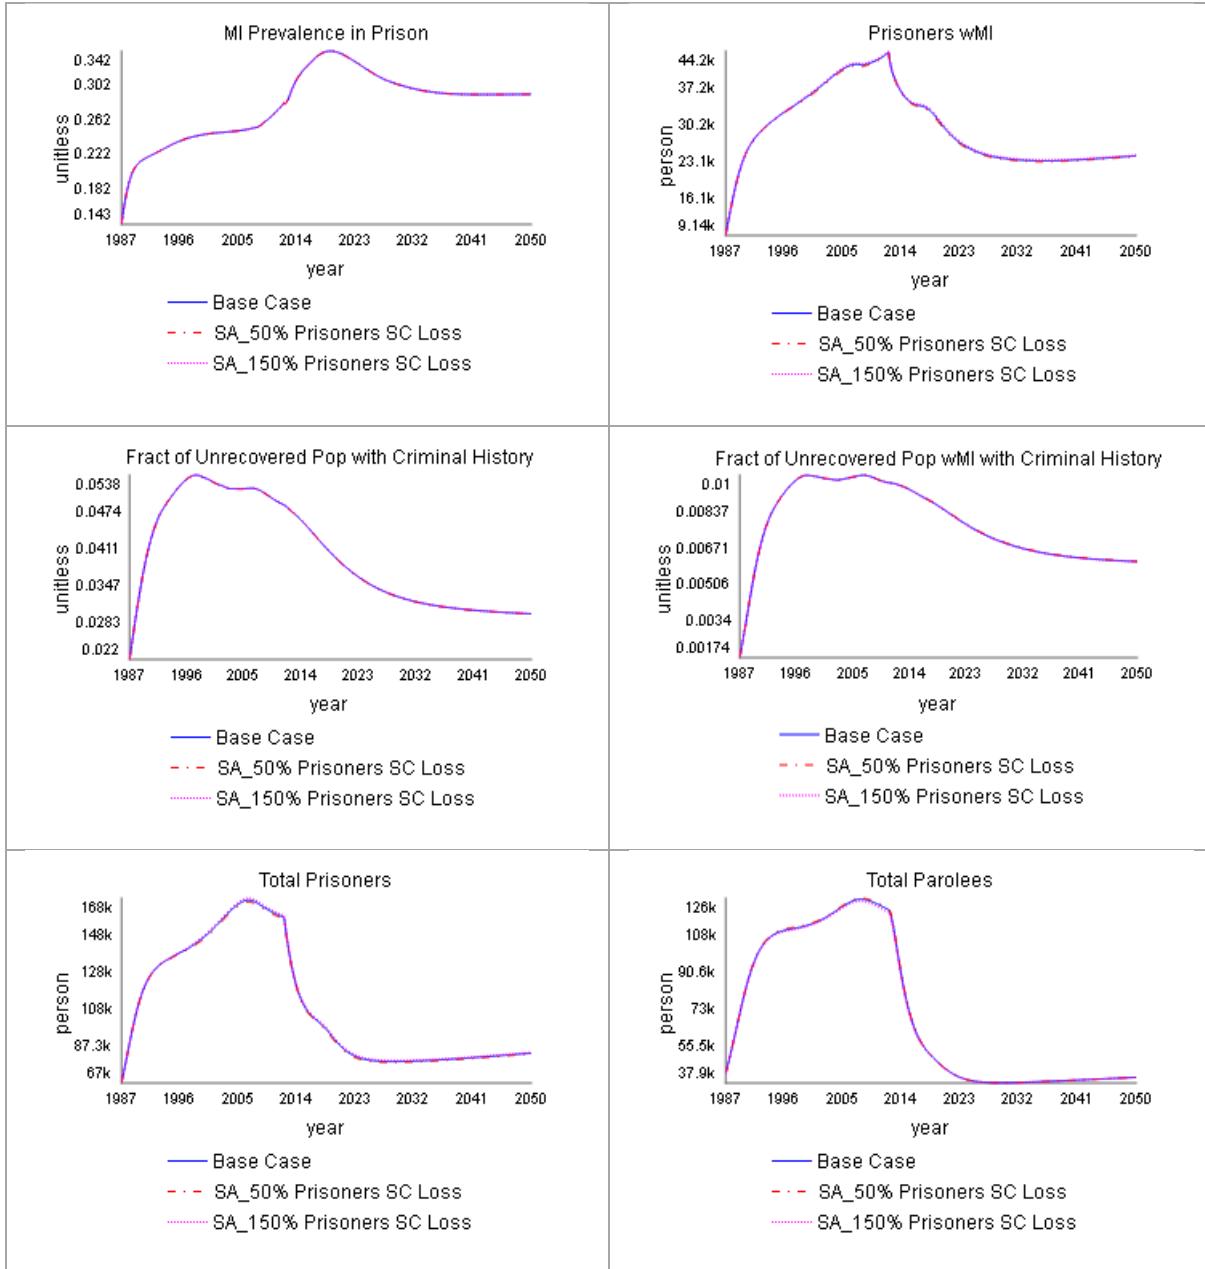

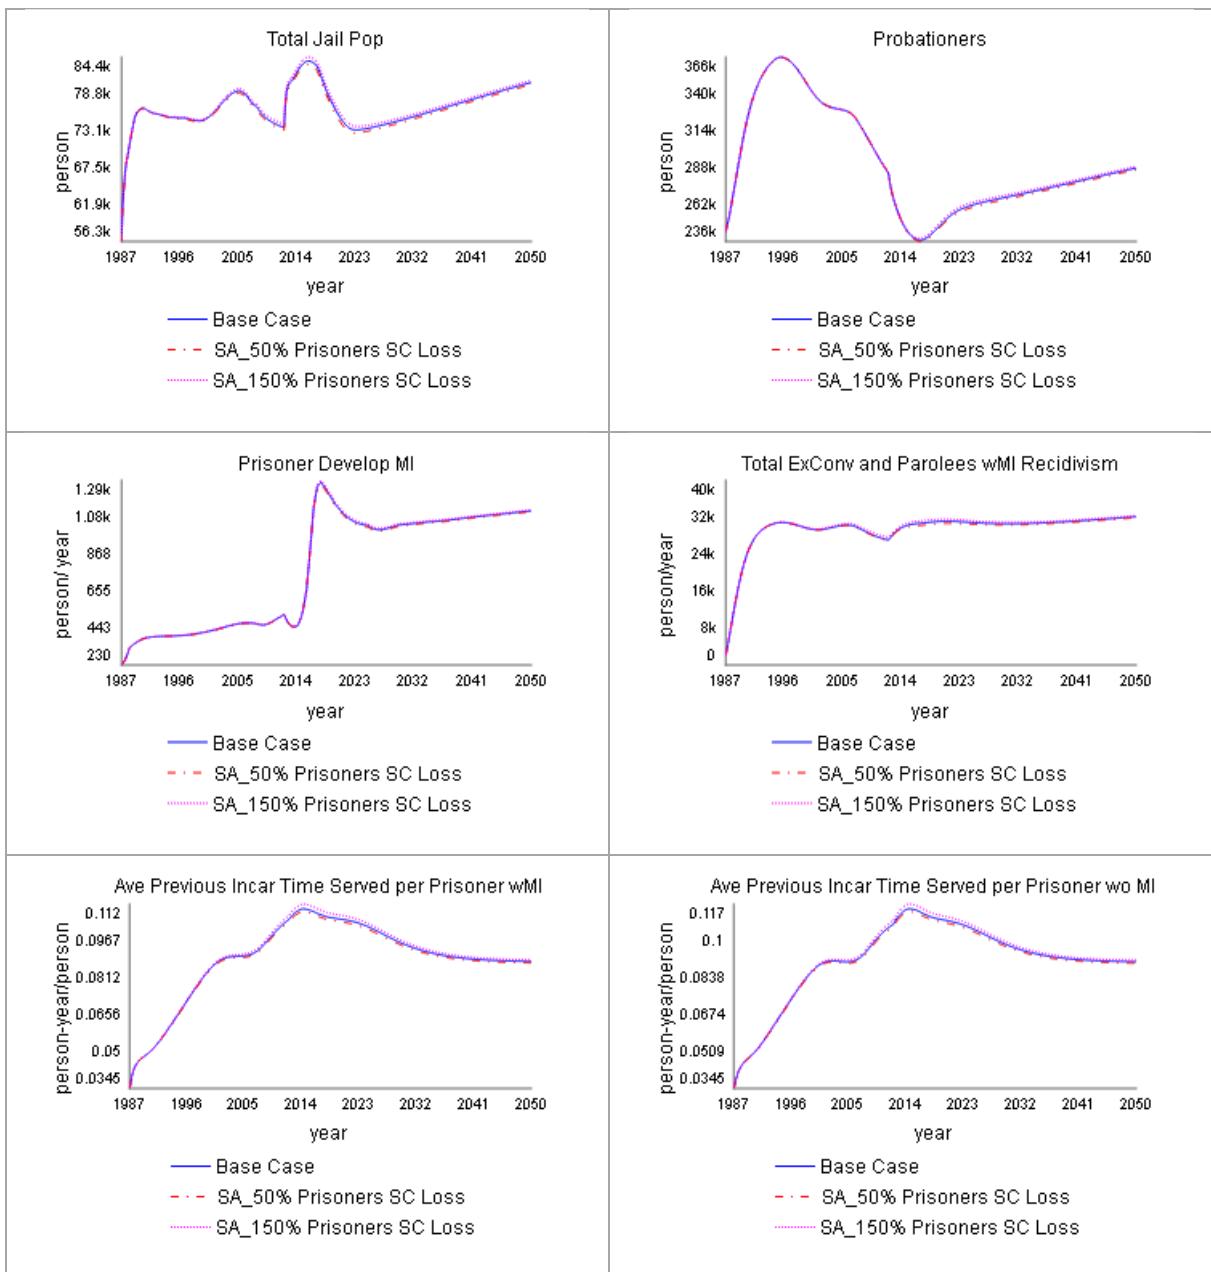

Sensitivity Analysis Test 9—Annual Prisoner’s Social Capital Loss per Year

In this test, the “ref annual prisoner SC loss per person” parameter is varied between 50% and 150% of the constant value, which is two score per person per year, from 1988 onwards.

Selected Results

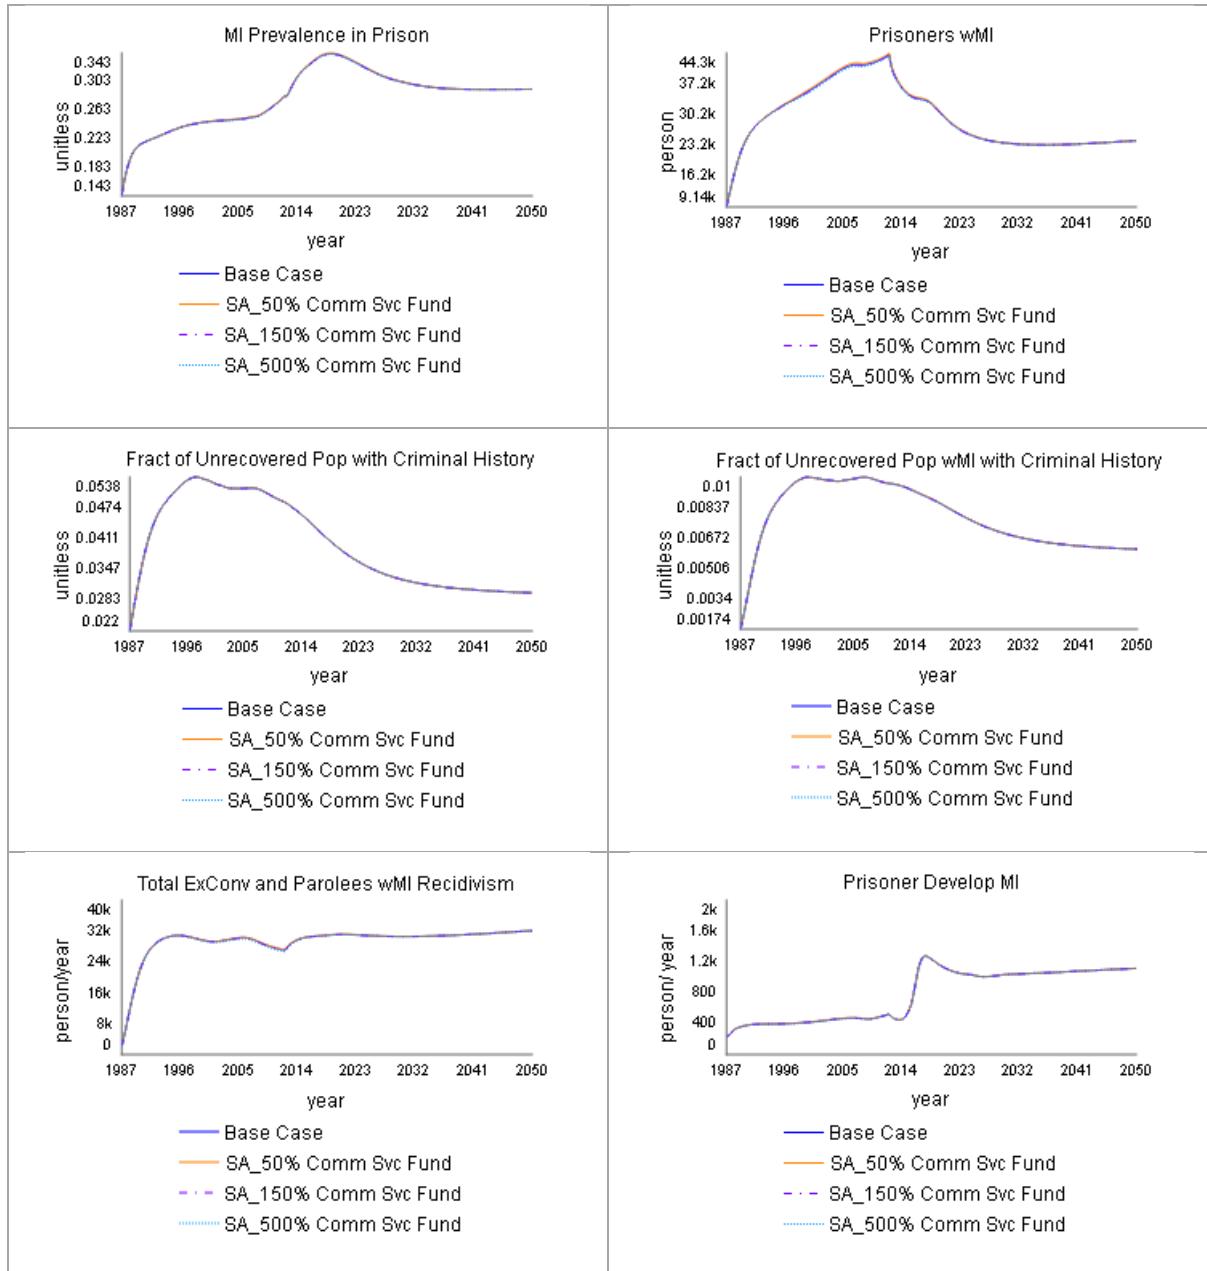

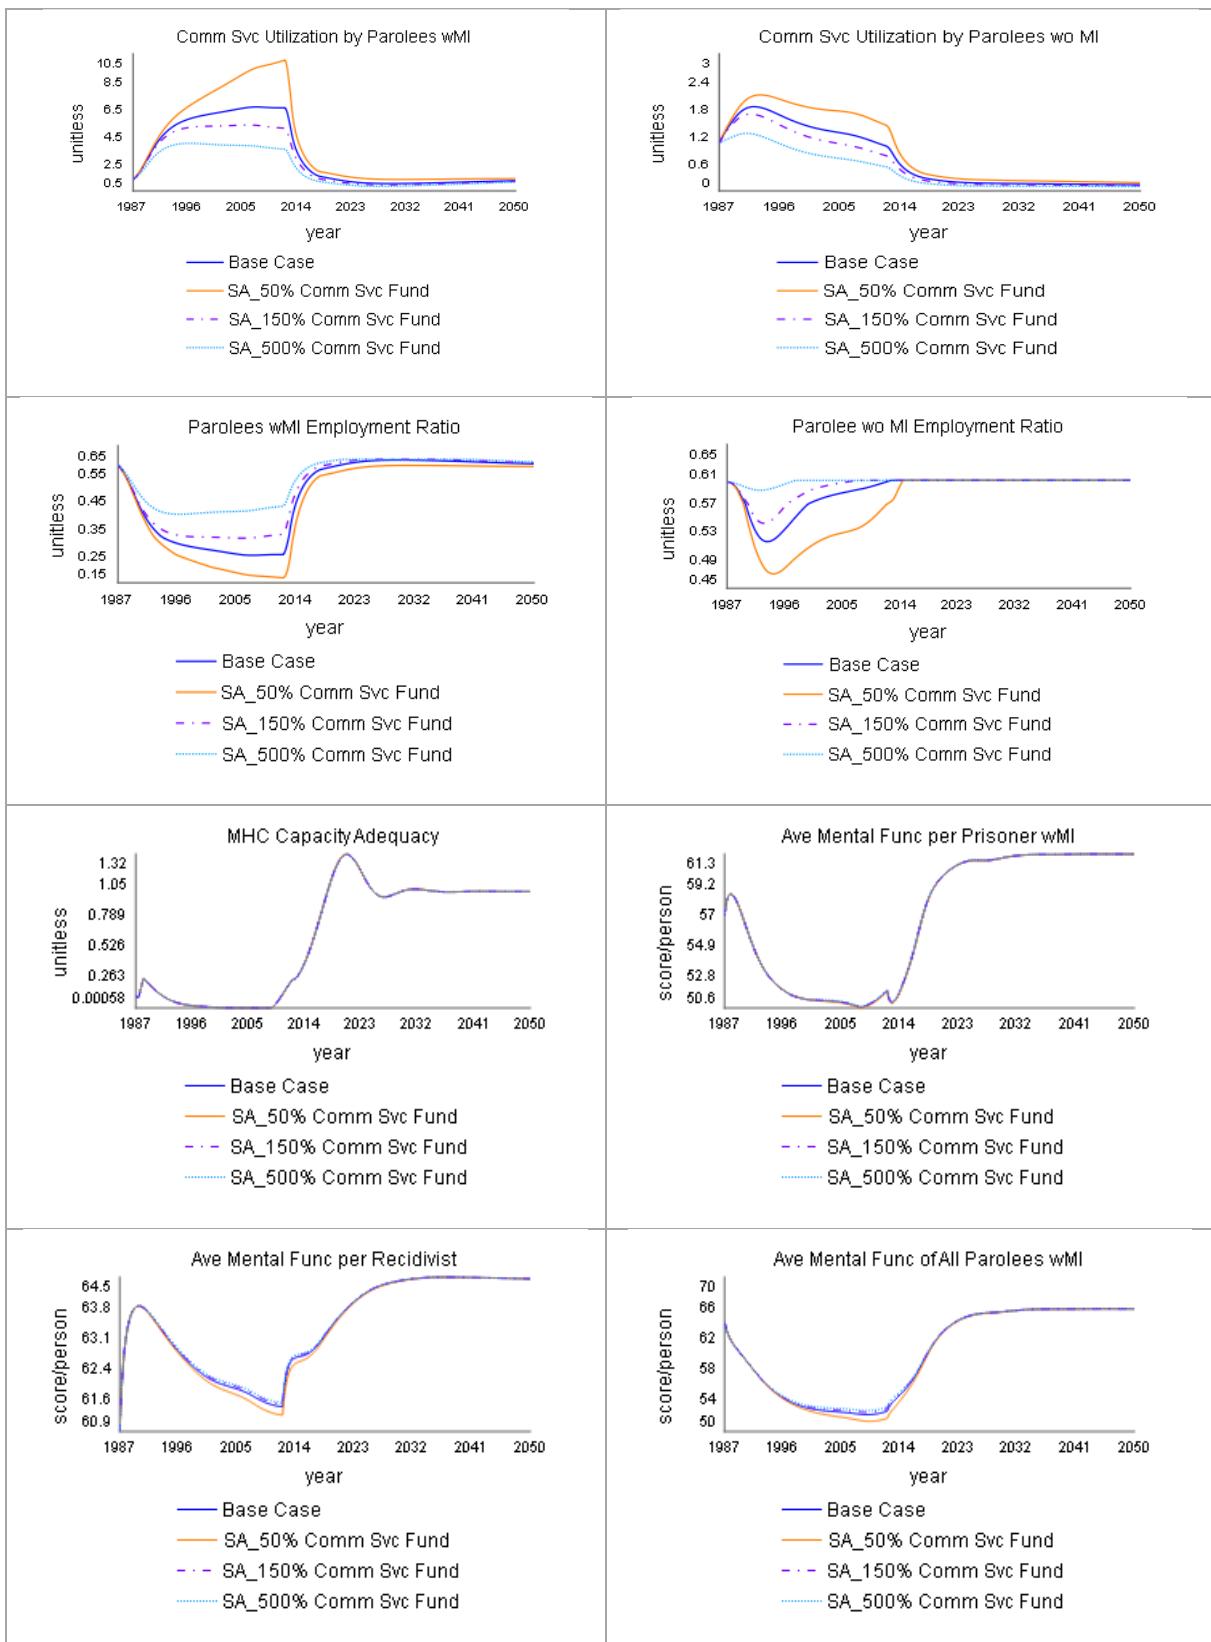

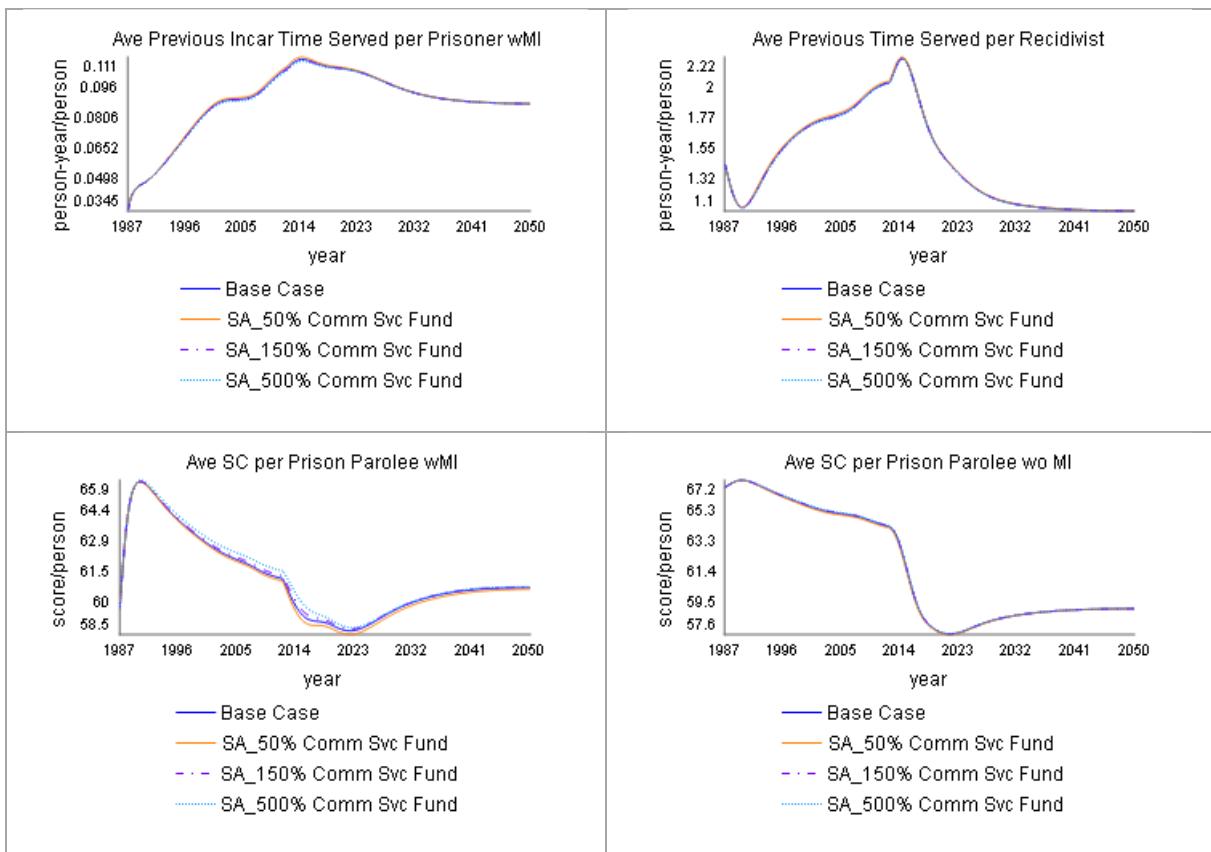

Sensitivity Analysis Test 10– Initial Value of Correctional Fund to Community Services

In this test, the initial value for the Correctional Fund to Community Services stock is varied between 50%, 150%, and 500% of the constant value, which is 8,018, from 1987 onwards.

Selected Results

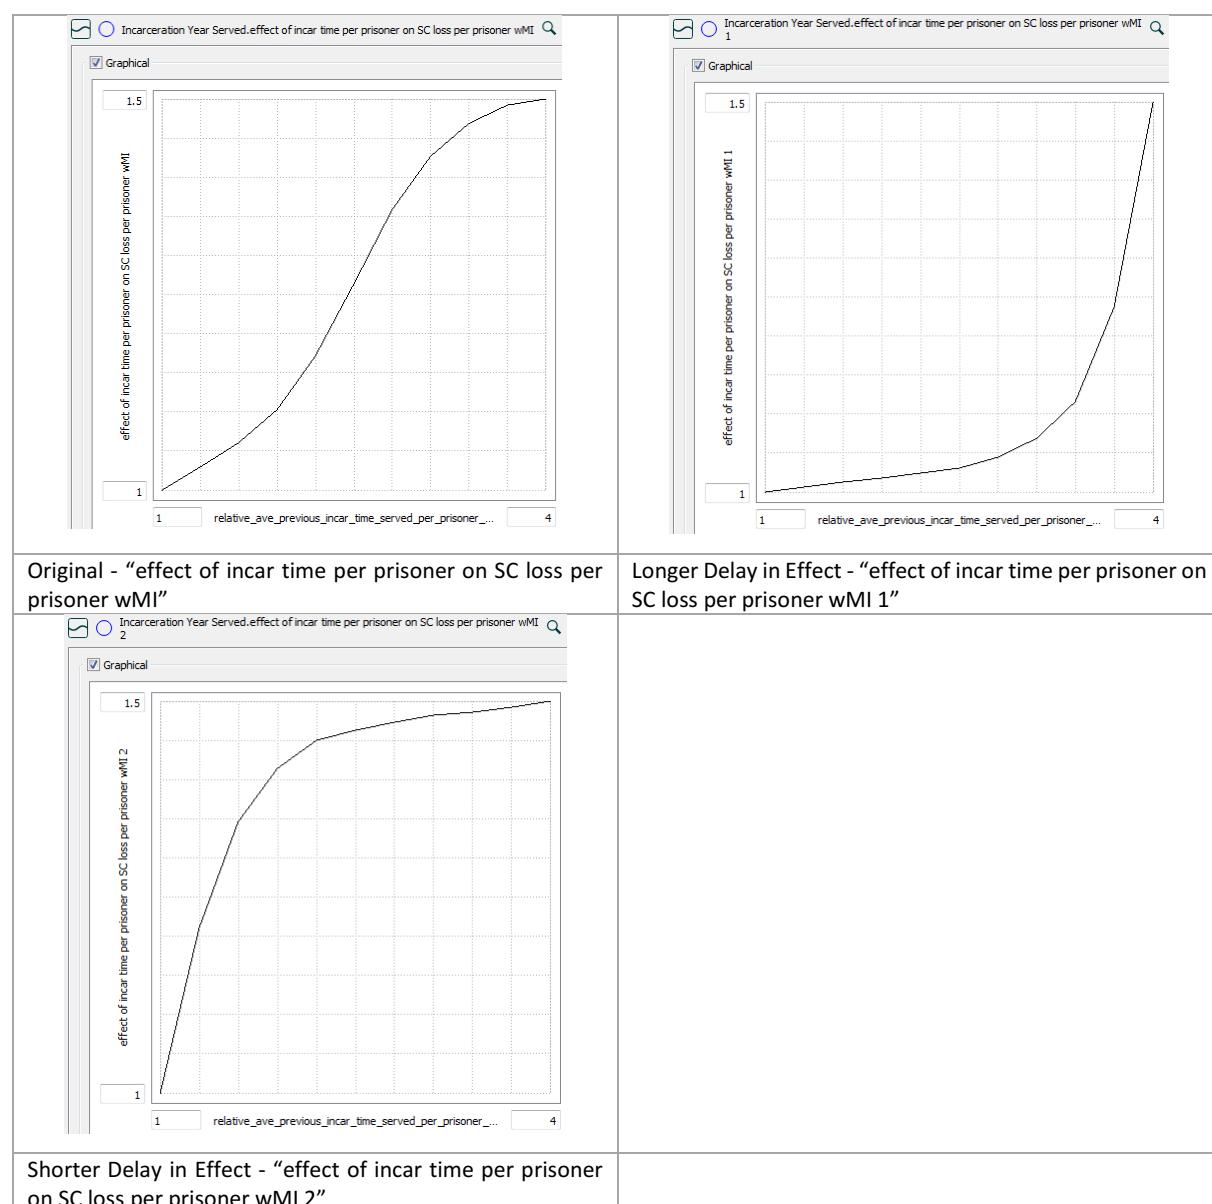

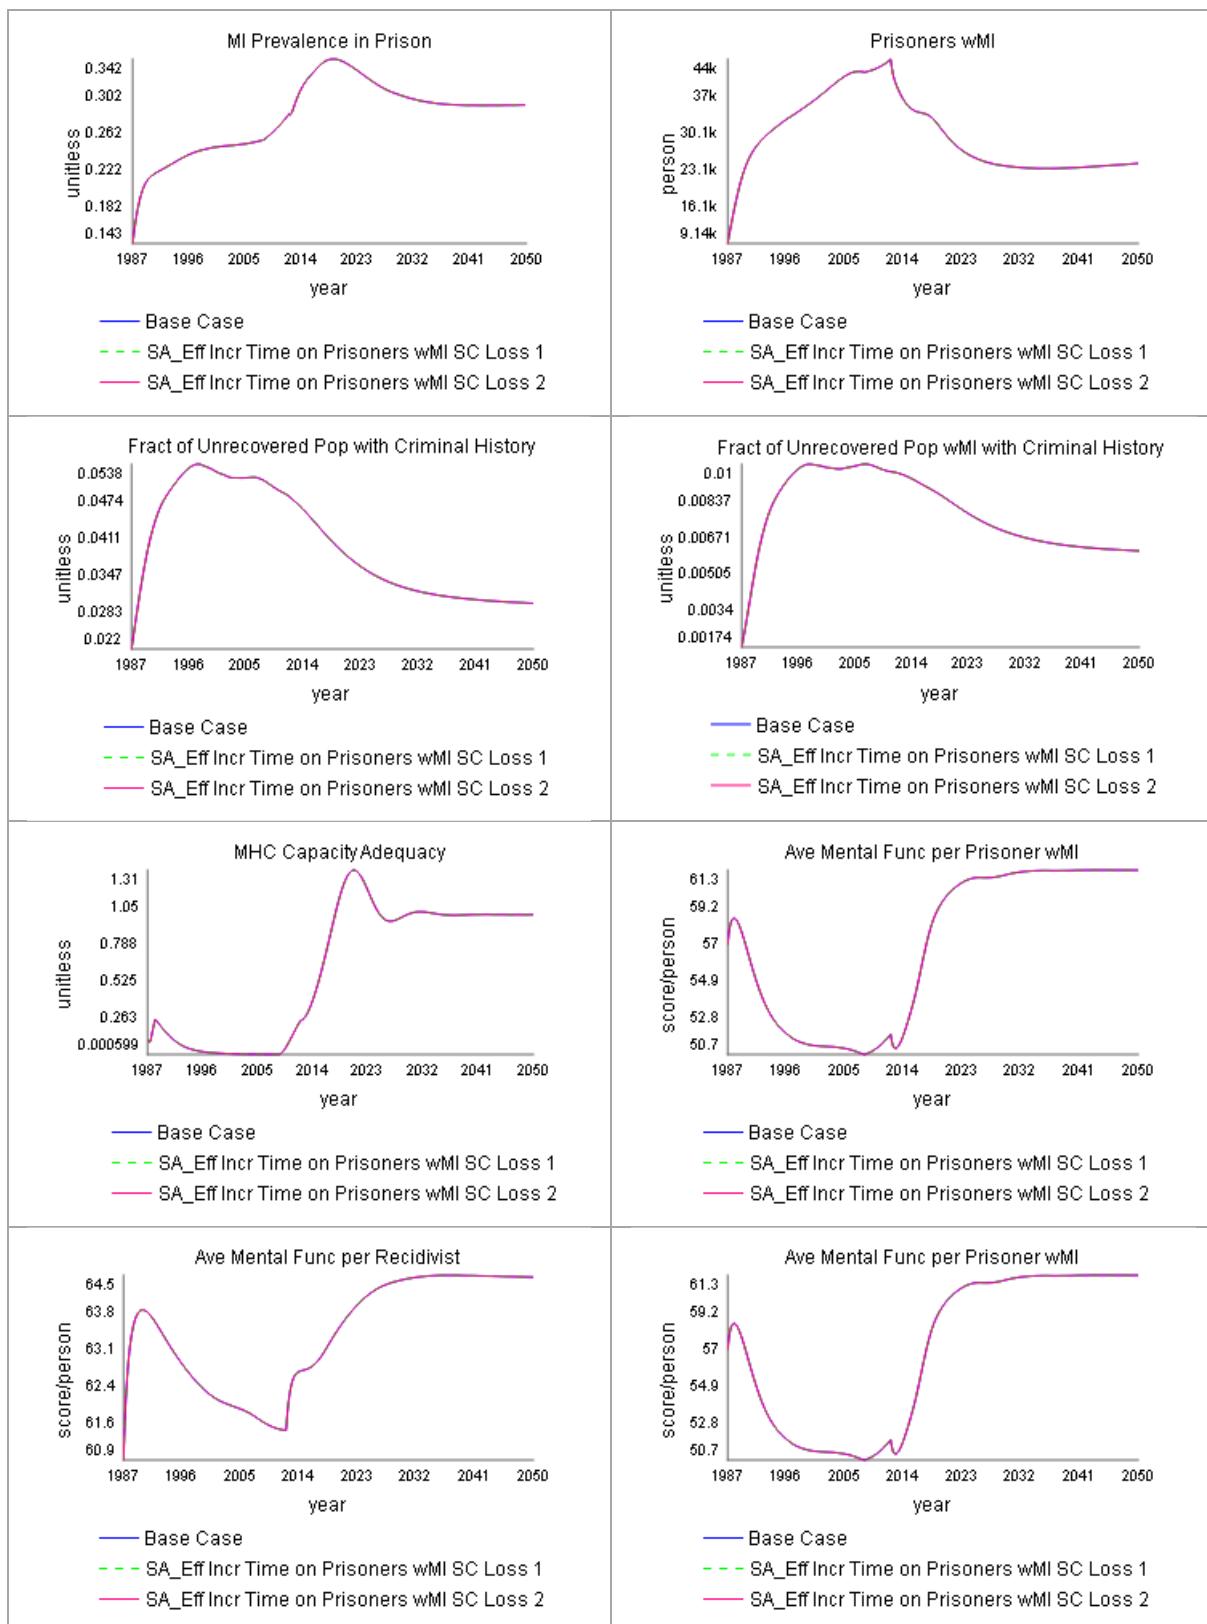

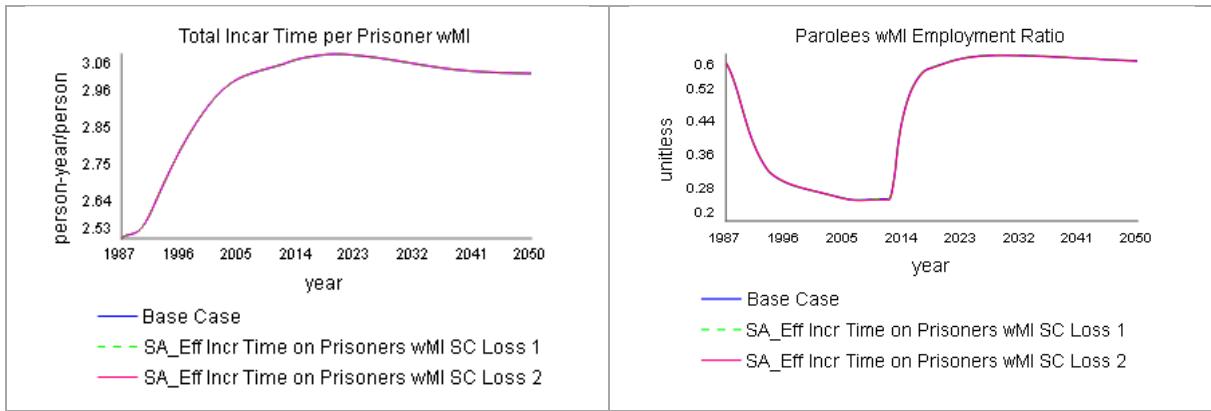

Sensitivity Analysis Test 11 – Effect of Incarceration Time Served by Prisoners on Social Capital Loss per Prisoner with Mental Illness

In this test, the relationship between “relative ave previous incor time served per prisoner wMI” in the **Incarceration Year Served** module and “annual prisoner SC loss per prisoner wMI” in the **Social Capital** module is modified through changing the steepness of the graph in the table function in “effect of incor time per prisoner on SC loss per prisoner wMI” to assess the impact on selected parameters. The steepness of the table function is varied to characterize the delay in the effect of the input parameter. The following graphs show the altered table functions. As the structure for the SC loss of prisoners w/o MI is similar, hence only the “effect of incor time per prisoner on SC loss per prisoner wMI” is tested.

