## Gullög C. Nordquist:

## Appendix 3: SMALL FINDS AND THEIR FIND-SPOTS

This list includes the small finds from the temple and pronaos trenches which received a find number (F. no.) in the field, including a few items of pottery (mostly miniatures) which were also registered in this way. The objects are ranged by those numbers, which begin with the square and the stratigraphical unit where each object was found. Precise coordinates (x, E–W direction; y, N–S direction; z, level below the 0 level, the euthynteria surface of the Classical temple), in metres, are given for most of the objects; when no coordinates are given, the find appeared in the indicated stratigraphical unit, but the exact spot was not recorded. The size of the object is given (in centimetres), except in cases where it was very worn or consisted of several tiny pieces. Dimensions, identifications and descriptions were made in the field, and have not been revised afterwards; where they diverge from catalogue entries, the latter take precedence. References are given to the Tex numbers of the preliminary inventory and to the official inventory numbers of the museum protocol, when the object has been registered there (both also found in Appendix 2), and to the catalogues by Mary Voyatzis (here, section **vii**, and section **iii** for pottery, with cat. nos beginning with **C**), Leslie Hammond (cat. nos beginning with **C-Min** in section **v**, or, if not listed there, in *ead.*, *MVV*) or Hege Bakke-Alisøy (cat. nos beginning with **St**; in *Tegea* II, section **x**) if the object is included in those. For further information and discussions of the artefacts, see those sections.
