

APPENDIX

Erik Østby:
Appendix 1: CONCORDANCE WITH TEX NUMBERS

This concordance gives the necessary references from the so-called Tex numbers, given to small objects (other than pottery) during the preliminary registration, and relates them to other numberings: square and stratigraphical unit (with find numbers, if relevant), catalogue numbers, and official inventory numbers in the protocols of the Tegea museum. The storage of the objects is organized according to the Tex numbers. For further information on the objects the catalogue section **ix** (Voyatzis) should be consulted; or, for bronze objects catalogued with the prefix **BrN-V**, the catalogue section **xi** (Tarditi). (Objects listed here as (**BrN-V**) are mentioned in that section, but not catalogued.) Stone objects with catalogue numbers beginning with **St** are found in the catalogue section **x** (Bakke-Alisøy), coins (**Co**) in section **xiii** (Ingvaldsen).

Most of the Tex numbers not listed below concern objects from the temple sector, and can be found in a similar concordance in *Tegea I* (Appendix 2). Some concern objects which have not been catalogued or otherwise registered.

Tex nos	Unit (with find nos)	Catalogue nos	Inventory nos				
1990 season				Tex no. 29	D9-D10/26-1	BrN-R 6	3500