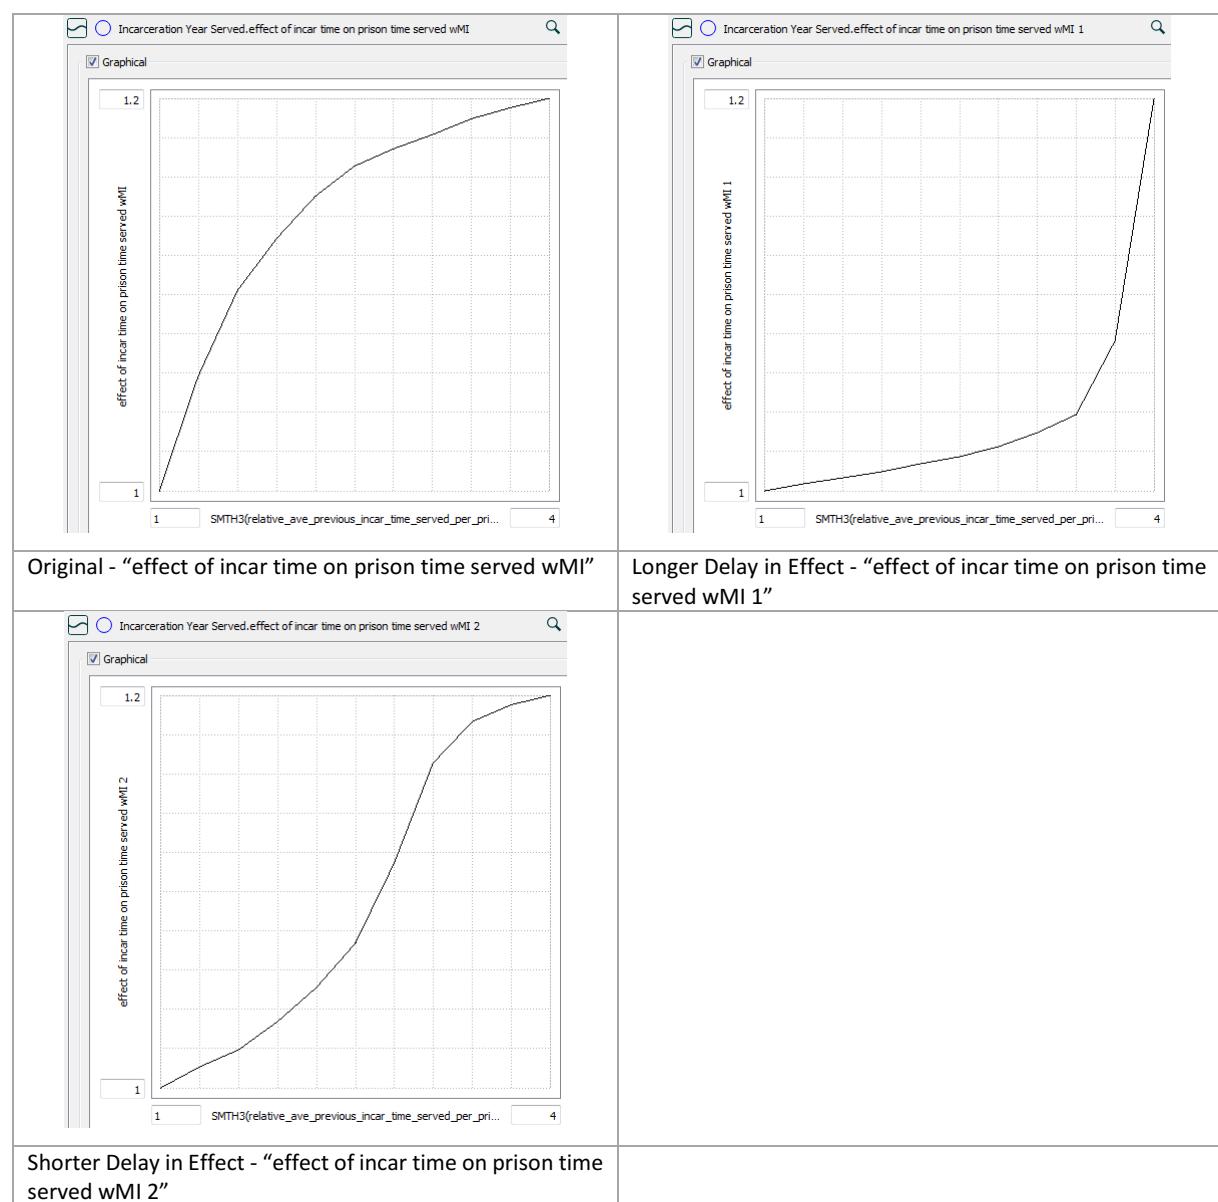

Selected Results

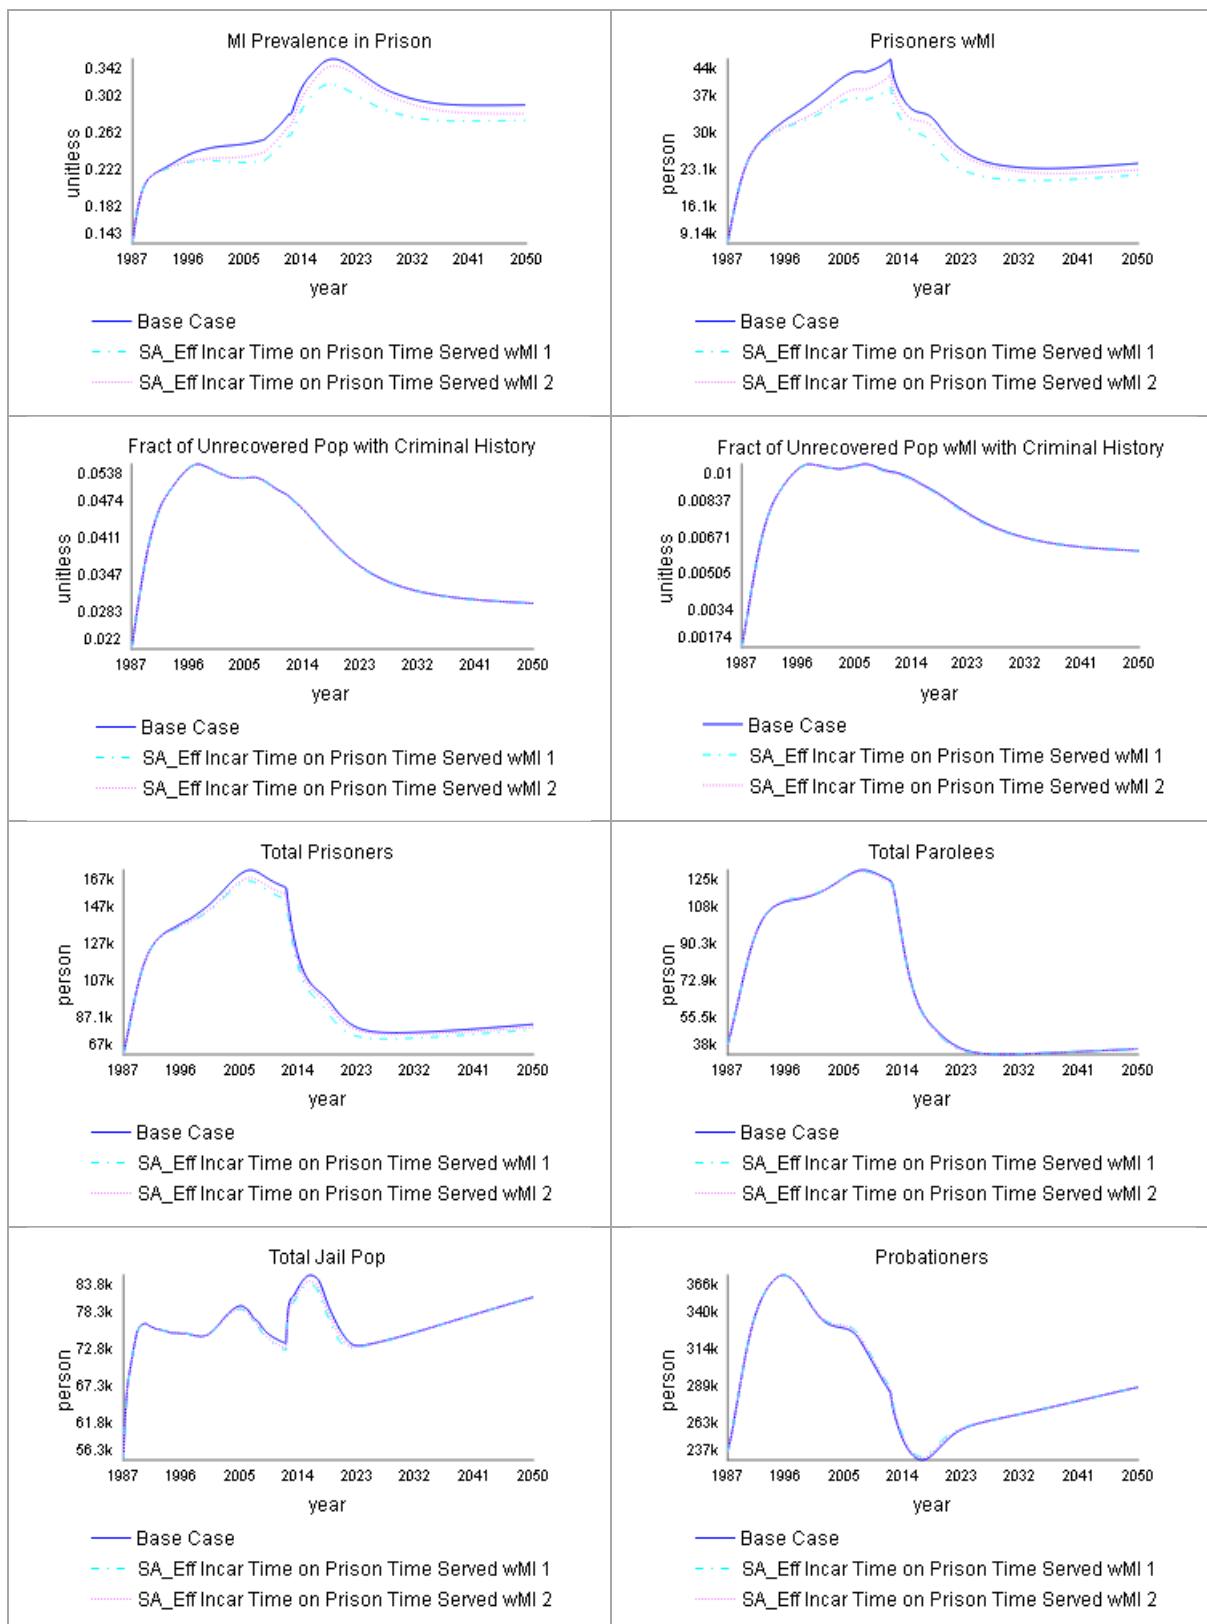

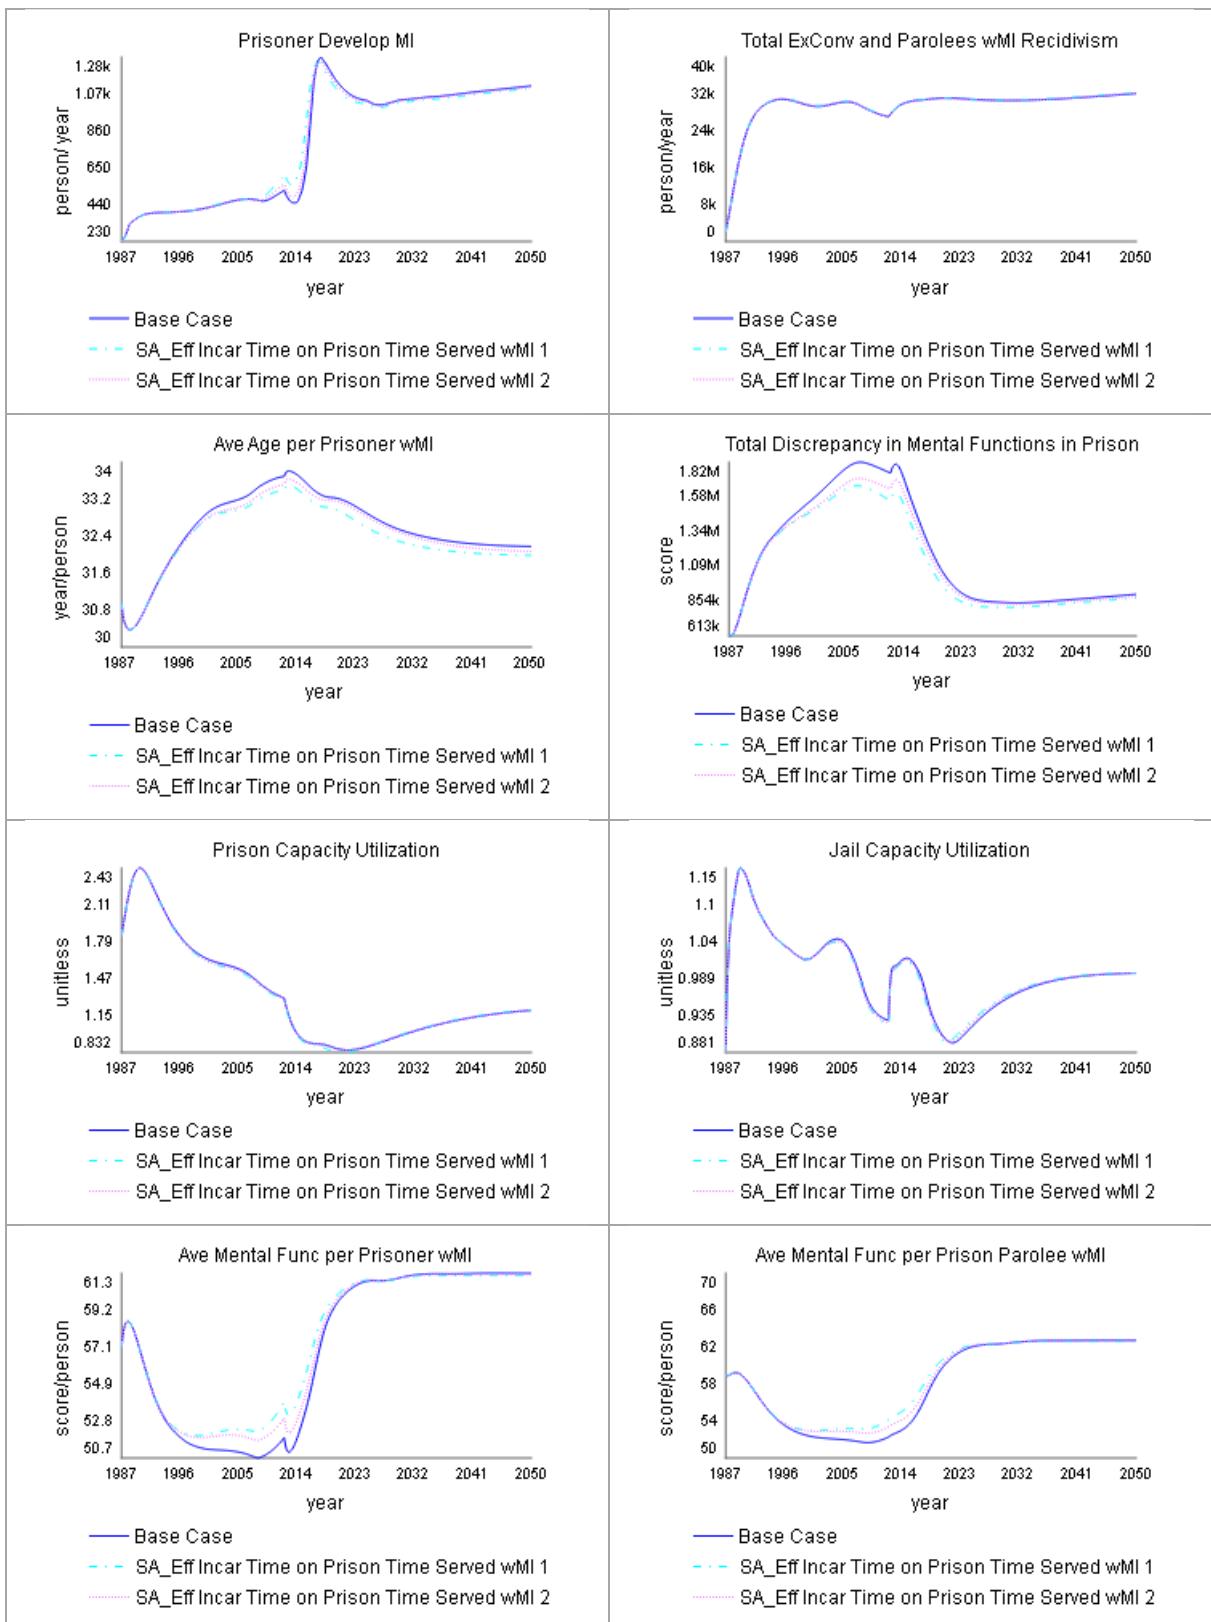

Sensitivity Analysis Test 12 – Effect of Incarceration Time Served on Prison Time Served by Prisoners with Mental Illness

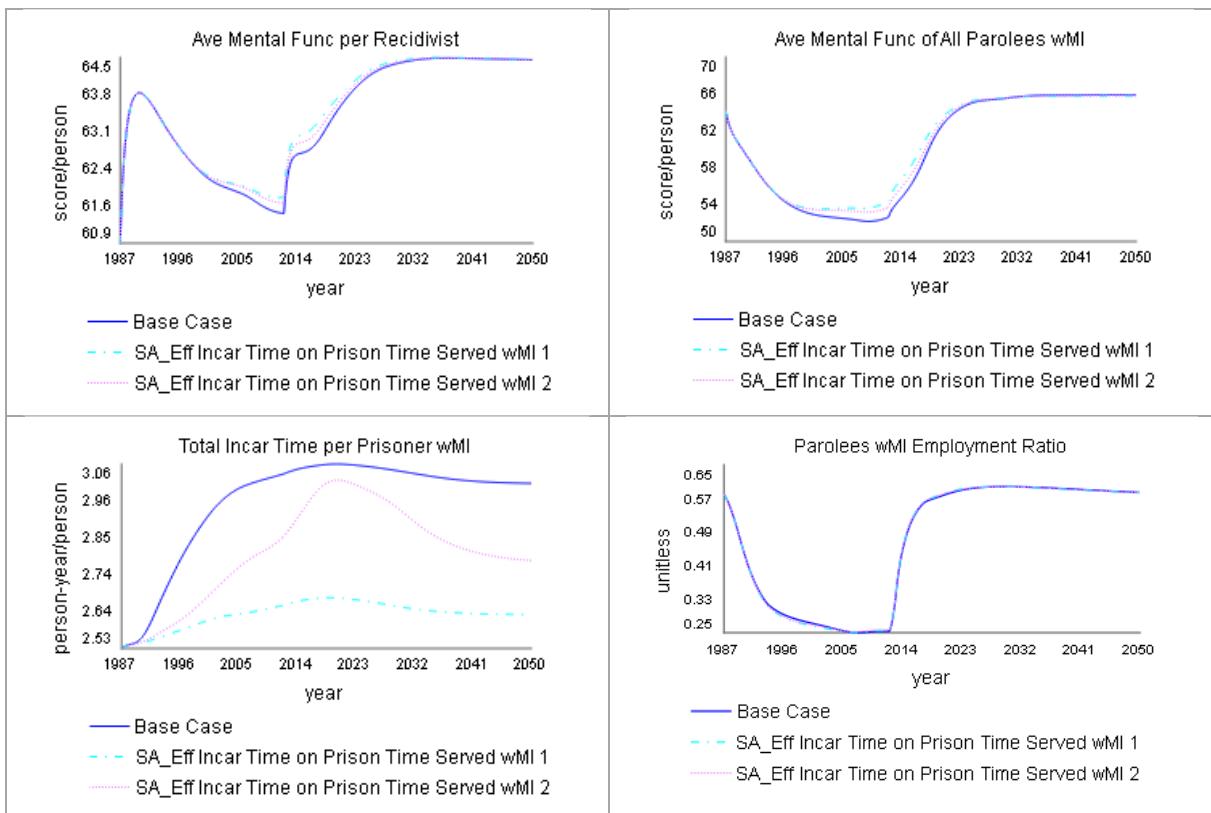

In this test, the relationship between “relative ave previous incor time served per prisoner wMI” in the **Incarceration Year Served** module and “ave prison time served at current release wMI” in the **Individuals with Criminal History** module is modified through changing the steepness of the graph in the table function in “effect of incor time on prison time served wMI” to assess the impact on selected parameters. The steepness of the table function is varied to characterize the delay in the effect of the input parameter. The following graphs show the altered table functions. As the structure for the average time served on prisoners wo MI is similar, only the “effect of incor time on prison time served wMI” is tested.

Selected Results

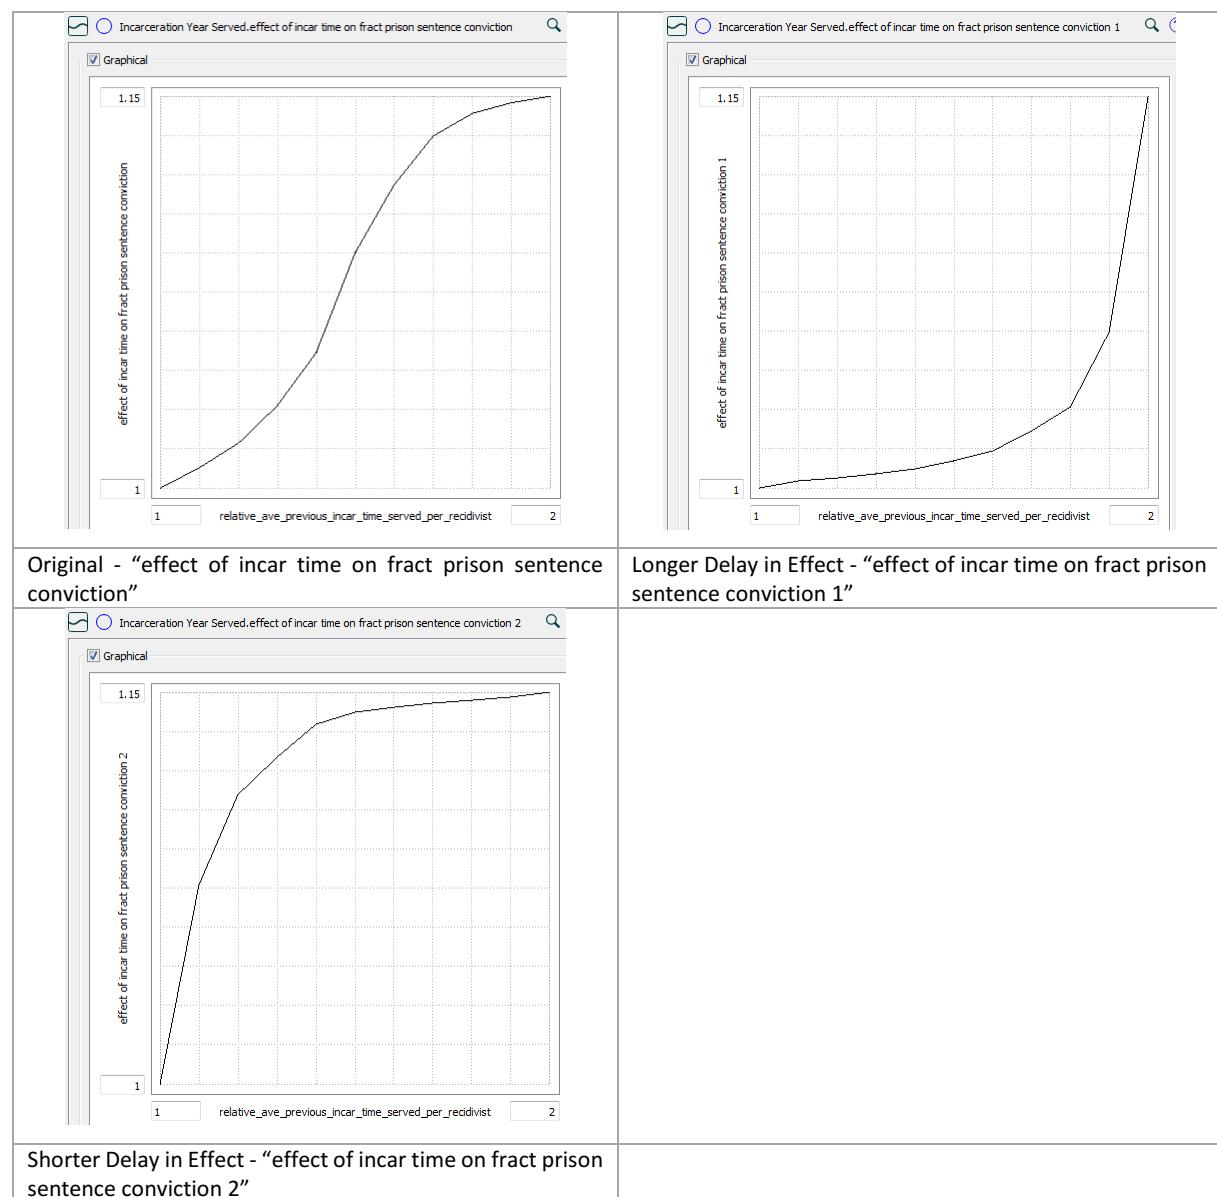

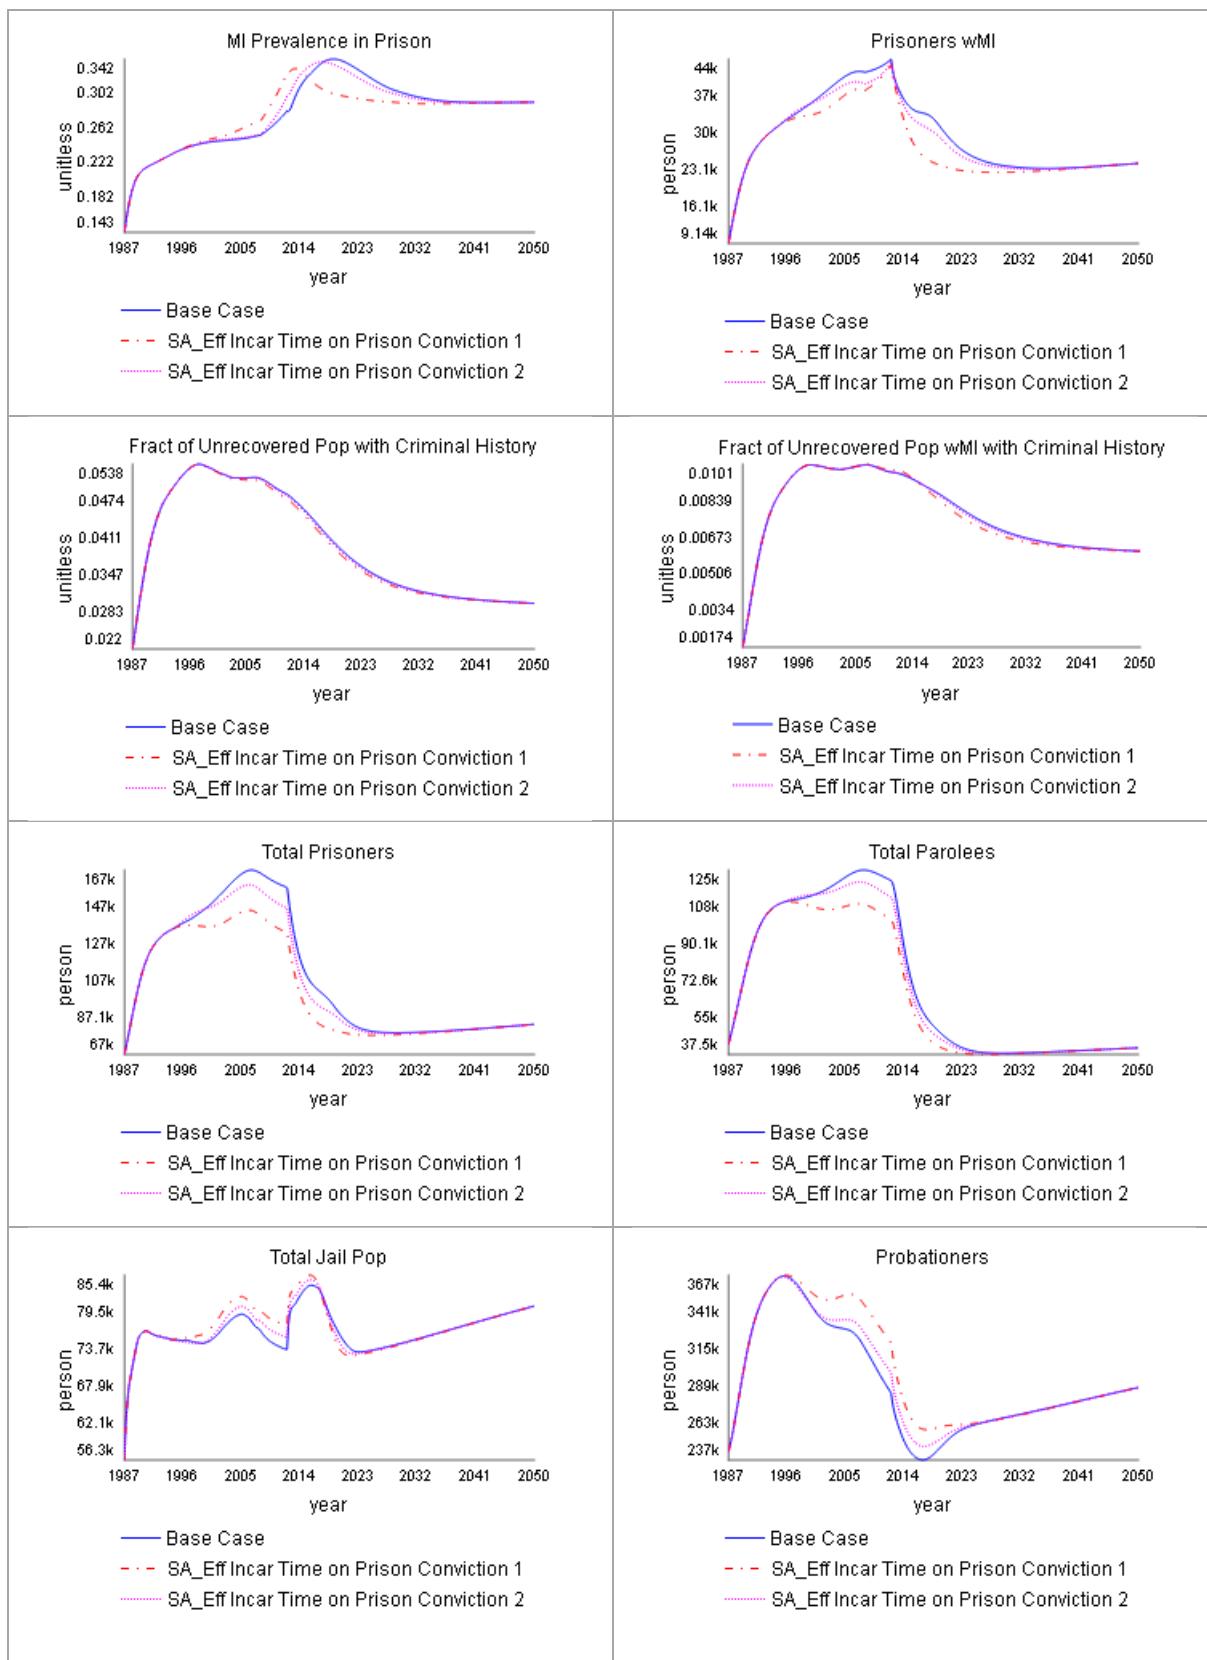

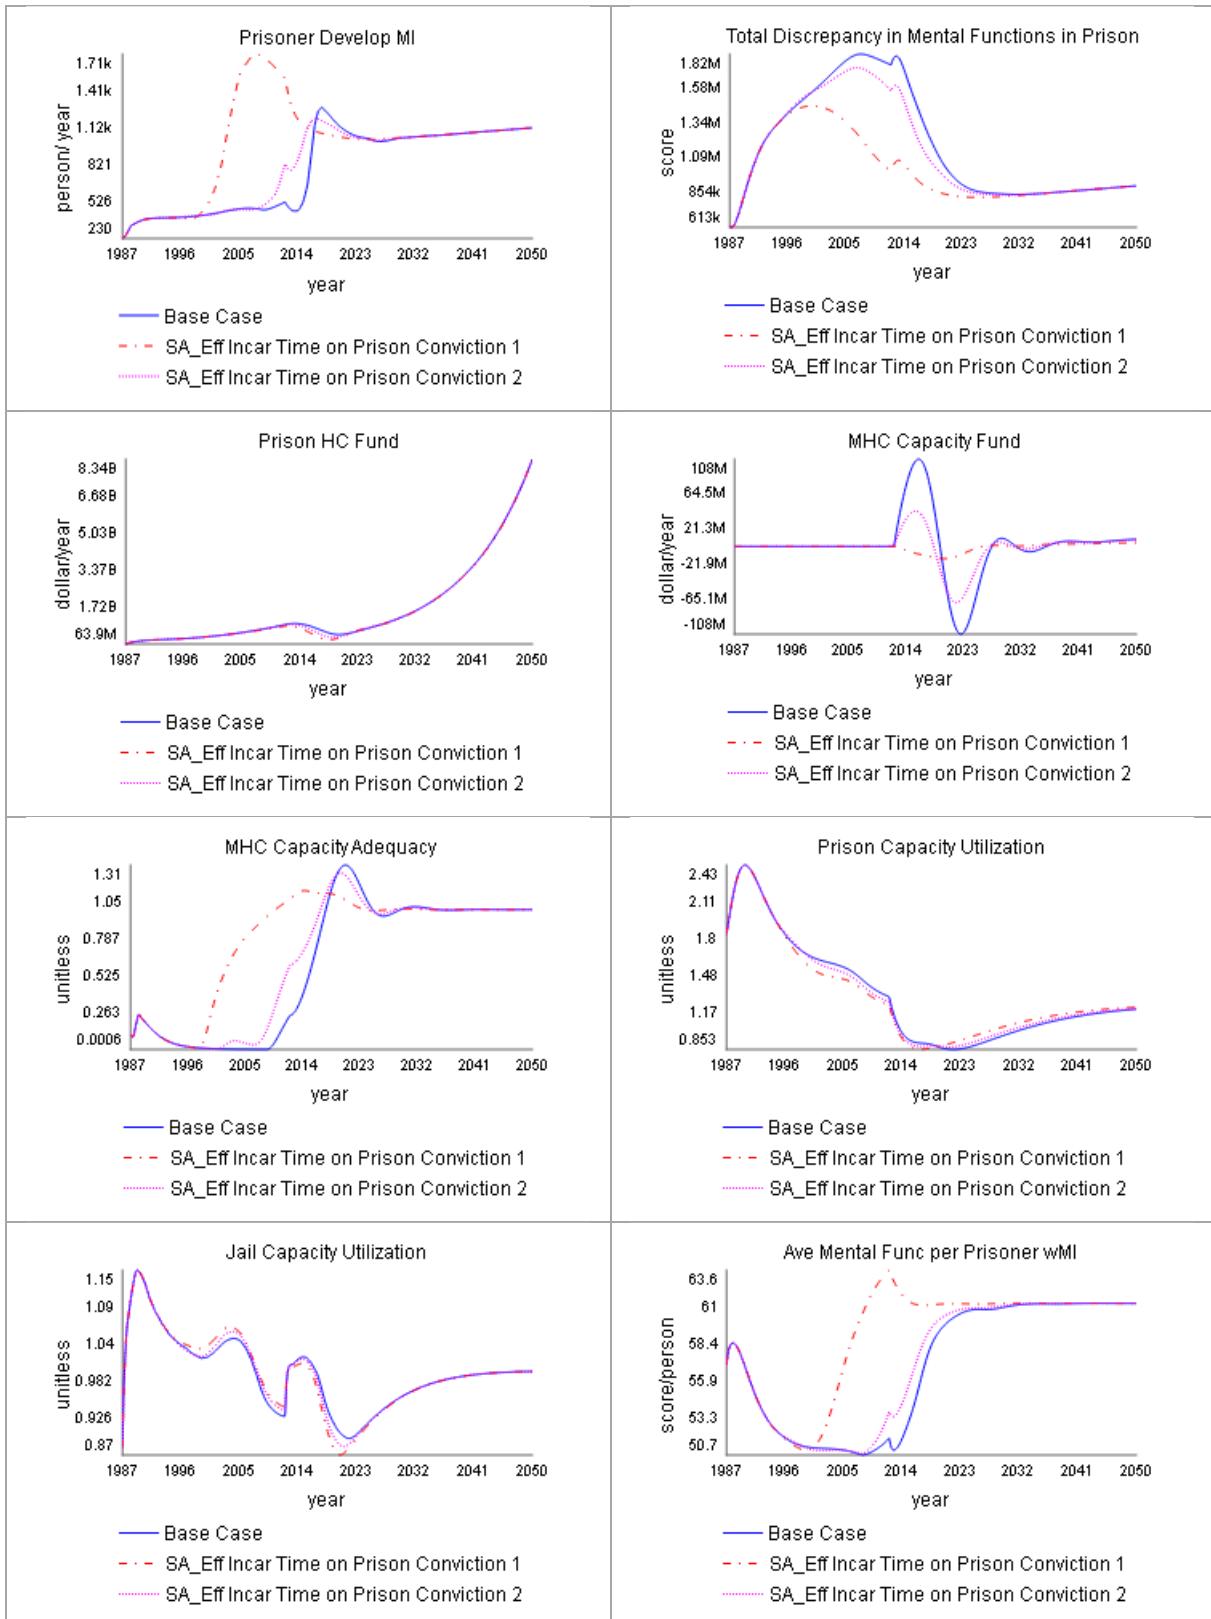

Sensitivity Analysis Test 13 – Effect of Incarceration Time Served on Prison Sentence Conviction

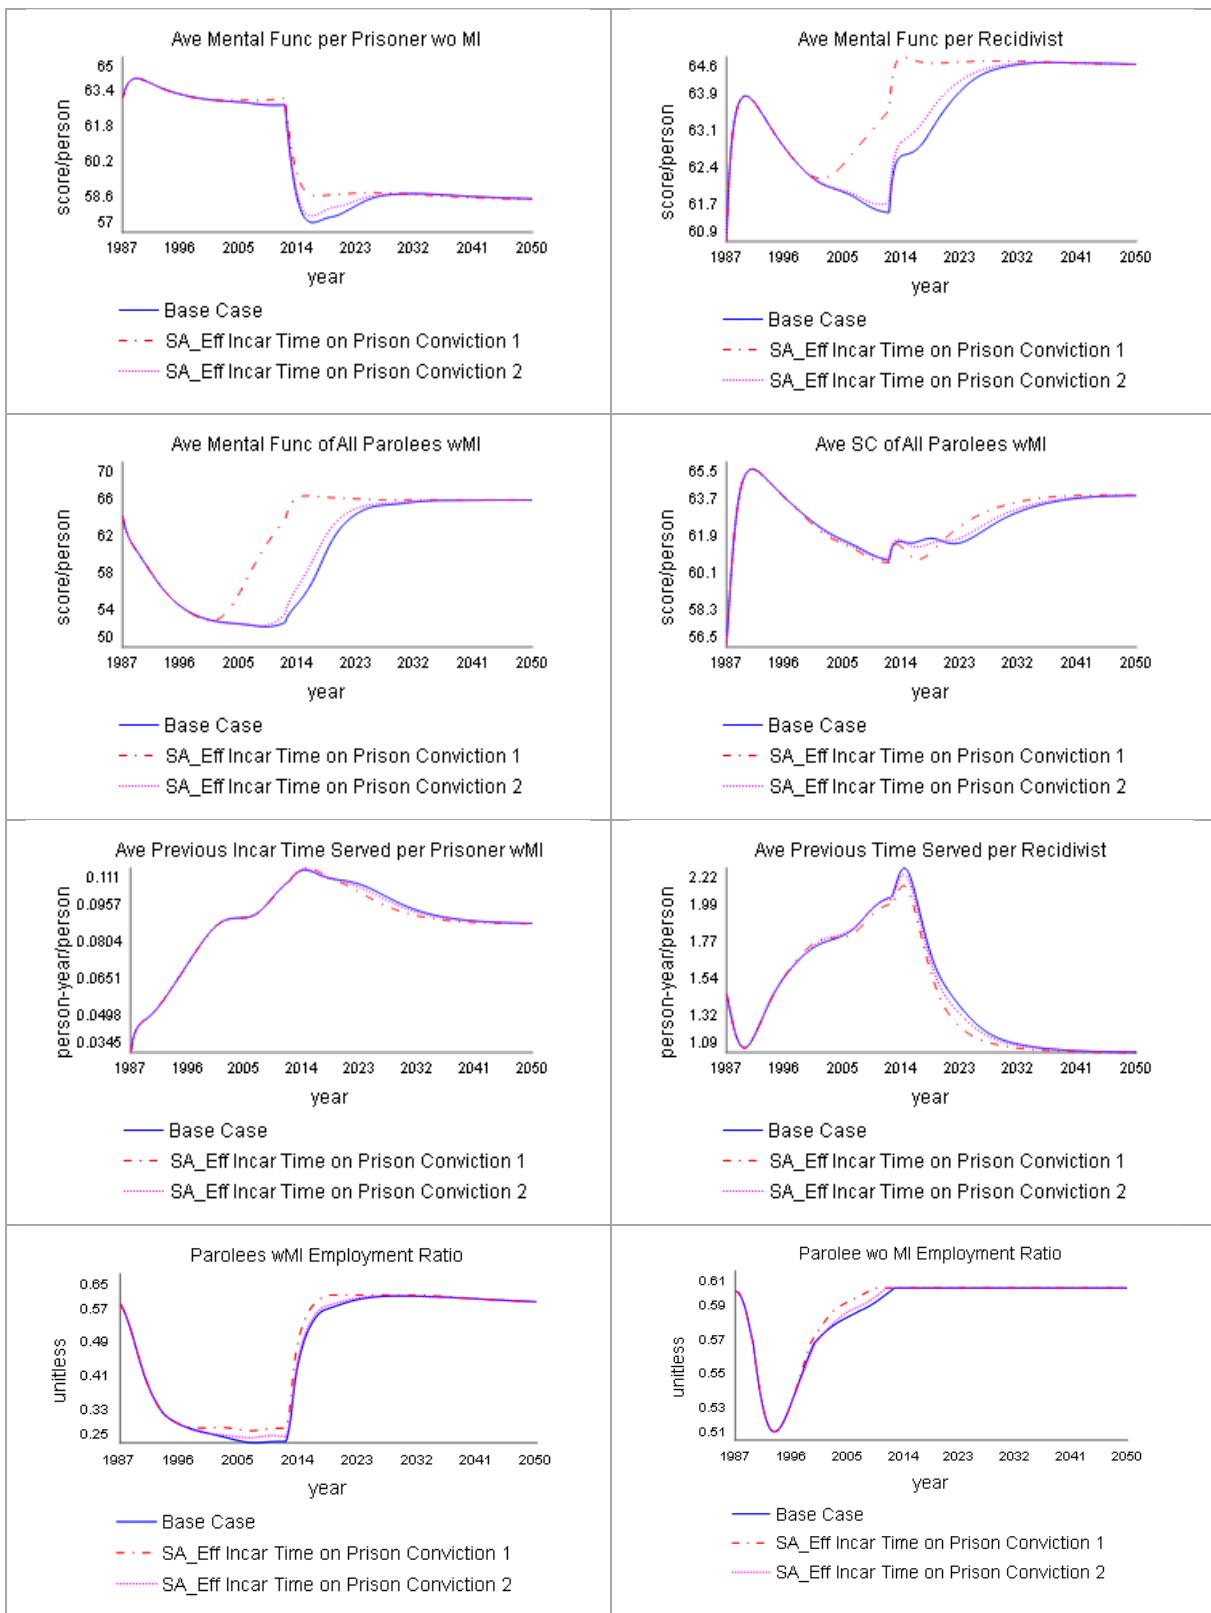

In this test, the relationship between “relative ave previous incor time served per recidivist” in the **Incarceration Year Served** module and “fract convicts in custody convicted to prison sentence” in the **Individuals with Criminal History** module is modified through changing the steepness of the graph in the table function in “effect of incor time on fract prison sentence conviction” to assess the impact on selected parameters. The steepness of the table function is varied to characterize the delay in the effect of the input parameter. The following graphs show the altered table functions. This effect also influence the fraction convicts in community convicted to prison sentence.

