

Additional data file 5. Clinicopathological characteristics of ovarian cancer patients (“TCGA”). Patients are stratified into patients who did receive Cisplatin-based chemotherapy (n=26) or received Carboplatin (Carboplatin-Monotherapy or combination Carboplatin/Cisplatin; n=316).

Characteristics	n	Chemotherapy treatment		P
		Cisplatin (n = 26)	Carboplatin (n = 316)	
Age				0.535
≤ 57 yrs. (median age)	148	14	134	
> 57 yrs. (median age)	152	11	141	
Unknown	42			
FIGO				1.000
II	15	1	14	
III/IV	326	25	301	
Unknown	1			
Tumor grade				0.091
I/II	33	0	33	
III	301	26	275	
Unknown	8			
Histology				NA
serous cancer	341	26	315	
Unknown	1			
Residual disease after surgery				0.006
no residual disease	58	10	48	
residual disease ≤ 2cm	189	11	178	
residual disease > 2cm	60	2	58	
Unknown	35			
HOTAIR DNAm				1.000
High	224	17	207	
Low	118	9	109	
Survival status				0.001
Alive	217	24	193	
Dead	124	2	122	
Unknown	1			

Note: The significance level (P) was determined by Chi square test.