Selected Results

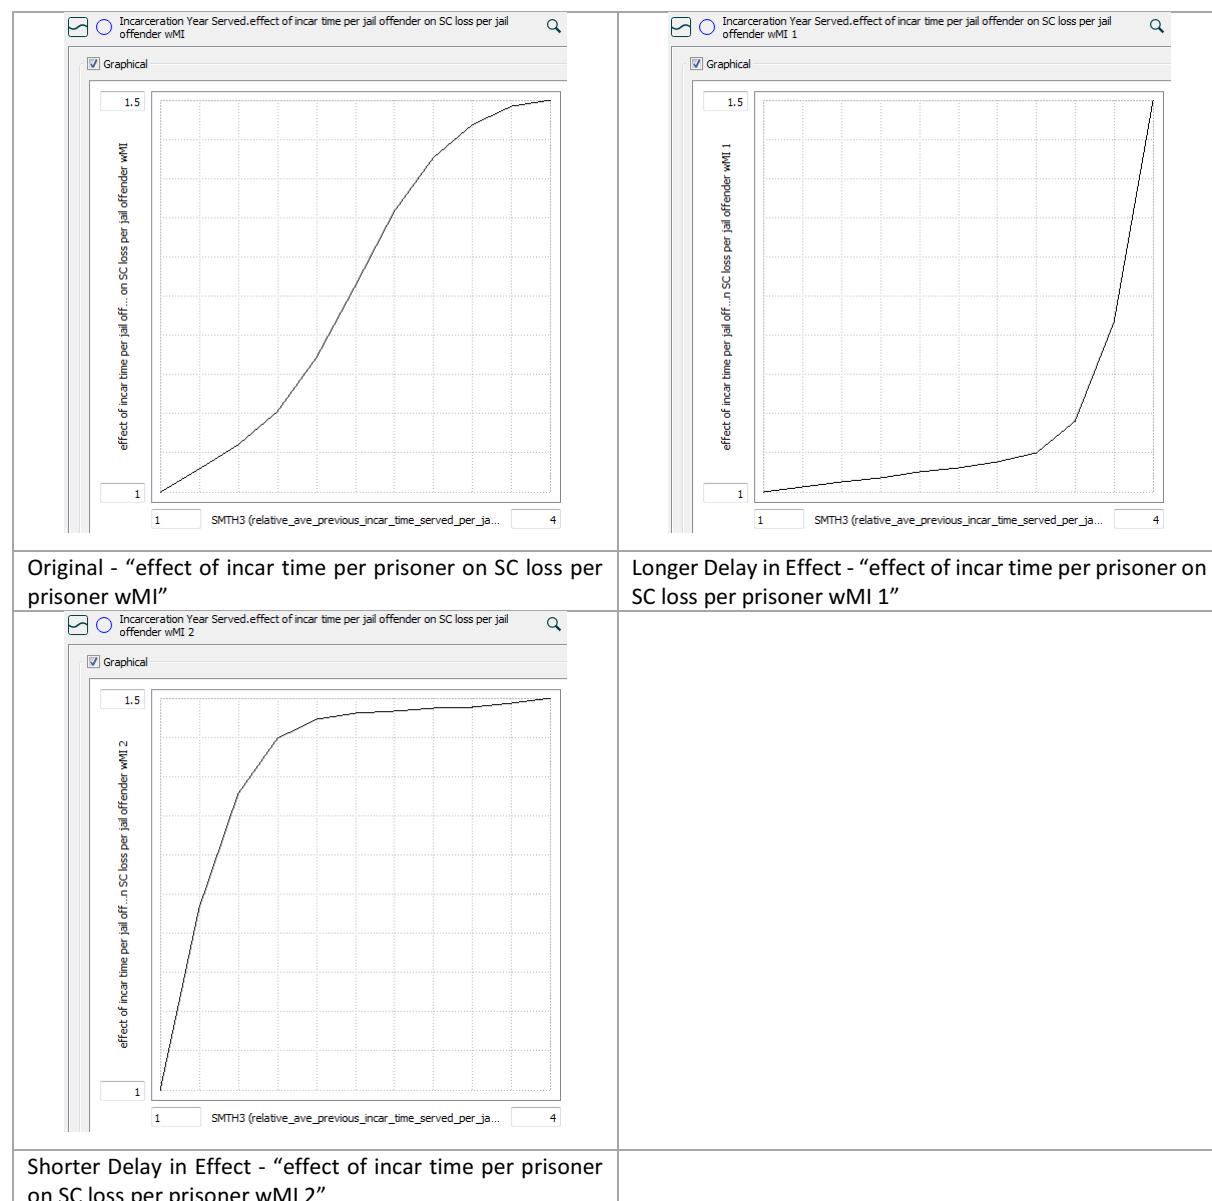

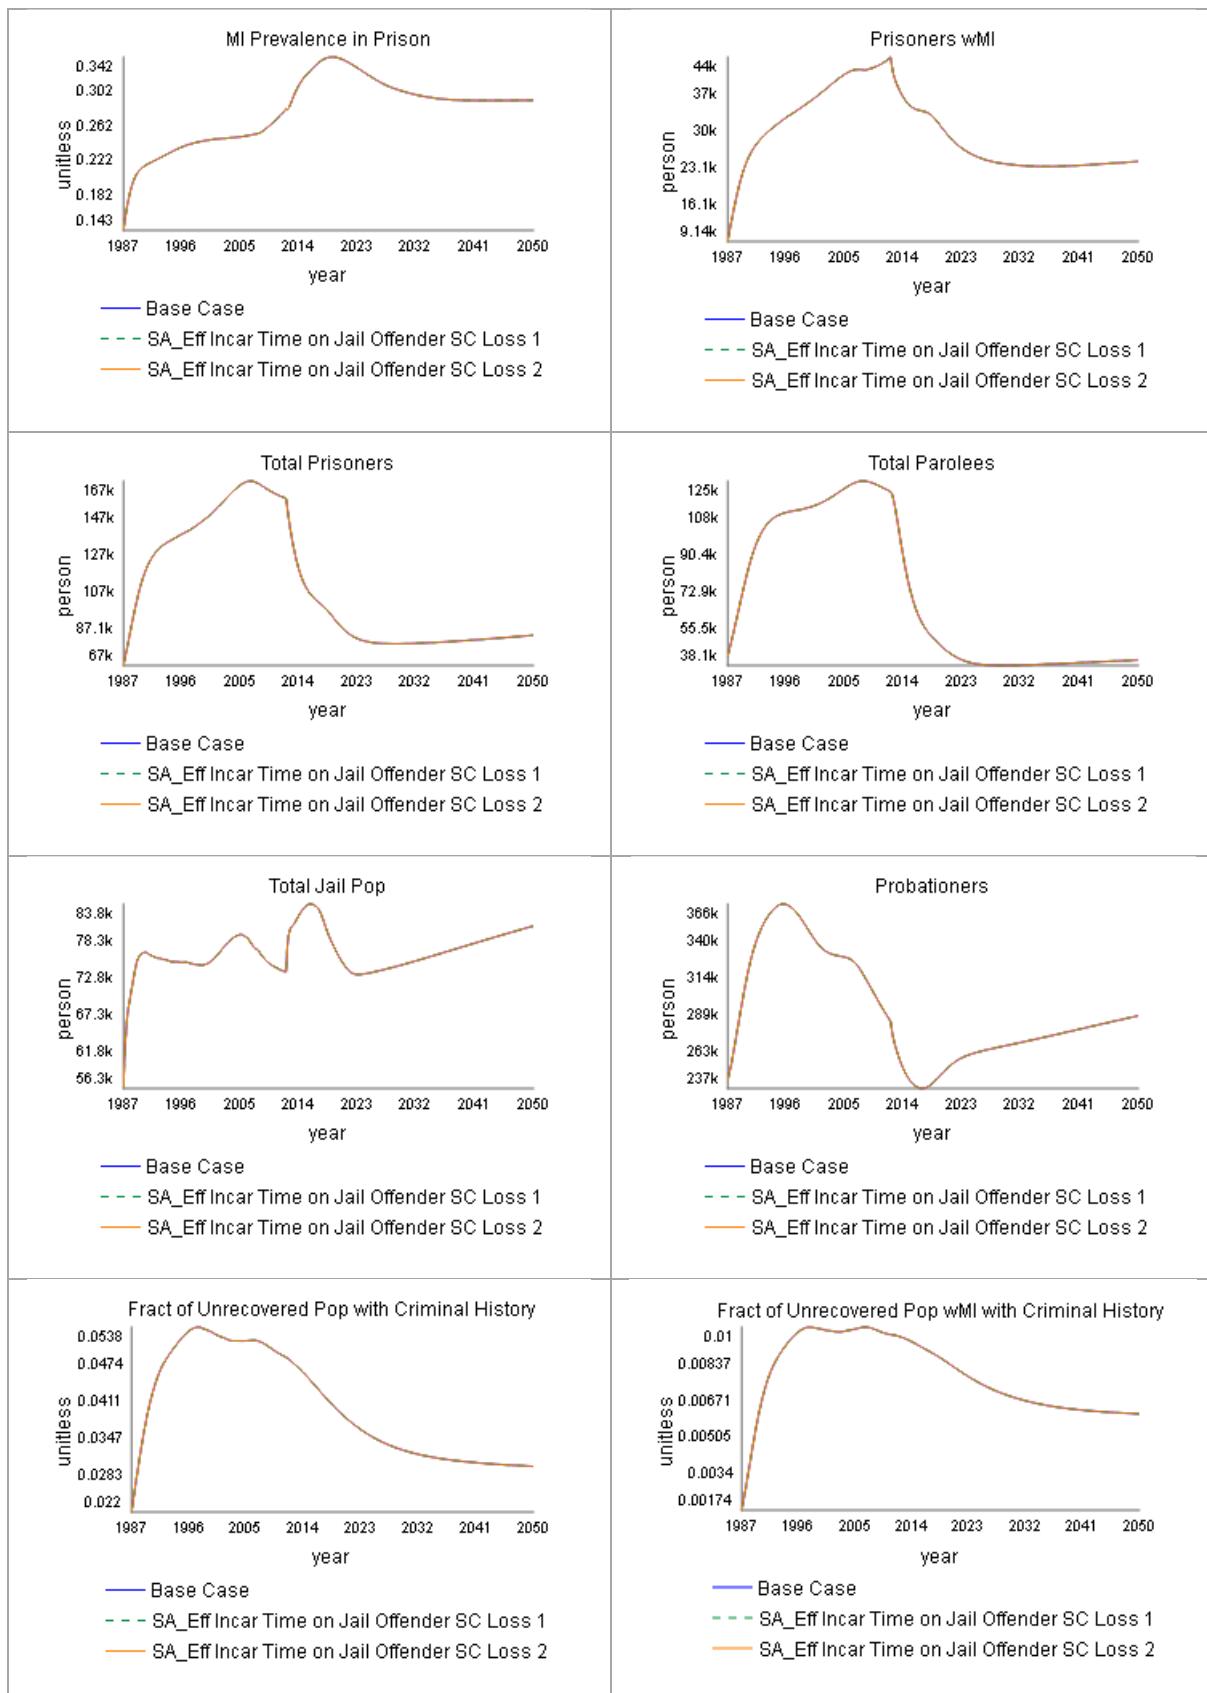

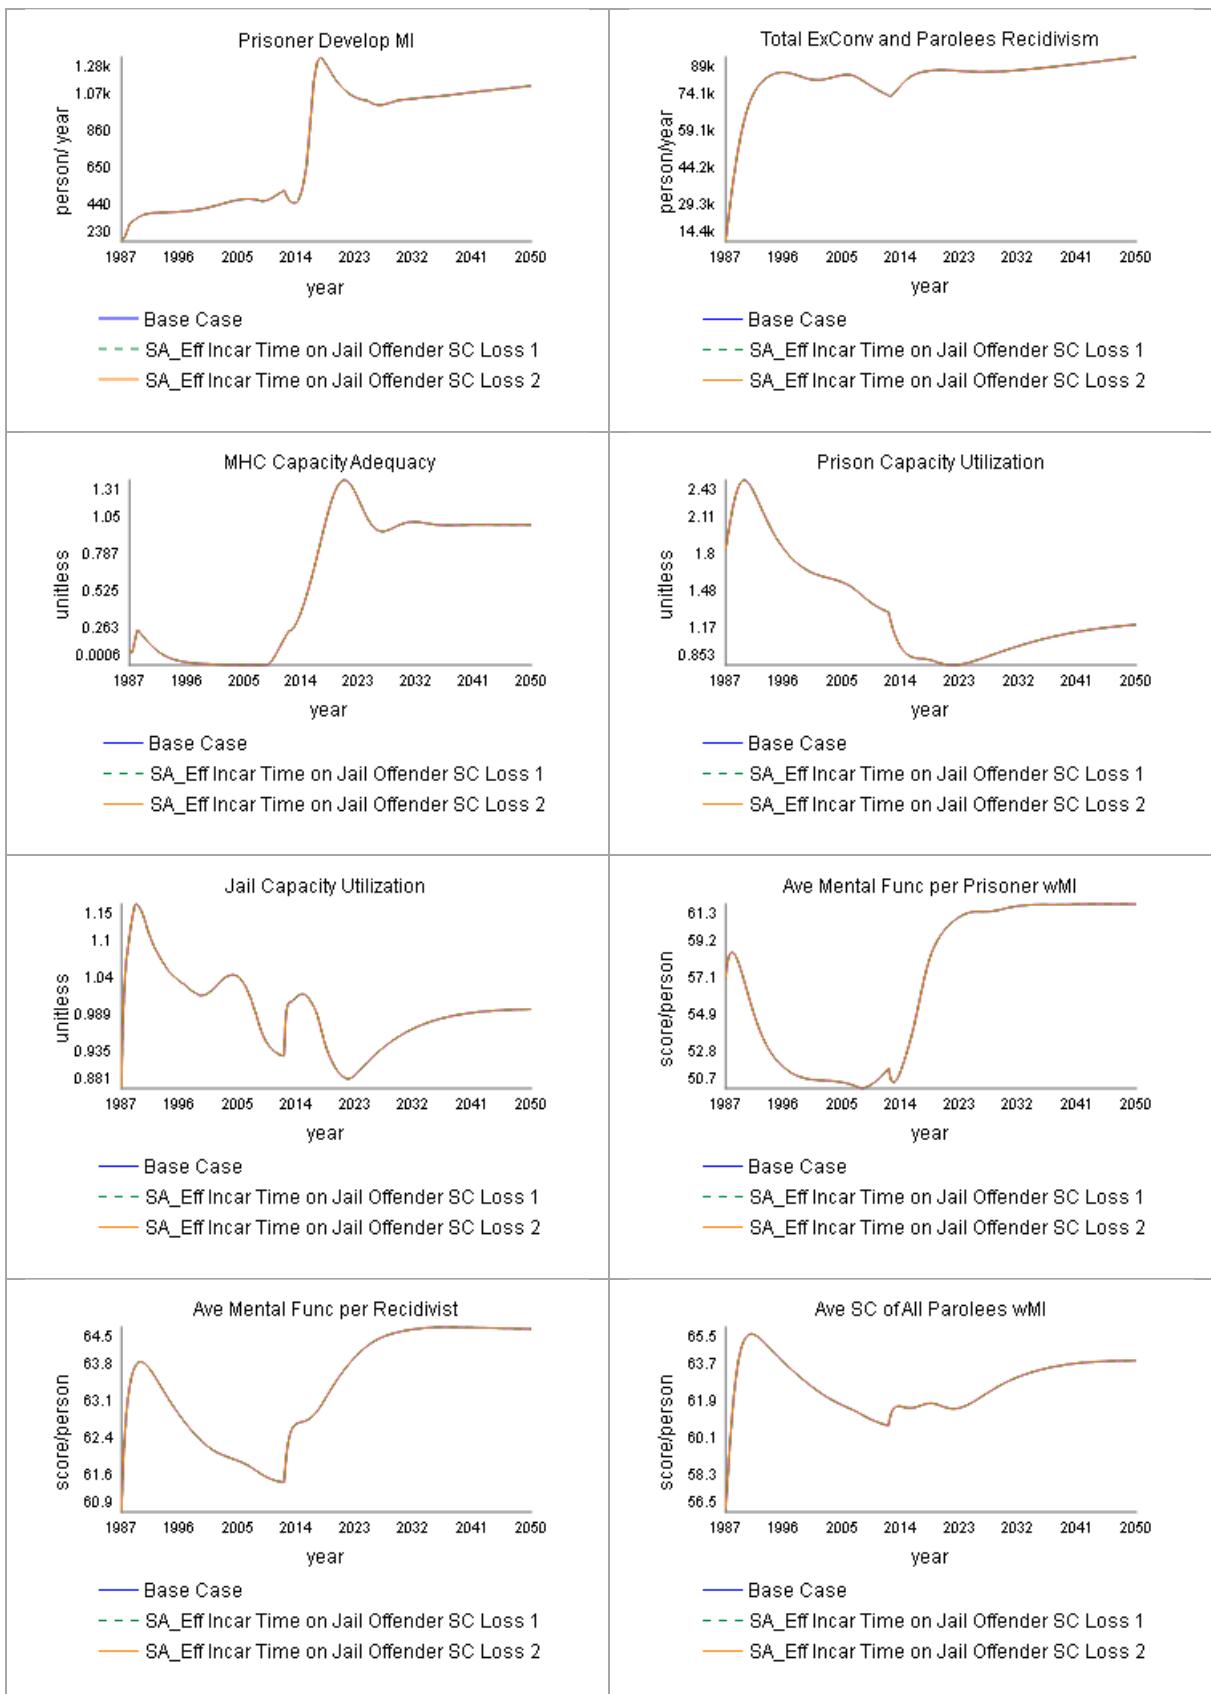

Sensitivity Analysis Test 14 – Effect of Incarceration Time Served of Jail Offenders on Social Capital Loss

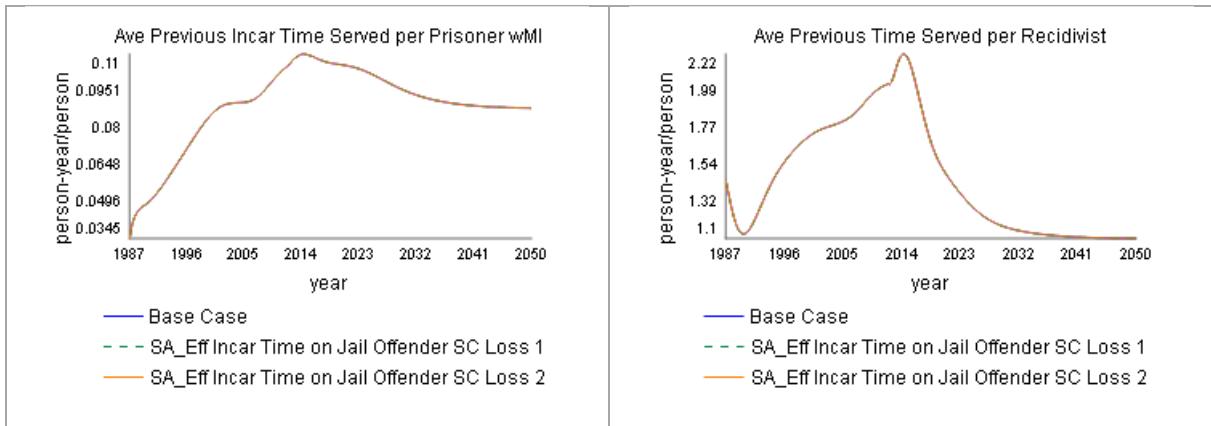

In this test, the relationship between “relative ave previous incor time served per jail offender wMI” in the **Incarceration Year Served** module and “losing SC in jail wMI” outflow in the **Social Capital** module is modified through changing the steepness of the graph in the table function in “effect of incor time per jail offender on SC loss per jail offender wMI” to assess the impact on selected parameters. The steepness of the table function is varied to characterize the delay in the effect of the input parameter. The following graphs show the altered table functions. As the structure for the SC loss of prisoners w/o MI is similar, hence only the “effect of incor time per prisoner on SC loss per prisoner wMI” is tested.

Selected Results

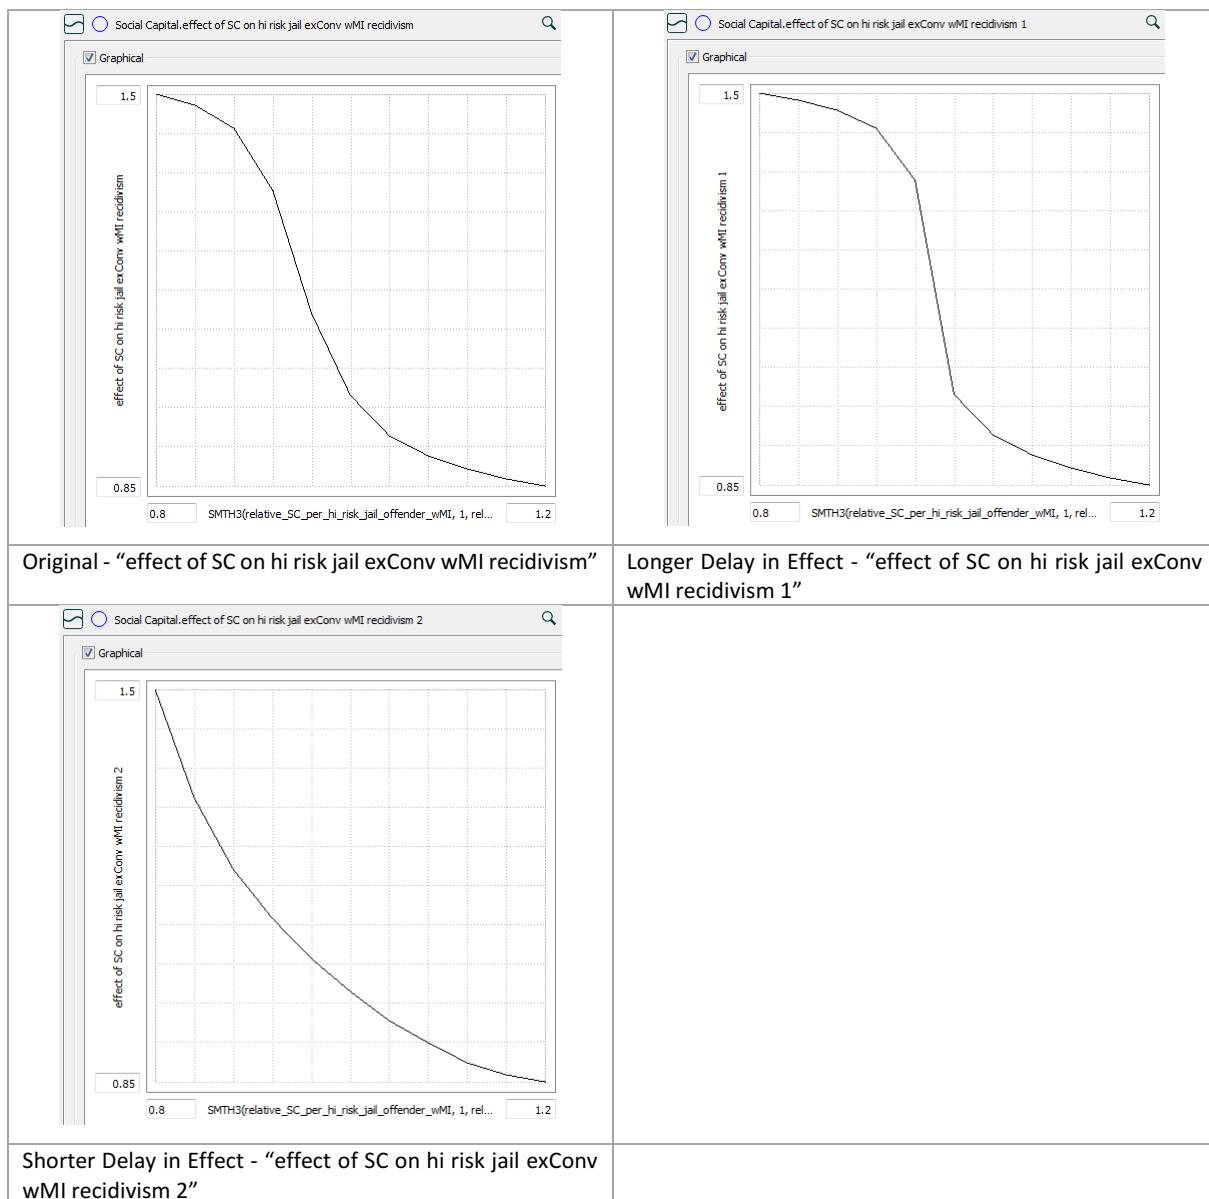

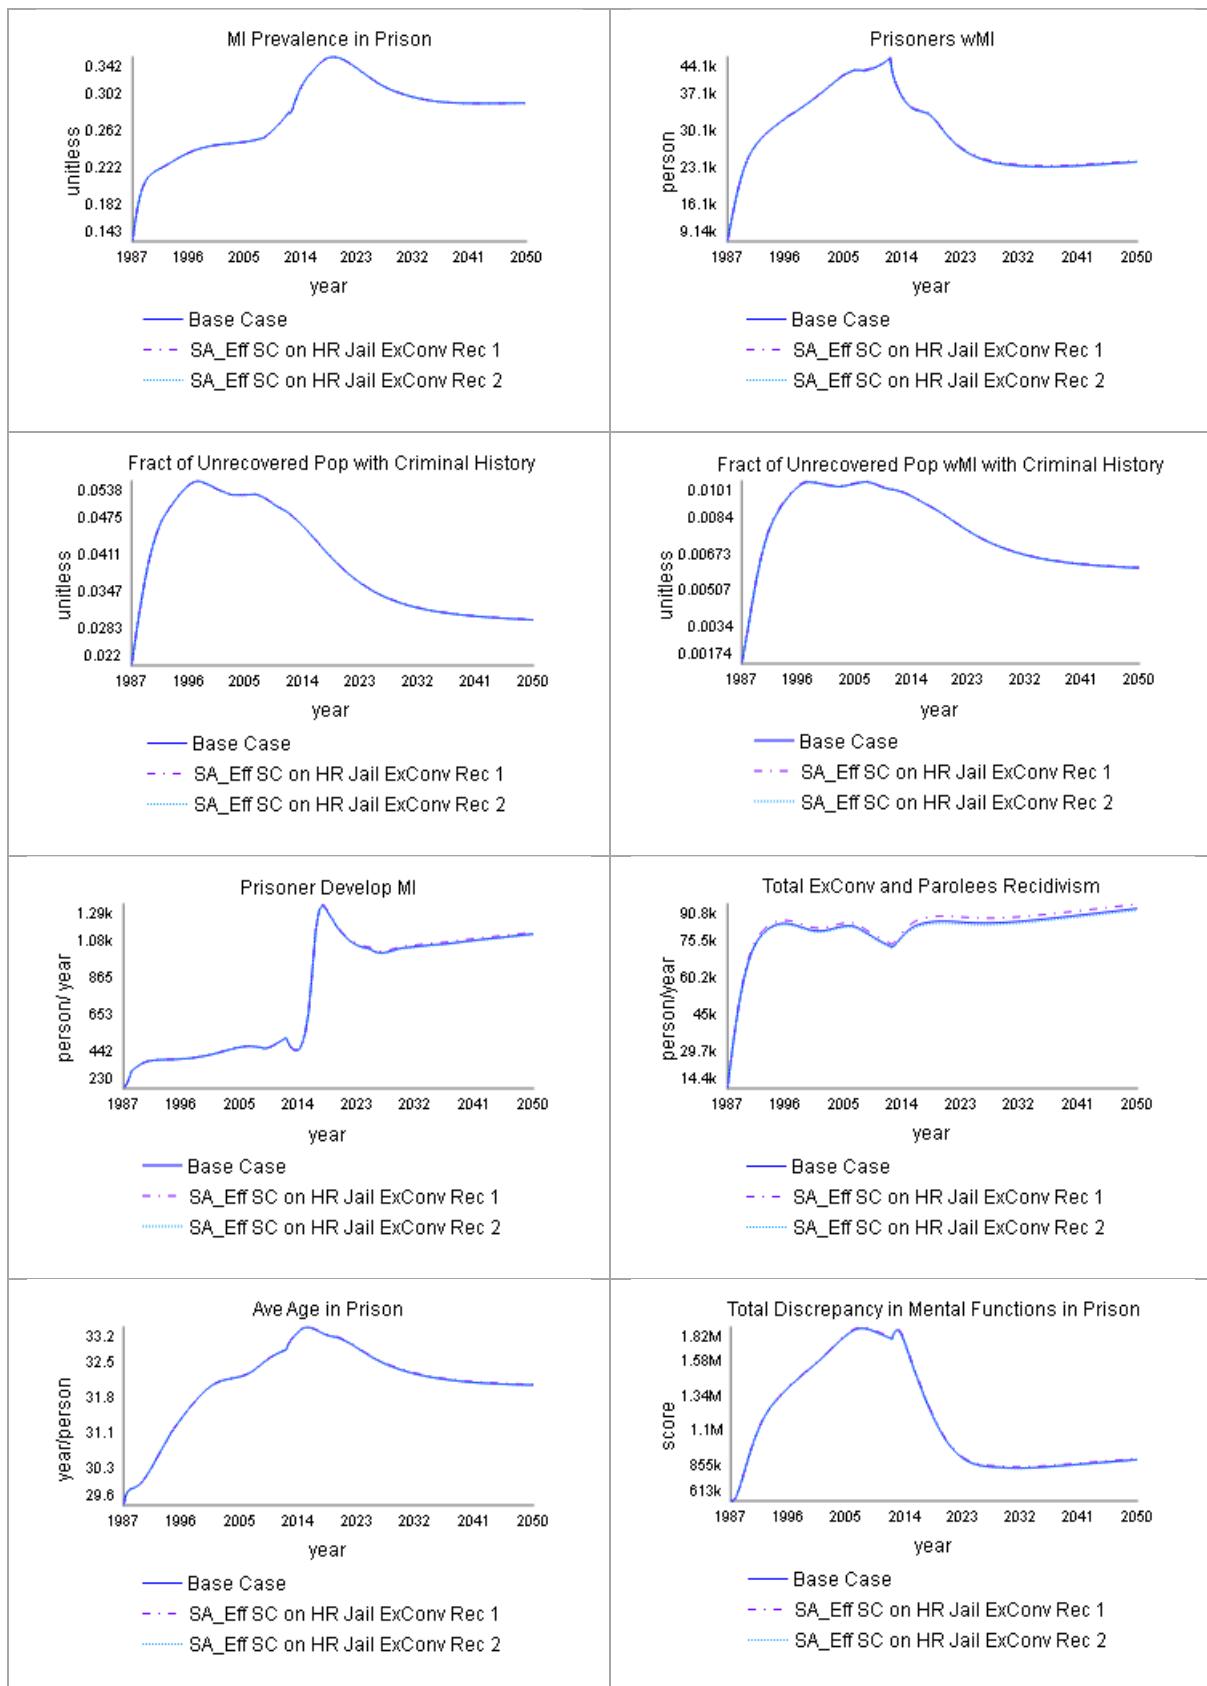

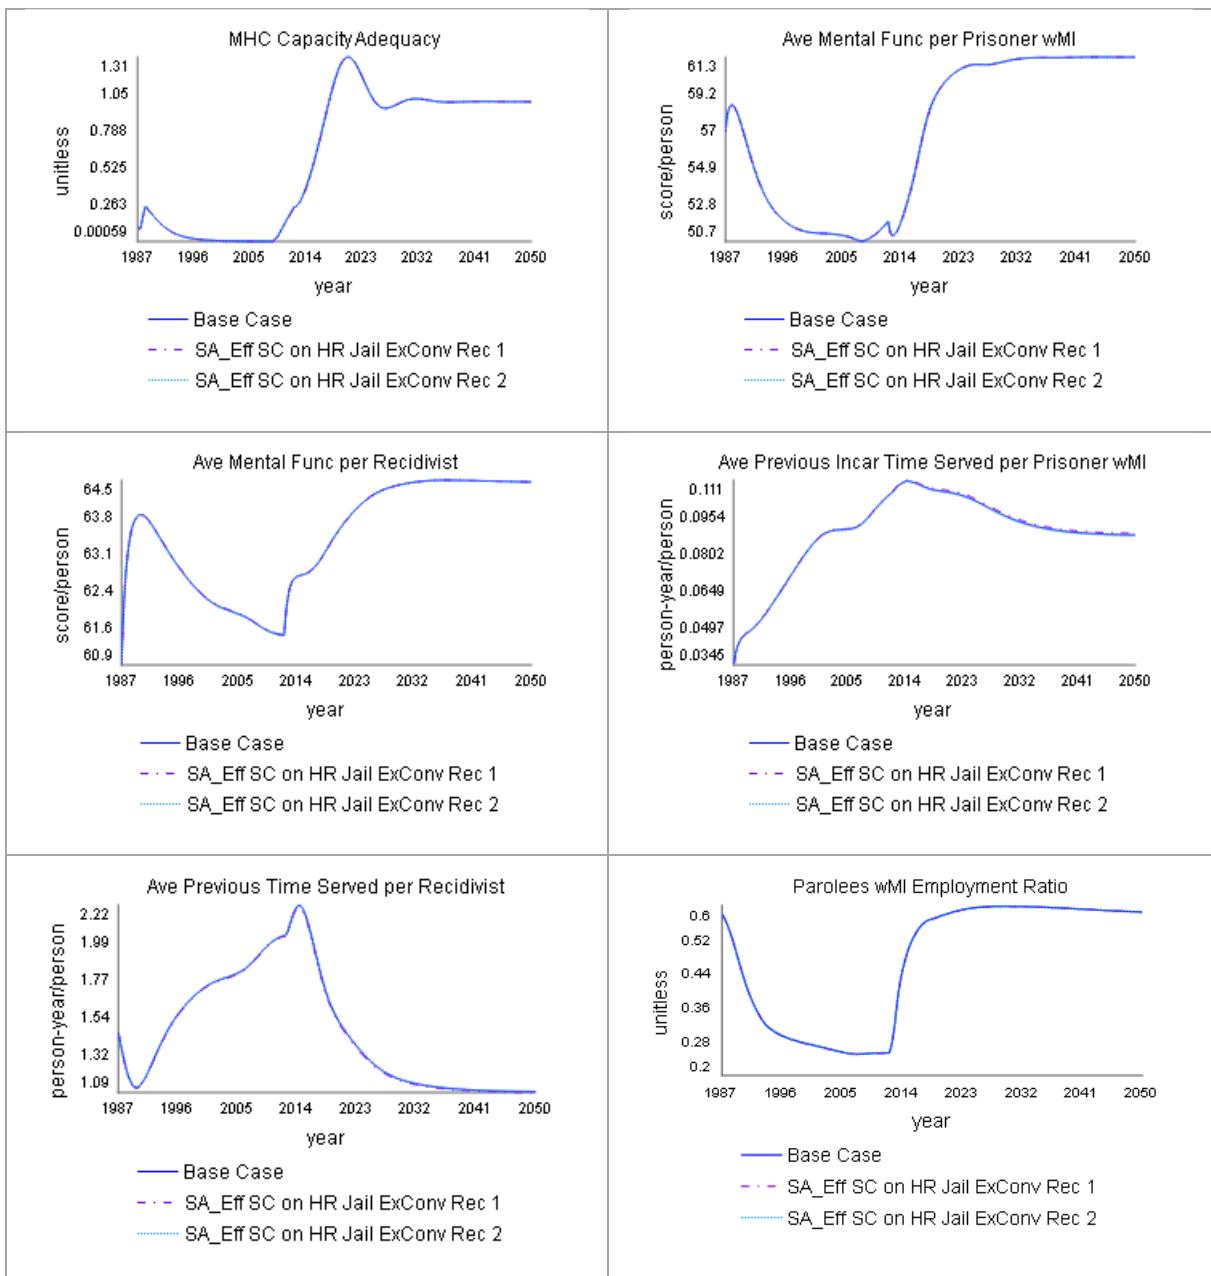

Sensitivity Analysis Test 15 – Effect of Social Capital on Recidivism by High Risk Jail Ex-convicts with Mental Illness

In this test, the relationship between “relative SC per hi risk jail offender wMI” in the **Social Capital** module and “high risk jail exConv wMI recidivism rate” in the **Individuals with Criminal History** module is modified through changing the steepness of the graph in the table function in “effect of SC on hi risk jail exConv wMI recidivism” to assess the impact on selected parameters. The steepness of the table function is varied to characterize the delay in the effect of the input parameter. The following graphs show the altered table functions. As the structure for the recidivism by jail offender wo MI is similar, hence only the “effect of SC on hi risk jail exConv wMI recidivism” is tested.

Selected Results

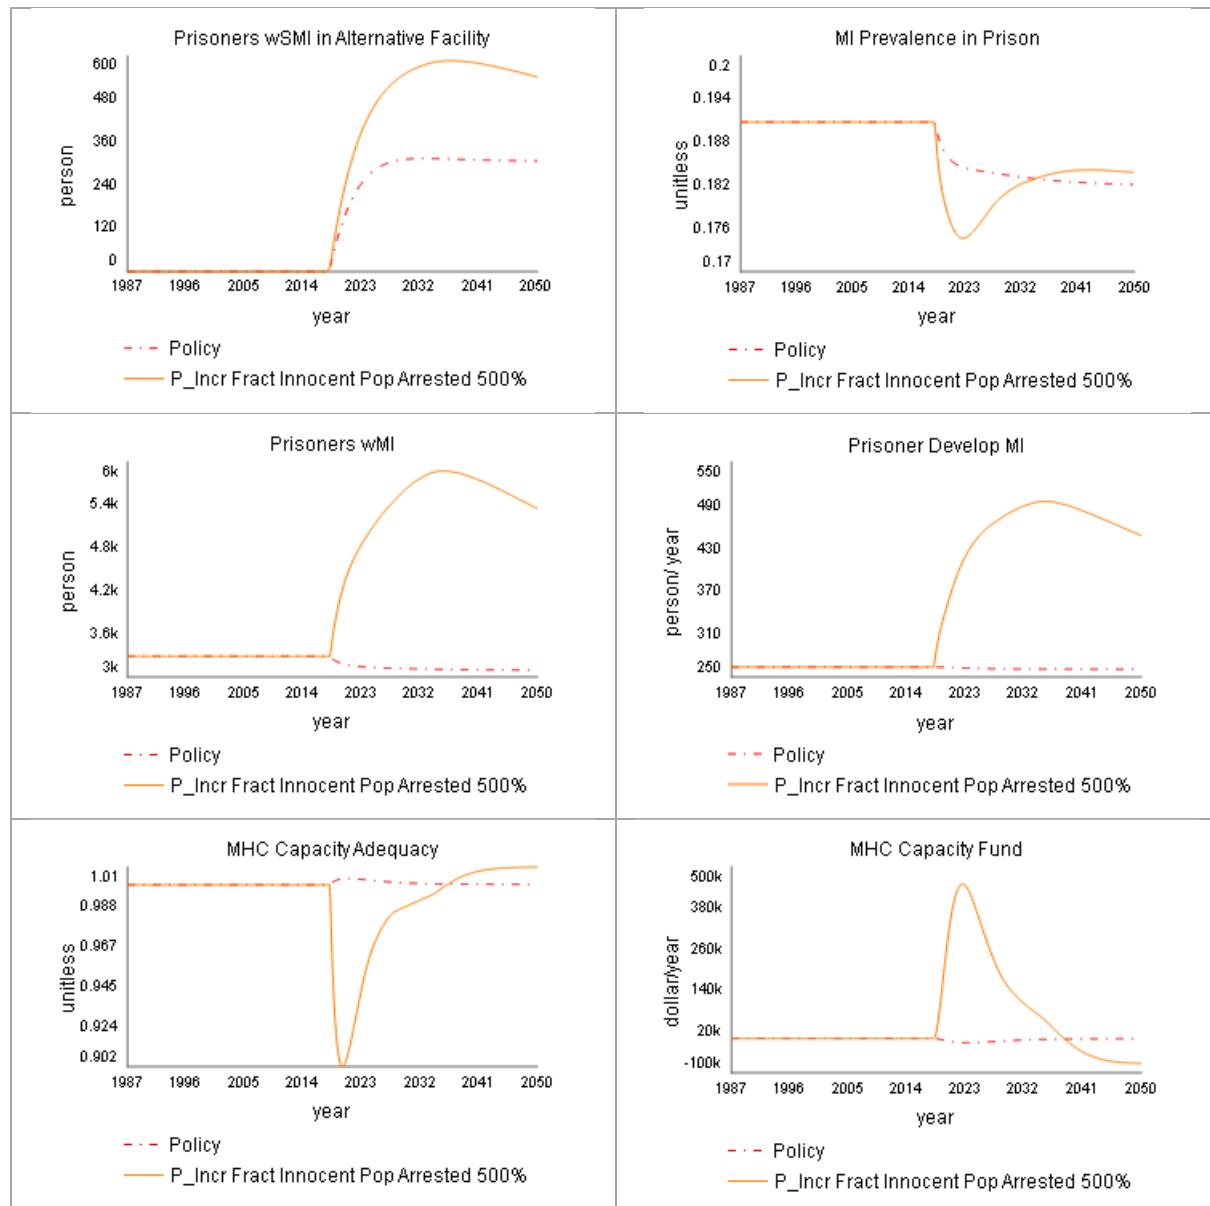

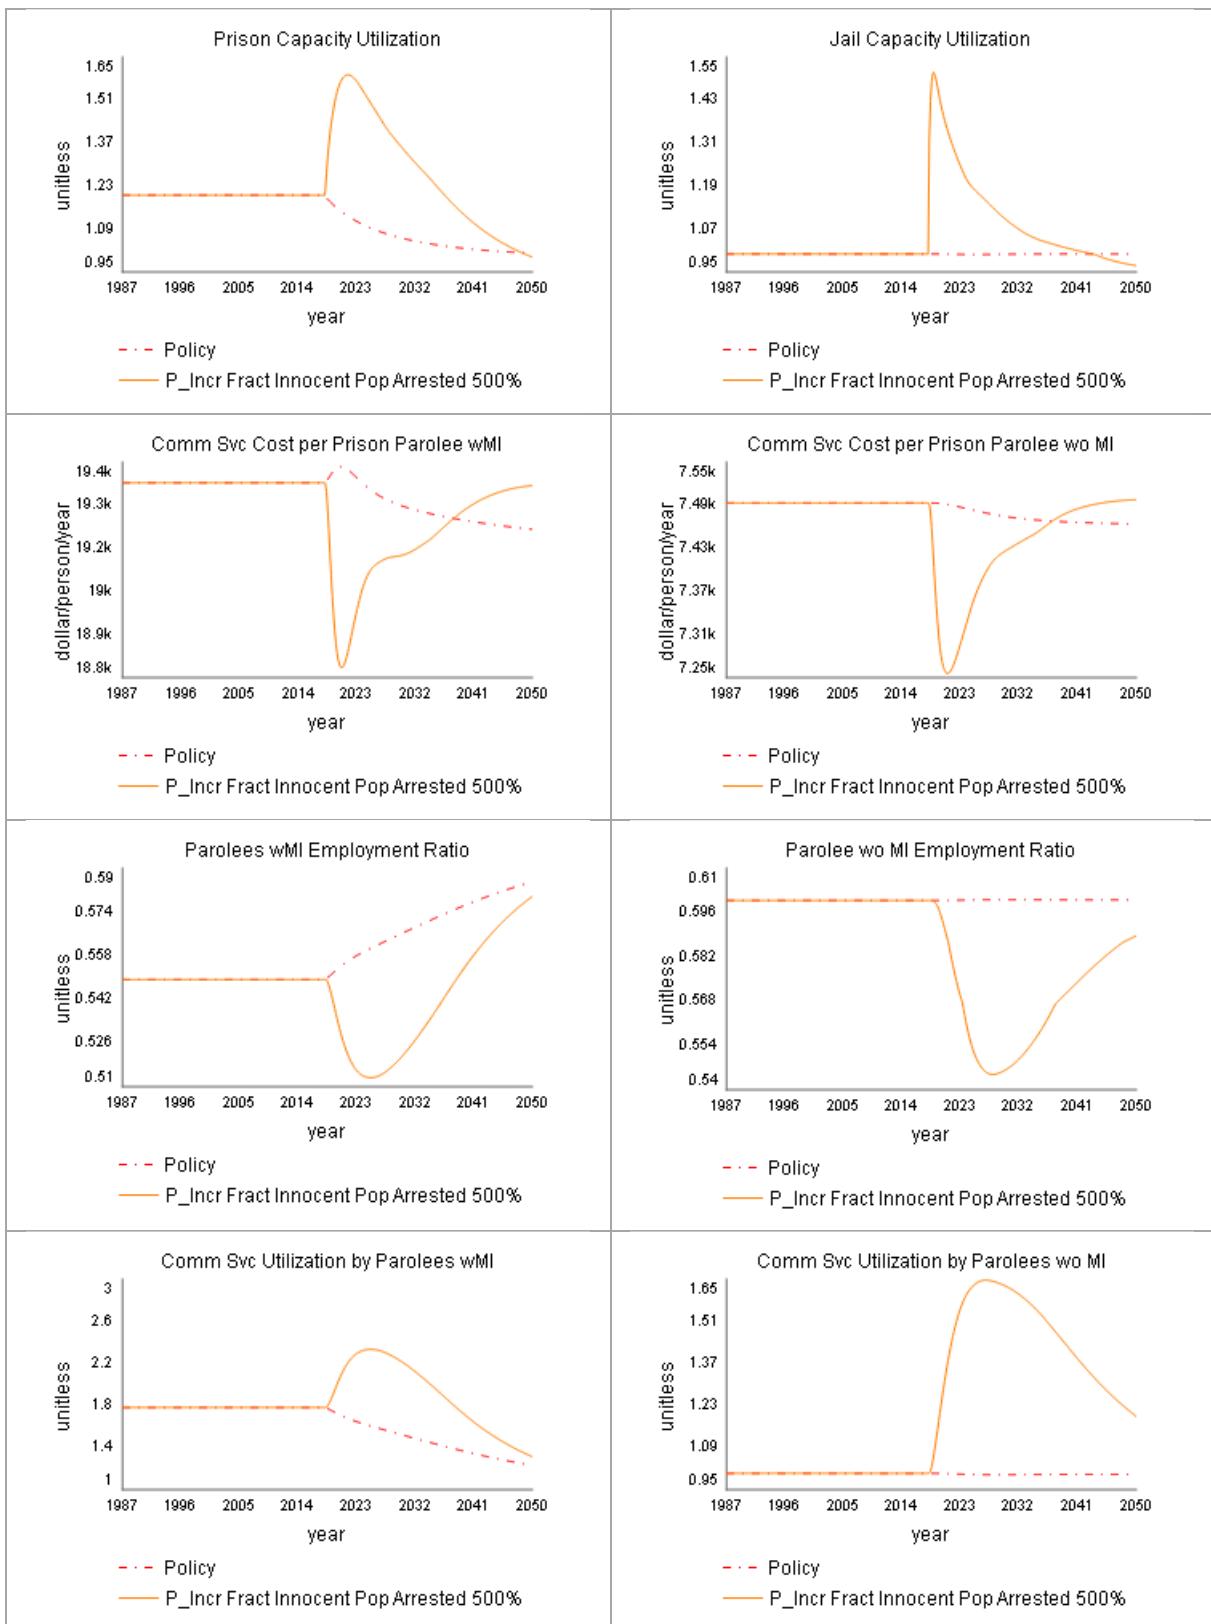

Appendix N – Test Results of the Full Model with Our Recommended Policy

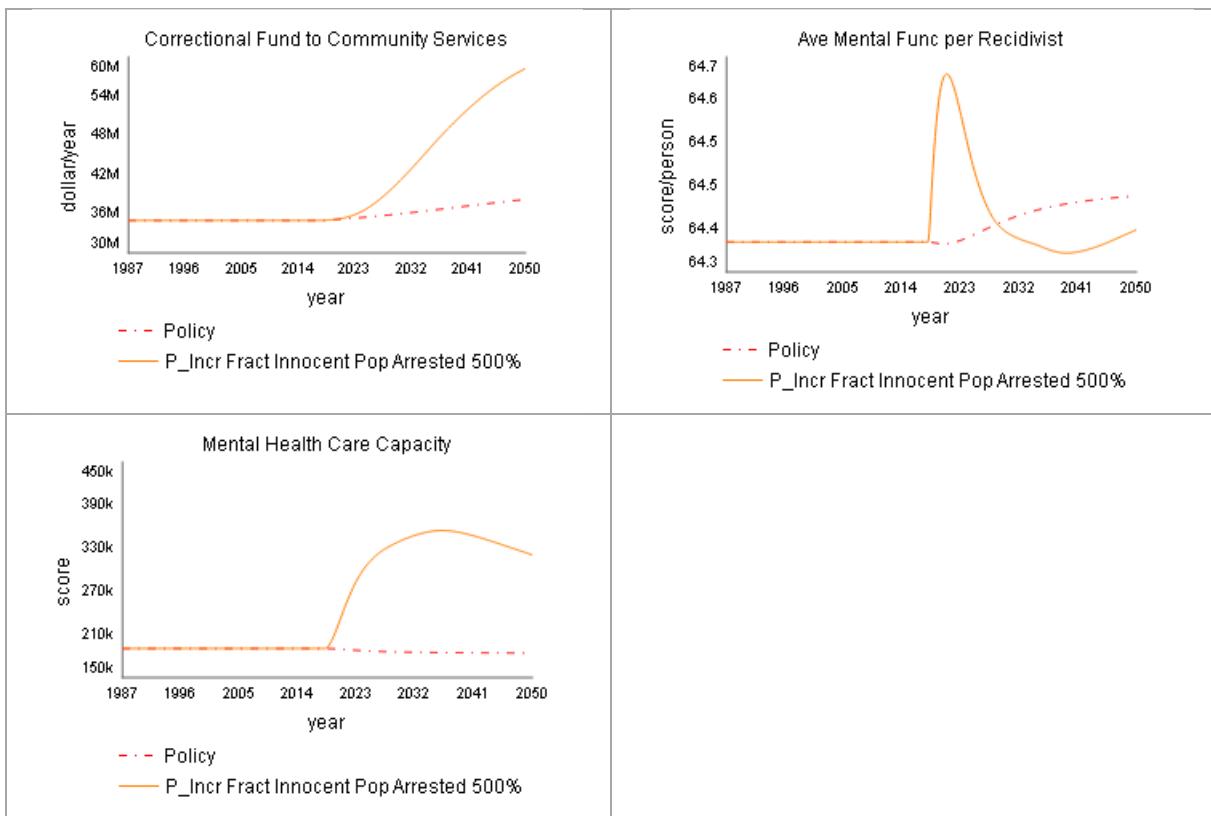

Extreme Condition Test 1 – Increase Fraction of Innocent Population Arrested

In this test, the “fract innocent pop” parameter in the **Individuals with Criminal History** module increases from 0.0315 to five times to 0.17 from 2018 onwards.

Selected Results

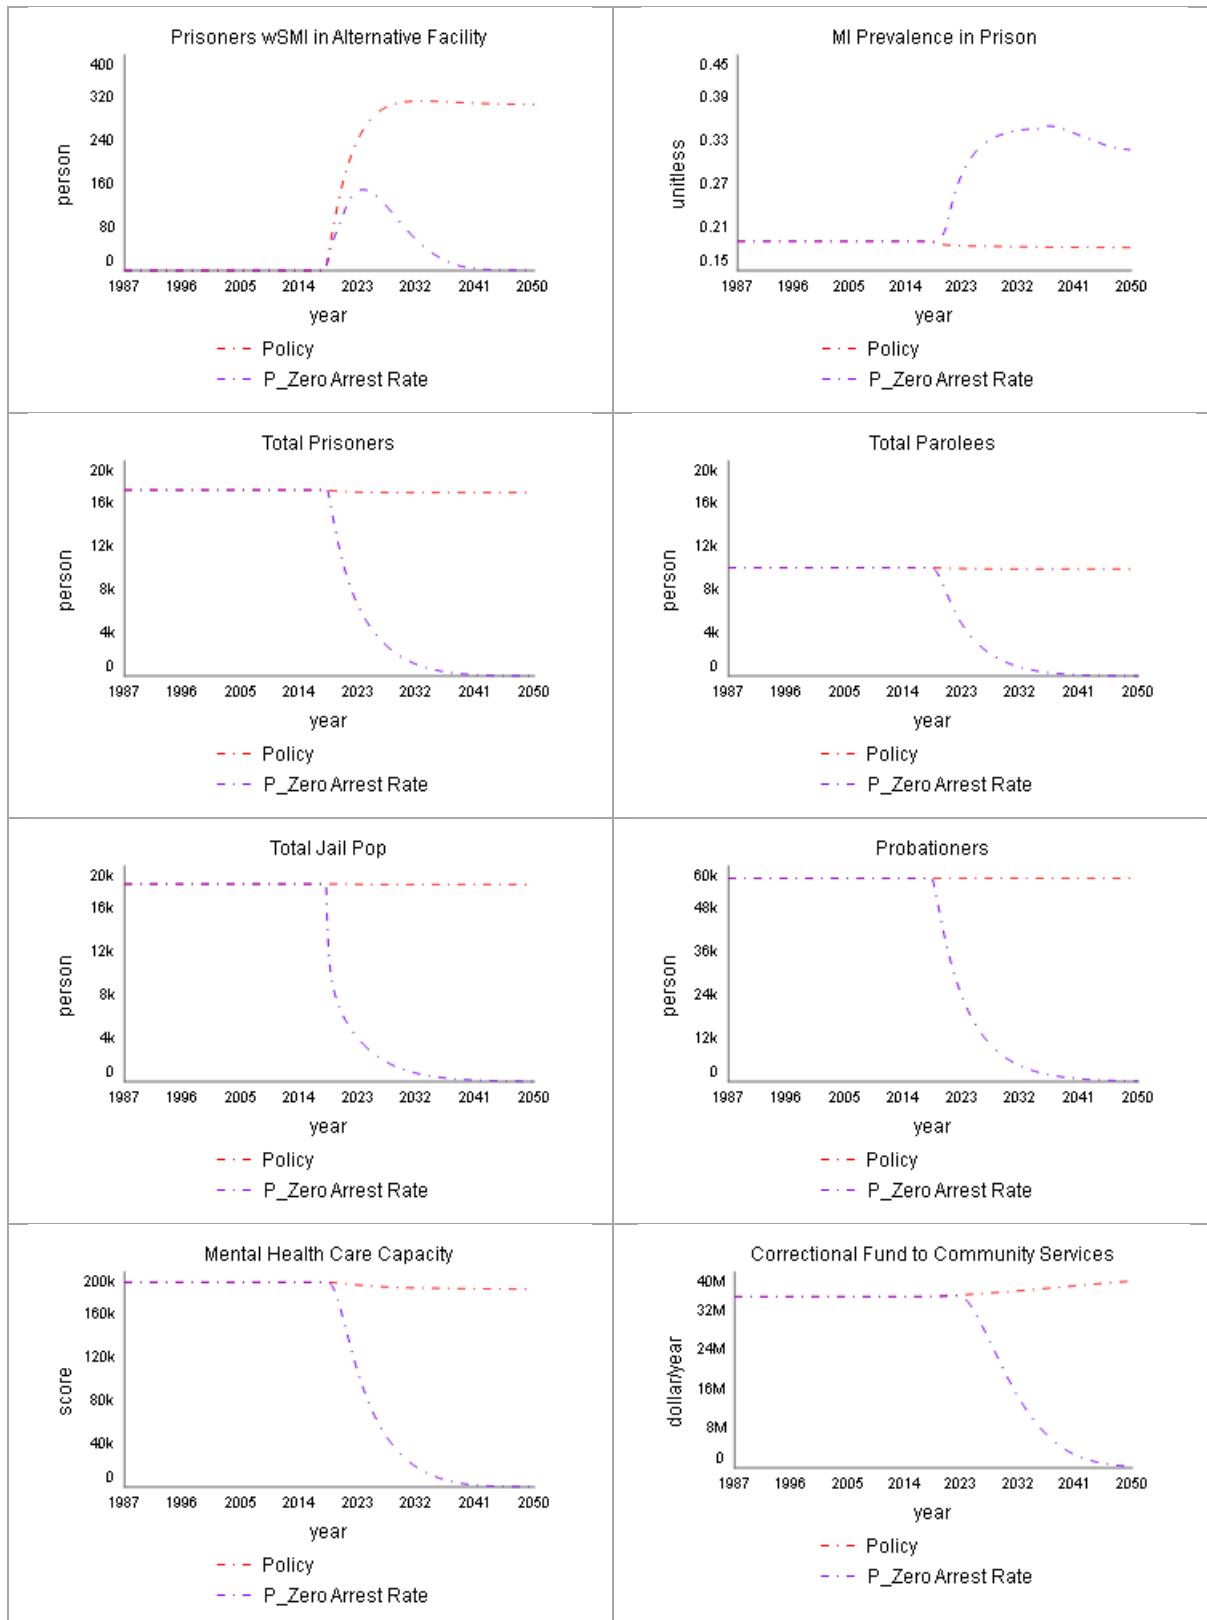

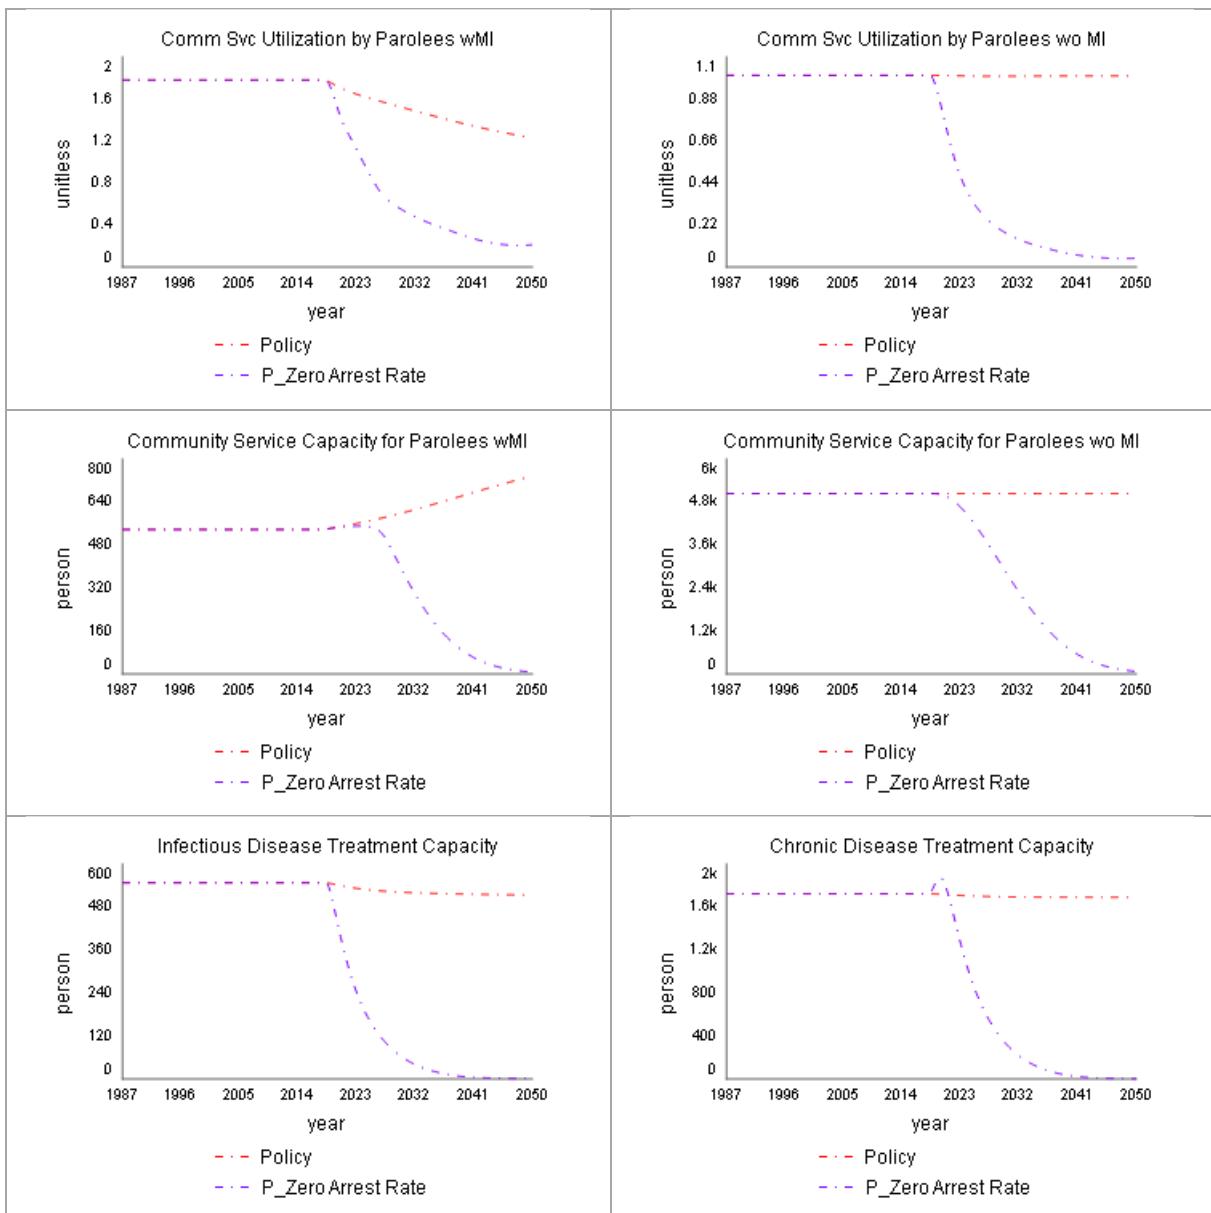

Extreme Condition Test 2 – Decrease Fraction of Innocent Population Arrested to Zero
In this test, the “fract innocent pop” parameter in the **Individuals with Criminal History** module decreases from 0.03338 to zero from 2018 onwards.

Selected Results

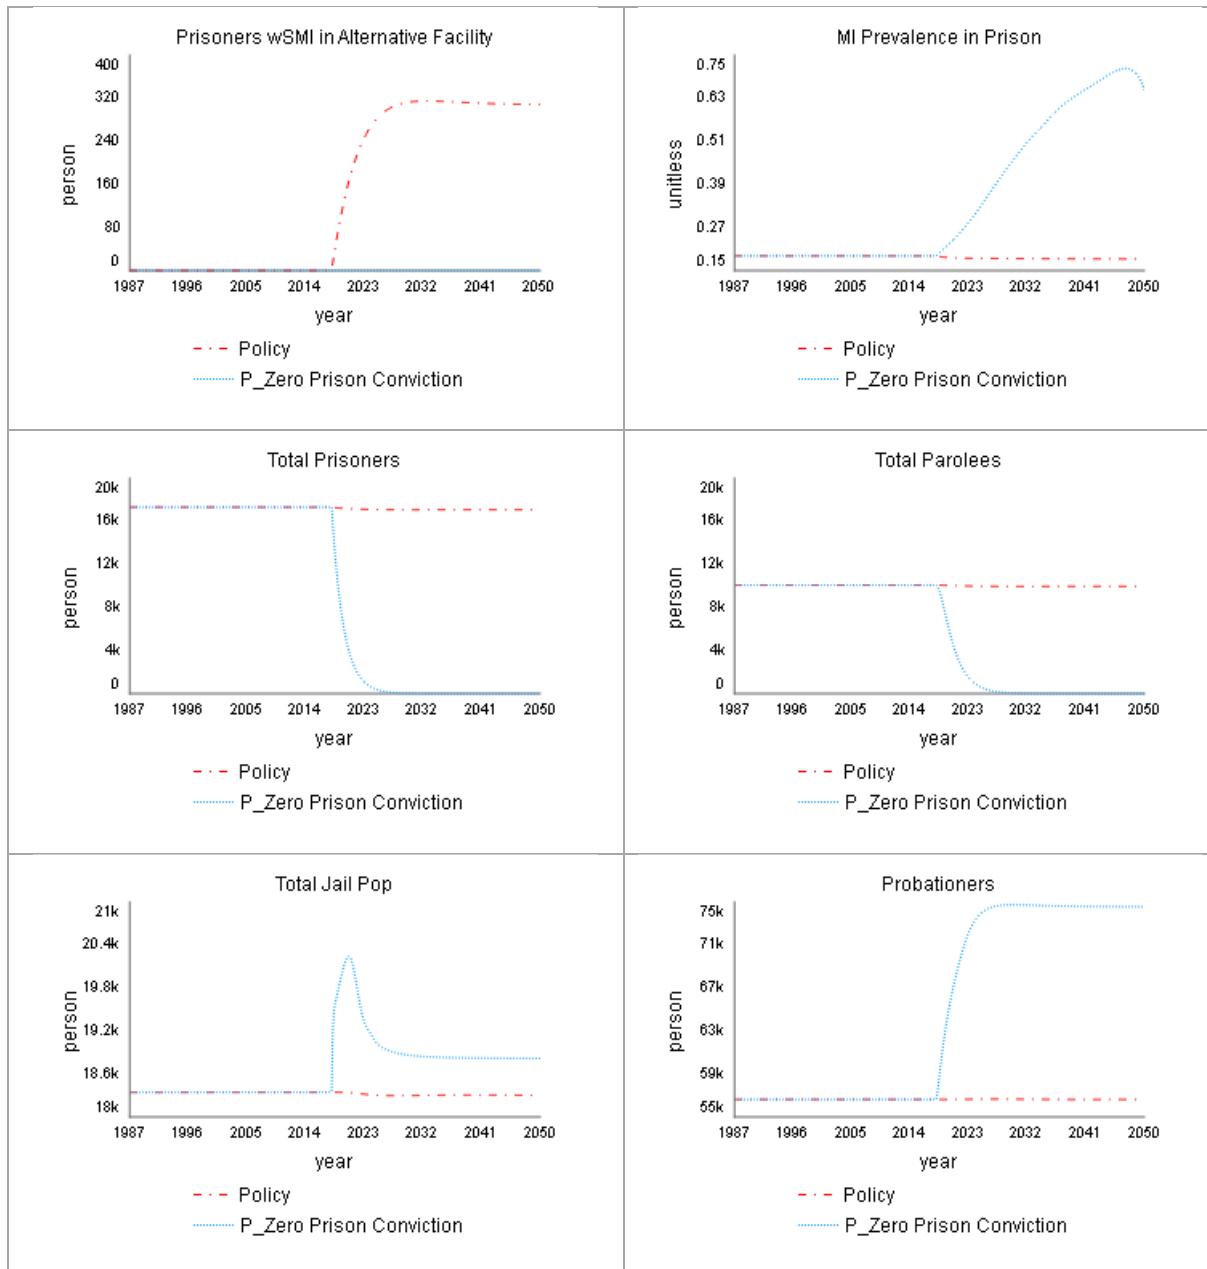

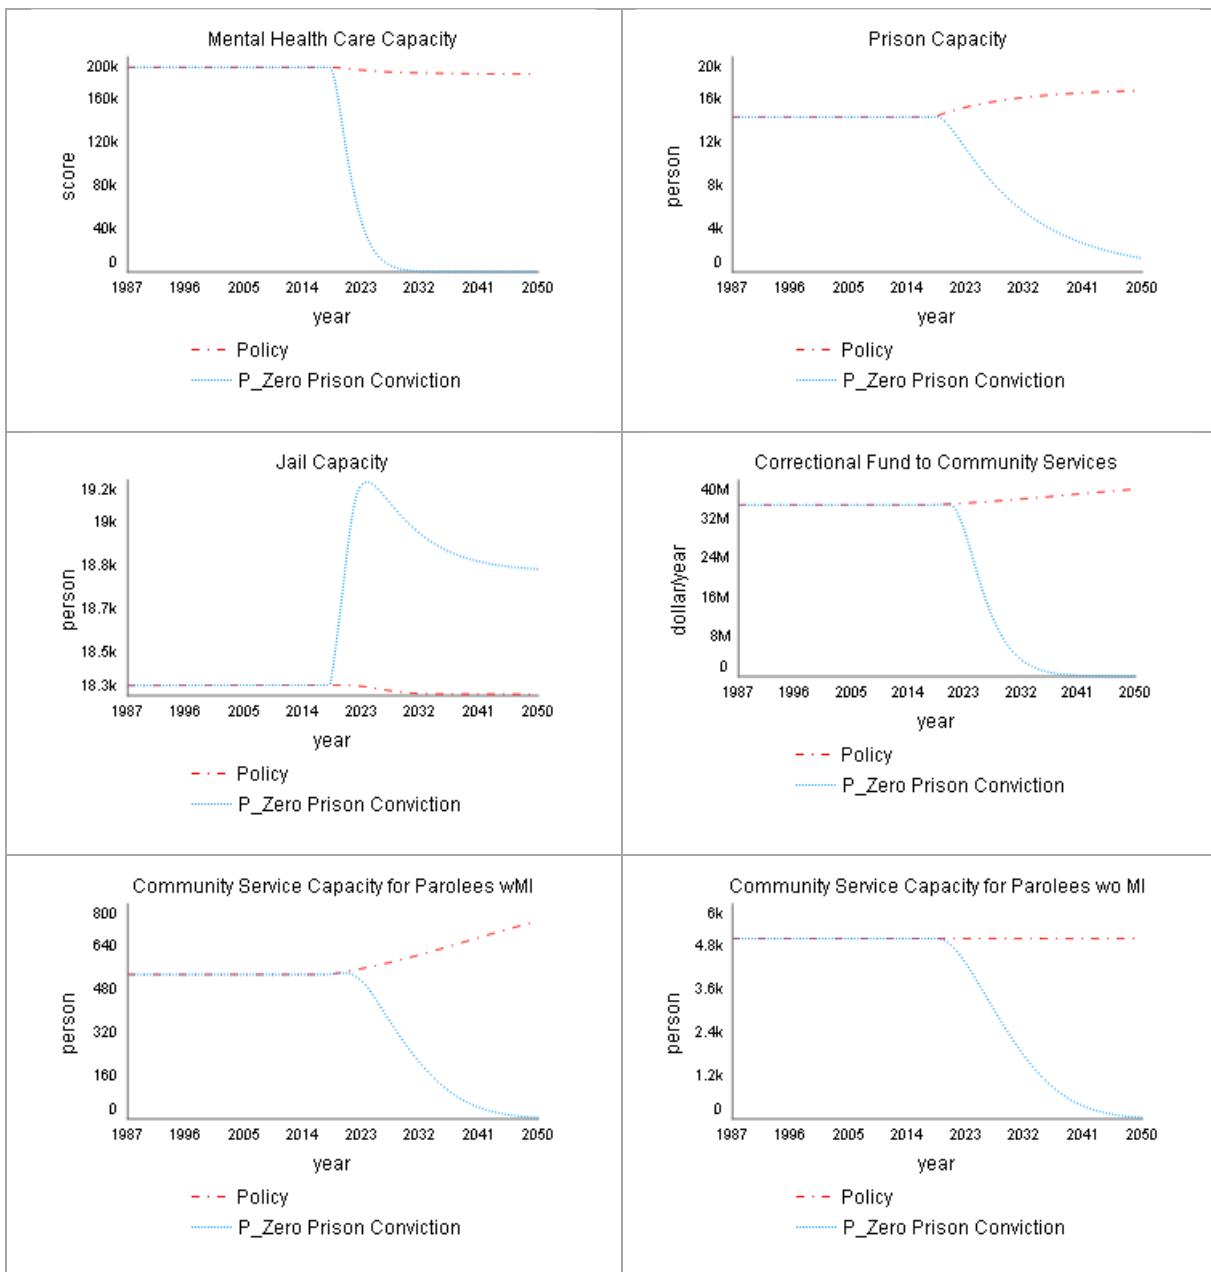

Extreme Condition Test 3 – Zero Prison Conviction

In this test, both the “ref fract convicts in custody convict to prison sentence” and “ref fract convicts in comm convict to prison sentence” parameter in the **Individuals with Criminal History** module to zeros from 2018 onwards.

Selected Results

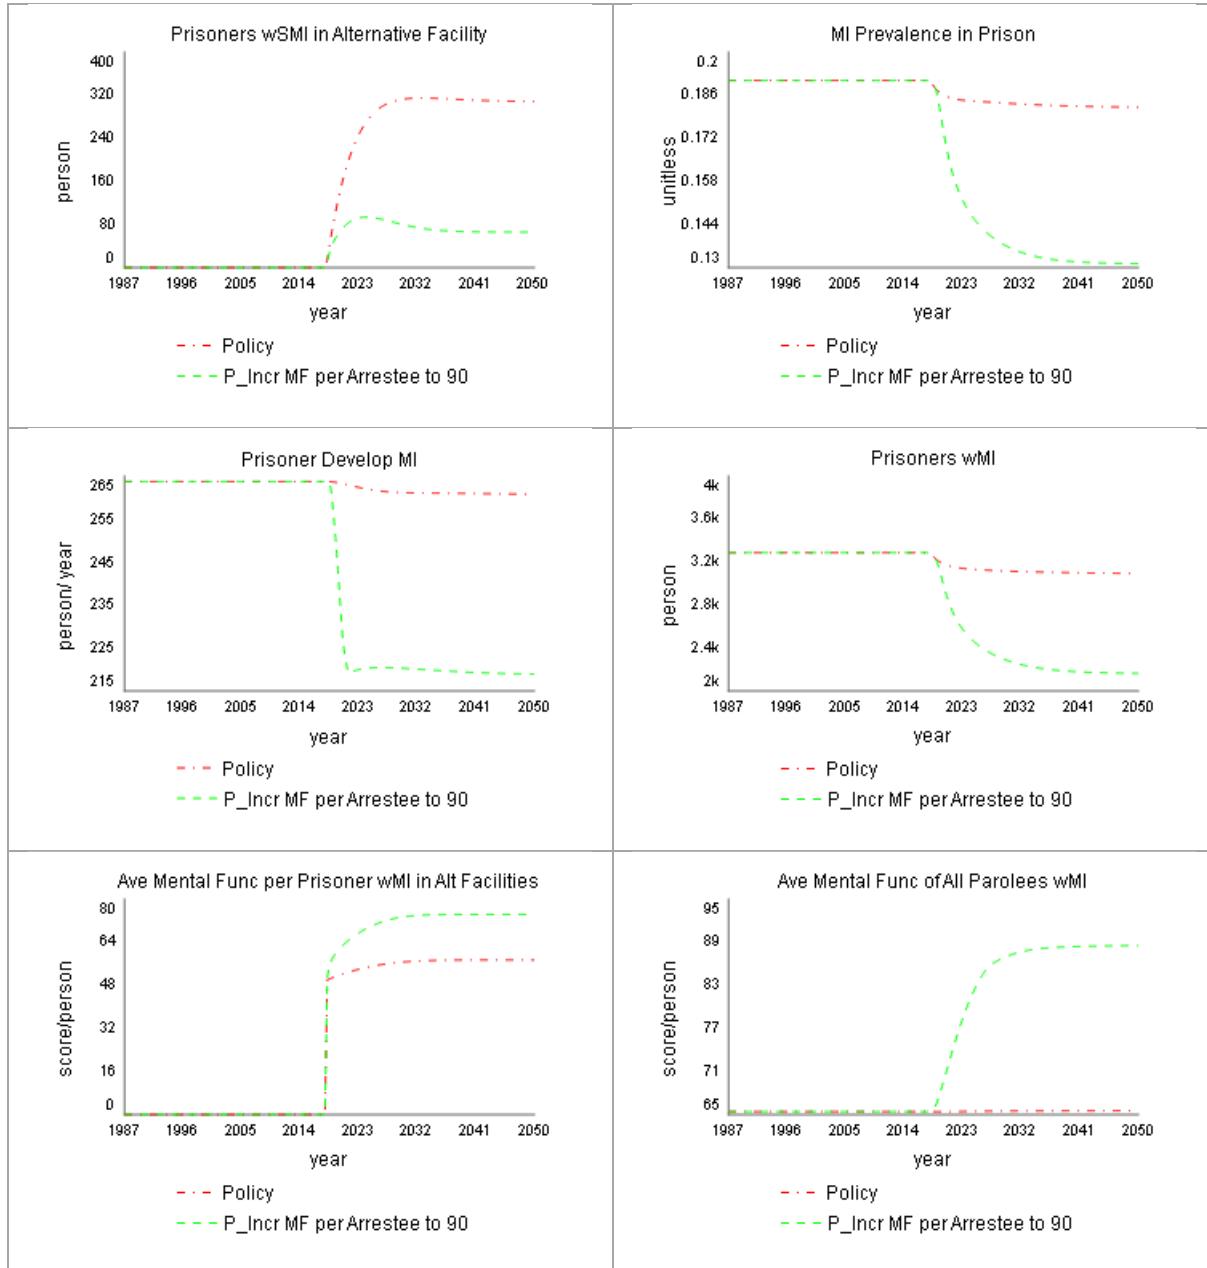

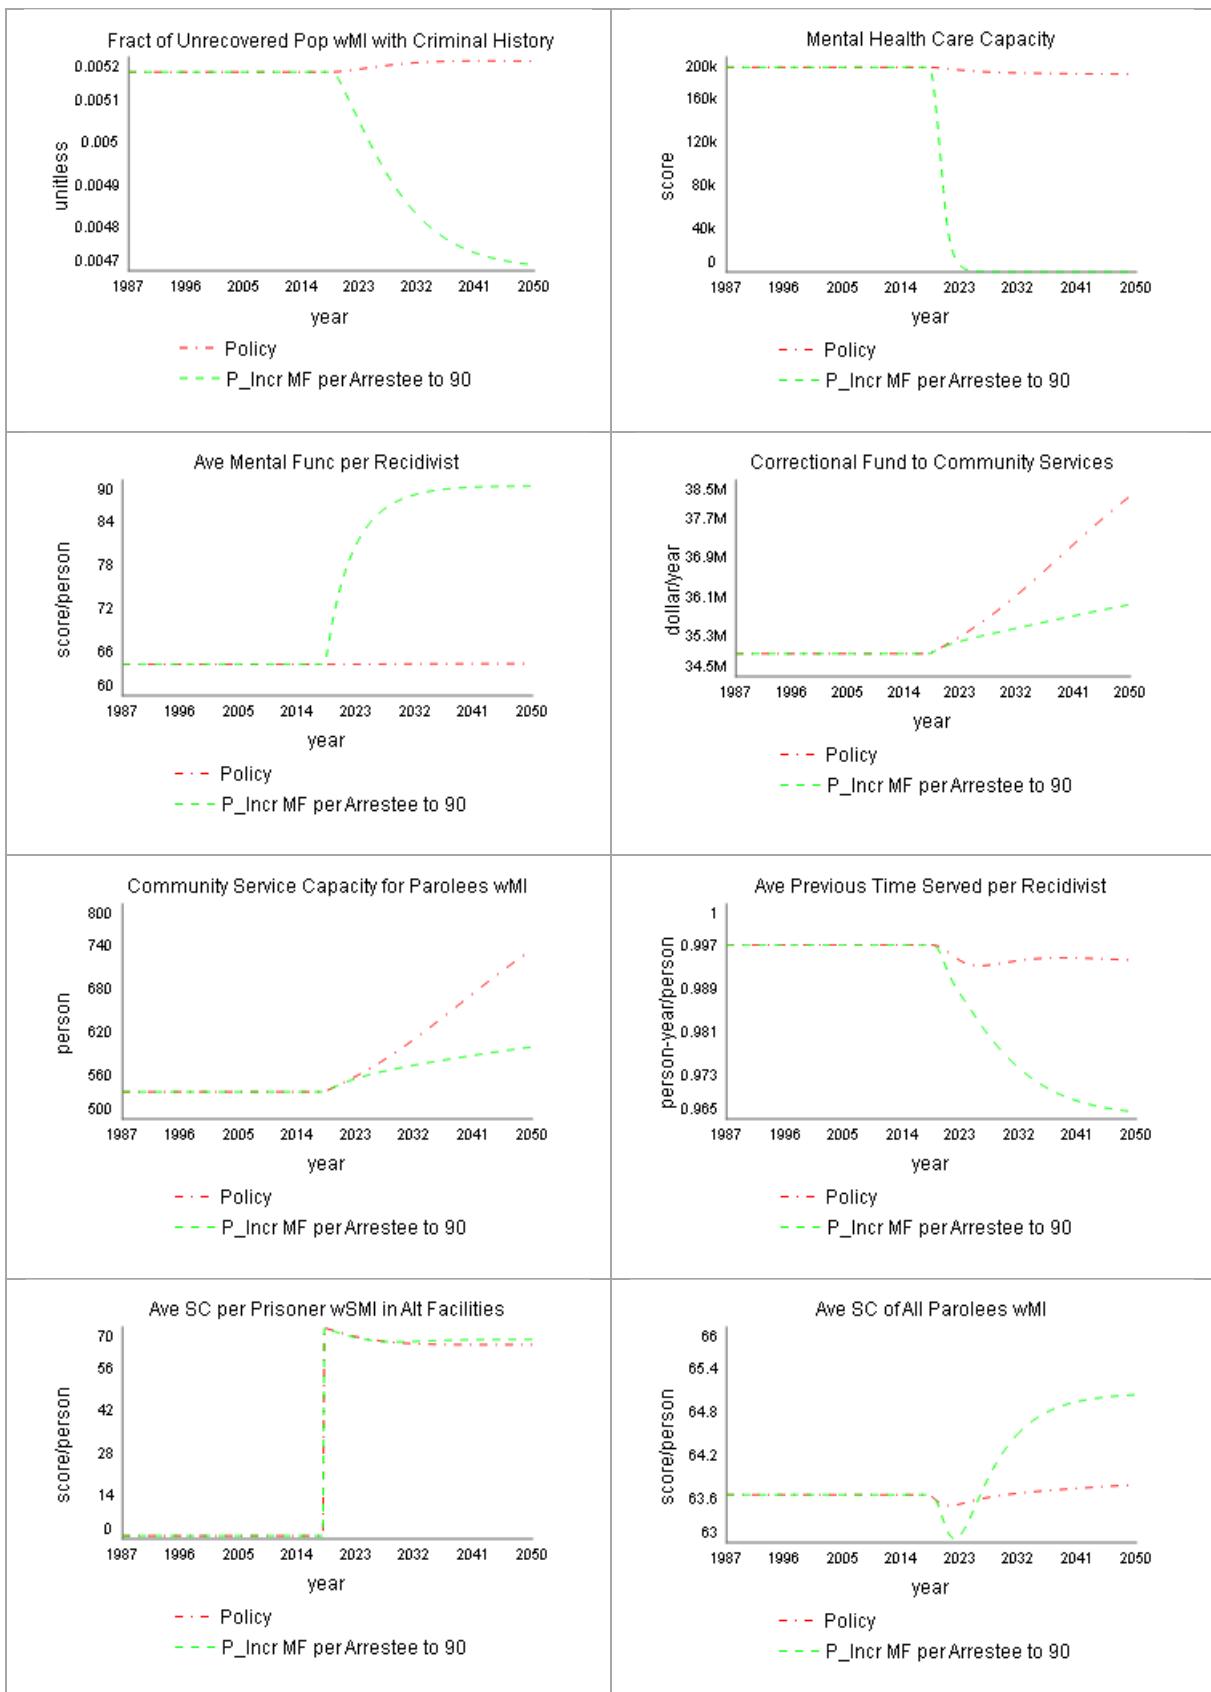

Extreme Condition Test 4 – Increase Mental Function per Arrestee

In this test, the “mental func per arrestee” parameter in the **Mental Profiles** module increases from 65 to 90 from 2018 onwards.

Selected Results

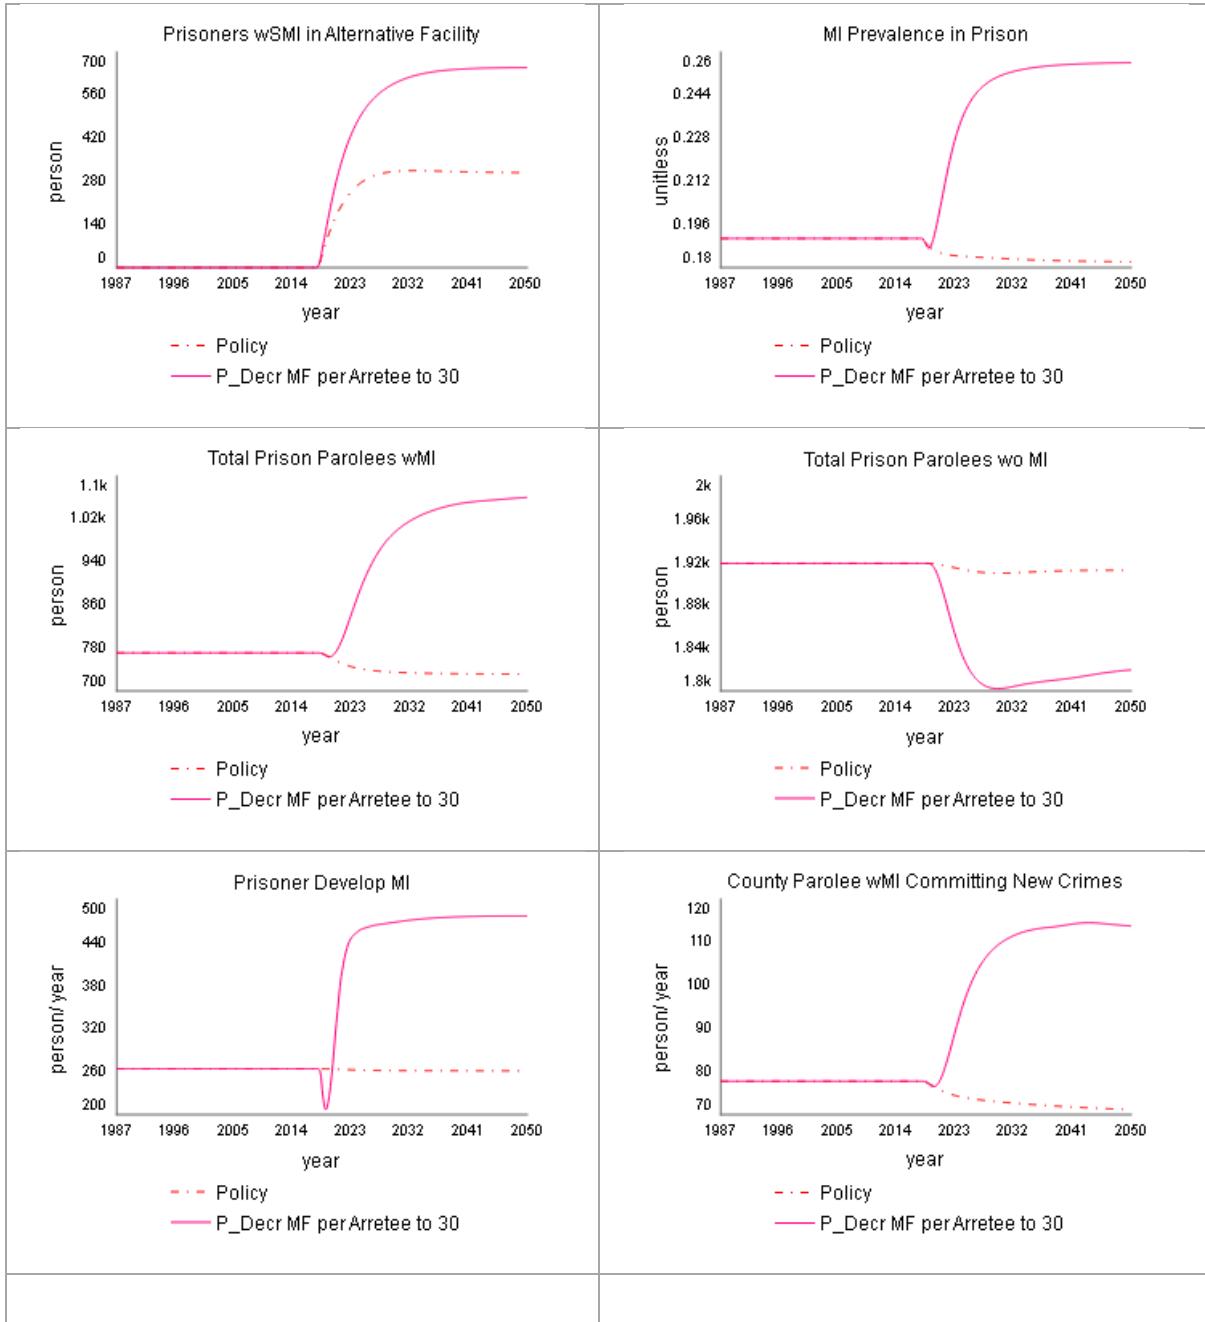

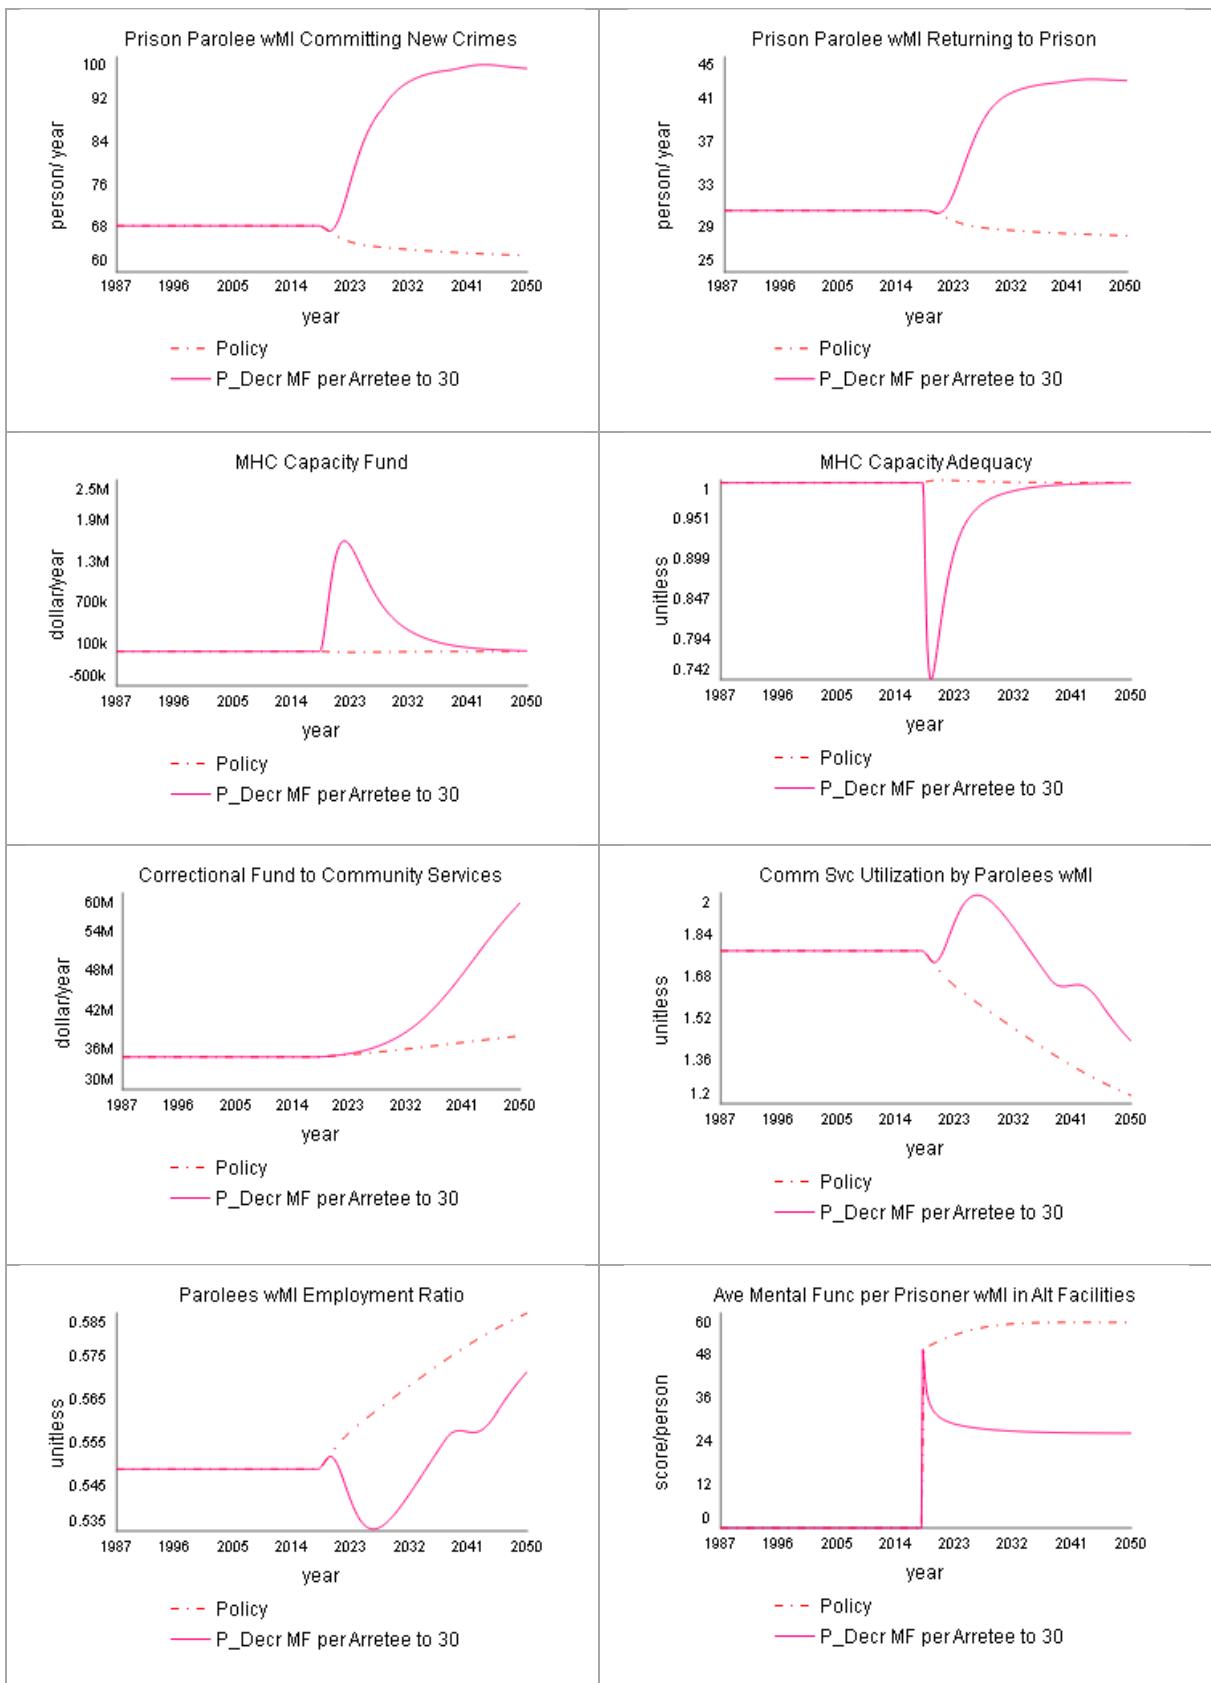

Extreme Condition Test 5 – Decrease Mental Function per Arrestee

In this test, the “mental func per arrestee” parameter in the **Mental Profiles** module decreases from 65 to 30 from 2018 onwards.

Selected Results

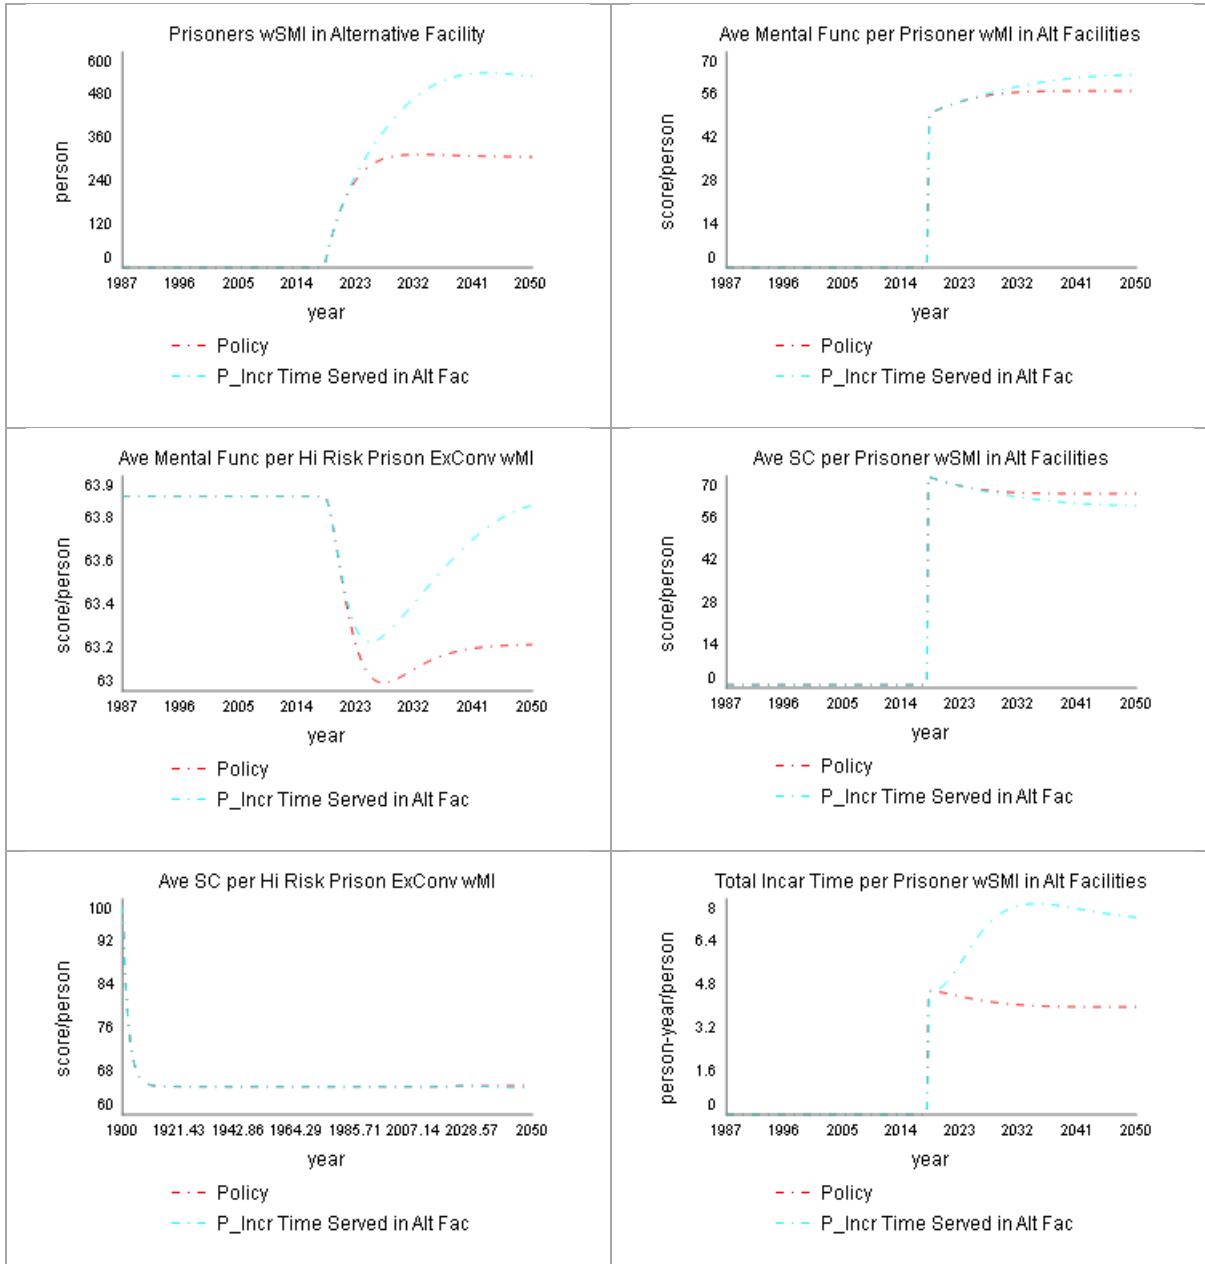

Extreme Condition Test 6 – Increase Time Served in Alternative Facility

In this test, the “ref ave time served in alt facility” parameter in the **Individuals with Criminal History** module increases from 3 to 6 years from 2018 onwards.

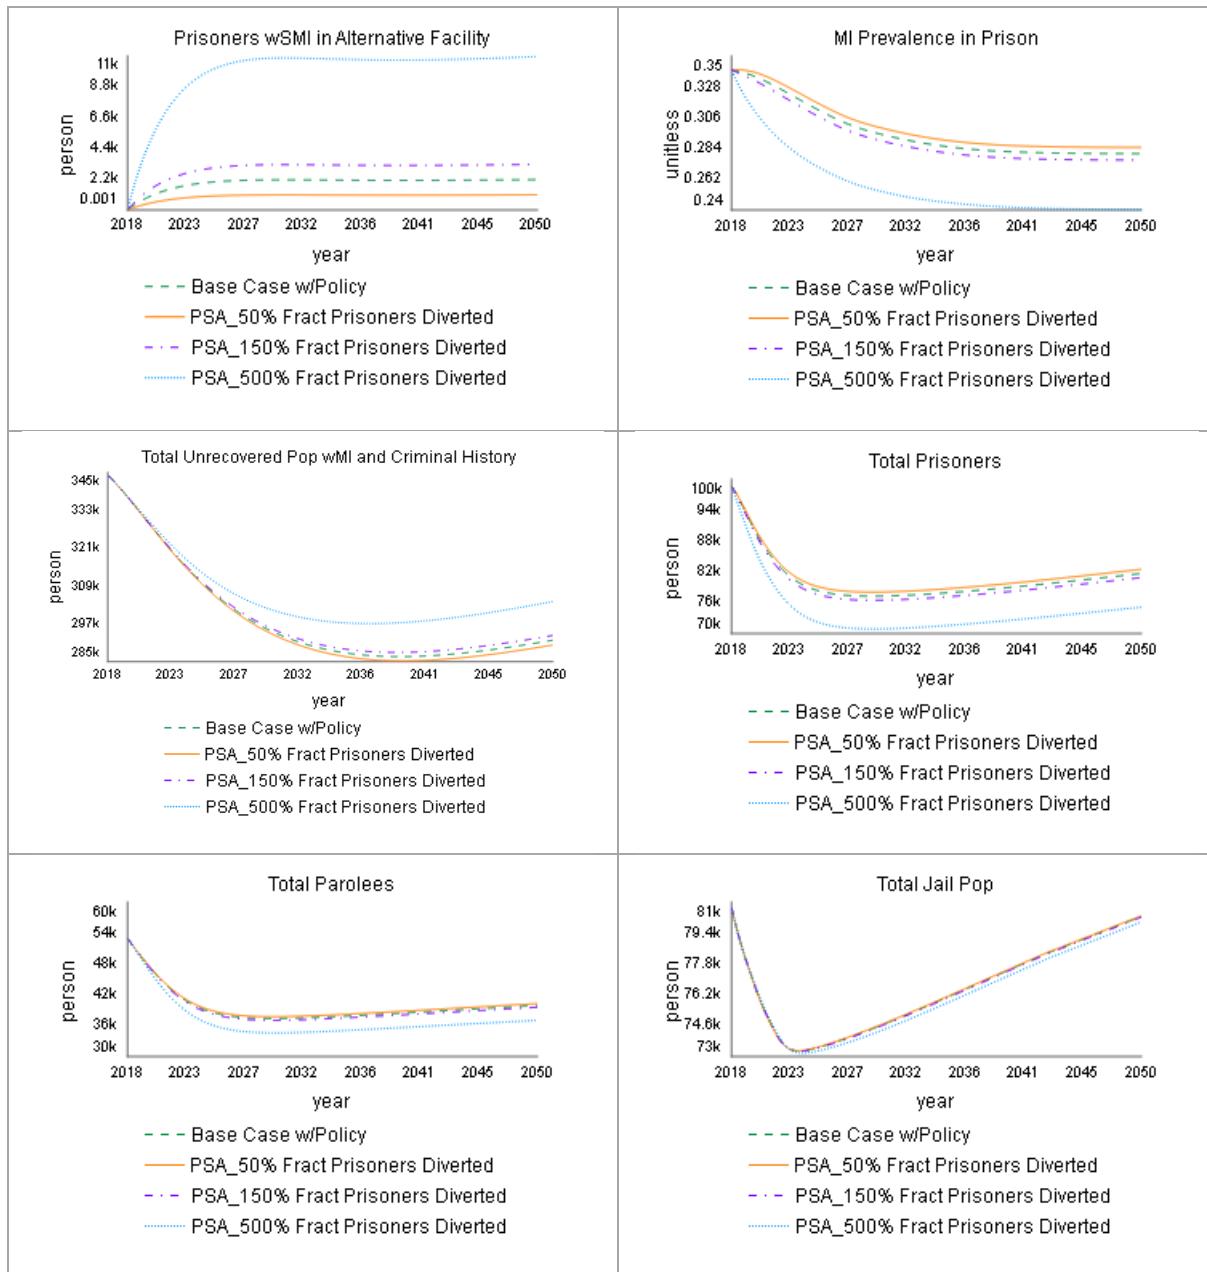

Selected Results

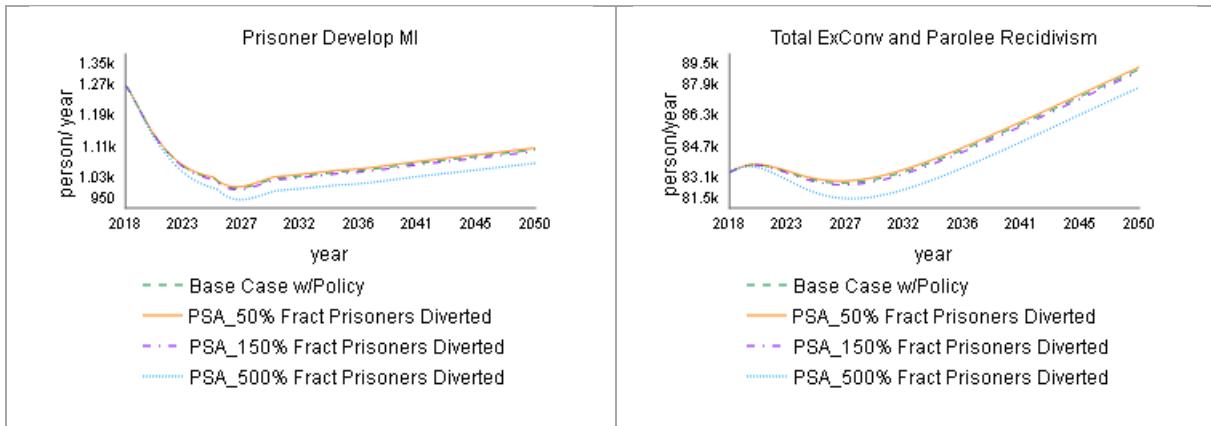

Sensitivity Analysis Test 1 – Fraction Incoming Prisoners wSMI Diverted

In this test, the “ref fract incoming prisoners wSMI diverted” in the **Individuals with Criminal History** module is tested by varying the parameter with a STEP function to lower the constant by 50% lower and increase the constant by 150% and 500% from 2018 onwards. The initial value for “ref fract incoming prisoners wSMI diverted” is 0.05.

Selected Results

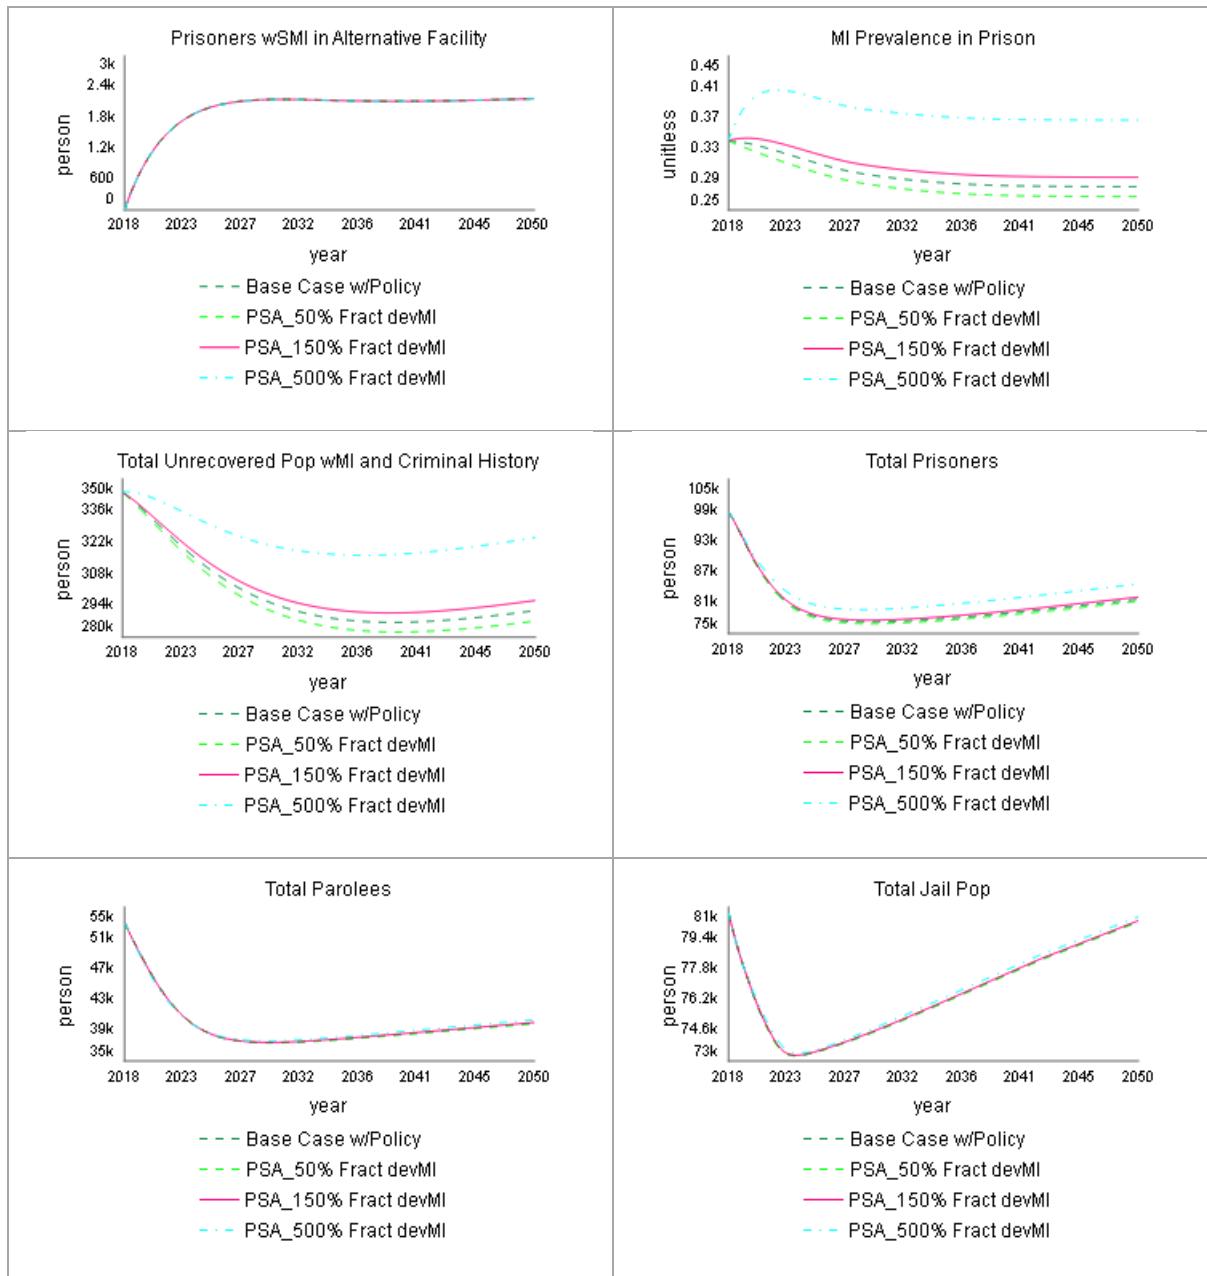

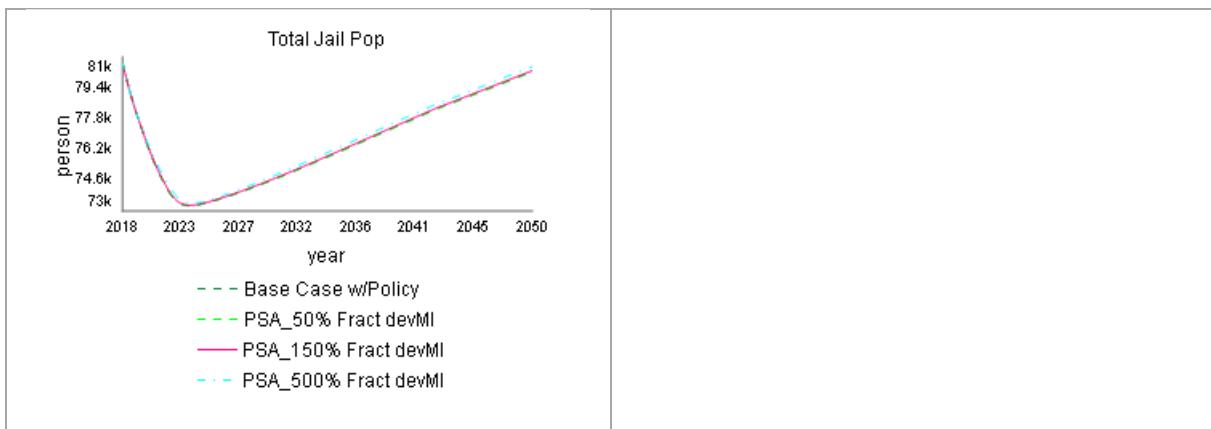

Sensitivity Analysis Test 2 – Fraction of Prisoners Develop Mental Illness

In this test, the “ref fract prisoners devMI” in the **Individuals with Criminal History** module is tested by varying the parameter with a STEP function to lower the constant by 50% lower and increase the constant by 150% and 500% from 2018 onwards. The initial value for “ref fract prisoners devMI” is 0.02.

Selected Results

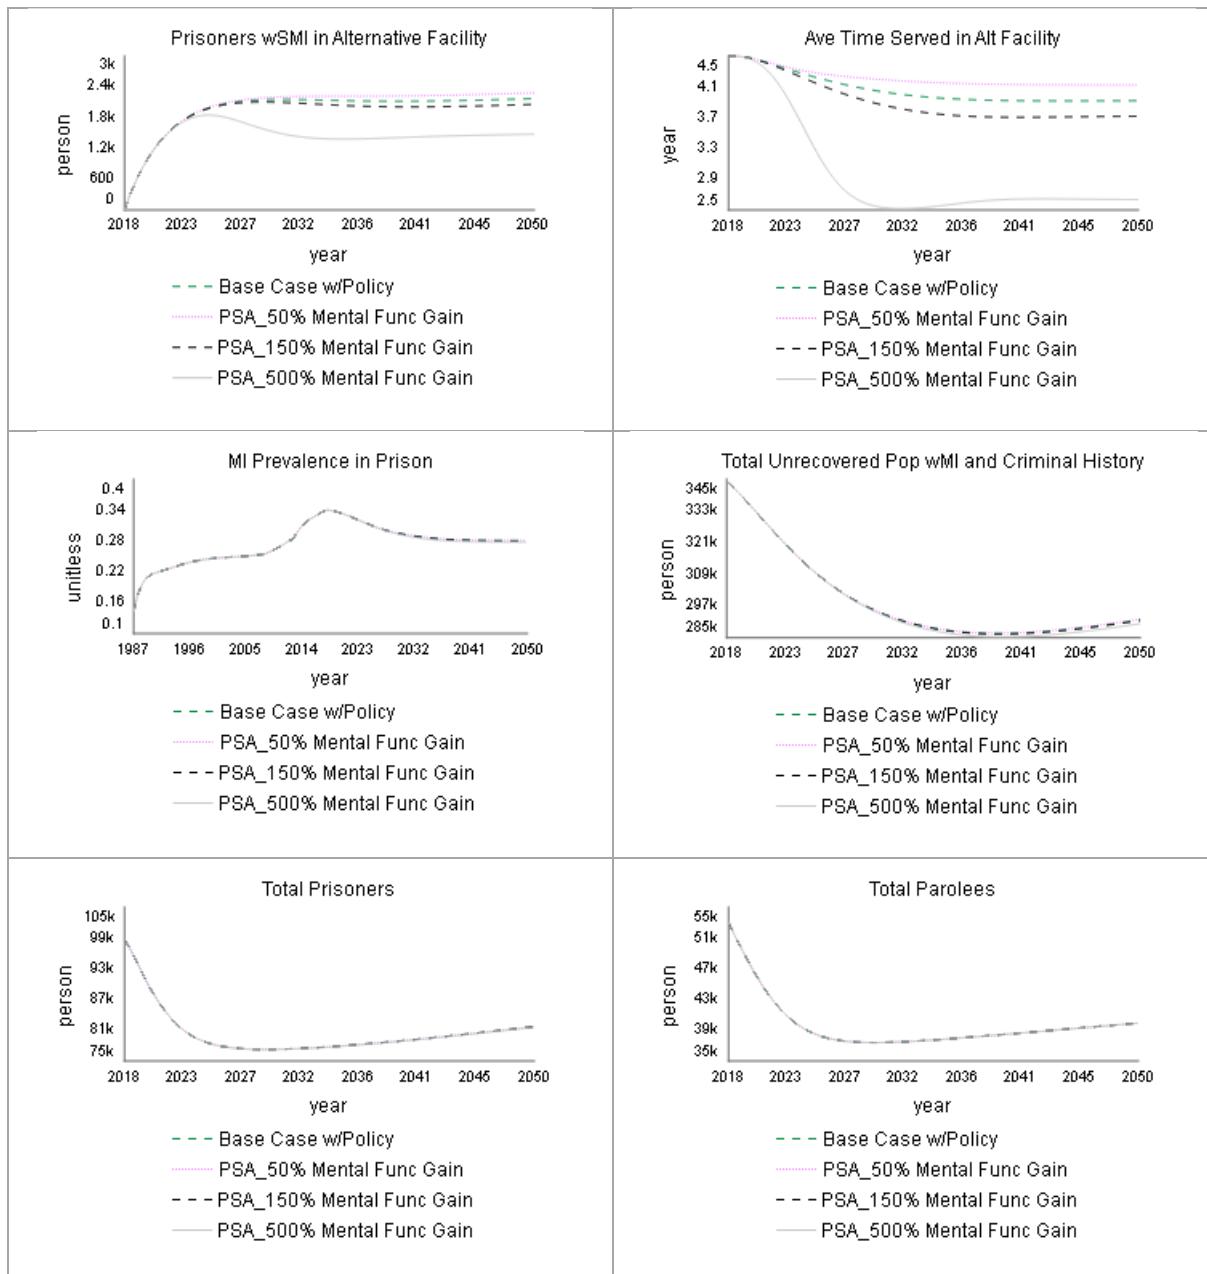

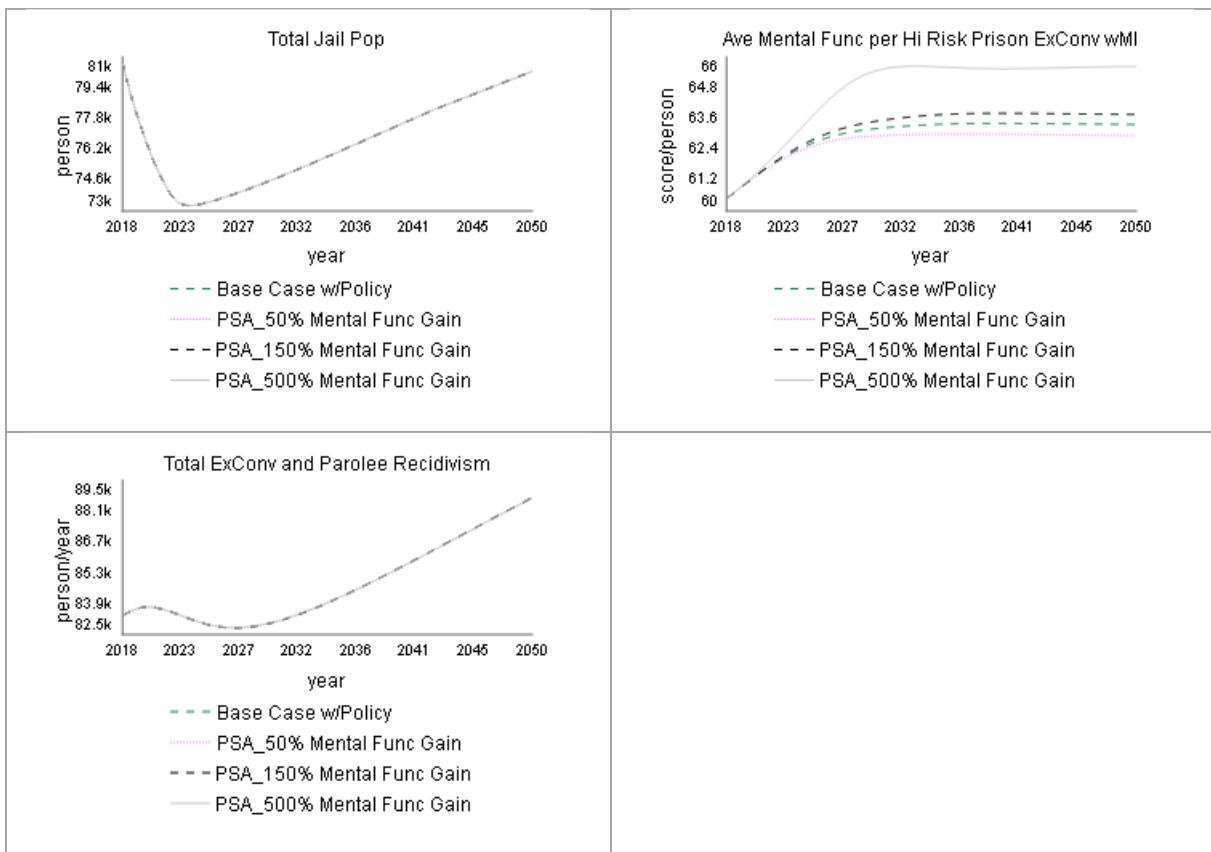

Sensitivity Analysis Test 3 – Mental Function Gain in Alternative Facility

In this test, the “mental func gain” in the **Mental Profiles** module is tested by varying the parameter with a STEP function to lower the constant by 50% lower and increase the constant by 150% and 500% from 2018 onwards. The initial value for “mental func gain” is two score per year per person.

Selected Results

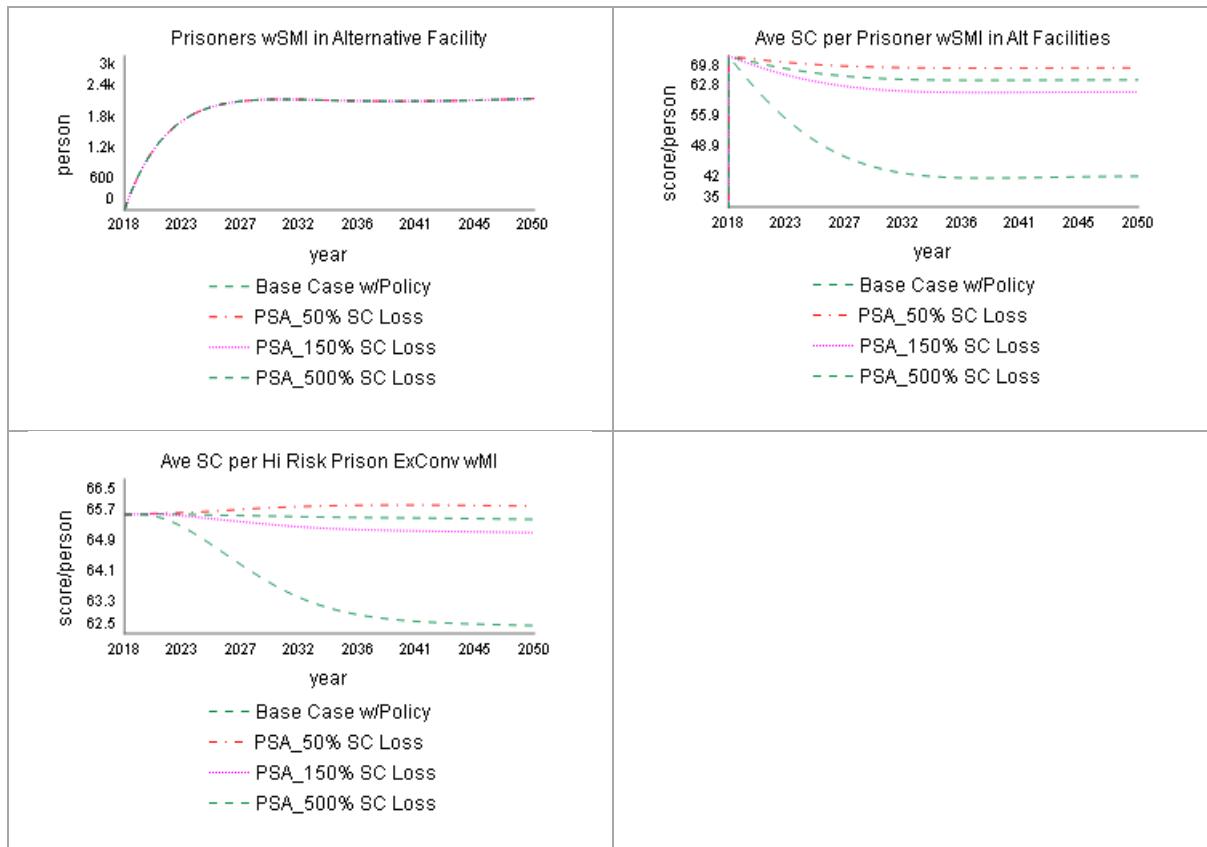

Sensitivity Analysis Test 4 – Annual Prisoner Social Capital Loss in Alternative Facility

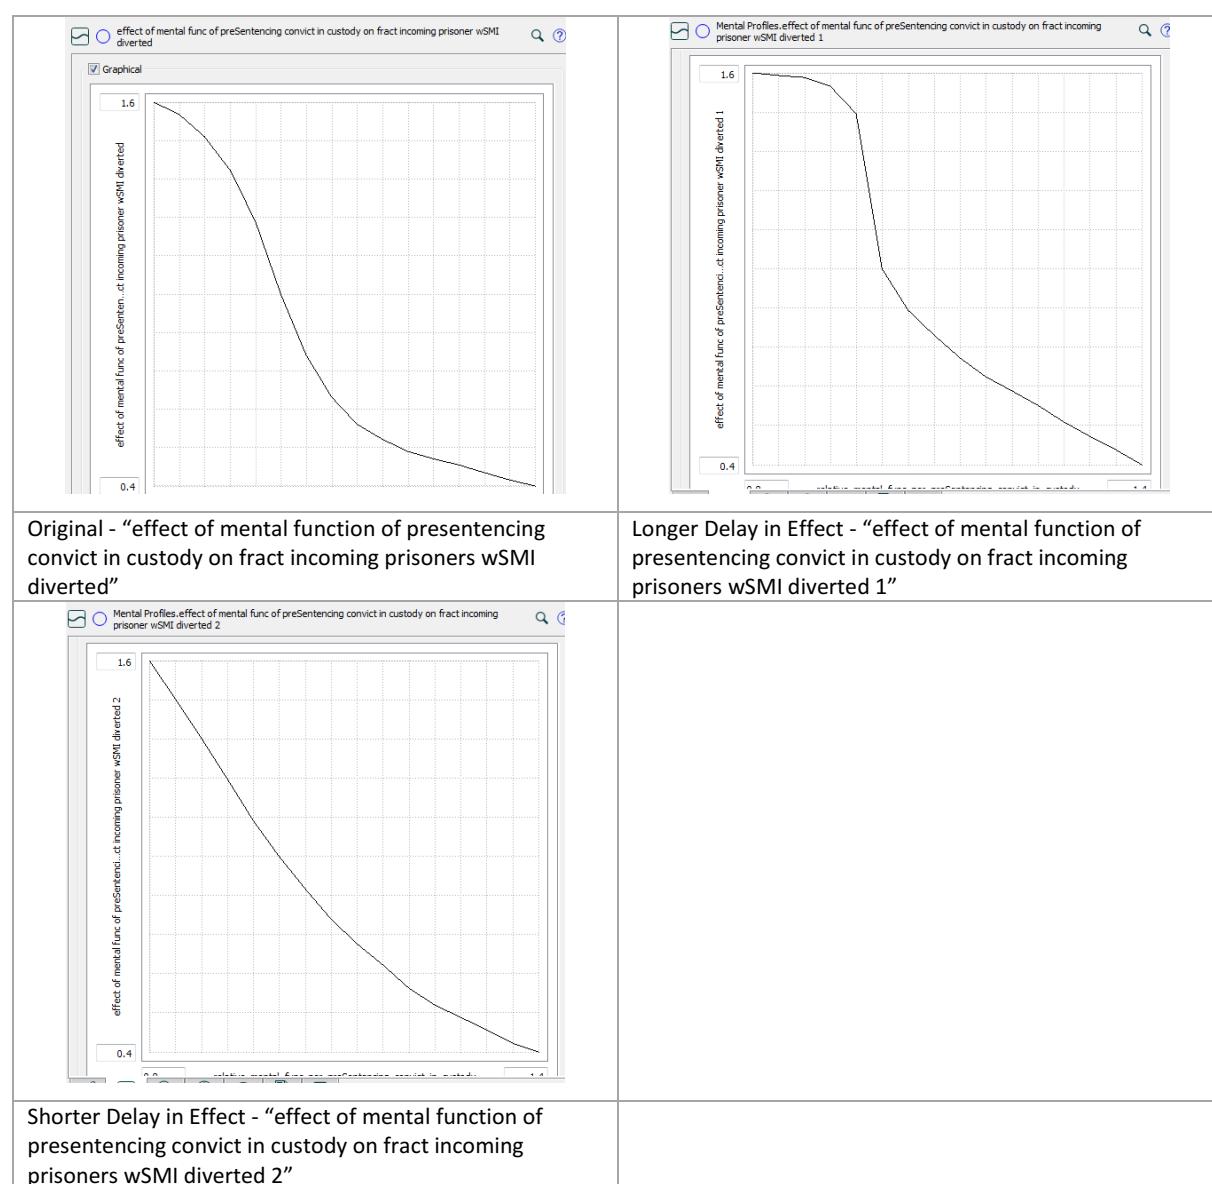

In this test, the “annual prisoner SC loss per prisoner in alt facility” in the **Social Capital** module is tested by varying the parameter with a STEP function to lower the constant by 50% lower and increase the constant by 150% and 500% from 2018 onwards. The initial value for “annual prisoner SC loss per prisoner in alt facility” is 1.5 score per year per person.

Selected Results

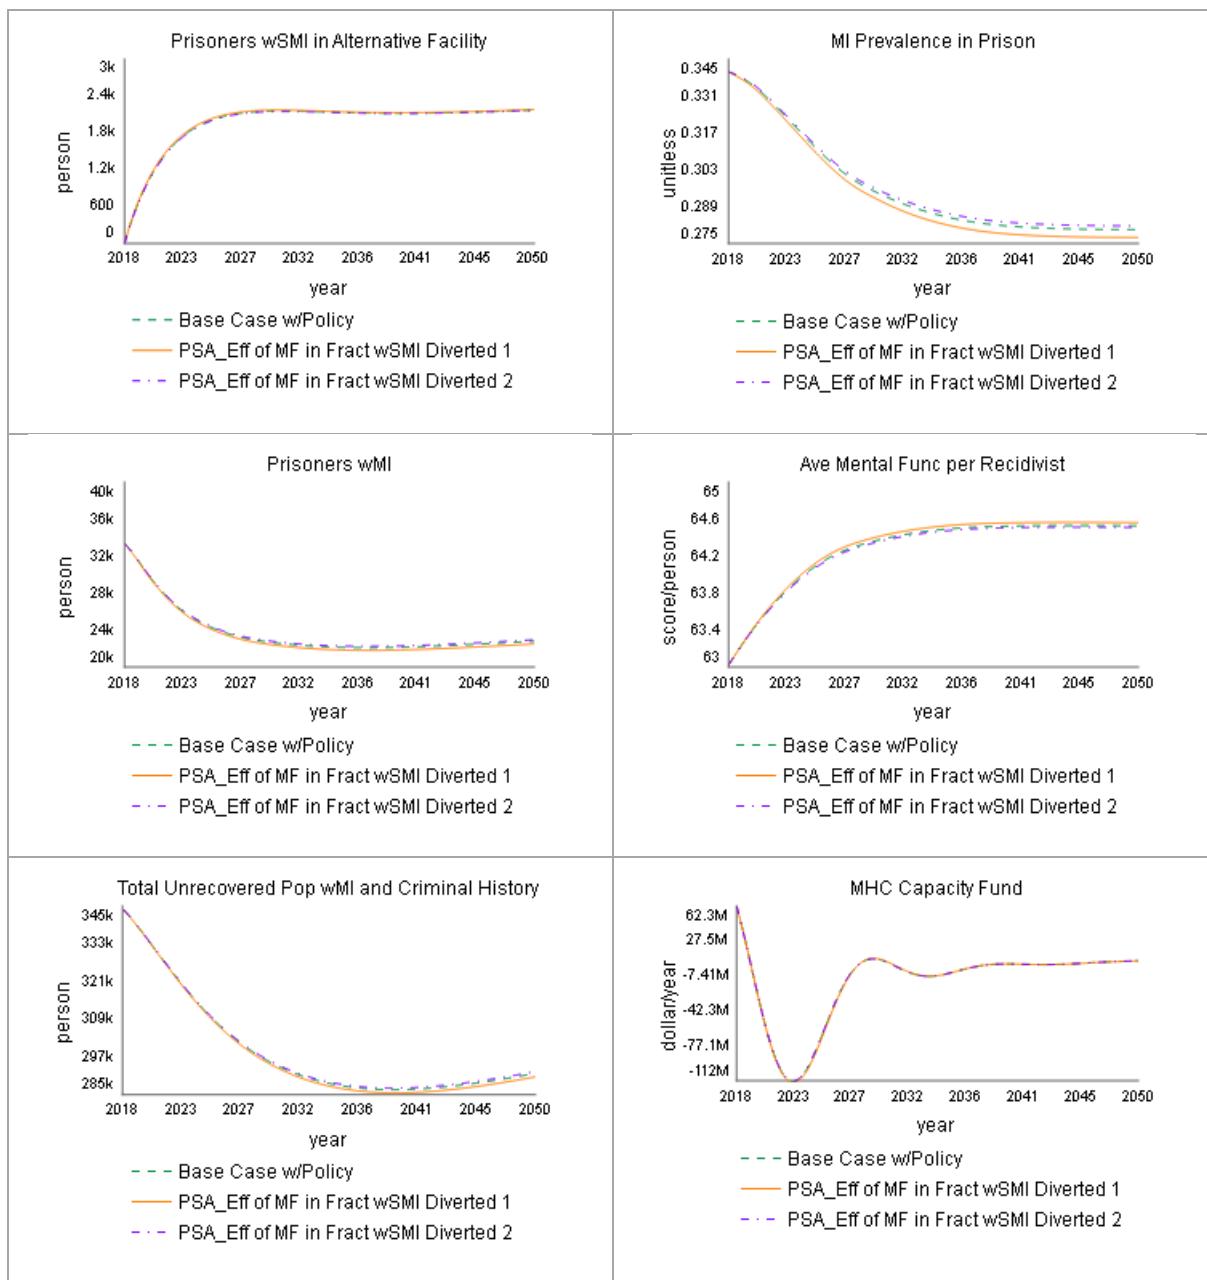

Sensitivity Analysis Test 5 – Effect of Mental Function of Pre-Sentencing Convict on Fraction of Prisoners wSMI Diverted

In this test, the relationship between “mental func of preSentencing convict in custody” in the **Mental Profiles** module and “fract incoming prisoners wSMI diverted” in the **Individuals with Criminal History** module is modified through changing the steepness of the graph in the table function in “effect of mental function of presentencing convict in custody on fract incoming prisoners wSMI diverted” to assess the impact on selected parameters with varying implicit delay in the effect of the input parameter. The following graphs are the altered steepness tested. As the structure for the presentencing convict in community is similar to those in custody, hence only the “effect of mental function of presentencing convict in custody on fract incoming prisoners wSMI diverted” is tested.

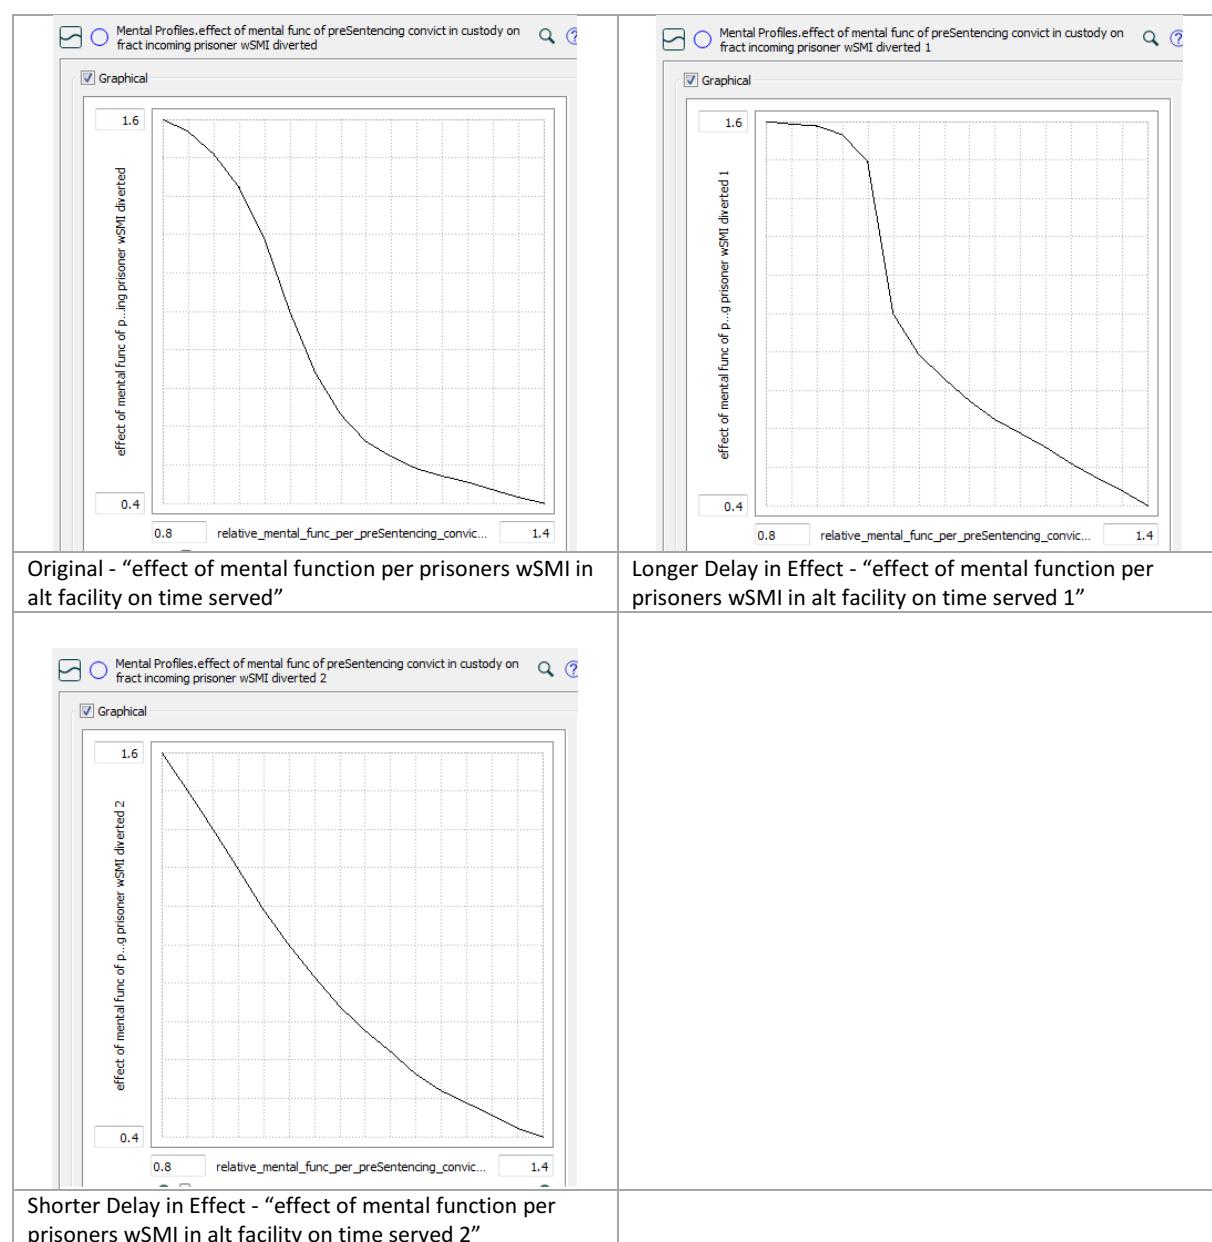

Selected Results

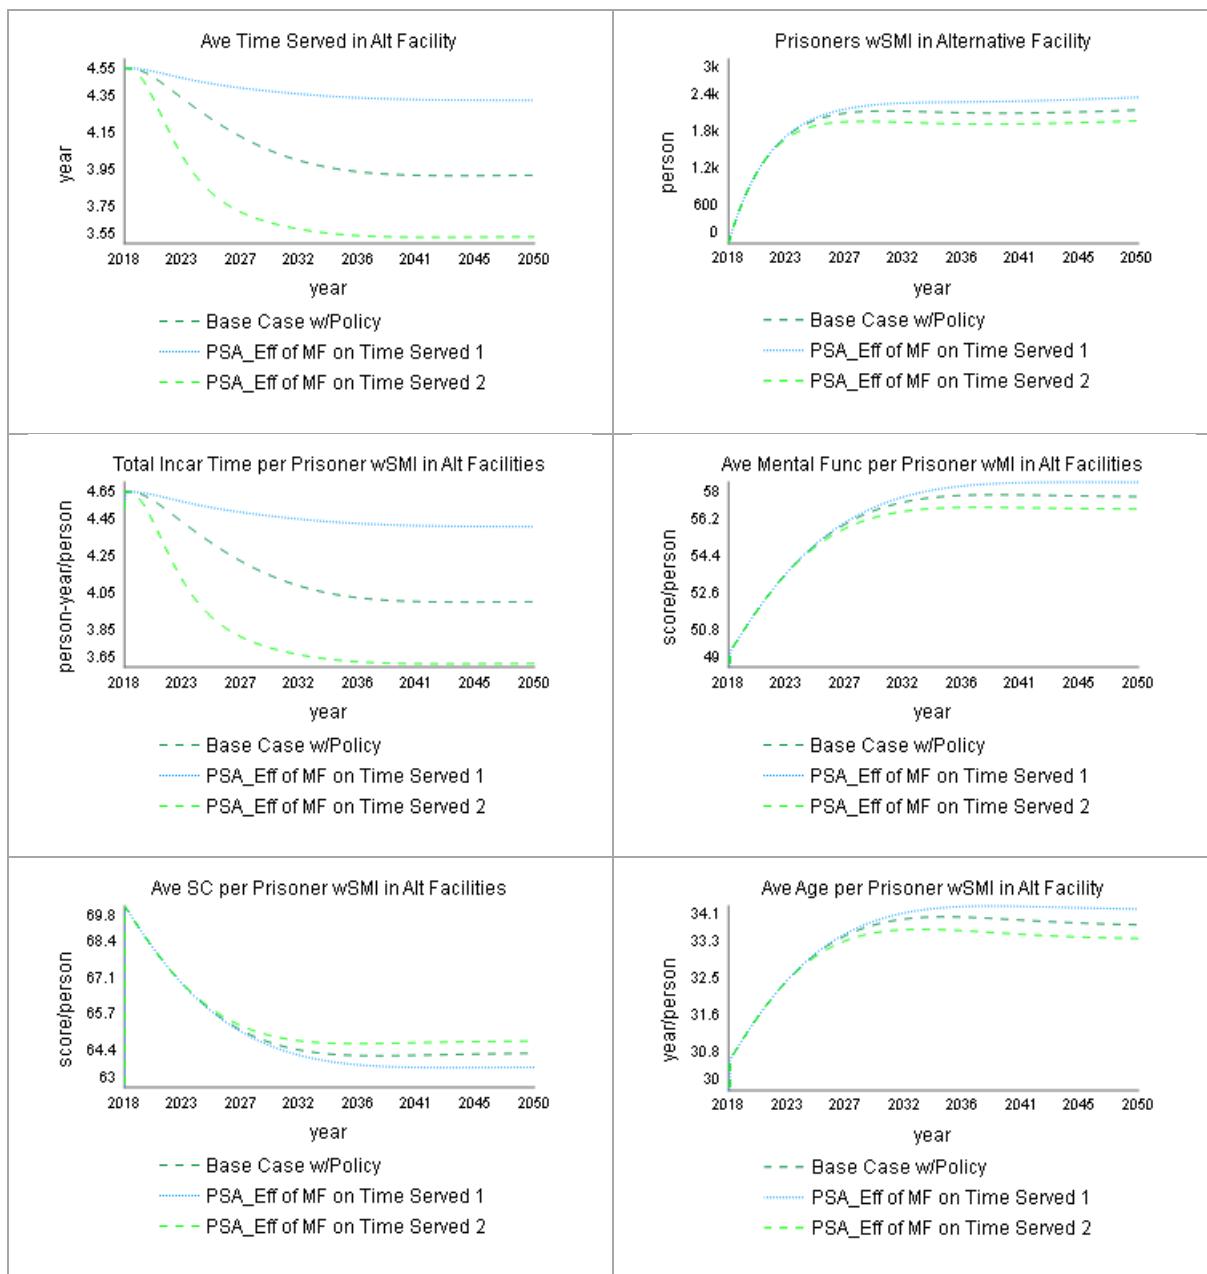

Sensitivity Analysis Test 6 – Effect of Mental Function per Prisoner wSMI on Time Served in Alternative Facility

In this test, the relationship between “mental func per prisoner wSMI in alt facility on time served” in the **Mental Profiles** module and “ave time served in alt facility” in the **Individuals with Criminal History** module is modified through changing the steepness of the graph in the table function in “effect of mental function per prisoners wSMI in alt facility on time served” to assess the impact on selected parameters with varying implicit delay in the effect of the input parameter. The following graphs are the altered steepness tested.

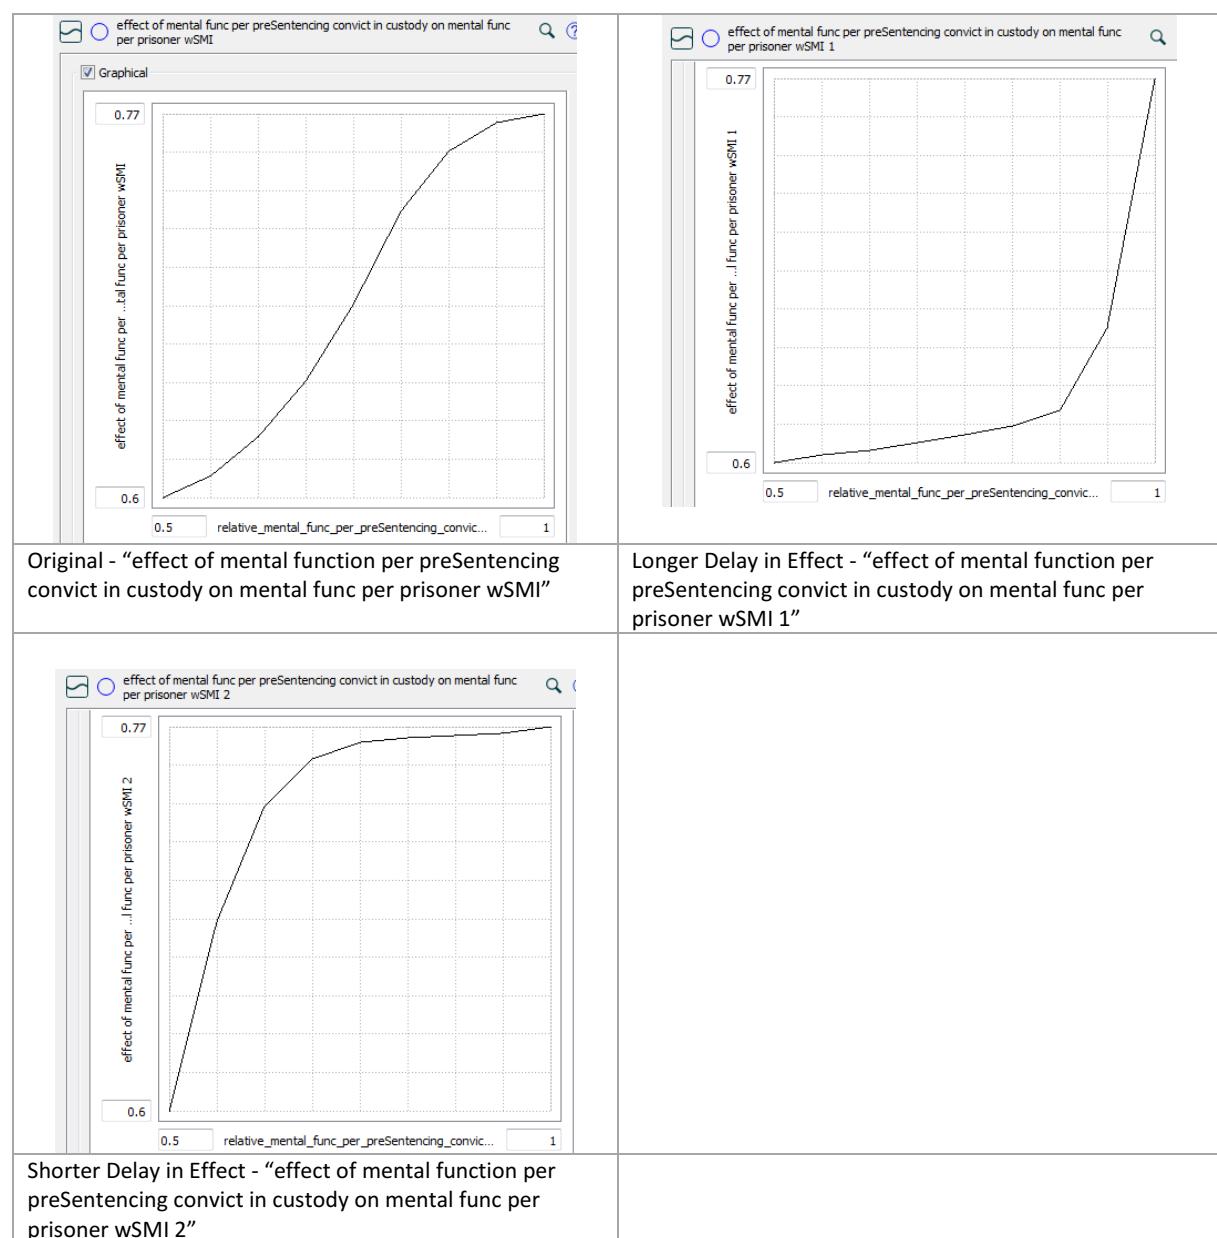

Selected Results

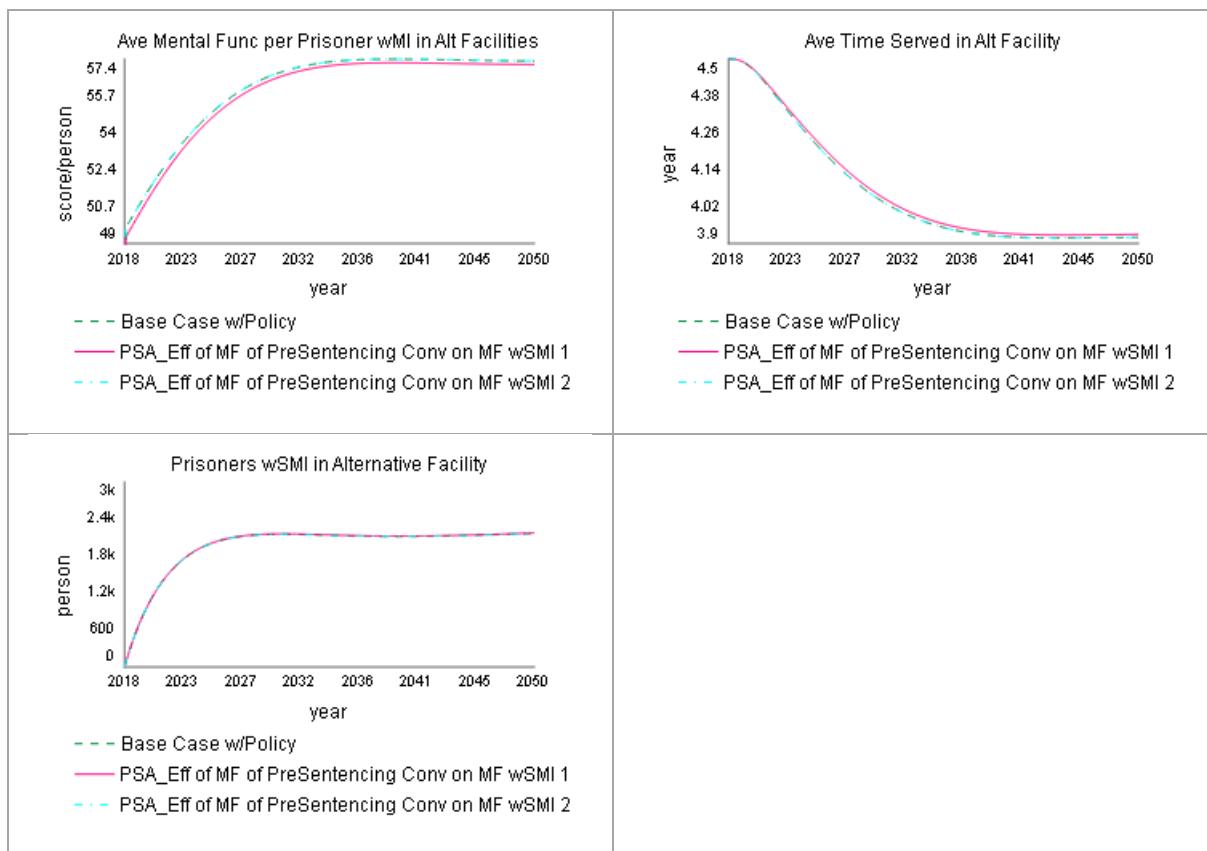

Sensitivity Analysis Test 7 – Effect of Mental Function per Pre-Sentencing Convict on Mental Functions per Prisoner wSMI

In this test, the relationship between “mental func per presentencing convict in custody” and “ave mental func per diverted prison convict in custody wSMI” in the **Mental Profiles** module is modified through changing the steepness of the graph in the table function in “effect of mental function per preSentencing convict in custody on mental func per prisoner wSMI” to assess the impact on selected parameters with varying implicit delay in the effect of the input parameter. The following graphs are the altered steepness tested. As the structure for the pre-sentencing convict in community is similar to those in custody, hence only the “effect of mental function per preSentencing convict in custody on mental func per prisoner wSMI” is tested.

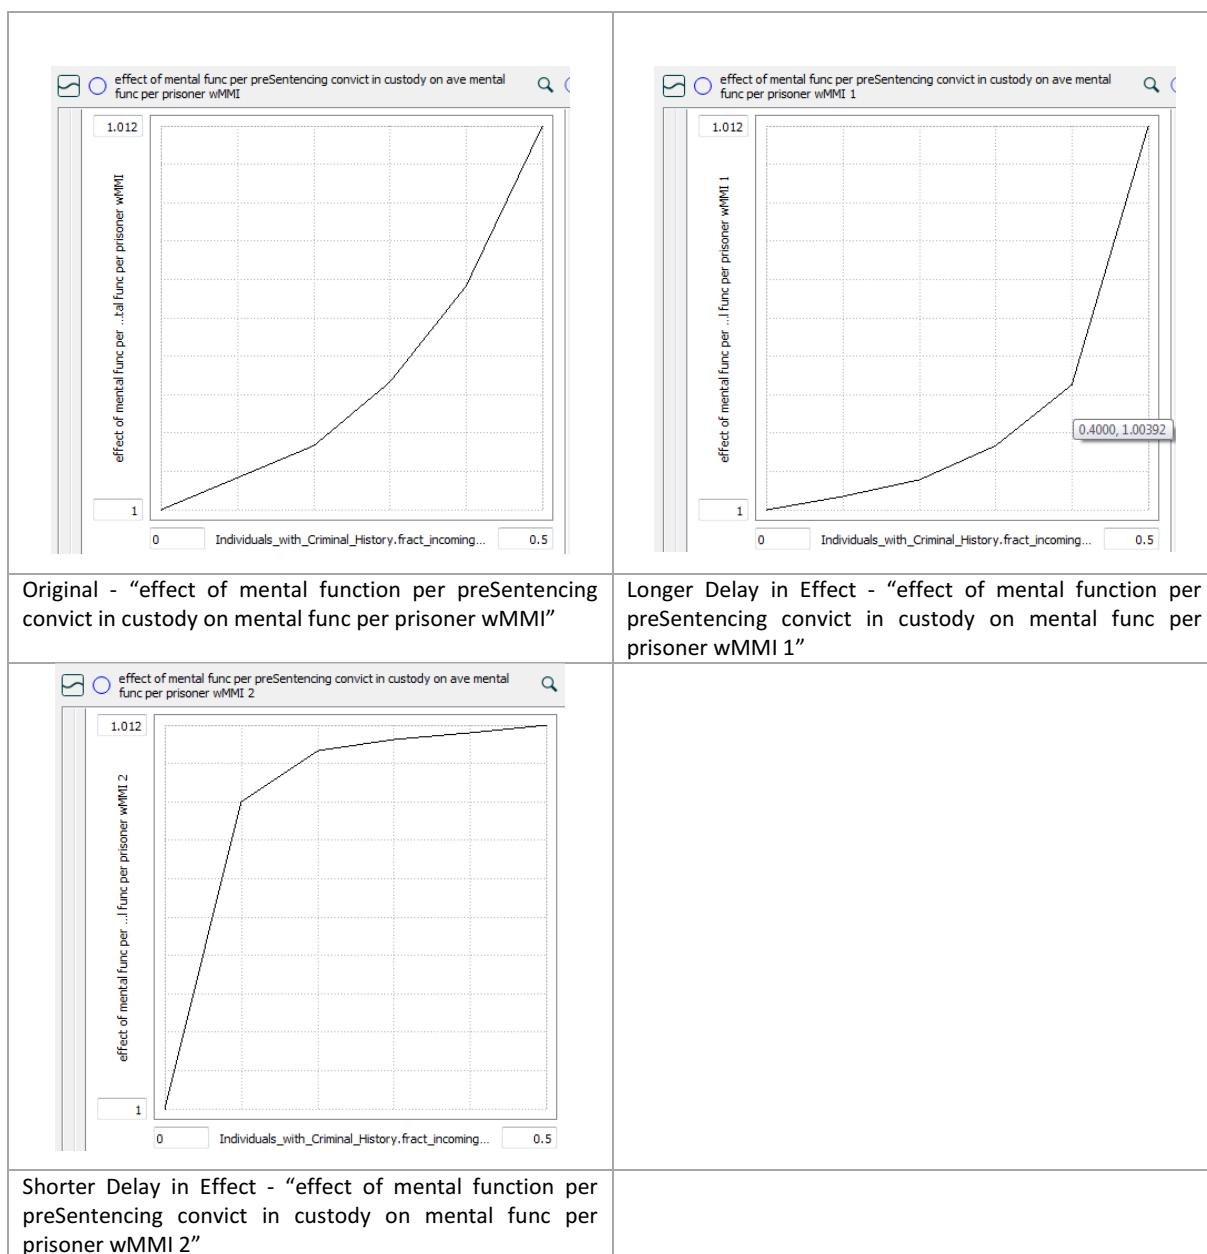

Selected Results

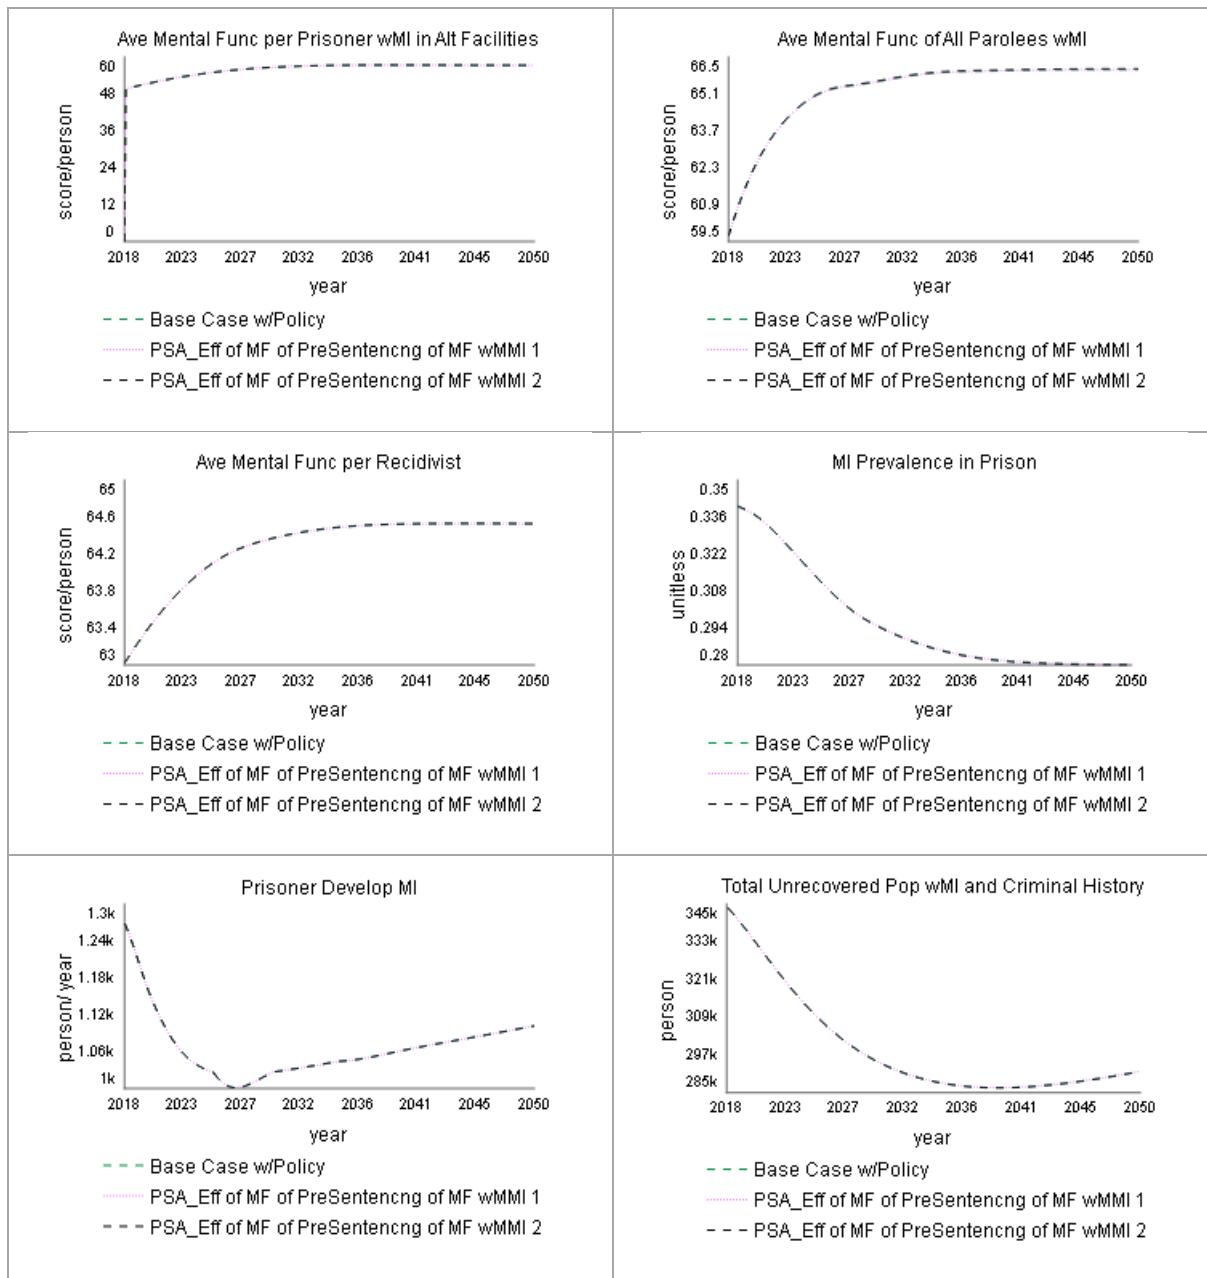

Sensitivity Analysis Test 8 – Effect of Mental Function per Pre-Sentencing Convict on Average Mental Functions per Prisoner with Mild/Moderate Mental Illness

In this test, the relationship between “mental func per presentencing convict in custody” and “ave mental func per incoming prisoner in custody wMMI” in the **Mental Profiles** module is modified through changing the steepness of the graph in the table function in “effect of mental function per preSentencing convict in custody on mental func per prisoner wMMI” to assess the impact on selected parameters with varying implicit delay in the effect of the input parameter. The following graphs are the altered steepness tested. As the structure for the pre-sentencing convict in community is similar to those in custody, hence only the “effect of mental function per preSentencing convict in custody on mental func per prisoner wMMI” is tested.

Selected Results

Appendix O – Test Results of Concept Model

Equilibrium Test

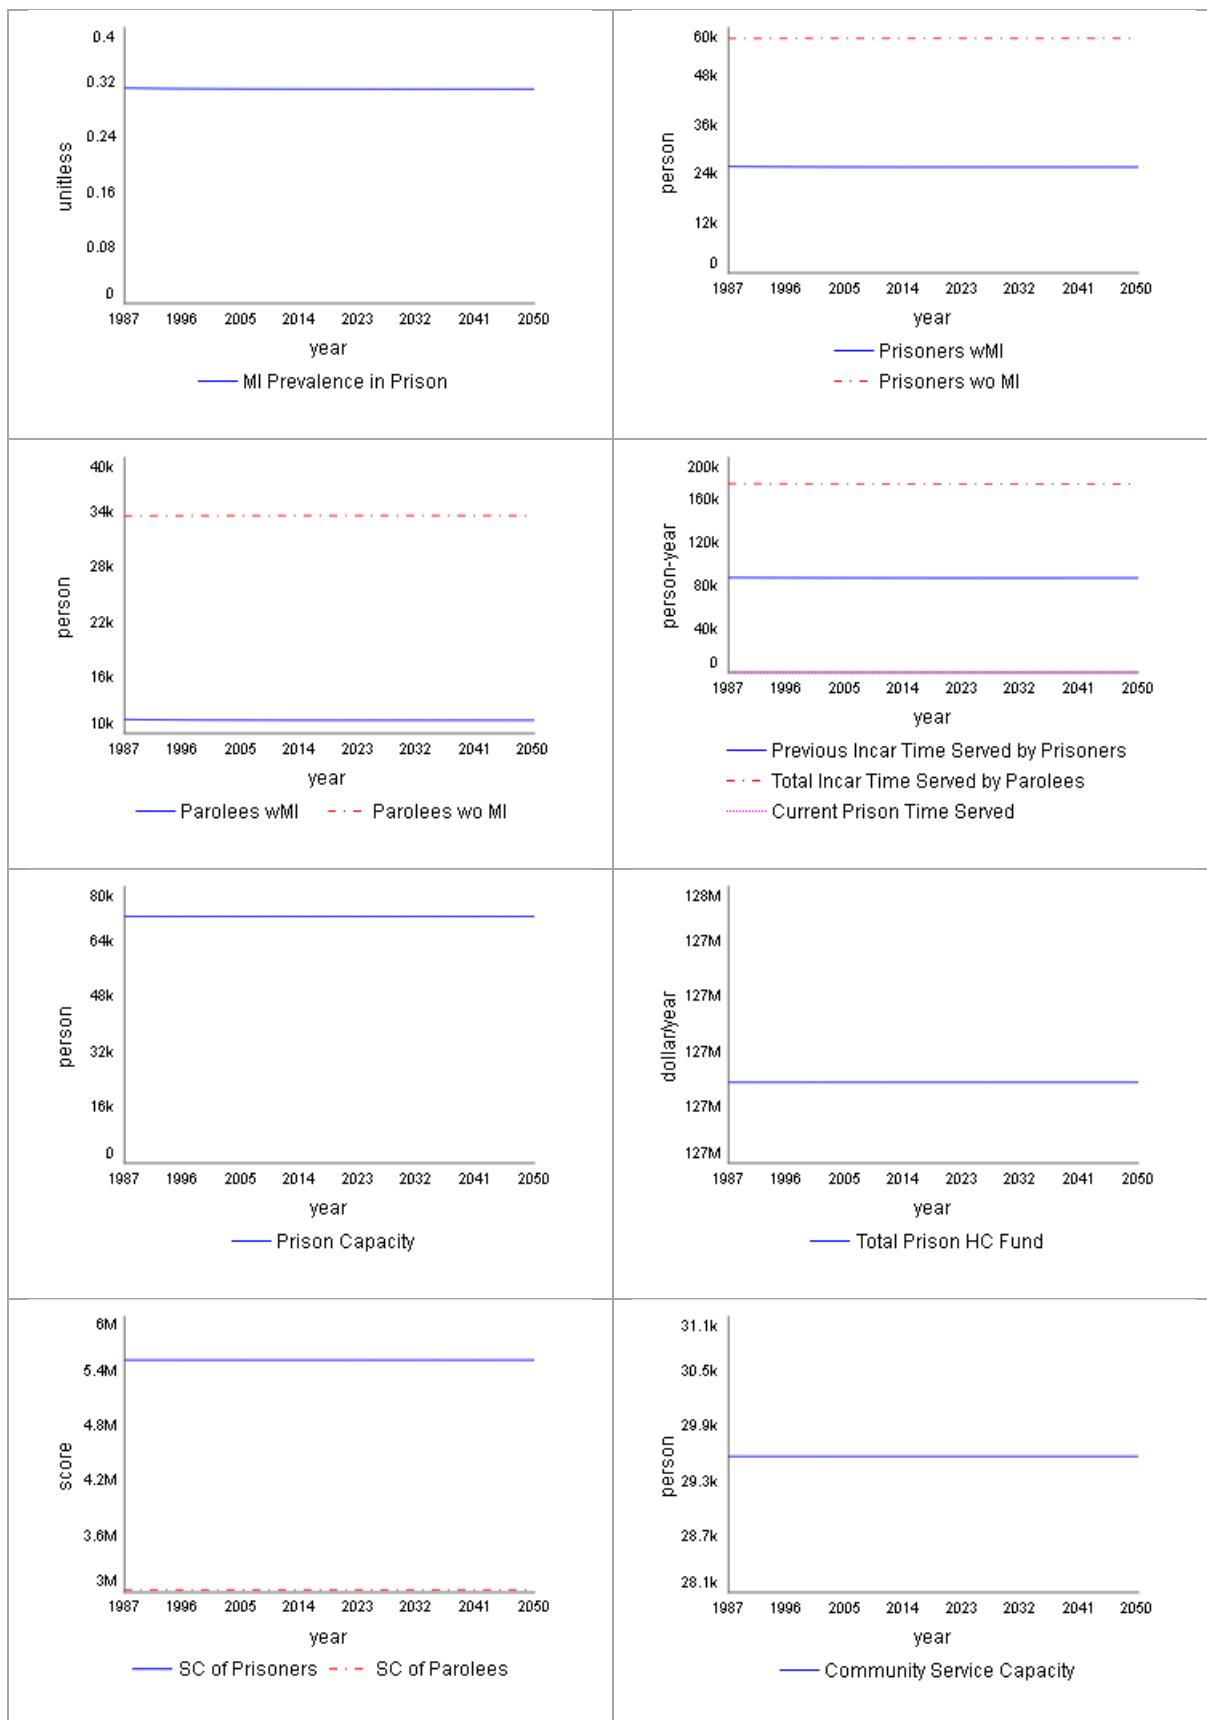

The simulated behaviors of the equilibrium test are achieved by setting the following parameters with modified values and equations:

Values in Stocks and Constants	
Prisoners wMI	25883.1033736
Parolees wMI	11425.1001423
Desisting ExConv wMI	Parolees_wMI/(ave_parole_length_wMI*mortality_rate)
Prisoners wo MI	57380.6627633
Parolees wo MI	33687.7403324
Desisting ExConv wo MI	Parolees_wo_MI/(ave_parole_length_wo_MI*mortality_rate)
Previous Incarceration Year Served by Prisoners	87978.441284
Total Incar Time Served by Parolees	175412.337232
Current Prison Time Served	0
Total Incar Time Served by Parolees	175412.337232
Prison Capacity	71368.9388246
Total Prison HC Budget	Non_MHC_Capacity_in_Prison*cost_per_non_MHC_tmnt + MHC_Capacity_in_Prison*cost_per_MHC_tmnt
Non MHC Capacity in Prison	2497.91250287
MHC Capacity in Prison	7163.60564183
SC of Prisoners	5527272.52285
SC of Parolees	3027475.76392
Community Service Capacity	29578.7110944

The following flows are also modified to initialize the model in equilibrium. The purpose of modifying the flows is to keep the bi-flows that depends on the stocks and constant growth rates.

Equations in Flows	
being admitted wMI	INIT (new_prison_admission) * fract_new_prisoners_wMI
being admitted wo MI	INIT(new_prison_admission) * (1-fract_new_prisoners_wMI)
chg in HC budget	((Non_MHC_capacity_in_Prison * cost_per_non_MHC_tmnt + MHC_capacity_in_Prison * cost_per_MHC_tmnt) - Total_Prison_HC_Budget) / budget_adjustment_time
transferring current prison time thru release	increasing_curret_prison_time_served

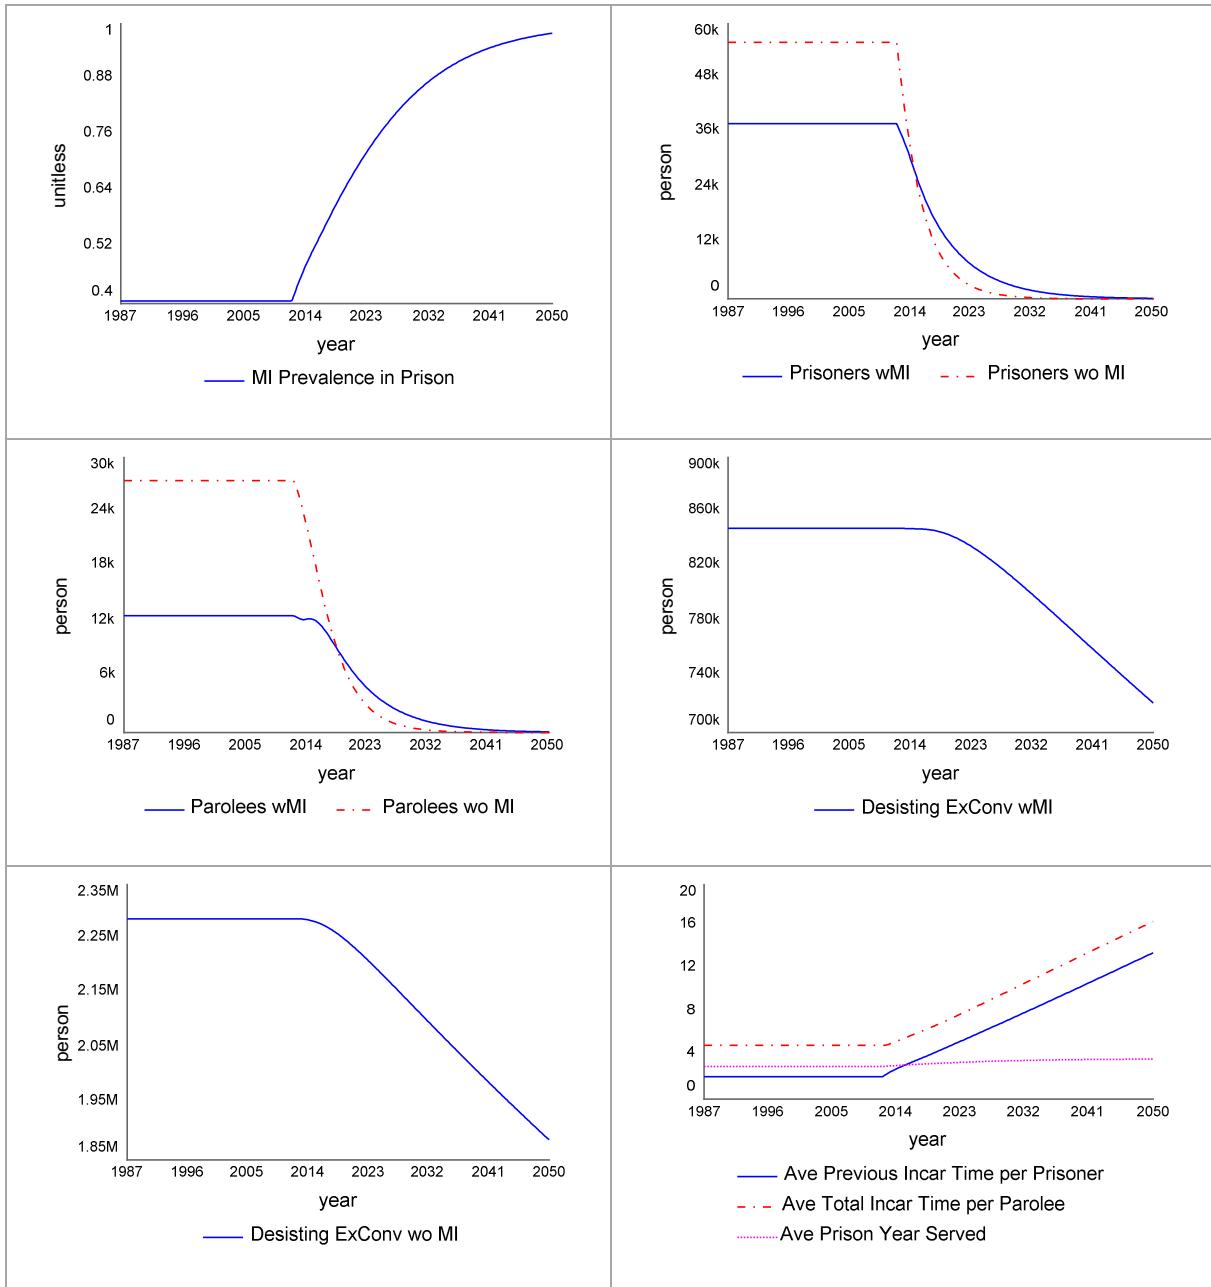

Selected Results

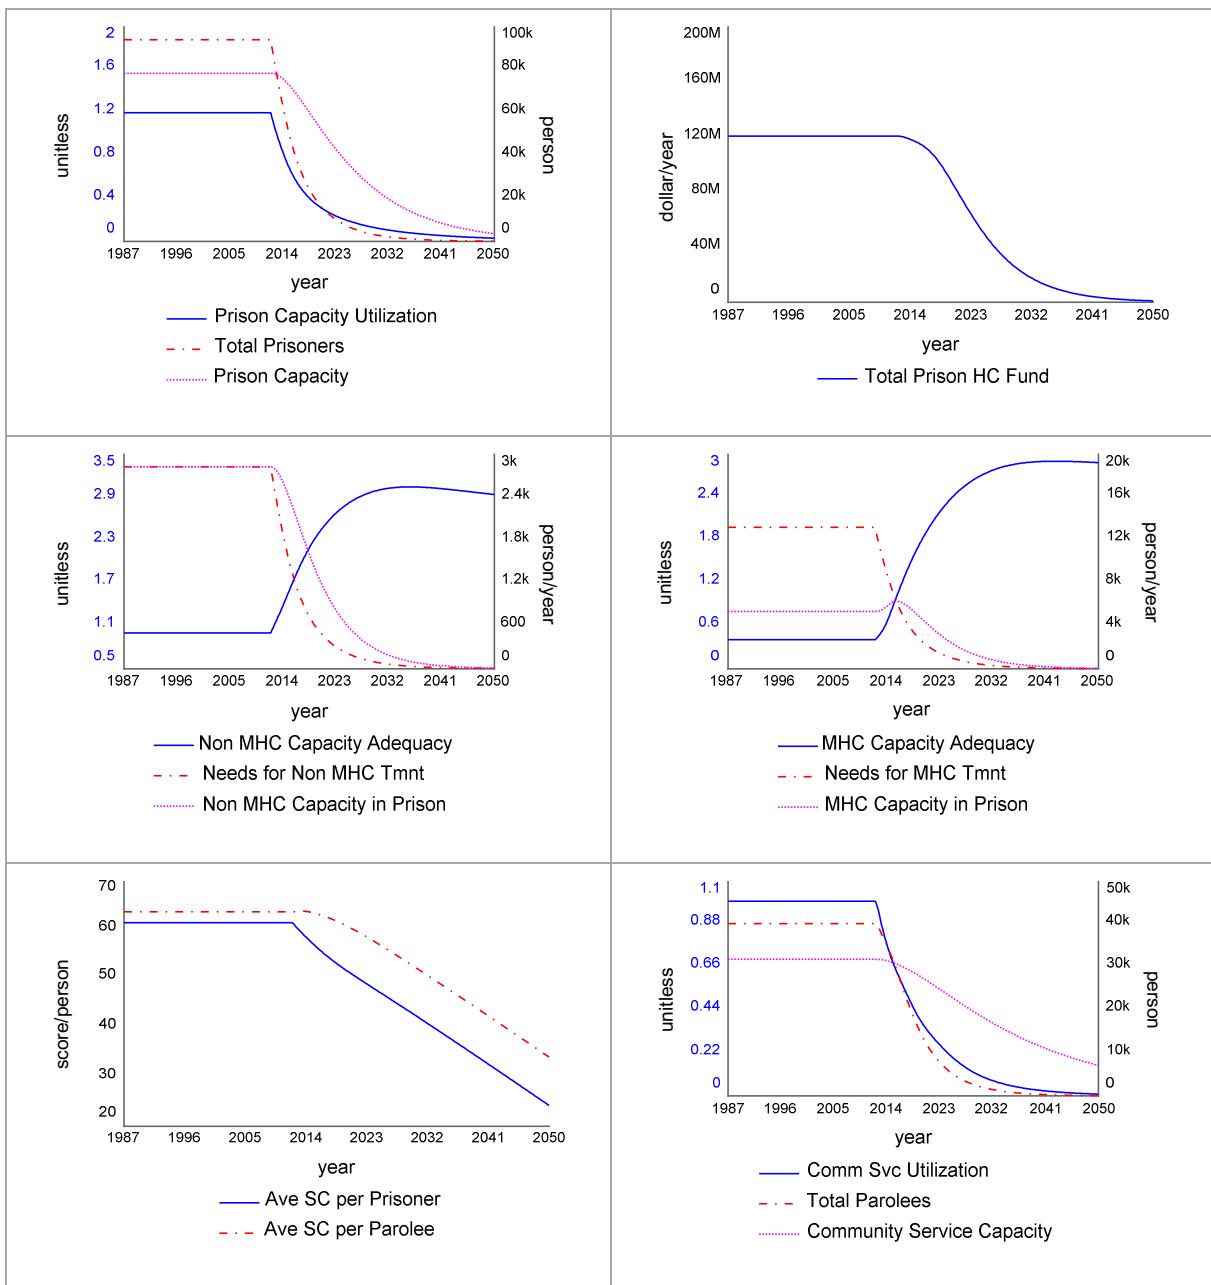

Extreme Condition Test 1 – Zero New Prison Admission

In this test, the “new prison admission” is set as zero from 2012 onwards.

Selected Results

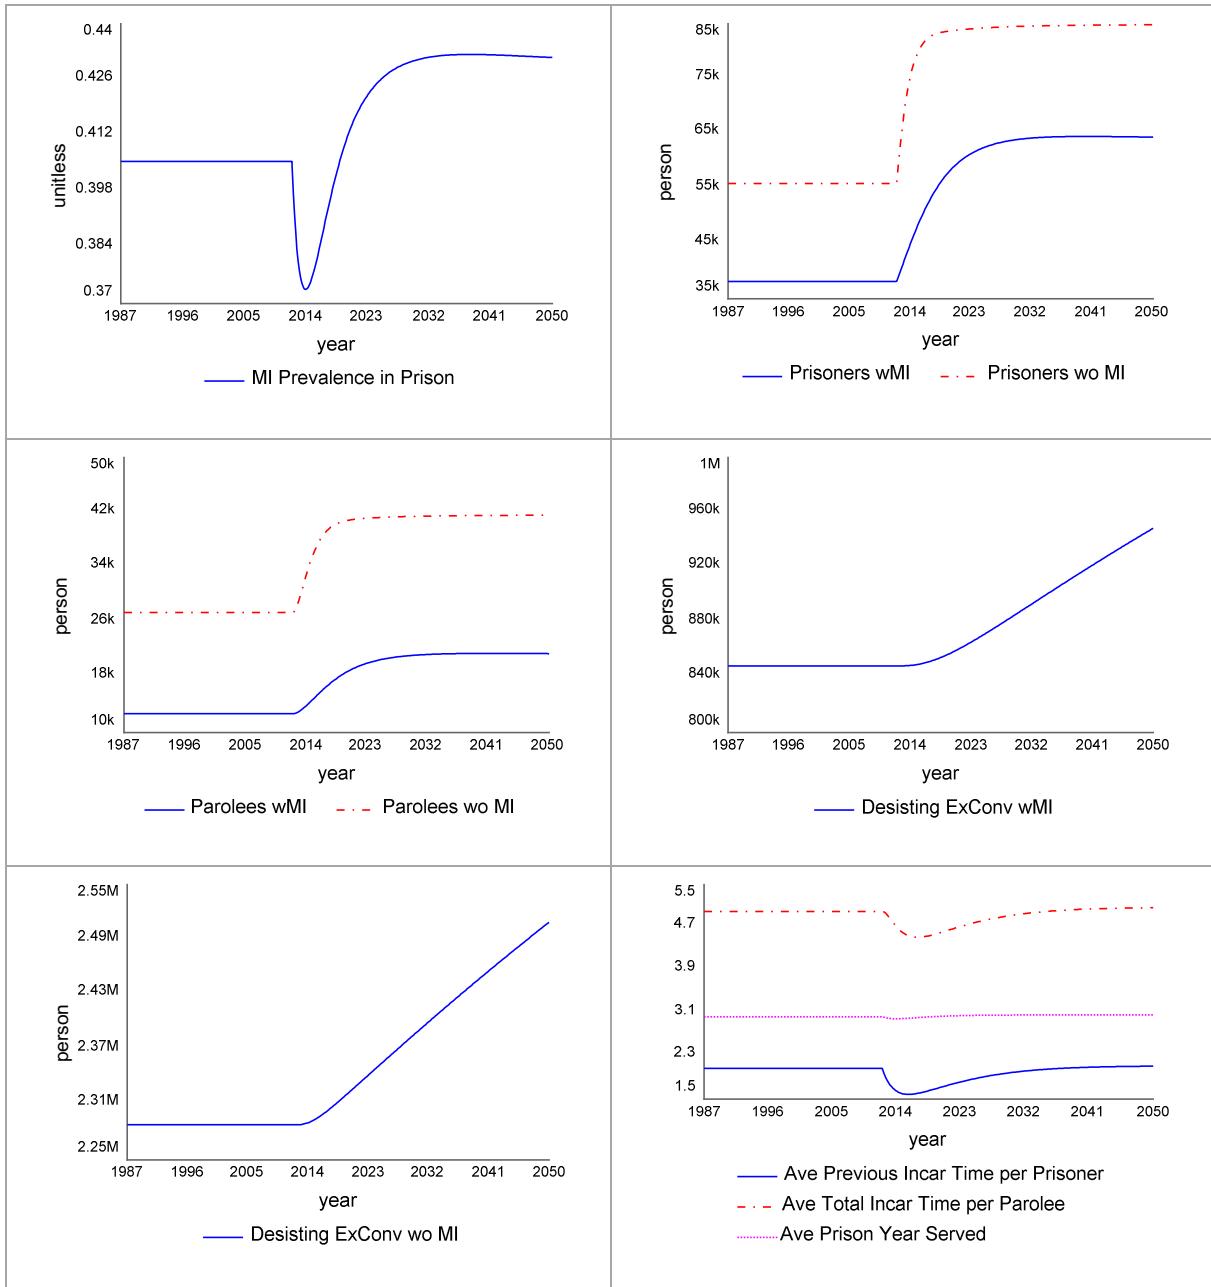

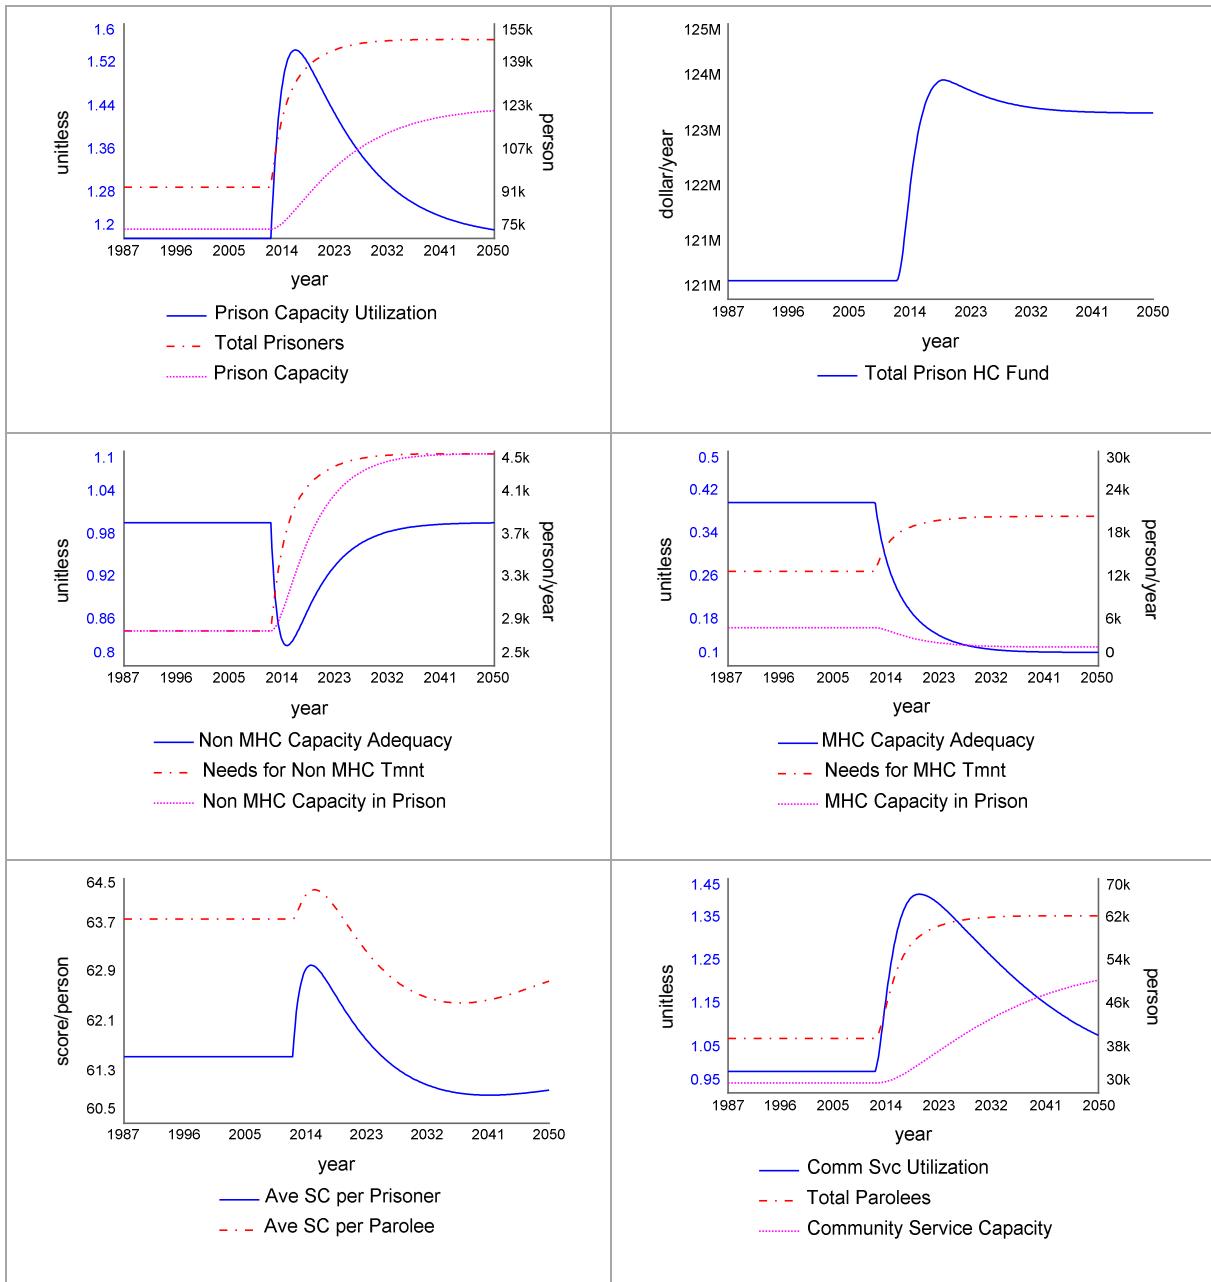

Extreme Condition Test 2 – Double New Prison Admission

In this test, the “new prison admission” is set as double from the initial value from 2012 onwards.

Selected Results

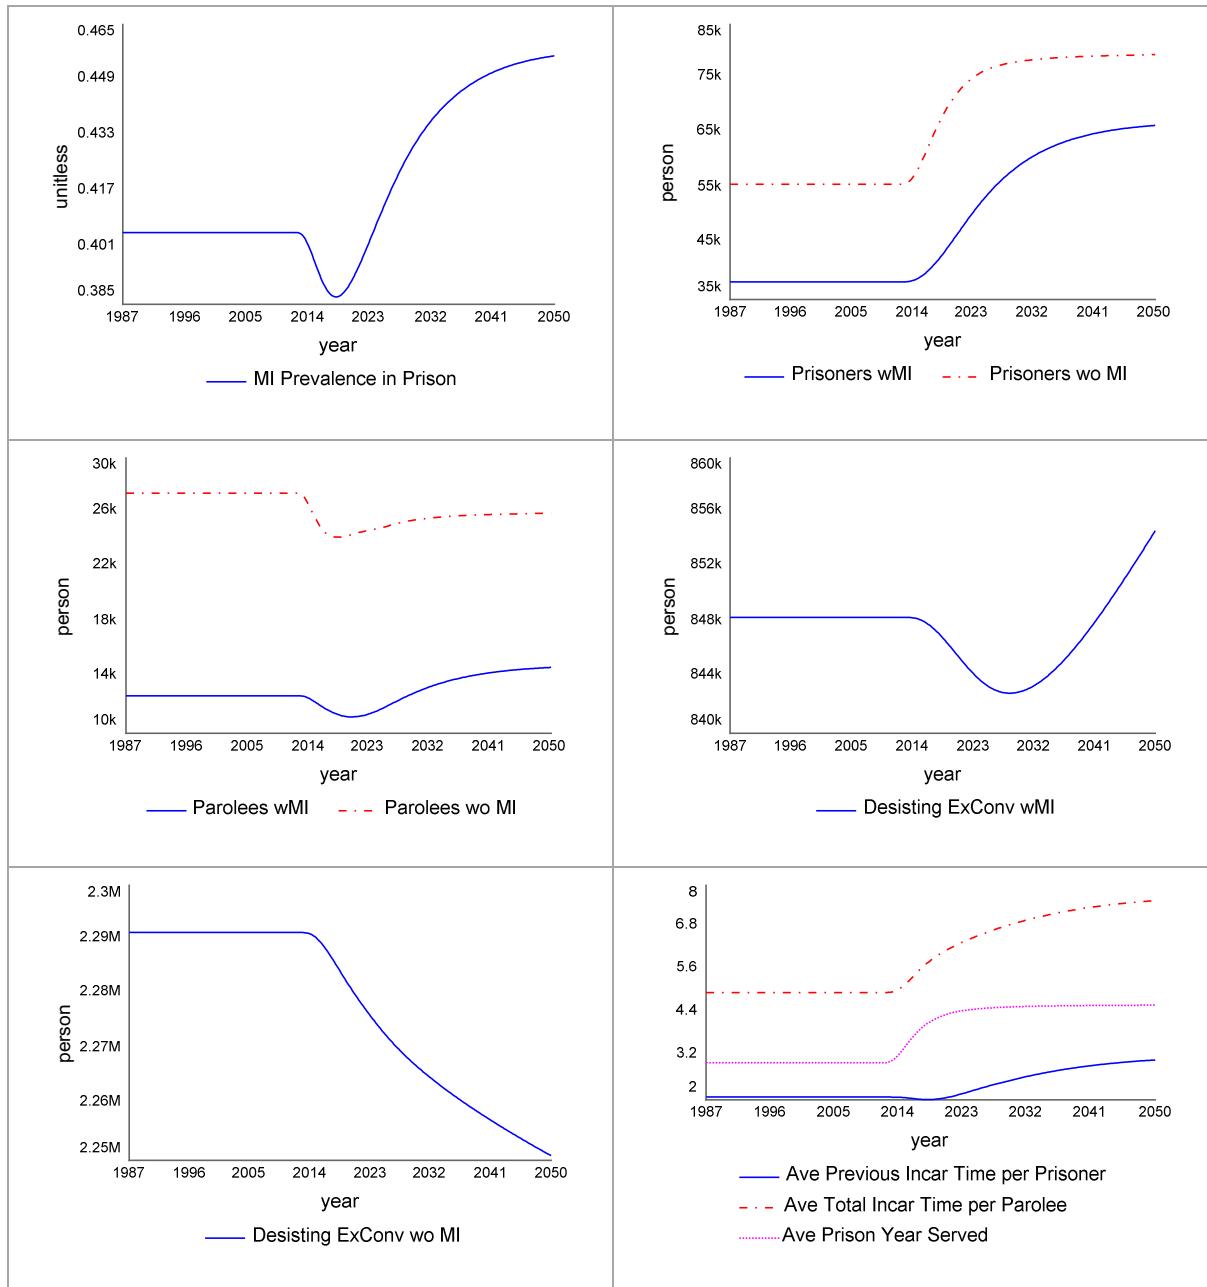

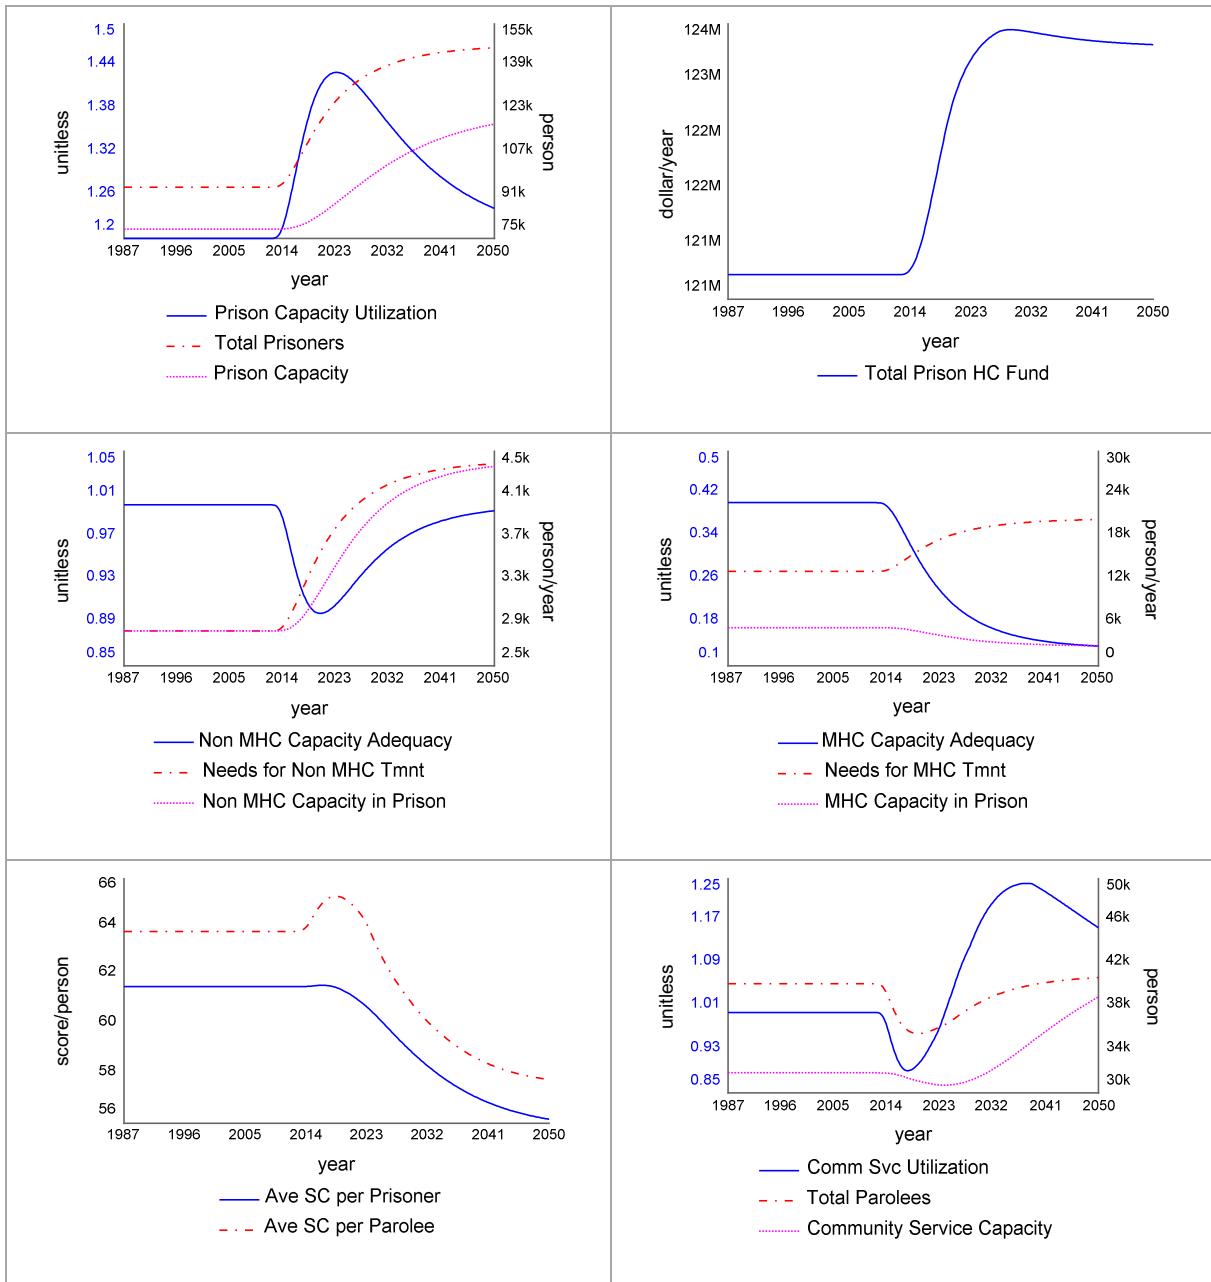

Extreme Condition Test 3 – Increase Average Prison Year Served by 50%

In this test, the “ave prison year served wMI” and “ave prison year served wo MI” are increased by 50% from 2012 onwards.

Selected Results

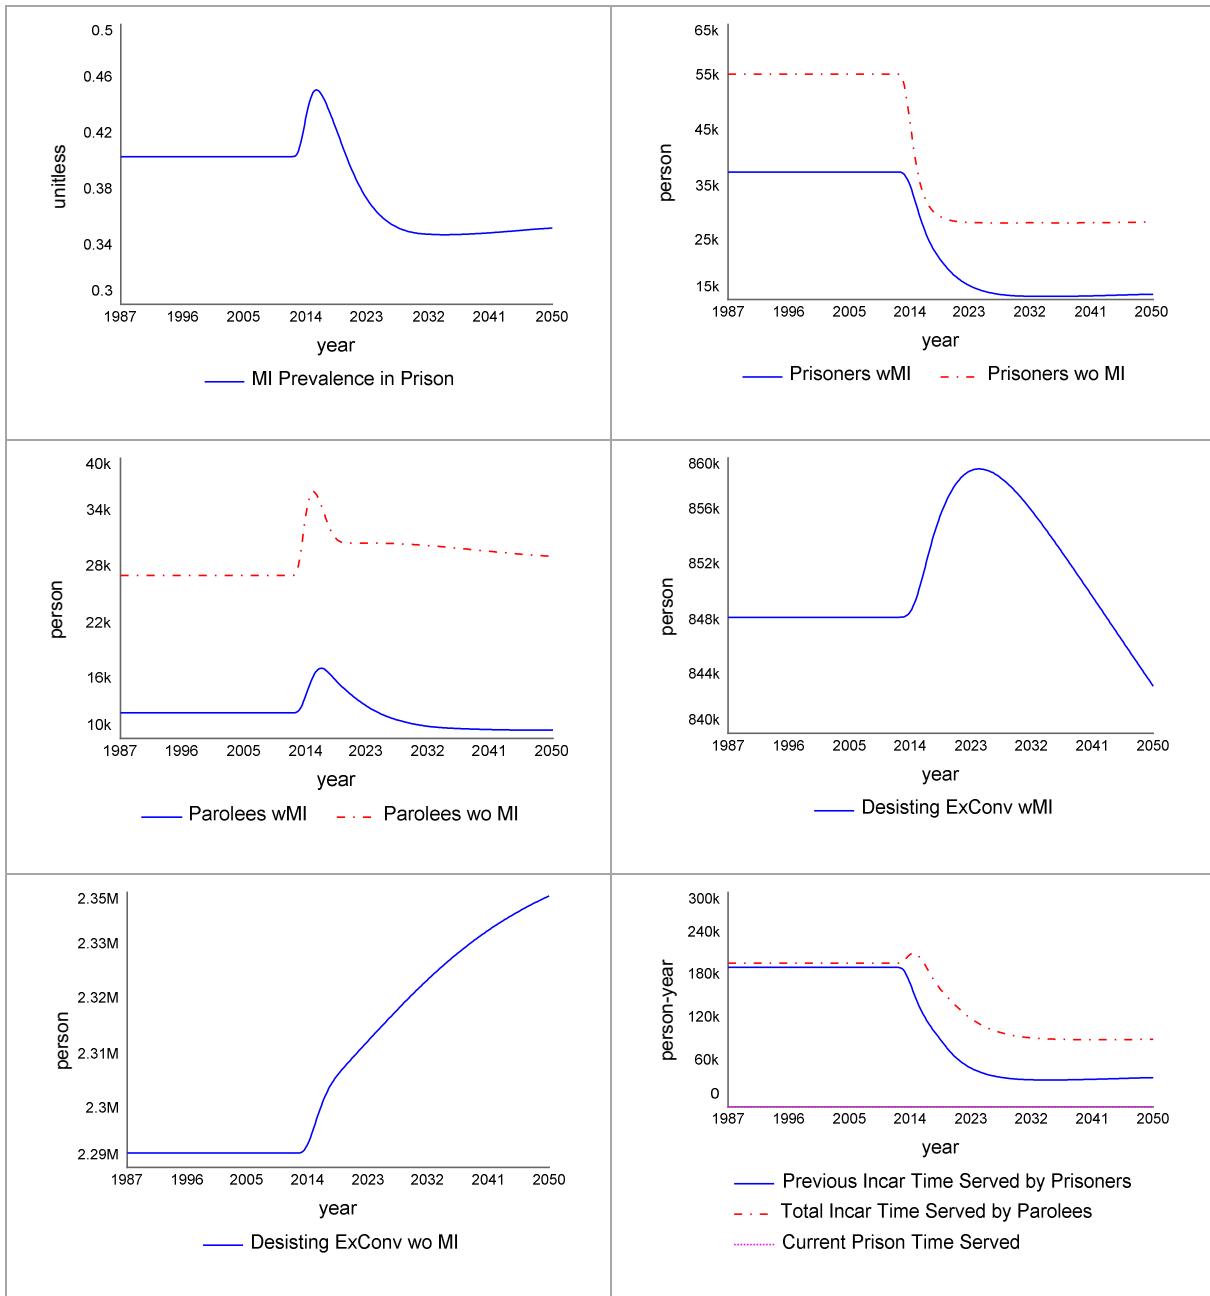

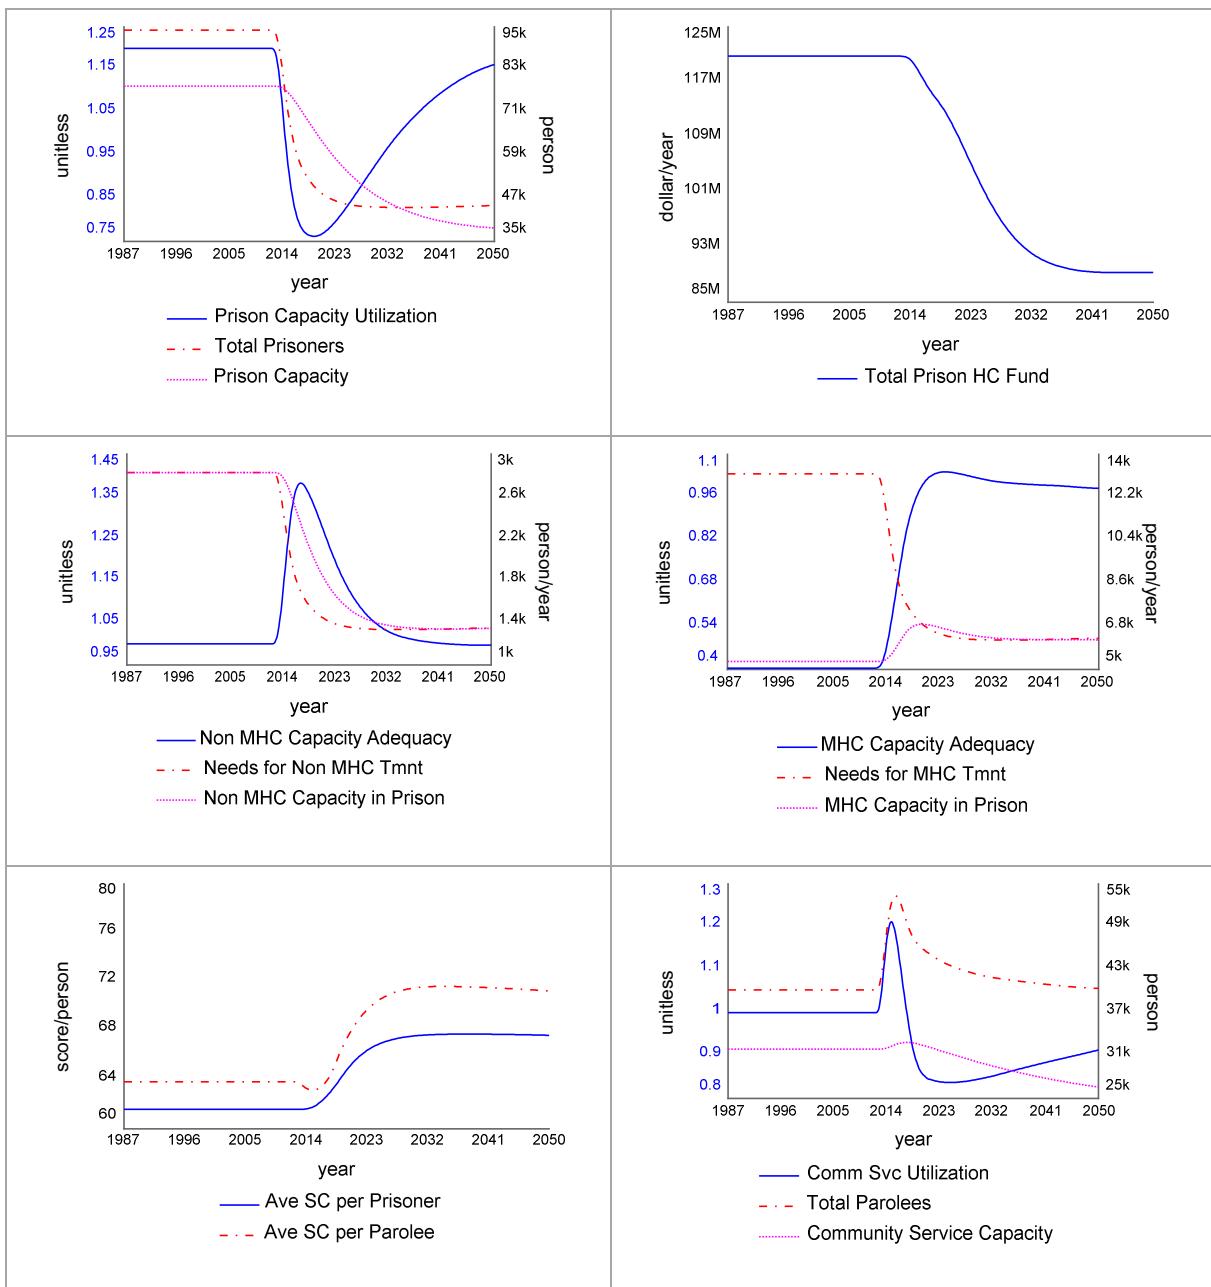

Extreme Condition Test 4 – Decrease Average Prison Year Served by 50%

In this test, the “ave prison year served wMI” and “ave prison year served wo MI” are decreased by 50% from 2012 onwards.

Selected Results

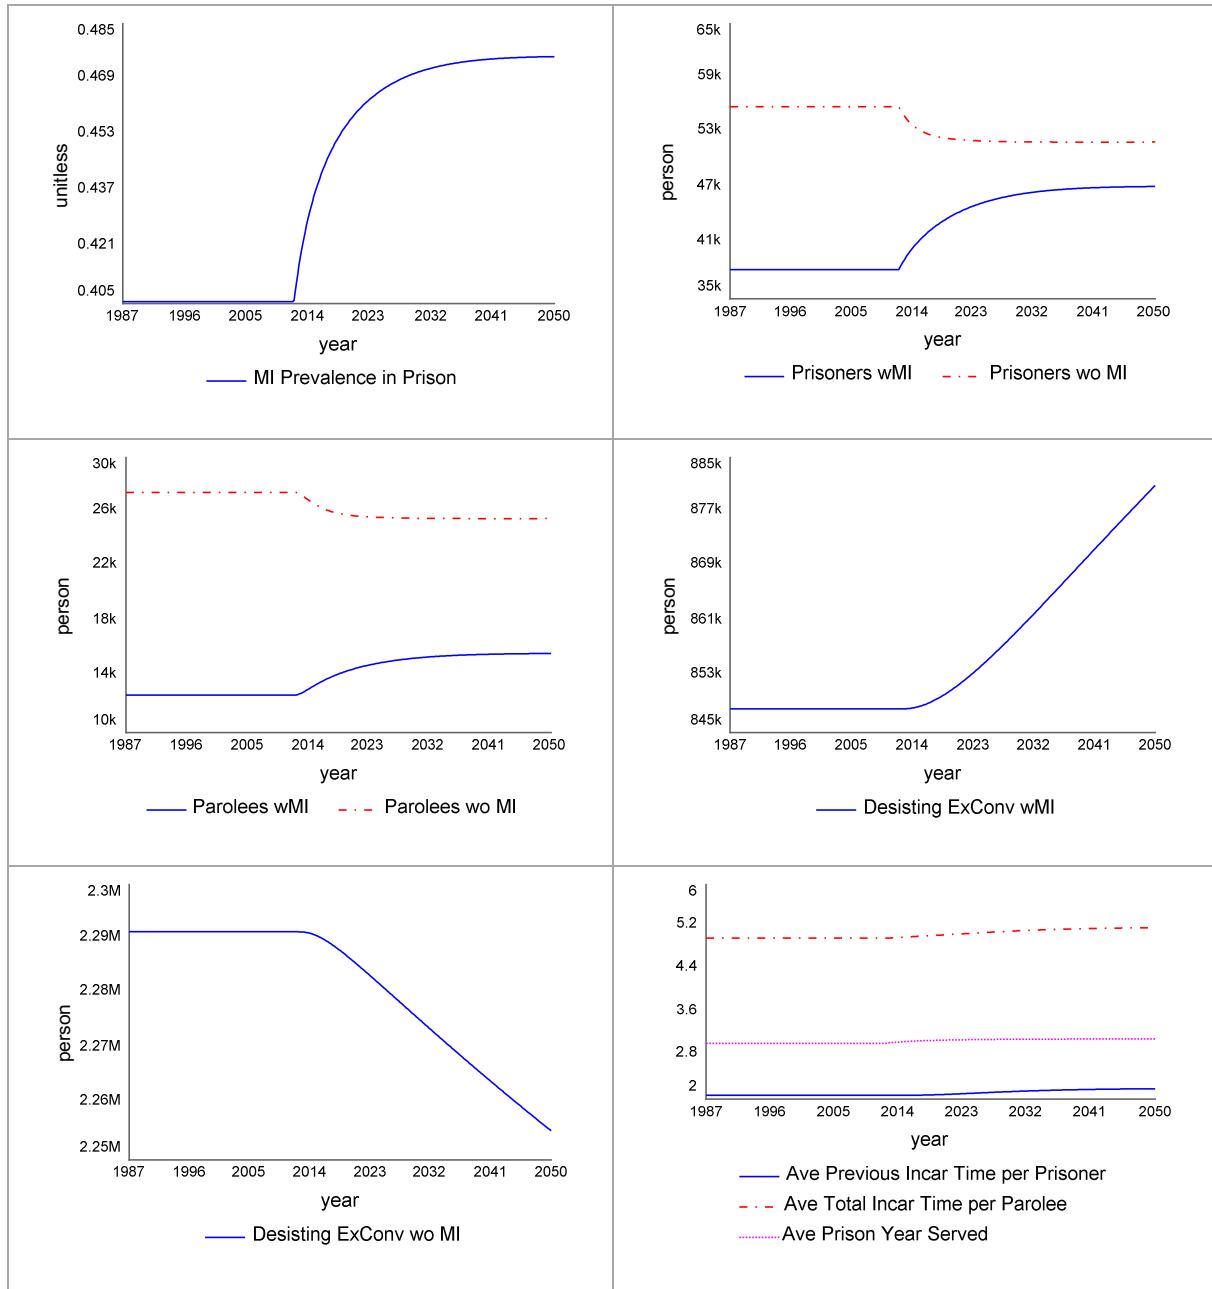

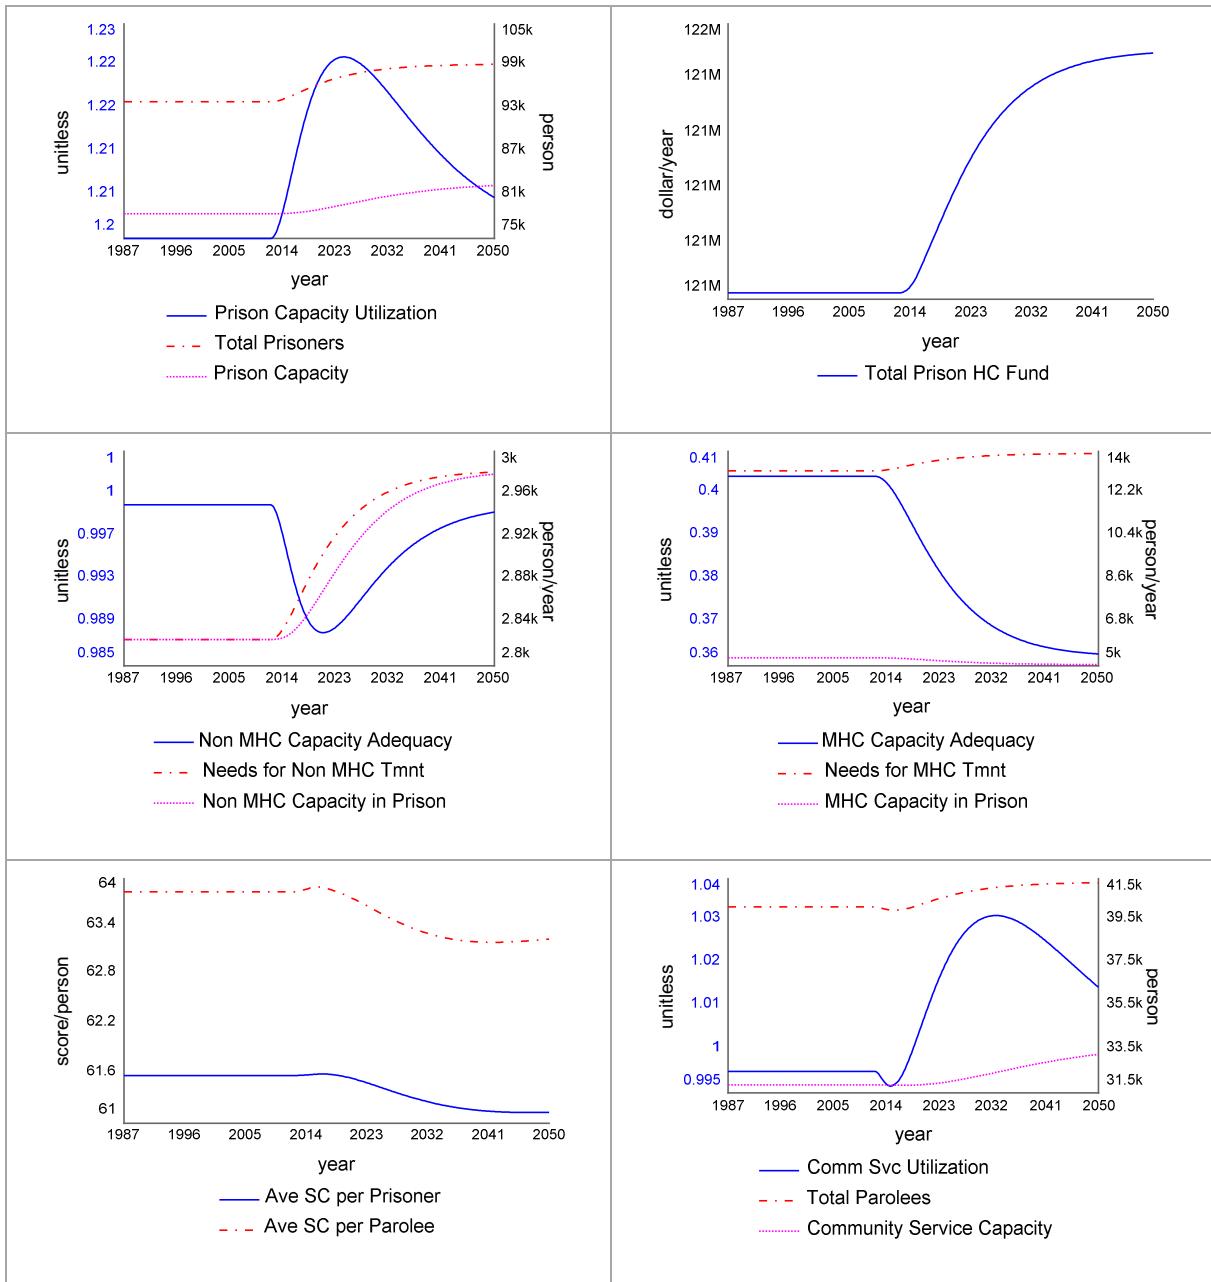

Extreme Condition Test 5 – Double the Fraction of Prisoners Develop MI

In this test, the “ref fract devMI” is increased from 0.01 to 0.02 per year from 2012 onwards.

Selected Results

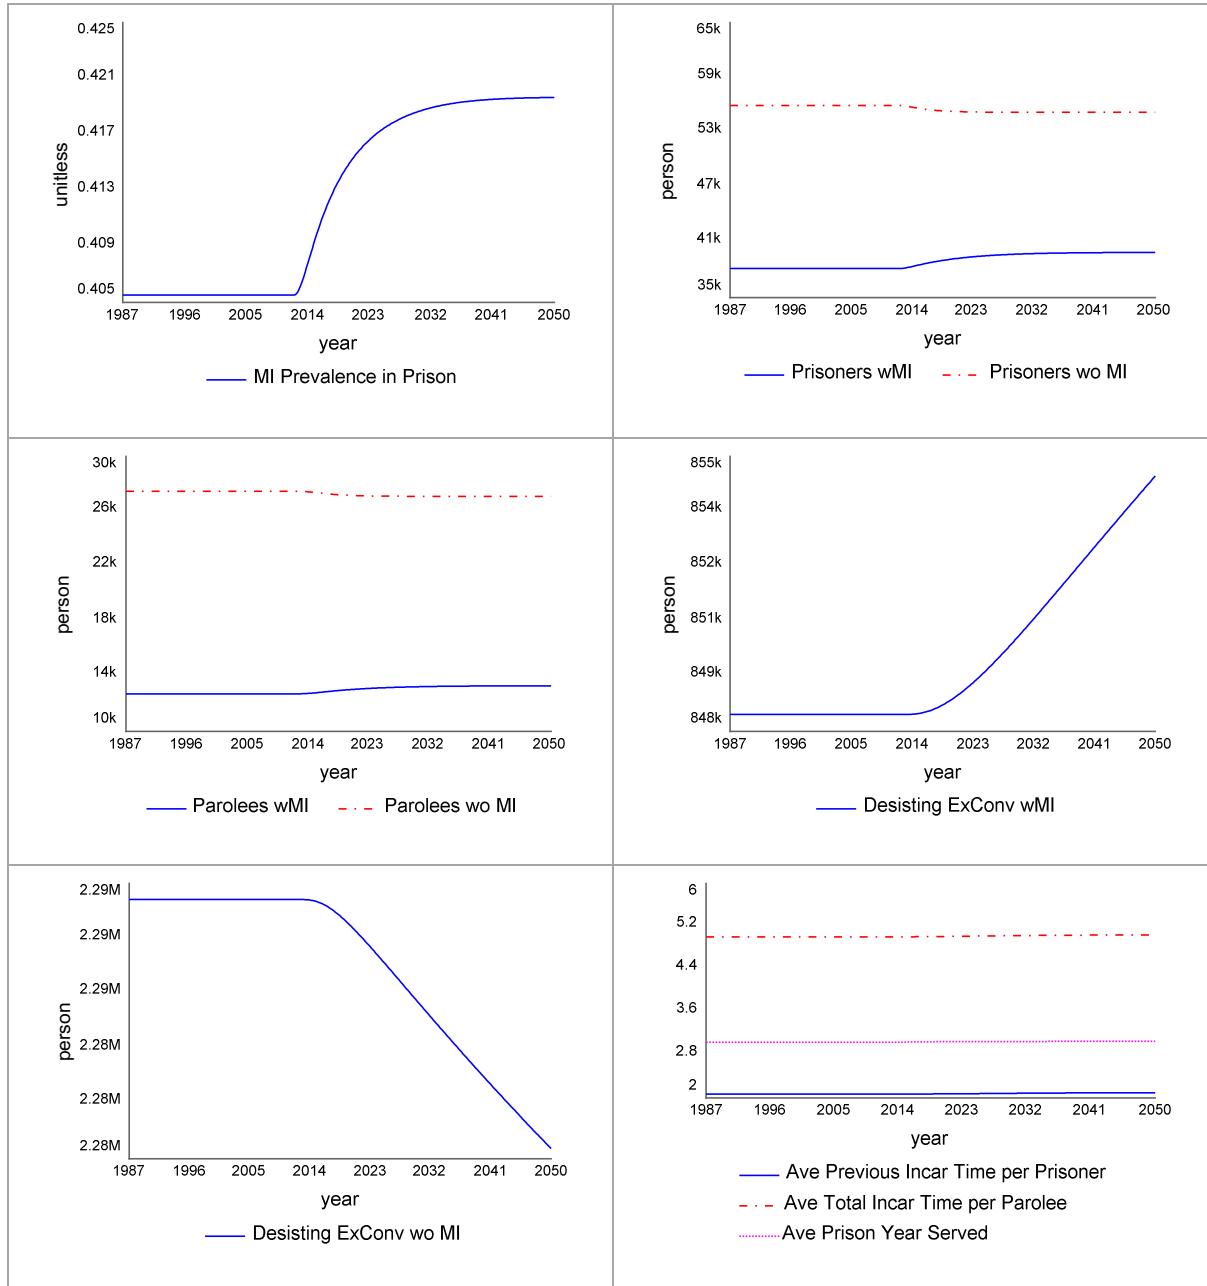

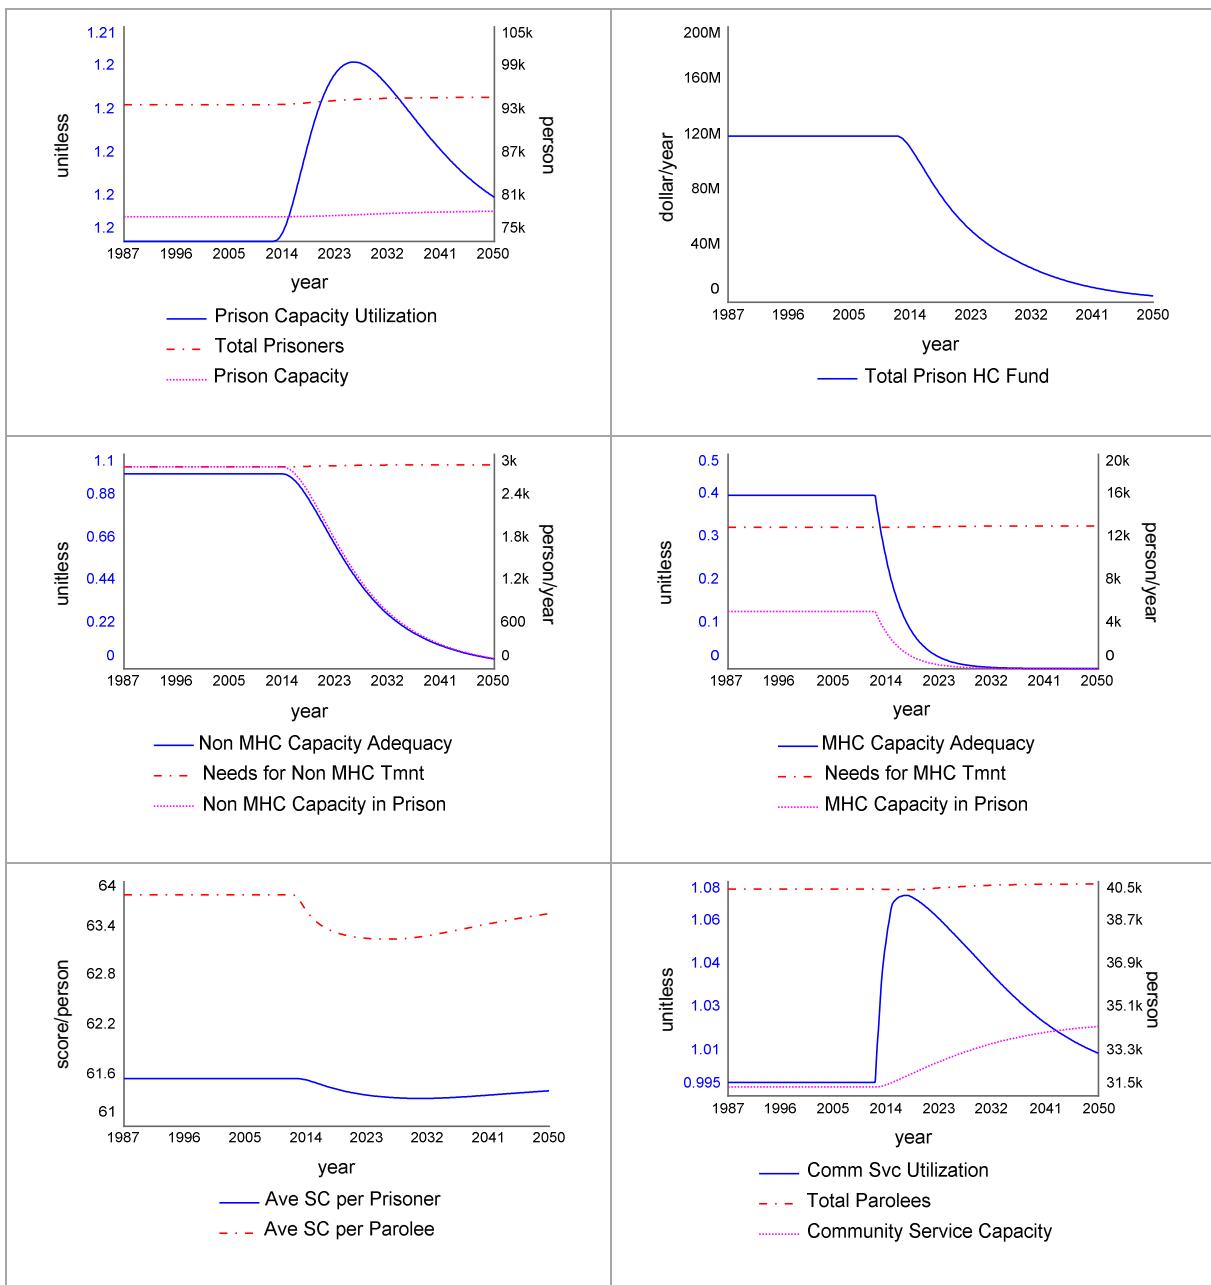

Extreme Condition Test 6 – Decrease Total Prison Health Care Budget by 50%

In this test, the Total Prison Health Care Budget reduces 50% from 2012 onwards. This modification will lead to only 50% fewer “funded non MHC capacity” and “funded MHC capacity” respectively.

Selected Results

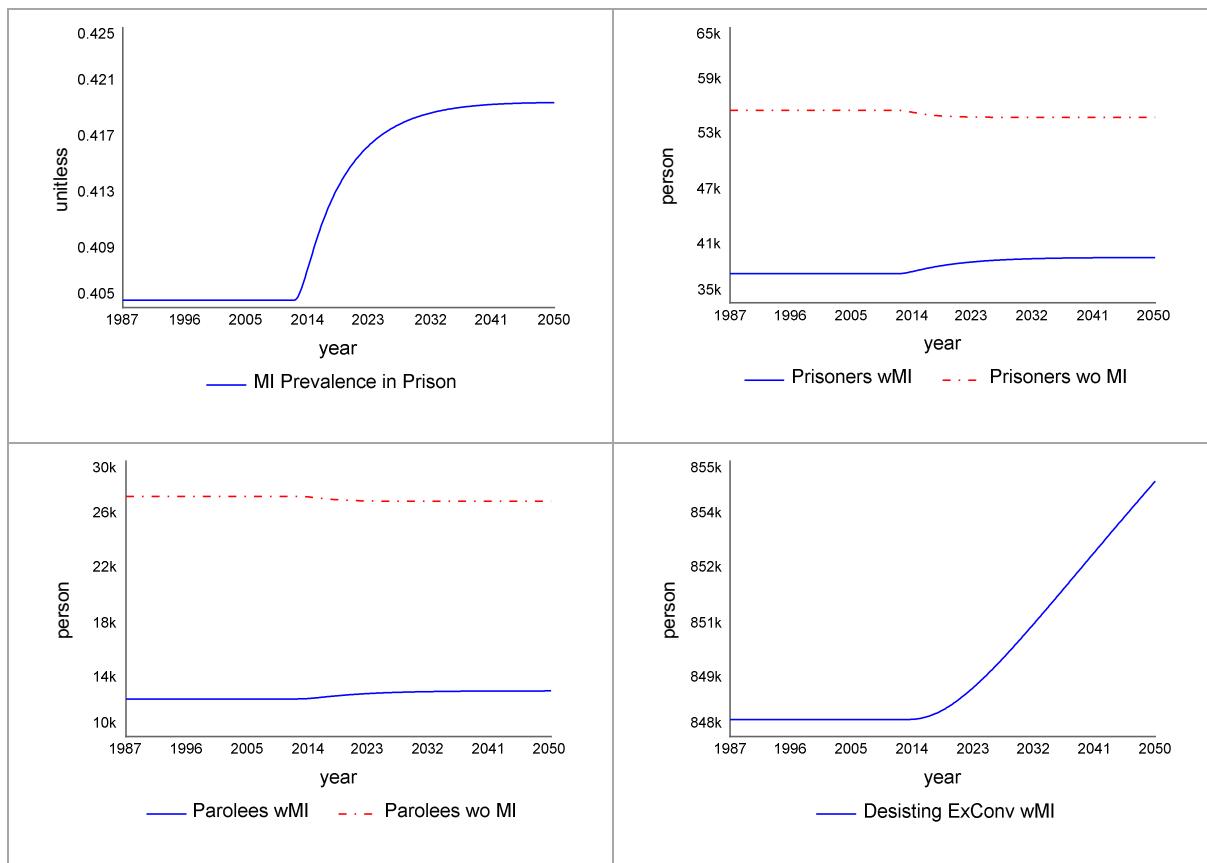

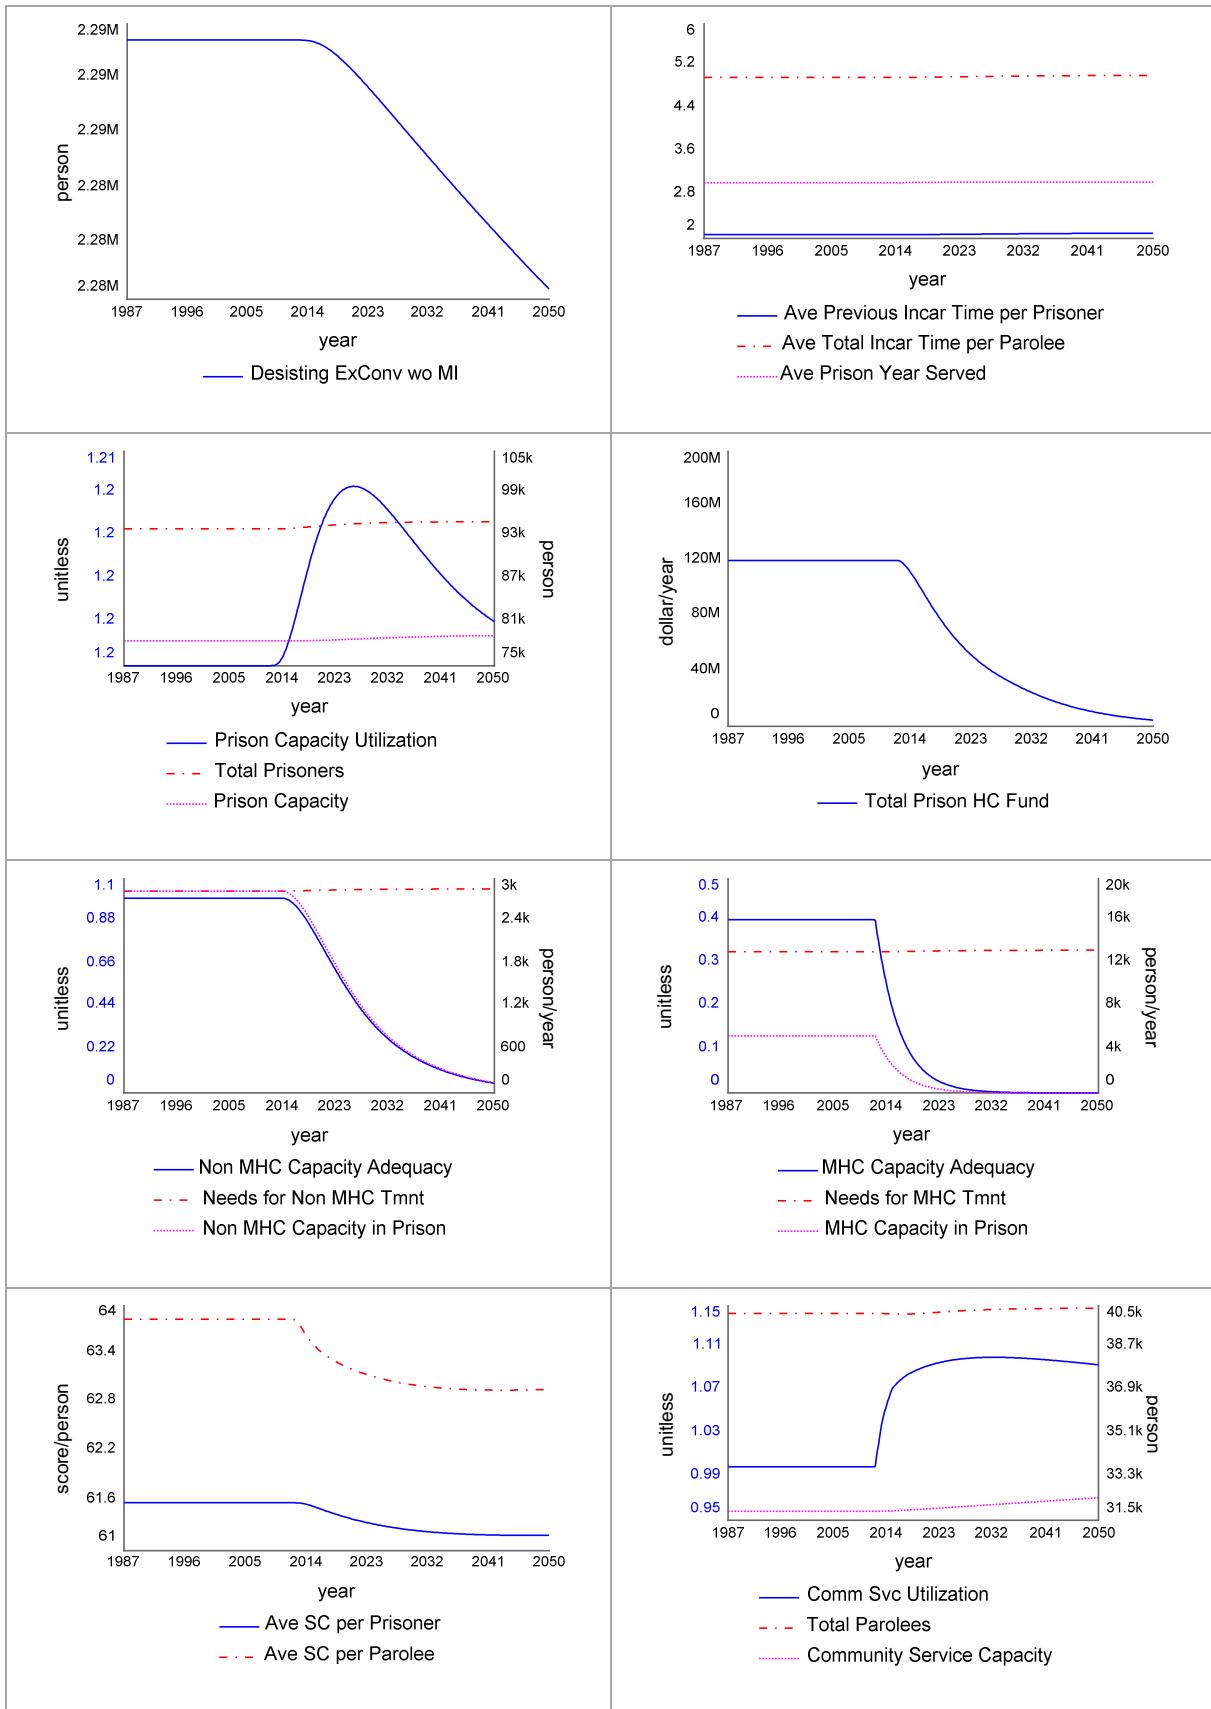

Extreme Condition Test 7 – Increase Community Service Capacity Adjustment Time to 200 Years

In this test, the “comm svc capacity adj time” increases from 20 years to 200 years from 2012 onwards. This modification will generate an outcome where the community service capacity responds to the needs for community service slowly due to the overly long adjustment time. However, when the system is in equilibrium, lengthening the capacity adjustment time has no effect on the system. The system has to be disturbed and affect the needs for community services. In such case, the gap for community services widens. Only when the community service capacity responds can we trace the impact of a slow community service capacity adjustment process. So, Test 7 is a continuation of Test 6 with an additional modification, i.e. a long community service capacity adjustment time.

Selected Results

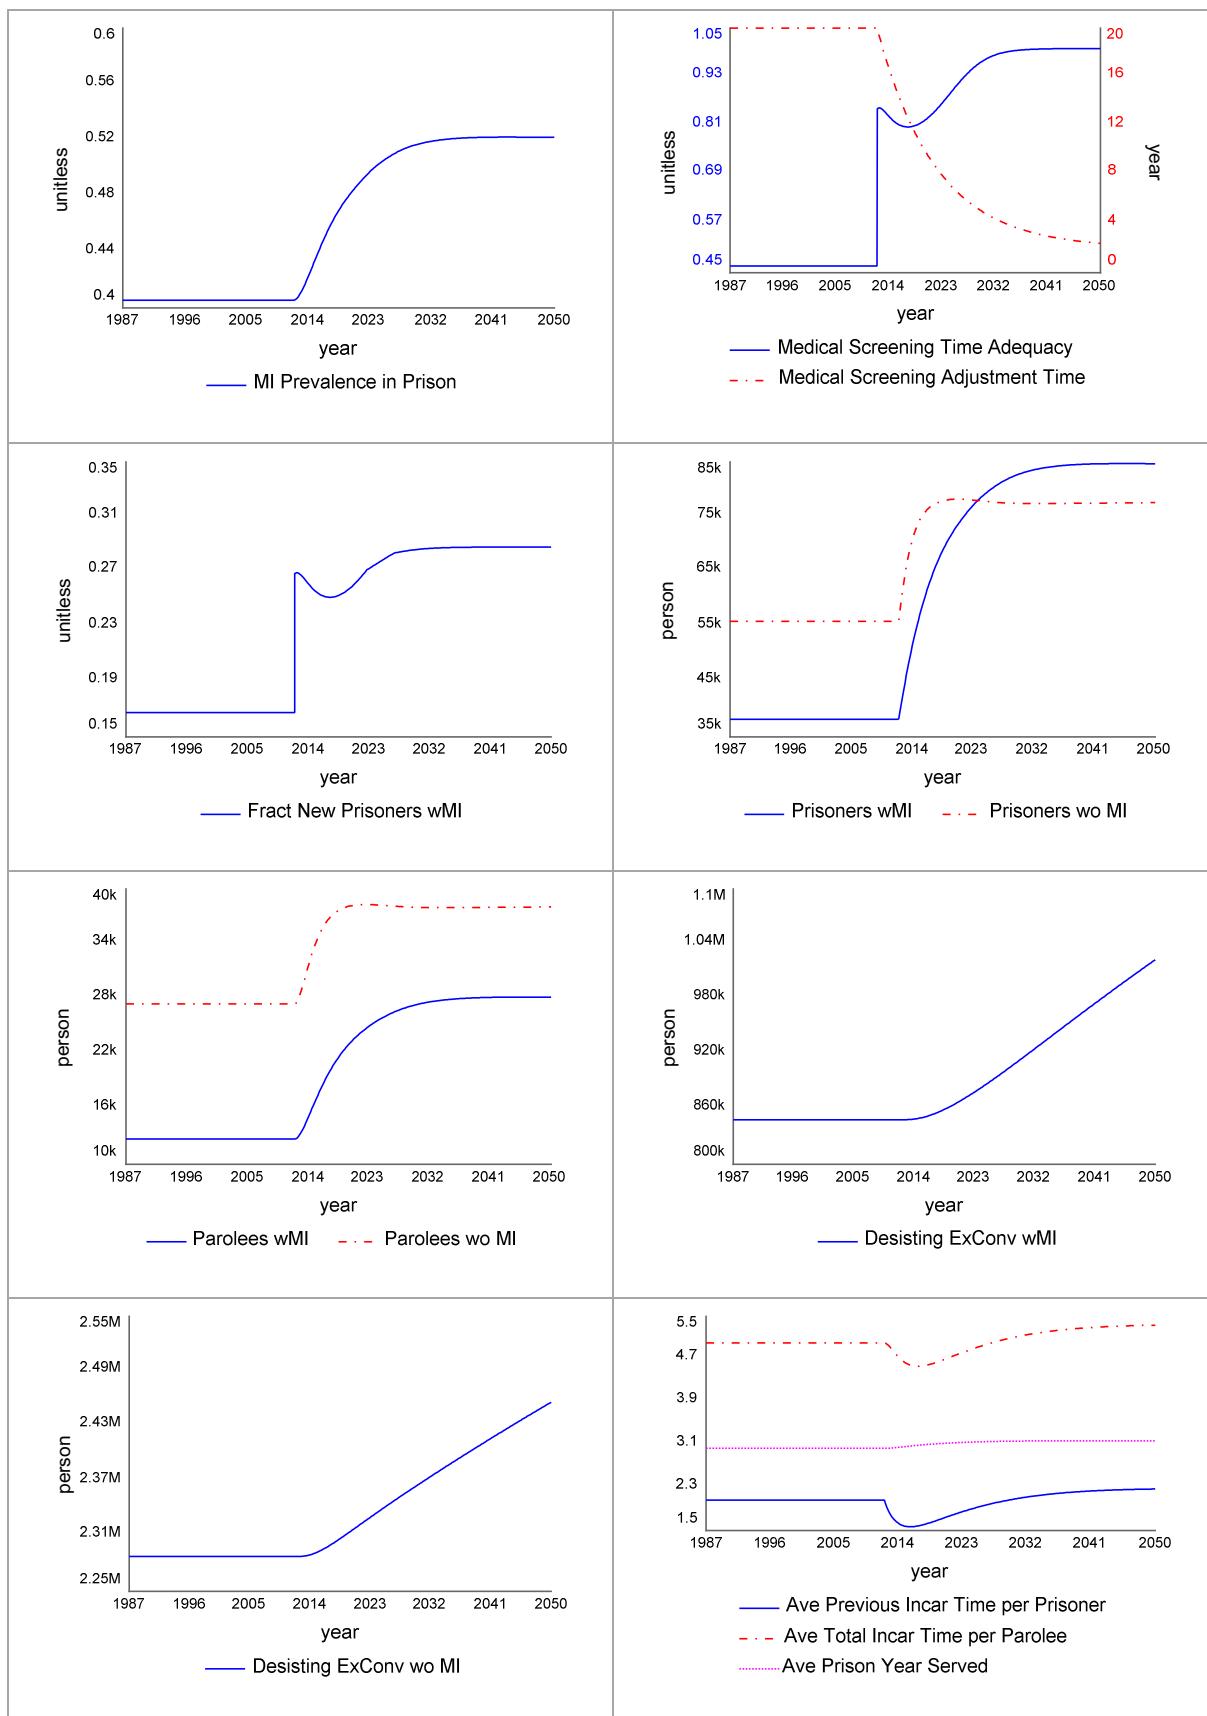

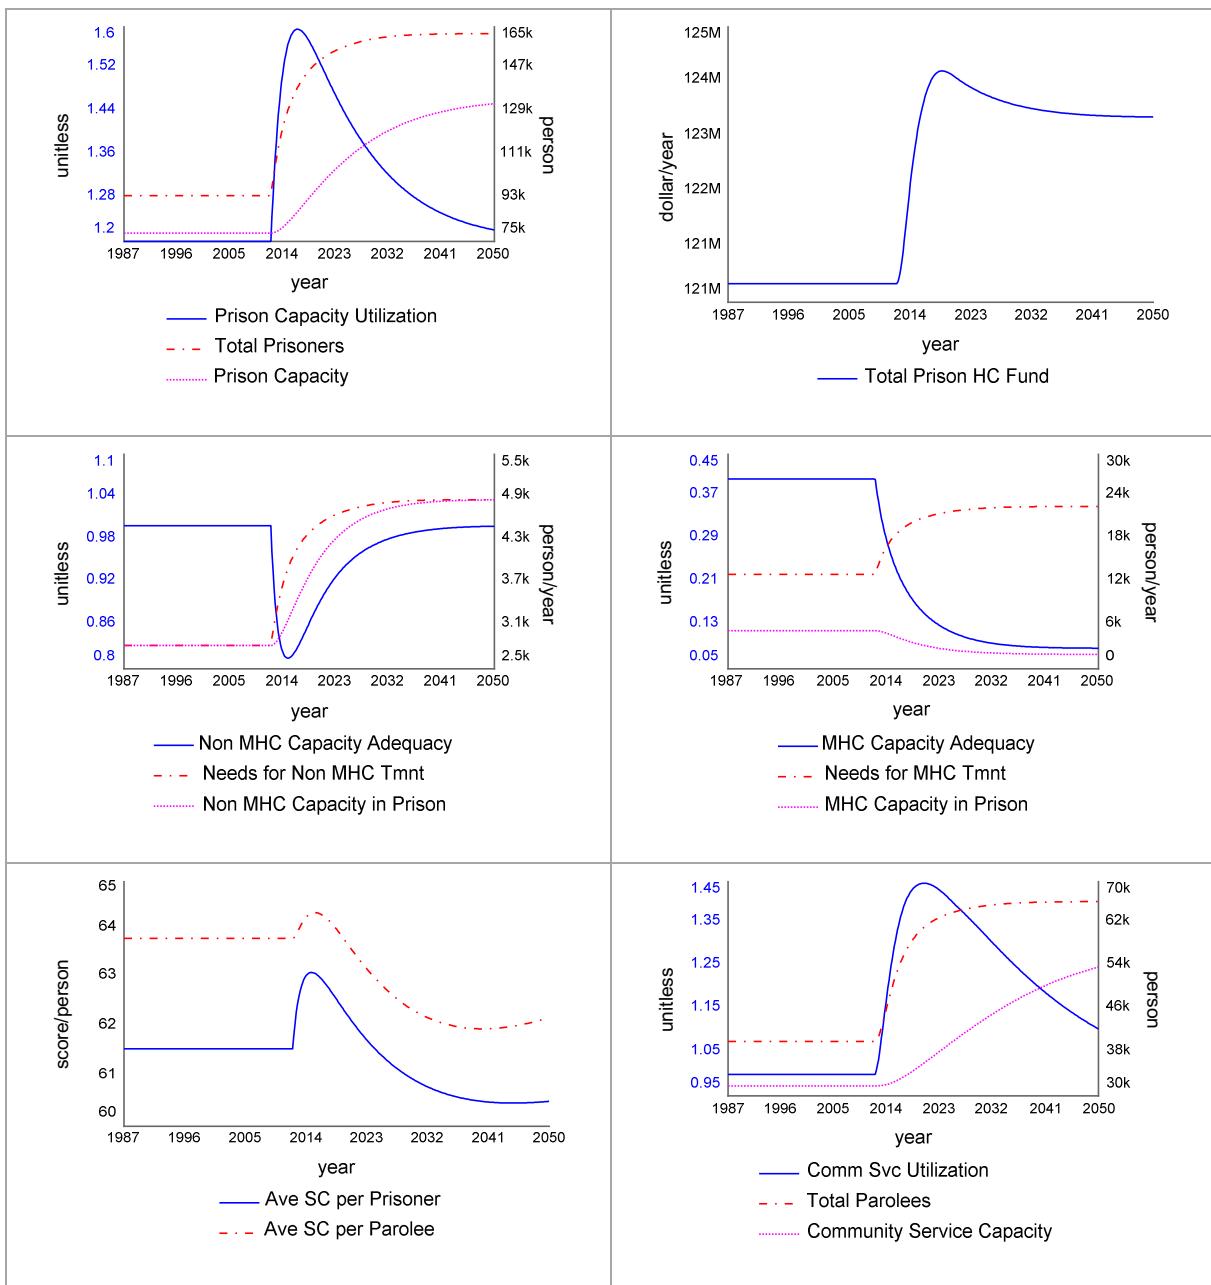

Extreme Condition Test 8 – Decrease the Adjustment Time for Building Medical Screening Capacity at Reception Center

In this test, the “time to adjust medical screening adj time” decreases from 20 years to 2 years starting from 2012. This modification will shorten the time to bring the medical screening capacity at the reception center up to the desired level at a faster rate. As in Test 7, this test requires a perturbation to system in order to have an impact. Thus, the “new prison admission” is increased by 100% in this test. The following modification are also needed for this test:

Equation in Parameters	
gap in medical screening adj time	$(init_medical_screening_adj_time - Medical_Screening_Adjustment_Time) * (1 - STEP (1, 2012)) +$ $(desired_adj_time_for_medical_screening_adj_time - Medical_Screening_Adjustment_Time) * (0 + STEP (1, 2012))$
actual medical screening time at reception center	$INIT(SMTH3(desired_MH_screening_capacity, Medical_Screening_Adjustment_Time, init_total_medical_screening_time_at_reception_center)) * (1 - STEP (1, 2012)) +$ $((SMTH3(desired_MH_screening_capacity, Medical_Screening_Adjustment_Time, init_total_medical_screening_time_at_reception_center)) * (0 + STEP (1, 2012)))$

DOCUMENT: According to "Three-Judge Court: Opinion and Order" (August 2009) on p. 34:

"Over the next eight years, as part of its ongoing effort to ensure that California hires and retains sufficient clinical staff, the court issued several orders concerning recruitment and retention bonuses, as well as salary increases for mental health clinicians."

Hence, we set the delay in medical screening at the reception centers to be 8 yrs.

DOCUMENT: 60,802 average daily population in jails in 1987

I treat the "unconvicted inmates" as suspects and convicted probationers who are in transit to start their sentences. In 1987, there were 150101 unconvicted inmates (Jail Profile 1987). According to BJS Probation and Parole 1987, the inflow to probation in 1987 was 139110. So, I assume that 139110 probationers stayed in the "Convicted Jail Offenders". The jail conviction (an inflow to jail) was 13476 in 1996. In the absence of any prior available data, I assume the inflow to jail for 1987 was around this figure. The maths goes like this: 150101 - 139110 = 10991 (those convicted to jail sentence)

A second calculation:

The Jail Profile states that there are 28,528 unconvicted ADP.

The distribution among the unconvicted suspect stocks is as the following:

Arrestees - 17,876

Suspects in Custody - 261

Suspects in Custody with Cases Filed - 256

Defendants in Custody Being Tried - 12.9

PreSentencing Convicts in Custody - 3,550

PreSentencing Convicts fr Comm in Custody - 6,290

DOCUMENT: "Parolees with Mental Disorder: Toward Evidence-Based Practice" (Louden & Skeem, 2011)

20.4% of parolees in their sample were identified as having a mental disorder, either by their mental health designation or diagnosis. Estimates from other studies indicated 14.5% and 30% of men and women in prisons have serious mental disorder.

In CA, mental disorder classification is based on functioning impairment and symptoms.

UNITS: unitless

DOCUMENT: This is an exogenous input. When the War on Drug policy was launched, the law enforcement agencies were more aggressive in prosecuting drug-related offenses. So the fraction of return-to-prison rate due to parole violation hiked drastically in the beginning of the simulation. The effect gradually wore off as federal resources was directed away after several years.

DOCUMENT: "Public Safety Realignment--What is it.pdf" (CPOC, 2012)

Between Nov 2011 - 2012, 23,000 parolees were transferred to county supervision.

There were 119941 prisoners being released to parole in 2010 (because the reported data for parolee was for Dec 2011, so it may not be accurate to use the Dec data after Realignment initiated in November)

23000/119941 = 0.2

But, under the Act, prisoners wMI will not be released to parole under county supervision. This only refers to prisoners who have severe MI that require treatment at the Dept of State Hospitals ("Felony Sentencing After Realignment.pdf"). So prisoners wMI who are do not have SMI will still be transferred to county parole supervision.

The Scarlett Carp Report published at the request of California state government in 1992 for the Coleman v. Wilson lawsuit discloses the prevalence of severe MI was about 10%.

Thus, the fraction of 0.2 will be reduced to 0.18 for prisoners wMI.

UNITS: dollar/year

DOCUMENT: The estimated initial value seems overly high. With the estimated initial value, MHC capacity adequacy should have exceed one in the beginning of the simulation. Given the reported severe shortage in MHC capacity, the initial value is tested with a range of fraction lower than 0.5. With 0.5 of the estimated initial value, MHC capacity adequacy still exceeds one. So we test 0.4 and 0.3 of estimated initial value. Then MHC capacity adequacy is lower than one. Considering the lack of data in 1987 and the reported shortage, we set the initial value for Total Prison HC Budget as 0.3 of the estimated initial value.

The Correctional Health Care Services Budget for 2000 was \$714,470,631. Factoring in the 6 - 7% prison medical expenditure growth and back trace the budget to 1987, we obtain \$31,962,922.

DOCUMENT: Analysis of the 2000-01 Budget Bill-Linking Mentally Ill Offenders To Community Care.pdf

In 1994, there were 285,105 former jail inmates being supervised by county probation departments and the cost of probation in 1993-94 was \$811 million. That works out to an annual per capita cost of \$2,845. Under the 7.2 percent scenario, the cost of supervising mentally ill probationers would have been \$58.4 million. Under the 9.8 percent estimate (the CA figure), the cost would have been \$79.5 million. At 15 percent the cost would be \$122 million.

$\$58400000 / (285105 * 0.072) \text{ person} = \2845 per person

$\$79500000 / (285105 * 0.098) \text{ person} = \2845 per person

So, if a parolee wMI is supervised by the community, the cost per person will be lower than being supervised by the state authority, which costs about \$4200/person/year.

Fraction of comm service costs for parolee wMI under local supervision is $2845 / 4200 = 0.68$

$\text{comm_svc_cost_per_county_parolee_wo_MI} = (1 - \text{Individuals_with_Criminal_History.realignment_policy}) * \text{init_comm_svcs_cost_per_county_parolee} + \text{Individuals_with_Criminal_History.realignment_policy} * (\text{comm_svc_cost_per_prison_parolee_wo_MI} * \text{fract_comm_cost_per_county_parole})$

DOCUMENT: "Follow the Money: How California Counties Are Spending Their Public Safety Realignment Funds" (Lin & Petersilia, 2014)

"To help local governments shoulder the costs of housing and supervising this new stream of offenders, the state has allocated \$2 billion through 2013-2014 and anticipates

distributing \$4.4 billion to the counties by 2016-2017"

So I laid out the fund distribution as the following:

$$2013 - \$2,000,000,000 / 4 = \$1,100,000,000$$

$$2014 - \$4,400,000,000 / 4 = \$1,100,000,000$$

$$2015 - \$4,400,000,000 / 4 = \$1,100,000,000$$

2016 - \$4,400,000,000 / 4 = \$1,100,000,000

2017 - \$4,400,000,000 / 4 = \$1,100,000,000

DOCUMENT: Analysis of the 2000-01 Budget Bill-Linking Mentally Ill Offenders To Community Care.pdf

In 1994, there were 285,105 former jail inmates being supervised by county probation departments and the cost of probation in 1993-94 was \$811 million. That works out to an annual per capita cost of \$2,845. Under the 7.2 percent scenario, the cost of supervising mentally ill probationers would have been \$58.4 million. Under the 9.8 percent estimate (the CA figure), the cost would have been \$79.5 million. At 15 percent the cost would be \$122 million.

$$\$58400000 / 285105 * 0.072 \text{ person} = \$2845 \text{ per person}$$

$$\$79500000 / (285105 * 0.098) \text{ person} = \$2845 \text{ per person}$$

So, if a parolee wMI is supervised by the community, the cost per person will be lower than being supervised by the state authority, which costs about \$4200/person/year.

$$\text{Fraction of comm service costs for parolee wMI under local supervision } 2845 / 4200 = 0.68$$

DOCUMENT: Do Local Realignment Policy Affect Recividism in CA.pdf

(Bird & Grattet, 2014)

- Programs and services expenditures varied from zero to 84 percent of total realignment funding. The median was 18 percent. Half the counties directed between 8 and 33 percent to the category.

- For law enforcement, the median expenditure was zero, meaning that at least half the counties did not allocate any money for this category. The highest law enforcement allocation was 23 percent.

- Jail bed expenditures ranged from zero to 70 percent. Half the counties directed from zero to 19 percent to expanding jail capacity.

- Expenditures in the sheriff category ranged from zero to 72 percent, with a median of 17 percent. Half the counties directed between 7 and 30 percent to the sheriff's office.

- Probation expenditures varied the most, ranging from zero to 86 percent, with a median of 27 percent. Half the probation budgets were between 20 and 38 percent.

ref_comm_svc_cost_per_parolee_wMI = 18600

DOCUMENT: Do Local Realignment Policy Affect Recidivism in CA.pdf

(Bird & Grattet, 2014)

Enforcement-focused plans

56.1% (Budget allocation to sheriffs, jails, and law enforcement)

8.0 (Number of reentry services)

19 (Number of Counties)

Reentry-focused plans

15.3% (Budget allocation to sheriffs, jails, and law enforcement)

8.6 (Number of reentry services)

24 (Number of Counties)

Average/Total

33.4% (Budget allocation to sheriffs, jails, and law enforcement)

8.4 (Number of reentry services)

43 (Number of Counties)

19 out of 43 counties spent more on enforcement. So this leads to about 45%. The reentry-focus counties is about 55%.

Glossary—United States Criminal Justice System and Court

A

Acquittal	A judgment of a court, based either on the verdict of a jury or a judicial officer, that the defendant is not guilty of the offense(s) for which he or she was tried.
Adjudication	The formal hearing and settling of a case by judicial procedure.
Adult	A person 18 years of age or older.
Arraignment	A proceeding in which a criminal defendant is brought into court, told of the charges in an indictment or information, and asked to plead guilty or not guilty.
Arrest	"...taking a person into custody, in a case and in the manner authorized by law. An arrest may be made by a peace officer or by a private person" (California Penal Code section 834).
Arrest Rate	The number of arrests per 100,000 population.
Average Daily Jail Population (ADP)	The average number of inmates housed in a local facility per day. The number includes inmates housed in single cells, double cells, dormitories (multiple occupancy cells), disabled housing, disciplinary segregation, and administrative segregation.

B

Bail	The release, prior to trial, of a person accused of a crime, under specified conditions designed to assure that person's appearance in court when required. Also can refer to the amount of bond money posted as a financial condition of pretrial release.
------	---

C

California Department of Corrections and Rehabilitation (CDCR)	The state agency that operates all state adult prisons and juvenile facilities, oversees a variety of community correctional facilities and other important correctional facility responsibilities, and supervises all adult and juvenile parolees during their reentry into society
Caseload	The total number of clients or cases on probation or under supervision with a given agency.
Charge	A formal allegation that a specific person has committed a specific offense.
Class Action	A lawsuit in which one or more members of a large group, or class, of individuals or other entities sue on behalf of the entire class. The district court must find that the claims of the class members contain questions of law or fact in common before the lawsuit can proceed as a class action.

Classification	Process through which the educational, vocation, treatment, and security needs of an offender are determined.
Complaint	A verified written accusation, filed by a prosecuting attorney with a local criminal court, which charges one or more persons with the commission of one or more offenses.
Convict	An offender who has been sentenced or a person found guilty of a criminal offense and serving a sentence of imprisonment.
Conviction	A judgment, based either on the verdict of a jury or a judicial officer or on the guilty plea of the defendant, that the defendant is guilty.
Correctional Facility	Facility for the incarceration of individuals accused or convicted of criminal activity. A correctional facility must have a separate perimeter that precludes the regular co-mingling of the inmates from other facilities.
Corrections	Those agencies or facilities concerned with the custody, confinement, supervision, or treatment of alleged or adjudicated offenders.
Court	An agency of the judicial branch of government authorized or established by statute or constitution, having one or more judicial officers on its staff. A court has the authority to decide upon controversies in law and disputed matters of fact brought before it. Because of court consolidation there is no longer a distinction between lower court and superior court.
Crime	". . . an act committed or omitted in violation of a law forbidding or commanding it. . ." (California Penal Code section 15).
Crime Rate	A measure of how much crime is known about for any given region or population, calculated by adding up all of the criminal incidents that have been reported to the police and dividing by the population (i.e. per every 100,000 persons). Because it does not include information about any crimes that were not reported, the crime rate is only one indicator of how much crime really occurs.
Criminal Commitment	Type of commitment that results when a defendant is sentenced to an adult prison or juvenile facility overseen by the California Department of Corrections and Rehabilitation.

D

Defendant	A person against whom a criminal proceeding is pending
Deferred Parole Revocation	Action taken by a prosecutor to revoke the parole status of an offender to return the subject to state prison in lieu of filing new charges.
Desistance	The process of permanent abstention from criminal activity.
Desisting Ex-convict	An ex-convict who permanently cease criminal activity.
Dismissal	A decision by a judicial officer to terminate a case without a determination of guilt or innocence.

Disposition – Court	An action taken as the result of an appearance in court by a defendant. Examples are: adults – dismissed, acquitted, or convicted and sentenced; juveniles – dismissed, transferred, remanded to adult court, placed on probation, or sentenced to a CDCR youth facility.
Disposition – Law Enforcement	An action taken as the result of an arrest. Examples of police dispositions are: adults - released by law enforcement, referred to another jurisdiction, or a misdemeanor or felony complaint sought; juveniles - handled within the department, referred to another agency, or referred to the probation department or juvenile court.
Disposition – Prosecutor	An action taken as the result of complaints requested by the arresting agency. Dispositions include granting a misdemeanor or a felony complaint, or denying a complaint for such reasons as lack of corpus, lack of sufficient evidence, interest of justice, complainant refuses to testify, witness unavailable, inadmissible search, deferred parole revocation, prefiling deferral, and other.
Diversion	a disposition of a criminal defendant either before adjudication or following adjudication but prior to sentencing, in which the court directs the defendant to participate in a work, educational, or rehabilitation program.

E, F, G, H, I

Ex-convict	A former convict.
Felon	A person who has committed felony.
Felony	A crime which is punishable by death or imprisonment in state penal institutions.
Filing	A document filed with the court clerk by a prosecuting attorney alleging that a person committed or attempted to commit a crime.
Guilty Plea	A defendant's formal answer in open court to charges in a complaint, indictment, or information stating that the charges are true and that he or she has committed the offense(s) as charged.
Halfway House	A residential setting within the community that is staffed by professional workers who support offenders released on parole with the process of returning to the community.
Inmate	Someone confined to an institution such as hospital or prison. In this study, “inmate” refers to an individual who are incarcerated.
Inmate	A person confined to an institution such as a prison or hospital.
Institution Population	

J, L, M, O

Jail	A county or city facility for incarceration of sentenced and unsentenced persons. See Type I, II, III, and IV Facilities.
------	---

Lawsuit	A legal action started by a plaintiff
Local Supervision	Local correctional agencies provide confinement, rehabilitation, and probation services for those sentenced to their care and also
Mental Health Treatment	Special condition the court imposes to require an individual to undergo evaluation and treatment for a mental disorder. Treatment may include psychiatric, psychological, and sex offense-specific evaluations, inpatient or outpatient counselling, and medication
Misdemeanor	Crime punishable by imprisonment in a county jail for up to one year.
Offender	An individual who have committed crime.
Offense	The charged offense is the crime for which the defendant was arrested or filed on by the district attorney. The convicted offense is the offense the defendant was convicted of or pleaded guilty to in court. The sustained offense is the offense for which the juvenile court sustains a petition.

P

Parole	A period of supervision in the community following completion of a prison sentence. The conditional release provides supervision and control over offenders after they return to society.
Parole	an added period of control following release from prison (California Penal Code section 3000(a)).
Parole Release	The release of an inmate to the jurisdiction of the Parole and Community Services Division. This includes both first paroles and reparoles.
Parole Violation	Violation of one or more of the conditions of parole or an illegal act for which parole is revoked rather than proceeding with criminal prosecution. See Deferred Parole Revocation.
Parole Violators Returned to Custody (PV-RTC)	A parolee who has violated the terms of parole, been revoked by the Board of Prison Terms (BPT), and returned to prison for a term up to twelve months.
Parole Violators with New Term (PV-WNT)	A parolee who has violated the terms of parole by committing a new crime and has been returned to prison with a new commitment from court.
Plaintiff	A person or business that files a formal complaint with the court.
Plea	In a criminal case, the defendant's statement pleading "guilty" or "not guilty" in answer to the charges.
Population-at-risk	That portion of the total population who, because of like characteristics to the specific study group, are considered "at risk." For example, if one

were studying juvenile arrestees, all persons between 10 and 17 years of age would constitute the at-risk population.

Prison	A state correctional facility where persons are confined following conviction for a felony offense.
Prisoner	A person deprived of liberty and kept under involuntary restraint, confinement, or custody; especially: one on trial or in prison
Probation	A judicial requirement that a person fulfill certain conditions of behavior in lieu of a sentence to confinement. See Straight Probation.
Probation Officer	Officers of probation office of a court. Probation officer duties include conducting presentence investigations, preparing presentence reports on convicted defendants, and supervising released defendants.
Probation with Jail	A type of disposition given upon conviction that imposes a jail term as a condition of probation.
Prosecutor	An attorney employed by a governmental agency whose official duty is to initiate and maintain criminal proceedings on behalf of the government against persons accused of committing criminal offenses.
Punishment	Penalty imposed for wrongdoing; punishment varies by type of crime committed

R

Recidivism	Relapsing into criminal behavior after treatment and/or sentencing within the criminal justice system. Most simply, it can be thought of as "reoffending". An offender who reoffends after being released from a correctional service is said to have "recidivate". In this study, recidivism rate refers to the number of prisoners released in a particular time who are rearrested, reconvicted, and resentenced.
Reentry	Programs or activities aims to assist individuals who have been incarcerated to return to the society and live as law-abiding citizens.
Rehabilitation	The treatment of offenders in order to prevent future criminal activity; a planned intervention that targets some aspect about the offender that is thought to cause the offender's criminality (e.g. attitude, cognitive processes, social relationships, and employment); the process whereby a person recognizes that his or her behavior was wrong, fully understands why it was wrong, and decides not to behave that way in the future.
Reintegrate	Returning offenders to society as law-abiding and productive citizen
Reintegration	The process whereby a person lives in the community in a law-abiding manner and maintains his or her decision not to continue with the past destructive behavior.
Revocation	Cancellation or suspension of parole or probation.

Revoke To withdraw, repeal, or cancel probation or parole for an adult.

S

Sentence	The penalty imposed by a court upon a convicted person.
Sentence	The punishment ordered by the court for a defendant convicted of crime.
Social Control	Informal influences (e.g. disapproving frown from parent) and formal influences (e.g. laws, regulations) on person's behavior.
State Institution	A facility for housing defendants who are under the jurisdiction of state correctional or treatment programs.
State Supervision	The state correctional system provides confinement, rehabilitation, and parole services. The principal provider of these services for adults is the California Department of Corrections and Rehabilitation (CDCR), which includes the California Rehabilitation Center (CRC). Based on special circumstances, some adult offenders are placed in the CDCR's youth facilities and the California Department of Mental Health.
Straight Probation	Probation granted to adults without condition or stipulation that the defendant serve time in jail as a condition of probation.

T, V

Type I Facility	A local detention facility used for detaining persons for not more than 96 hours after booking, excluding holidays. Type I facilities may also detain persons on a court order or for their own safekeeping, or sentence persons to a city jail as inmate workers. This facility may also house inmate workers sentenced to the county jail, provided such placement in the facility is made voluntarily by the inmate. An inmate worker is a person assigned to do designated tasks outside his or her cell or dormitory, pursuant to the written policy of the facility, for a minimum of four hours each day on a five-day scheduled workweek.
Type II Facility	A local detention facility for the detention of persons pending an arraignment, participating in a trial, or awaiting a sentence of commitment.
Type III Facility	Local detention facility used only for persons convicted and sentenced.
Type IV Facility	A local detention facility or portion of it designated for the housing of inmates eligible under Penal Code section 1208 for work/education furlough and/or other programs involving inmate access into the community.
Violent Crimes	Crimes committed against people. This category includes homicide, forcible rape, robbery, and aggravated assault.
Violent Offenses	Felony arrest offenses for crimes against people. This category includes homicide, forcible rape, robbery, assault, and kidnapping.
